

All Lines Inter-local Cooperative Aggregate Pool

The All Lines Inter-local Cooperative Aggregate Pool (ALICAP) is an alternative risk financing mechanism which has allowed a group of Nebraska schools, like yourselves, to pool together their insurance contributions to fund losses, negotiate broader coverages, manage expenses, and realize investment return.

Rather than purchasing insurance from the standard marketplace, these schools have elected to manage and operate their own insurance company by purchasing excess and reinsurance over large retentions and deductibles. This program structure allows these schools to finance their insurance risks like a large self-insurer, and purchase insurance like a guaranteed cost transfer method.

The contributions to a loss fund allow the necessary dollars to be set aside, while earning investment income to pay the retentions. Excess premiums are collected to pay aggregate insurance costs over and above retentions and the actuarially predicted loss funds.

ALICAP operates under a "Certificate of Authority" approved by the Nebraska Department of Insurance, governed by the NASB State Board of Directors, and managed by a Board of Trustees. The boards' decisions are based on an approved set of By-Laws and a Participation Agreement that the NASB Workers' Compensation Pool operated under since its inception in 1990.

The list of school districts participating in ALICAP, either by purchasing workers compensation or all lines of property & liability coverage, is noted in the ALICAP Annual Report. These schools have benefited greatly from their long-term commitment to the pool. They have earned more than \$31,000,000 in dividends against future contributions and maintained control over their losses within the laws of the State of Nebraska.

We ask that you review the program definitions enclosed and the color graph. Please feel free to call Sheri Shonka at Public Risk Management, (402) 884-3751 if you have any questions.

- * Work Comp \$250,000 xs \$350,000
- * One-Time Property Corridor of \$500,000

SEVERITY

FREQUENCY

PROGRAM DEFINITIONS

(see graph)

Self Insured Retention (SIR) (pink)

The predetermined amount of risk that will be assumed by the NASB All Lines Aggregate for any one occurrence of loss.

Specific Excess (green)

The amount of insurance placed to protect against any one single catastrophic occurrence.

Loss Fund (pink)

The maximum amount that the NASB All Lines Aggregate expects to pay in losses for a given coverage year. Once this fund is exhausted, the Aggregate Excess coverage applies to the SIRs subject to any applicable maintenance deductibles.

Excess Loss Fund (green)

The amount of insurance purchases to cap the amount of risk retained within a given coverage year.

Secondary Excess Insurance (blue)

The amount of insurance above the primary excess necessary to adequately cover all exposures.

Program Costs

The costs associated with the NASB "All Lines Aggregate" program may be broken down into *Fixed Cost* (purchasing excess insurance, handling claims and administration), and *Variable Cost* of the losses within the self-insured retention.

Your money is spent only as claims are paid. If you fail to pay out the pre-funded loss fund, these monies with investment income will be returned to the participants as dividends.
