3. Items of Business

3.A. Provide a recommendation to the City Council on entering into a software service agreement with myGov for permitting, licensing, and code enforcement software.

City Administrator Tom Ourada reminded the Committee of previous discussions about the myGov software and all that it is capable of. It would be highly beneficial not only for code enforcement, but for building permits, business registration, and other licensing as well. There is a public portal where citizens can go to get information, or to report things like a nuisance property or a street light being out. Committee members inquired about getting monthly updates on how it's working for the City. With that stipulation, the Committee recommended trying out the software.

Recommend to the City Council to enter into a software service agreement with myGov, with the condition of getting monthly updates on implementation. Carried with a motion by Dan Papik and a second by Kyle Frans.
