Ravenna Public School  
Attn: Ken Schroeder  
41750 Carthage Rd  
Ravenna, NE 68869

Dr. Schroeder,

As you know, Abengoa Bioenergy of Nebraska began operation of our Ravenna facility in 2007. We focus on sustainable development by providing renewable fuels to the global marketplace. We also focus on creating new opportunities for rural development, energy crop development, and the creation of agricultural industries. The Ravenna community has been very supportive of our environmentally friendly goals and we would like to thank the Ravenna Public School system for your support in the past and going forward.

In order to continue our synergistic relationship with the Ravenna community, we believe community involvement and support are crucial. For this reason and as special thanks for the continued support the Ravenna School System has shown Abengoa, we would like you to accept this small donation. Please allocate this donation as shown below or as the needs of the school dictate.

Bluejay Headquarters – \$500  
Future Farmers of America – \$500  
RHS Special Education/Special Needs Program – \$1000  
Robotics Program - \$600

At Abengoa, we look forward to our continued involvement with the community of Ravenna. We appreciate your support for our company and your support of the ethanol industry. Thank you.

Kind Regards,

Mitch Feldman  
Plant Manager
