Principal's Report
June 13, 2022

We have started Summer School for grades 7th through 11th. We have two 7th grade students and two high school students. Three other students who had the opportunity to participate have decided to work these classes into next years' schedule. Mrs. Breinig has worked these classes into their schedules.

The summer meal program started slow at first but has picked up pretty quickly. We will have breakfast and lunch throughout the month of June. During the month of July we will have meals on Monday through Thursday. No meals will be served on Friday in the month of July. No meals will be served on July 4. Thanks to Theresa for her hard work.

As far as personnel, we will have our Spanish classes (two - Spanish I and one-Spanish II) taught by an instructor from ESU #5. The teacher will be Christina Schroeder. The classes will be held during the same periods as last year. We will be utilizing Elevate K12 for our Chemistry classes and will utilize Edgenuity for Physics and Anatomy for the first semester. I am working to find a person//s to supervise these classes. We will have to be creative but we will make it work. I will cover Miss Gunderson's Advisory Period until she arrives in the second semester.

As we have lost our Spanish instructor, we will be adding a Business class for our Junior High students to take as an Exploratory class. Mrs. Crosley will teach this class. We will work on soft skills and some personal finance, if possible.

Our supplemental duties are almost totally complete. I will share the list with Mr. Drews.

I will have the Secondary Parent/Student Handbook ready for the July Meeting.
