SECTION 1 THE WAVERLY PLANNING PROCESS.

INTRODUCTION.

This **Waverly**, **Nebraska Comprehensive Plan** was prepared as a tool to assist in planning for the future development and stability of Waverly, Nebraska and the City's respective One-Mile Planning Jurisdiction. The **Comprehensive Plan** contains information about existing demographic, economic and development trends within the City, including existing and future land use, public facilities, utilities, transportation and energy usage. This **Plan** replaces the current **Comprehensive Plan**, prepared in 2013.

The Waverly Planning Process included the development of a General Plan, which establishes specific and practical guidelines for improving existing conditions and controlling future growth. The Plan itself presents a planning program with "Community & Economic Preservation & Growth/Development Initiatives" aimed at preserving the existing environment and preparing the Community for new growth and development opportunities relating to residential, commercial and industrial development.

The Comprehensive Plan was prepared under the direction of the Waverly Planning Commission and City Council, with the assistance of City Staff and Planning Consultants Hanna:Keelan Associates and Schemmer Associates, both of Lincoln, Nebraska. Guidance was also provided by a locally-organized "Planning Steering Committee".

PLANNING PERIOD.

The planning period for achieving the goals, programs, and community and economic development activities identified in this **Comprehensive Plan** is **10 years, 2023 to 2033.** The **Plan** highlights necessary, broad-based community and economic development activities to meet the City's goals. This approach allows the Community of Waverly to focus on a long-term vision, accomplished by means of implementing specific activities to address the social and economic well-being of its citizens.

PLANNING JURISDICTION.

The City of Waverly Planning Jurisdiction includes the land areas within the Corporate Limits and within one mile of the City. The City enforces planning, zoning and subdivision regulations in the One-Mile Planning Jurisdiction, in accordance with Nebraska State Statutes.

AUTHORITY TO PLAN.

This **Comprehensive Plan** for the City of Waverly is prepared under the Authority of Section 19-924 to 929, Nebraska State Statutes 1943, as Amended.

RESPONSIBLE GROWTH AND DEVELOPMENT.

Responsible growth and development activities will include the ongoing planning and implementation of needed public facilities, utilities and transportation systems in Waverly. The Community is cognizant of its residential, commercial, industrial, social and recreational needs, but will need to continue to upgrade and develop modern, accessible public facilities and infrastructure to meet an increasing demand for these services.

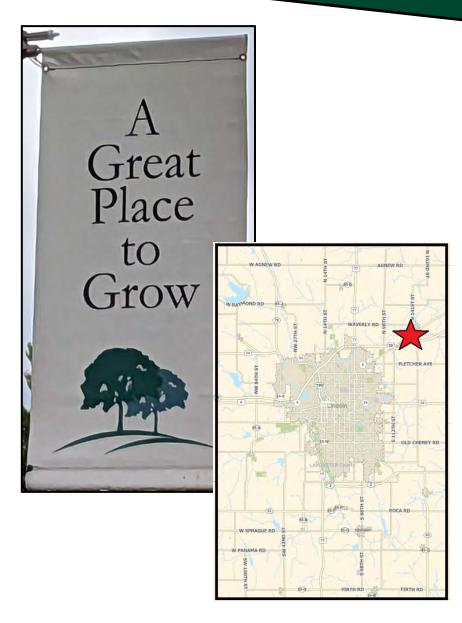

The Waverly Comprehensive Plan promotes responsible growth and sustainability of Community services and values. This includes an understanding of the growth potential within the existing built environs of Waverly, as well as the support for preserving the agricultural and natural resources associated with the City. Undeveloped areas within the One-Mile Planning Jurisdiction of Waverly will be assigned land uses and zoning classifications capable of preserving the integrity of these areas, while providing for controlled, well planned growth throughout the 10-year planning period.

COMMUNITY SUMMARY.

The City of Waverly is located in east central Nebraska, along the Interstate 80 and U.S. Highway 6 Corridors and the Burlington Northern Santa Fe Railroad Corridor in northeastern Lancaster County. The Community is an estimated three miles northeast of Lincoln, Nebraska, and 45 miles southwest of Omaha, Nebraska. Waverly is also located within the Lincoln Metropolitan Statistical Area.

Downtown Waverly is located north of the Highway 6 and Burlington Northern Santa Fe Railroad Corridors, generally east of North 141st Street between Mansfield and Kenilworth Streets. Downtown consists mostly of professional offices, bank, City Offices and U.S. Post Office.

Most of Waverly's major employers are located along the Highway 6 Corridor, including but not limited to the Tractor Supply Company Distribution Center, Tecumseh Farms/Smart Chicken, District 145 Public Schools, Millard Lumber, Matheson Gas and Commercial Plastics. Additional highway commercial businesses and professional offices are also located along Highway 6.

ORGANIZATION OF THE PLAN.

This Comprehensive Plan includes the following Sections:

- ***** The Waverly Planning Process.
- ❖ Citizen Participation & Community Profile.
- ❖ Community & Economic Preservation & Growth/Development Initiatives.
- * Existing & Future Land Use Planning.
- **❖** Education, Public Facilities/Utilities & Transportation.
- **❖** Energy Element.

Additionally, three appendices are included that highlight the raw statistical and citizen data and additional planning efforts conducted to support this Comprehensive Plan. These appendixes include the following:

- * City of Waverly, Nebraska Economic Development Strategy & Action Plan.
- ❖ Waverly, Nebraska Community Opinion Survey Results.
- * Waverly, Nebraska Table Profile.

The system embodied in this community planning framework is a process that relies upon continuous feedback, as goals change and policies become more clearly defined. Planning is an ongoing process that requires constant monitoring and revision throughout the proposed planning period.

Element 1.

This Comprehensive Plan is organized in three elements. The first element of the Comprehensive Plan is the Community & Economic Preservation & Growth/Development Initiatives. The Initiatives represent the foundation for which planning components are designed and eventually implemented. The Initiatives identified in this Comprehensive Plan address each component of the Plan itself.

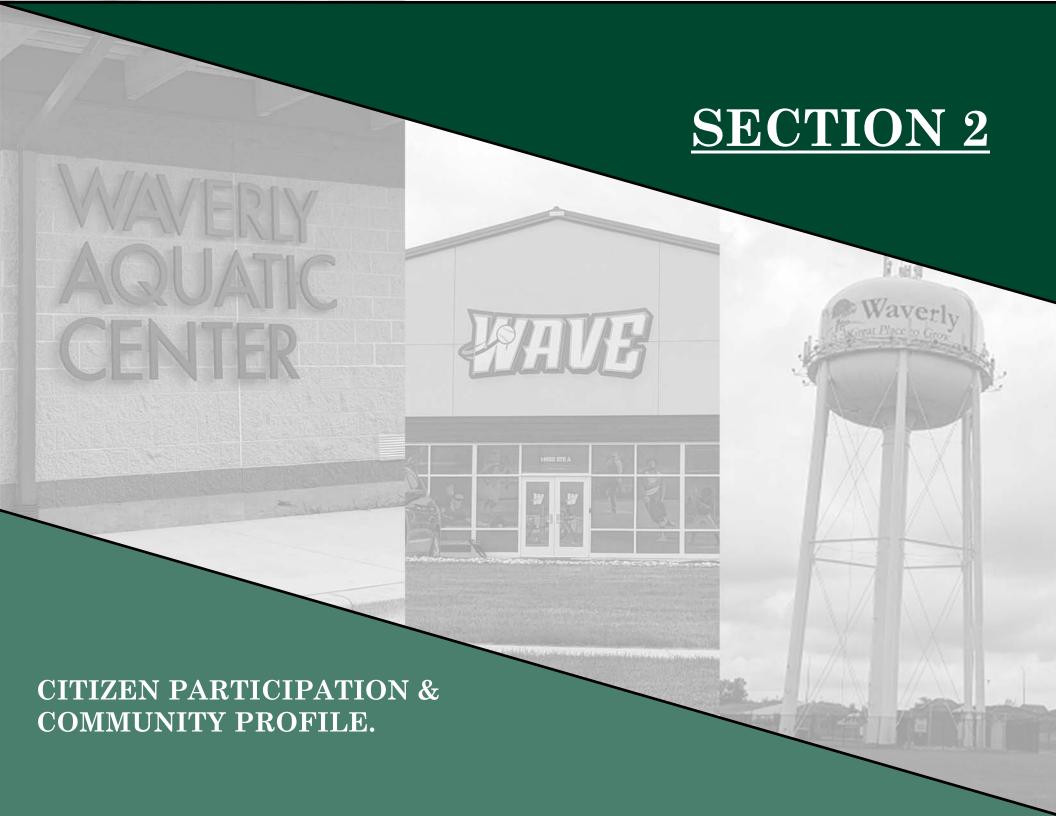

Element 2.

The **second** element is the **Background Analysis**, which presents the research, both, quantitative and qualitative, necessary for the development of the Plan's **Community & Economic Preservation & Growth/Development Initiatives**. This research included the investigation of demographic, economic, land use, housing, transportation and public facilities and utilities in Waverly. The careful research of past and present data allowed for the projection of future population and development needs.

Element 3.

The **third** and final element of the **Comprehensive Plan** is the **Planning Components**, which presents general background analysis and future plans for land use, public facilities, infrastructure, transportation and energy consumption reduction.

SECTION 2 CITIZEN PARTICIPATION & COMMUNITY PROFILE.

INTRODUCTION.

Planning for the Community's future, as it relates to affordable housing, is most effective when it includes opinions from as many citizens as possible. The Waverly, Nebraska Comprehensive Plan included both qualitative and quantitative research activities. Discussed in this Section is the comprehensive citizen participation program that was implemented to gather the opinions of the Waverly citizenry, including results from the Waverly Community Opinion Survey and a summary of population, income and economic information collected from a variety of local, State and National data sources.

Meetings with the Waverly Planning Commission, as well as a locally-based "Planning Steering Committee" and "Economic Development Advisory Committee" were also conducted. Local input from these meetings is included in Section 3 of this Comprehensive Plan, as well as the City of Waverly Economic Development Strategy & Action Plan ("Appendix I" of this Comprehensive Plan) and in the "Executive Summary" of the Waverly Community Housing Study ("Appendix II" of this Comprehensive Plan).

WAVERLY COMMUNITY OPINION SURVEY.

A Community-Wide "Opinion Survey" was made available to households in Waverly on pertinent Community websites and social media outlets. A total of 267 Surveys were completed and returned, providing valuable public information. Survey participants were asked to provide their opinion about a variety of Community issues, needs and opportunities, including housing needs/wants, commercial and industrial development, desired public services, transportation issues and protecting community appearance and sustainability. The following summarizes the results of the Survey. The complete results of the Survey, including community growth, land use, zoning and community development opportunities are highlighted in "Appendix III" of this Comprehensive Plan.

DEMOGRAPHICS.

The majority of participants resided in a four-person household with at least one resident less than 18 years of age.

- Household Size:
 - o Four-person household with 79 participants (29%).
 - o Two-person household with 66 participants (24%).
 - o Three-person household with 47 participants (17%).
- Household Age:
 - o Less than 18 years with 154 participants (57%).
 - o 35-44 years with 121 participants (45%).
 - o 45-54 years with 76 participants (28%).

RESIDENCY.

A majority of Survey participants have lived within the City of Waverly Corporate Limits between 11 and 20 years. These participants have watched the Community grow and evolve over time and are well aware of local needs and desires regarding Community betterment. This allows City and economic development leadership to more accurately determine community needs.

- Length of Time residing in Waverly:
 - o 11-20 years with 71 participants (26%).
 - o 21+ years with 63 participants (23%).
 - o 1-5 years with 55 participants (20%).
 - o 6-10 years with 54 participants (20%).
- Work in Waverly:
 - o No with 194 participants (72%).
- School in Waverly:
 - o Public Schools were a factor in my decision to locate in Waverly had 161 participants (67%).
 - o 132 participants (51%) felt that there are NOT sufficient and safe routes to school for children.
 - Pedestrian bridge over Hwy 6 was mentioned by 64 participants as a way to improve safety.

AMENITIES.

- When asked what new public recreational activities should be considered for Waverly, participants identified the following:
 - o Pool/Splash pad/Aquatic Center/Water Park (44 participants).
 - o Walking path/Hiking/Biking Trail (35 participants).
 - o YMCA/Community Center/Recreation Center (18 participants).
 - o Dog park (18 participants).

- When asked what new businesses they would like to see in Waverly, participants identified the following:
 - o Restaurant (family/sit-down)/bar (148 participants).
 - o Dollar general/tree/store (44 participants).
 - o Coffee shop (36 participants).
 - o Hardware store (30 participants).
 - o Fast food (27 participants).
- When asked what services participants would like to see in the City of Waverly, the top responses included the following:
 - o Police department (34 participants).
 - o Recycling (17 participants).
 - o Internet (15 participants).
- When asked to rate the quality/availability of Community Services and Public Facilities in Waverly, participants ranked the following the highest (average scores): (4 = excellent, 3 = good, 2 = fair, 1 = poor).
 - o Garbage Collection (3.48).
 - o Schools (3.40).
 - o Fire Protection (3.24).
 - o Child Care Opportunity (3.10).
 - o Church (3.08).
 - o Banks (3.06).
 - o Pharmacy (3.04).
 - o Parks/Recreation (3.02).

COMMUNITY BETTERMENT.

- When asked which transportation items needed to be addressed in Waverly, participants ranked the following the highest (average scores): (3 = greatly needed, 2 = somewhat needed, 1 = not needed).
 - o Improved Truck Routes (2.46).
 - o Pedestrian/Trails Connections & School Traffic Circulation (2.43).
 - o Traffic Safety Improvements (2.30).

- Utilizing a scale from 1 ("strongly disagree") to 5 ("strongly agree"), participants identified the following as the best towards improving the appearance of the City of Waverly.
 - o Vehicular traffic safety (3.60).
 - o Pedestrian seating areas and sidewalk cafes (3.56).
 - o Crosswalk enhancements (3.53).
 - o Street trees/benches/landscaping (3.47).
 - o Nuisance enforcement/property clean-up (3.47).
 - o Coordinated traffic control lighting (3.36).
- Using the 1-5 scale above, participants identified the following as the best approaches towards improving the sustainability of the City of Waverly.
 - o Business retention/recruitment/ expansion (4.12).
 - o Additional pedestrian safety measures (3.88).
 - o Improved park and recreation trails (3.83).
 - o Reducing utility costs with alternative energy sources (3.65).
 - o Marketing of sales and festivals (3.57).
 - o Increased marketing of vacant buildings (3.54).
 - o Nuisance enforcement/property clean-up (3.53).
- 83 percent of participants agreed that the City of Waverly should expand to include new commercial and entertainment facilities.

HOUSING.

- Utilizing a scale from 1 ("not needed") to 3 ("greatly needed") the following were identified by participants as the greatest housing needs in Waverly.
 - o Single family housing (2.24).
 - o Housing choices for first time homebuyers (2.24).
 - o Senior independent living housing (2.06).
 - o General rental housing (2.05).

- Participants were largely in support of utilizing local, State and/or Federal grant funds/dollars for the following programs:
 - o Purchase, Demolition & Replacement of existing deteriorated housing (79% support).
 - o Owner Housing Rehabilitation Program (73% support).
 - o Purchase-Rehab-Resale of vacant housing (73% support).
 - o Renter Housing Rehabilitation Program (58% support).
 - o Down Payment Assistance to first-time homebuyers (54% support).

A total of 83 participants, or 33 percent, identified a willingness to contribute or donate money to support a local community, economic or housing development activity.

WORKFORCE HOUSING NEEDS SURVEY.

The City of Waverly, in cooperation with major employers, conducted a Workforce Housing Needs Survey to determine the specific renter and owner housing needs of the Area's workforce. A total of 208 Surveys were returned.

Survey participants were asked to provide information on such subjects as issues and barriers to obtaining affordable housing, place of employment, annual household income and in where participants would like to become either a homeowner or a renter. The following are highlights that were developed from the **Survey**. The complete **Survey** results are available in "**Appendix III**" of this **Comprehensive Plan**.

DEMOGRAPHICS.

- Participating employers included but were not limited to Waverly-District 145 Public Schools, Millard Lumber, and Smart Chicken.
- A total of 60, or 47 percent of all 128 participants lived inside the Corporate Limits of Waverly. An estimated 42 percent reside in the City of Lincoln.
 - o Commute time to work:
 - 10 to 20 minutes (45 participants).
 - Less than 10 minutes (34 participants).

Section 2

Citizen Participation & Community Profile.

INCOME.

- Household income: (128 total participants).
 - o \$100,000 to \$149,000 with 42 participants (32%).
 - o \$75,000 to \$99,000 with 27 participants (21%).
- Monthly rent:
 - o \$601 to \$1,250 with 12 participants (20%).
- Monthly mortgage:
 - o \$1,001 to \$1,750 with 55 participants (48%).

BARRIERS TO AFFORDABLE HOUSING.

- For renters, the top issues or barriers experienced with obtaining affordable, suitable housing include the following:
 - o Cost of rent (83%).
 - o Lack of availability of decent rental units in your price range (55%).
 - o Condition of existing rental housing (22%).
- For owners, the top issues or barriers experienced with obtaining affordable, suitable housing include the following:
 - o Housing purchase prices/cost to own (67%).
 - o Lack of sufficient homes for sale (46%).
 - o Cost of utilities (23%).
- When asked what the most was that their family could afford for a home, 32 percent, or 25 participants identified a home purchase price between \$201,000 and \$300,000.
- When asked what the most was that their family could afford for monthly rent, 32 percent or 20 participants identified a range between \$1,101 and \$1,500.

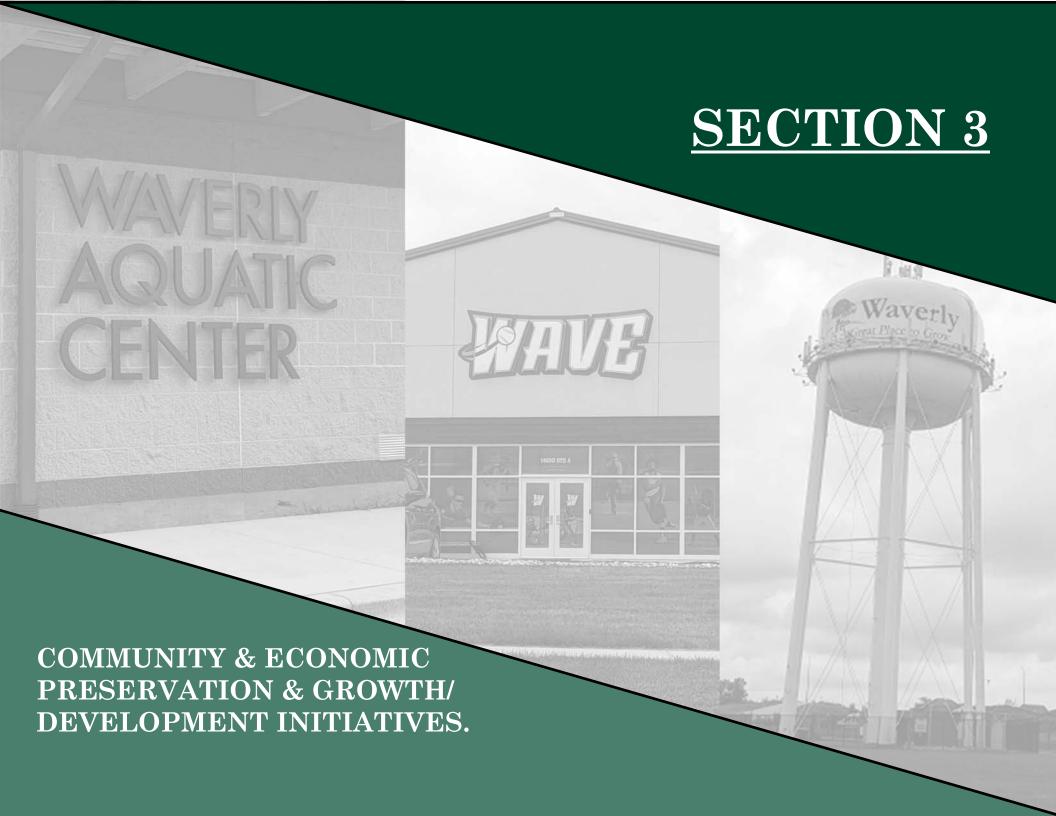

- When asked what amenities would make Waverly a more attractive place to live or relocate, participants selected the following:
 - o Restaurants with 81 participants (84%).
 - o Retail/Shopping with 57 participants (59%).
 - o Housing Choices with 47 participants (48%).

COMMUNITY PROFILE.

Population, income and economic trends in **Waverly** serve as valuable indicators of future development needs and patterns for the Community and provide a basis for the realistic projection of the future population. The quantity and location of social and economic features play an important role in shaping the details of various development plans to meet the Community's needs. The Community should continue to promote the development of new businesses, industries and housing for individuals and families, in areas of the Community with the appropriate zoning designation, during the 10-year planning period. The population trends and projections for the years 2000 through 2033 were studied and forecasted, utilizing a process of both trend analysis and U.S. Census population estimates. A complete "Table Profile" is included in "Appendix IV" of this Comprehensive Plan.

- The population from the 2000 and 2010 Decennial Censuses recorded an increase in population for Waverly, increasing from 2,452, in 2000, to 3,277, in 2010, or by 33.6 percent. The rate of population growth in Waverly remained consistent by the 2020 Census, which documented a population of 4,279, or an increase of 30.6 percent from the 2010 Census. The current (2023) estimated population for Waverly is 4,532, representing an increase of 5.7 percent since 2020.
- Currently, the Waverly One-Mile Planning Jurisdiction maintains an estimated population of 91. Continued population growth in Waverly, as well as surrounding Communities, will contribute to additional population increases in the Jurisdiction through 2033.
- By 2033, the population of the City of Waverly is projected to increase between 18.5 and 49.8 percent, or ranging from 5,371 to 6,778. A "medium" population projection of 5,520 was utilized for this **Comprehensive Plan.** Additionally, the population within the One-Mile Planning Jurisdiction is also projected to increase, ranging from 108 to 140 persons by 2033.

- In 2023, the City of Waverly is experiencing an estimated median age of 34.7 years, an increase from the 2020 estimated median age of 34.3 years. **Median age is projected to continue to increase to 34.9 years by 2033.**
- The "19 and Under" and "35 to 54" age cohorts were the largest population cohorts in Waverly, as per the 2000 and 2010 Censuses as well as the 2020 Estimate and remain the largest in the Community, today. This trend is projected to continue through 2028 and 2033.
- The Waverly 55+ population is projected to increase by 2028, with the "55-64" age group projected to experience the largest population increase. It is important that a range of elderly services, amenities and appropriate housing be made available in Waverly to encourage senior/elderly populations to remain in their respective housing situations and, ultimately, remain a resident of the City of Waverly.
- The median income for all households in Waverly, in 2023, is estimated to be \$87,694. By 2033, median income in Waverly will increase an estimated 12.7 percent, to \$98,874. The CGI projection estimates a total household income of \$101,336 by 2033. The majority of Community residents are projected to have incomes at or above \$75,000.
- In 2023, an estimated 128 owner households in Waverly, or 10 percent of all owner households, are cost burdened or have housing problems. By 2033, this number is expected to increase, slightly, to 133 households. Currently, an estimated 89 renter households in the Community of Waverly, or 30.6 percent of all renter households, are cost burdened or have housing problems.
- By 2033, an estimated 120 renter households will be of cost-burden status. Cost burdened households are projected to increase due to the rising costs associated with owning, renting and/or maintaining a place of residency in Waverly.
- Between 2010 and 2022, the **unemployment rate** in Lancaster County ranged from a high of 4.2 percent to a low of 1.8 percent. During this period, the total number of **employed persons** increased by 23,215. By 2033, an estimated 198,277 persons will be employed in the County, with an unemployment rate maintaining 3.1 percent.

SECTION 3 COMMUNITY & ECONOMIC PRESERVATION & GROWTH/DEVELOPMENT INITIATIVES.

INTRODUCTION

This Section provides proposed Community & Economic Preservation and Growth/Development Initiatives for the City of Waverly, Nebraska, including the Community's One-Mile Planning Jurisdiction.

The **Initiatives** address a wide spectrum of land use and development topics, including but not limited to housing development and rehabilitation, business and industrial development; public facility, infrastructure and utility needs and improvements, transportation and park/recreation needs. The end goal is to create "balance" in the Community through all levels of planning and project implementation, all in an effort to address the health, safety and overall general welfare of all Waverly residents.

The following Community & Economic Preservation and Growth/Development Initiatives are the product of both qualitative and quantitative research activities conducted for the Comprehensive Planning Program. Additional supportive information is documented in the 2023 Waverly, Nebraska Community Housing Study and the 2023 City of Waverly Economic Development Strategy & Action Plan.

Section 3 Community & Economic Preservation & Growth/Development Initiatives.

A qualitative research process included meetings with the Waverly Planning Commission, as well as a "Planning Steering Committee" and an "Economic Development Advisory Committee," all grassroots-based. An important activity of the qualitative research process was the implementation of a Community Opinion Survey. The Survey allowed the local Citizenry to provide their opinion of future land use activities in Waverly. A total of 267 residents of the Community completed the Survey. A "Workforce Housing Needs Survey" was implemented to target selected local major employers regarding their housing needs and desires, as well as identifying barriers and/or impediments to obtaining affordable housing in Waverly. A total of 128 employees completed the Survey. The results of the two Surveys are included in "Appendix II" of this Plan.

Quantitative research activities included the collection, analysis and projection of pertinent population, income, economic and agricultural data from local, State and National sources, all in an effort to understand both past and present demographic and land use development trends in Waverly. An important statistical analysis of land use in Waverly was the preparation of Existing and Future Land Use Matrices, presenting both the current and projected land use requirements in the Community, which were based on on-site field observations and utilizing parcel data from the Lancaster County Assessor and GIS information. The Matrices are highlighted in Section 4 of this Comprehensive Plan.

In essence, the Community & Economic Preservation and Growth/Development Initiatives address the important components of planning implementation. The Initiatives are separated into three categories including "preservation" of existing Community operations and development patterns, "growth/development" through supporting new business, industry, housing and public recreation opportunities to enhance an already thriving Community and "funding/implementation and Plan maintenance".

Community & Economic Preservation & Growth/Development Initiatives.

The three categories of the Preservation & Growth/Development Initiatives for Waverly are identified, below.

1. Community & Economic "Preservation" Initiatives.

Agricultural Land Areas & Associated Farmsteads.

Existing Parks/Recreation & Other Public Amenities.

Existing Health & Wellness Amenities.

Road Network & Other Transportation Systems.

Commercial & Industrial Development.

Housing Rehabilitation.

Public Facilities/Services, Utilities & Infrastructure.

Education Facilities & Programs.

2. Community & Economic "Growth/Development" Initiatives.

Land Use Planning & Zoning.

Future Parks/Recreation & Other Public Amenities.

Future Health & Wellness Amenities.

Residential Development & Critical Housing Needs.

Commercial & Industrial Development.

Public Facilities, Utilities & Infrastructure.

Future Transportation System Needs.

Alternative Energy Practices.

3. Project Funding/Implementation & Plan Maintenance/Review

Project Funding/Implementation.

Plan Maintenance/Review.

1. COMMUNITY & ECONOMIC "PRESERVATION" INITIATIVES.

Agricultural Land Areas & Associated Farmsteads.

As the City of Waverly is poised for growth in several Community indicators, traditional agricultural activities continue to exist in the One-Mile Planning Jurisdiction. Local leadership should be cognizant of the existing agricultural industry around Waverly and preserve sensitive agricultural lands in areas where land annexation by the City is not anticipated during this 10-year planning period.

Partnerships with agricultural and farming operations within the Planning Jurisdiction are important in creating an understanding of the Community of Waverly's desires to become a growing and thriving Community, while allowing traditional farming operations to continue. Targeted agricultural land areas are generally located south of the Interstate 80 Corridor, as well as in the extreme eastern and northeastern portions of the Planning Jurisdiction.

Non-agricultural, both large lot and planned residential subdivisions could be planned, with development having little or no impact on the operation of existing general and traditional agricultural activities.

Create and foster relationships with land owners in the One-Mile Planning Jurisdiction, especially those who own land adjacent the Waverly Corporate Limits. These land areas are critical to the continued growth and expansion of the Community. Areas of high importance to Waverly for future growth are located east and north of the City.

Protecting agricultural land areas should also include **protecting existing natural resources**, especially those along Salt Creek in the northwestern portion of the Waverly Planning Jurisdiction. This is accomplished by controlling and prohibiting, in specific regions, large scale intensive agricultural and livestock/confinement facilities in areas deemed inappropriate for such activities.

Existing Parks/Recreation & Other Public Amenities.

A total of 193 participants, or 73 percent of all 267 participants of the Waverly Community Opinion Survey identified "good" or "excellent" quality of existing park and recreation amenities in Waverly. An estimated 75 acres of park and recreation land exist in four public parks in Waverly. These parks should be maintained by the City to ensure continued safe use by all sectors of the population, which could include replacement of existing playground features and shelters (as needed), enhanced park accessibility and parking areas and improved connectivity with existing local trails and sidewalks. Additional park spaces are located in northern Waverly, owned by the Anderson North Park and Aspen Park Homeowners Associations (HOAs). The HOAs are encouraged By City staff to maintain this park space and all associated equipment.

The new Waverly Aquatic Center was completed in July, 2023. This new Aquatic Center, located in Wayne Park, replaces the existing swimming pool located in the same park. Retaining necessary resources to keep the new Aquatic Center fully staffed and operational will be necessary throughout the 10-year planning period. The City will need to conduct and monitor safety procedures relating to the demolition and removal of all components of the former swimming pool.

Two parks in Waverly (Wayne and Lawson Parks) contain athletic fields (baseball and softball) that are used by a wide variety of local organizations for practices, games and tournaments. These fields will need to continue having proper maintenance during the 10-year planning period. Maintenance activities include dugout, fence and gate maintenance, infield dirt raking, field lighting and maintenance and/or enhancements to bleachers and concession areas.

Waverly, Nebraska Comprehensive Plan-2033.

Section 3

Community & Economic Preservation & Growth/Development Initiatives.

Existing Health & Wellness Amenities.

Maintaining a high quality of life in Waverly should be a top priority for all City Staff, public organizations and residents. Existing facilities in Waverly provide walk-in care, pediatrics, acute injury evaluation and treatment, immunizations, preventive care, screening, health management and dental hygiene services. To remain a viable, healthy Community, residents of the City of Waverly are encouraged to utilize these operations when needed. The City should maintain a strong relationship with local health providers to ensure these amenities remain in operation to serve the Waverly citizenry. Expansion of the existing health services will most likely be required as the Community continues to increase in population.

A long-term care and rehabilitation facility for senior citizens and families is also located in Waverly. The facility consists of 54 private and semi-private units and provides residents with hospice care, transportation and specialized services which include, but are not limited to, recreational activities, discharge planning, speech language pathology, physical therapy and case management. This facility will remain a significant operation in regards to maintaining a population of seniors in the Community. Support should be given to the expansion and enhancement of existing health care services through new care technologies, when available.

Walking trails provide a means of outdoor exercise and movement in Waverly. A strong system of sidewalk connectivity exists throughout the Community and throughout the City's park system. Segments of sidewalk, especially in older neighborhoods, are in need of either rehabilitation or replacement to ensure the safe movement of all pedestrians in Waverly. The City should continue to replace sidewalks, as needed, and improve the safety and well-being of pedestrians at intersections, with large amounts of vehicular traffic, with streetlights and painted/signed crosswalks. Special attention should be given to plans and procedures to ensure the safe movement of children attending District 145-Waverly Public Schools.

Pedestrian connectivity over the Burlington Northern Santa Fe Railroad Corridor and the Highway 6 Corridor has been a critical need in the Community and will continue to be so, until resolved. A pedestrian bridge near Sharp Park is currently being discussed and considered.

Walking trails at City parks should also be monitored for sidewalk/trail rehabilitation needs and, potentially, include additional amenities along their respective trails such as lighting, benches, landscaping, outdoor fitness equipment and a "storybook walk" for kids along existing and future trail systems.

Section 3 Community & Economic Preservation & Growth/Development Initiatives. Road Network & Other Transportation Systems.

Both the Highway 6 Corridor and the Burlington Northern Santa Fe Railroad Corridor bisect the Community of Waverly in a northeast/southwest direction. Highway 6 consists of a two-lane highway entering the Community from the northeast at North 148th Street before becoming a three-lane highway westward. This three-lane highway continues southwest until Deer Park Road, where the Highway becomes a four-lane expressway to Lincoln. Speed limits of 45 and 55 miles per hour are posted along various segments of Highway 6. While a number of safety enhancements have been implemented, additional enhancements may be needed during the next 10 years, including but not limited to improved street and traffic lighting, pedestrian crossings, turn lanes and reduced speed limits. Additional safety measures at the North 141st Street intersection with both the Highway 6 Corridor and the Burlington Northern Santa Fe Railroad Corridor may also be needed.

A paving project at Oldfield from 141st Street to Canongate Road is recommended. The current surfacing for Oldfield Street is gravel. This project would pave a three lane concrete section and also include the construction of a side path from Lawson Park to Canongate Road and Kenilworth Street. This project will improve access to Lawson Park and reduce road dust for residents living in the area.

North 148th Street is a north/south two lane arterial street, located along the western portion of Waverly, providing a direct connection to major highway corridors, including Highway 6, 34 and 2. This Street has been experiencing a steady increase in traffic in recent years, due to increased housing development in the Community and the provision of a direct connection to the eastern portions of the City of Lincoln. As both eastern Lincoln and the City of Waverly grow in population, this Street will become increasingly busy and require safety measures to be implemented, including street lighting, turning lanes onto local streets, pedestrian walkways and crosswalk signals and a potential widening of the Street within the Waverly Corporate Limits. The City will need to continue to monitor traffic patterns and flow along 148th during the 10-year planning period.

Section 3 Community & Economic Preservation & Growth/Development Initiatives.

An additional segment of street in need of monitoring is North 141st Street, from the Highway 6 Corridor to Waverly Road. Northward development of residential subdivision will continue to increase the amount of traffic utilizing this stretch of Road into and out of Waverly.

The condition of local streets should continue to be monitored and, when and where necessary, rehabilitated or resurfaced with new pavement. Currently, street segments in need of rehabilitation or resurfacing exist in the older and established neighborhoods of the Community.

The desire to create safe routes to school for kids is greatly needed in Waverly. Both the Highway 6 Corridor and Burlington Northern Santa Fe Railroad Corridor, as well as the Canongate overpass, present unsafe conditions for the efficient movements of kids from northern portions of the Community to any of the local public school facilities. As the City continues to grow and District enrollment increases, the need for safety enhancements will continue. A pedestrian overpass for the Highway and Railroad Corridors is the most pressing need in the Community. Other improvements will, over time, include analyzing the flow of vehicular traffic and consider the need for modern crosswalks and traffic signals along North 134th Street, Amberly Road and Canongate Road. Traffic volumes have increased in areas around Waverly High School and Waverly Middle School, specifically during the morning drop-off and afternoon pickup times.

Section 3

Community & Economic Preservation & Growth/Development Initiatives.

Commercial & Industrial Development.

Future commercial and industrial developments in Waverly, Nebraska should be guided by the recently completed Waverly Economic Development Strategy & Action Plan. The Strategy/Plan is included as Appendix I of this Comprehensive Plan. The Strategy/Plan provides a listing of priority economic and community development activities for Waverly during the next 10 years. An important component of the Strategy/Plan is the recommendation for the City to foster a partnership of support with both local business owners/franchisees and small, locally-based business owners in an effort to support business industry retention and development in Waverly.

Three distinct areas of commercial development exist in Waverly, including the original Downtown, the Highway 6 Corridor and a shopping mall area, south of the Corridor. Downtown Waverly should be targeted for redevelopment and transformed into a business/entertainment point of destination, consisting of shops and venues for dining and social gathering. Current vacant land parcels along the Highway 6 Corridor should be targeted for continued development of goods-based businesses, including restaurants, convenience stores and other automotive-oriented businesses. The shopping mall area should be targeted for improvements to enhance redevelopment activities to include additional local based businesses and services.

Waverly is home to several large employers, including, but not limited to, the Tractor Supply Company's Waverly Distribution Center, Tecumseh Poultry/Smart Chicken, Millard Lumber, District 145-Waverly Public Schools, Matheson Gas and Commercial Plastics. The City, with the assistance of economic development leaders in the Community, should work to maintain a strong industrial sector, including assisting those existing industries with both maintaining a stable employment base and production goals, as well as expansion opportunities, and securing new light industrial/commercial enterprises for land areas currently available in the Waverly for development.

Community & Economic Preservation & Growth/Development Initiatives.

Housing Rehabilitation.

Despite the recent significant increase in new housing construction, homes in need of moderate- to substantial rehabilitation continue to exist in Waverly. An estimated nine structures were rated by the Lancaster County Assessor as being in "fair" or "poor" condition. An additional 746 structures were rated in "Average-" condition. In an effort to preserve the existing housing stock in the Community, the **Waverly, Nebraska Community Housing Study** identified the following housing rehabilitation and demolition expectations of the Community by 2033:

Up to 30 units by 2033 could be targeted for moderate rehabilitation in Waverly. Moderate rehabilitation generally includes cosmetic improvements to a housing unit, including but not limited to paint, doors, windows, landscaping, etc.

Up to 14 units by 2033 could be targeted for substantial rehabilitation in Waverly. Substantial rehabilitation focuses on the same elements of moderate rehabilitation, but also includes structural elements to a home that are in need of replacement, including bowing and/or sagging walls and roof lines and foundation issues.

Up to 10 housing units by 2033 should be demolished and replaced due to dilapidated conditions and the structure not being cost effective to rehabilitate. Cost will depend on property acquisition and unit replacement potential.

The City of Waverly should continue to acquire funding to preserve and upgrade the housing stock in greatest need of rehabilitation during the next 10 years. Housing units that are severely deteriorated or dilapidated should be targeted for substantial rehabilitation or, in extreme cases, demolition and replacement.

Community & Economic Preservation & Growth/Development Initiatives.

Public Facilities/Services, Utilities & Infrastructure.

The City of Waverly maintains modern public facilities and services traditional to many First and Second Class Cities in Nebraska. These include a City hall/government, fire protection, (County) law enforcement, a library, parks, ballfields and new Aquatic Center, public schools, churches and modern water and sewer systems. These operations and their respective facilities will need to be cognizant of the rate of growth in the Community and expand services and capacity as needed. This would include any necessary technology, as well as vehicular and pedestrian street and sidewalk upgrades.

The City of Waverly has experienced significantly decreased municipal well water pumping levels in 2023, due to the extended drought in eastern Nebraska. The engineering firm, Olsson, was hired to complete a Water Distribution Study and a Wellfield Hydrogeologic Analysis Report, with further research to locate areas for additional wells, coming soon. The Reports provide detailed information on the current water system and recommended improvements to make the water system more resilient to both regional water level declines and increased demand due to growth. The City is also evaluating other options for alternate water sources.

As the Community continues to grow, maintenance of existing public utilities and infrastructure components will be critical to the sustainability of the existing neighborhoods. The City of Waverly has recently completed a Water Distribution Study that identifies priority projects and associated timeline. Water projects include hydrant installation, water main upsizing and looping existing water mains across the Community. A Community Street Study will be conducted in the near future.

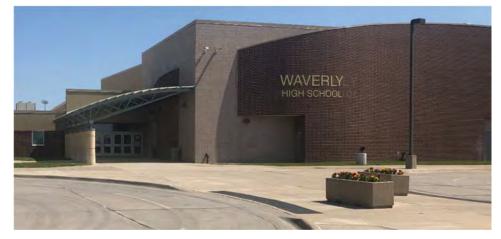

The original sanitary sewer system, installed in 1955, is adequately sized and in good condition. The oldest segments of the sewer system were constructed with vitrified clay pipe and have deteriorated. The sewer system should be continuously monitored for breakages and needed replacement, especially with older segments that exist around Waverly.

Lincoln Electric System supplies power to the City of Waverly. The electrical system capacity consists of two 115-12 kilovolt transformers at a substation location near North 134th Street and Highway 6. Other transformers are located at nearby substations that provide capacity during contingency situations. Transformer 1 has a capacity of 22.4 megavolt amperes (MVA) and Transformer 2 has a capacity of 39 MVA. This capacity is deemed appropriate for the City of Waverly. A project is planned to move the overhead facilities on North 141st Street from Oldfield to Mansfield to underground in the next few years. Another project is planned for Oldfield west of North 141st Street to move the overhead facilities underground when the paving project is scheduled. General maintenance of all other electrical systems will be required during the 10-year planning period.

Section 3 Community & Economic Preservation & Growth/Development Initiatives. Educational Facilities & Programs.

Waverly is home to the administrative offices and educational facilities supporting **District 145 Public Schools**. Facilities include Hamlow Elementary and Waverly Intermediate, Middle and High Schools. District enrollment has steadily increased in recent years. The 2021-2022 total enrollment, as recorded by the Nebraska Department of Education, was 2,180. This represents an increase from the 2020-2021 student enrollment of 2,138 and an increase from the 2019-2020 student enrollment of 2,142. The four facilities in Waverly have a combined maximum student capacity of 2,935. Currently, no major facility improvements, additions or expansions are planned for any District 145 Public School facilities, but the growing number of students attending school within the District will increase the need for classroom and activity space. The Public School District should be prepared for an **increase in student enrollment** by providing necessary building/classroom space and additional multimedia and learning resources. Continued growth of the School District will ultimately depend on the future housing development in Waverly. With the anticipated growth in student enrollment, a **sufficient amount of teachers, faculty staff and additional education support and facility maintenance** must be secured.

Several **school programs**, such as homework assistance, athletics and extra-curricular academic programs, etc. are provided to students of District 145-Waverly Public Schools and should continue to be an important role in the development of education in school children of all ages. It would be beneficial for the City of Waverly to partner with the Public School District in providing programs that address Community leadership, betterment and training opportunities.

Planning initiatives are also being implemented at District 145-Waverly Public Schools as part of the District's recently completed Strategic Plan, which highlights master facilities planning, academic assessments, student and faculty support services, instructional modeling and technology planning initiatives. City leadership should play a supportive role in assisting District 145-Waverly Public Schools in achieving these initiatives, where necessary, either administratively or financially. This also includes supporting the efforts of the District 145-Waverly Public Schools Foundation. Doing so will ensure a strong connection between the two entities in achieving a high standard of education and Community awareness in Waverly.

2. COMMUNITY & ECONOMIC "GROWTH/DEVELOPMENT" INITIATIVES.

Land Use Planning & Zoning.

By 2033, the population of the City of Waverly is projected to increase between 18.5 and 49.8 percent, or ranging from 5,371 to 6,778. Additionally, the population within the One-Mile Planning Jurisdiction is also projected to increase, ranging from 108 to 140 persons by 2033. Proper land use practices will ensure efficient growth of the Community throughout the 10-year planning period. This includes utilizing and understanding both the existing and future land use capacity matrices in designating specific land uses to undeveloped tracts of land in an effort to maintain current City and National Planning Standards and having land "set aside" for future developments.

A series of Future Land Use Maps, each one linked to a "Medium," "High" and "Community Growth Initiative" population projection, are presented on Pages 3.14 through 3.16.

Adhering to the growth and development patterns projected in this **Comprehensive Plan**, the Community will need to utilize both **voluntary and involuntary annexation policies** in conformance with Nebraska State Statutes. These policies should serve as a guide to integrate residential and commercial growth areas adjacent the current Corporate Limits of the City of Waverly. Future development should be encouraged to locate in areas which are free of environmental problems related to ground and surface water features, soil and topographic slope.

Maintain and amend, when needed, the local **zoning** and subdivision regulations and maintain appropriate building codes, which support the efficient implementation of the Land Use Plan. Establish new provisions within these Regulations that support mixed use, sustainable development principles, smart growth and green building practices. Subdivision requirements should include modern infrastructure standards.

Community & Economic Preservation & Growth/Development Initiatives.

Future Parks/Recreation & Other Public Amenities.

Currently, an estimated 75.3 acres of land in Waverly is used for park and recreation purposes. By 2033, an estimated 118.8 acres should be planned for future park and recreation land uses, totaling 194.1 acres of park and recreation land in Waverly. As new residential neighborhoods continue to be platted, developed and established in the Community, land should be set aside for the provision of trails, playground equipment, athletic fields and natural greenspace purposes.

The Community of Waverly has recently completed a 5 year program of planning and building a new Aquatic Center. The new facility is state of the art and being well received by the citizens of Waverly.

Existing parks and public facilities/amenities in Waverly should be connected by local sidewalks, a City-wide trail loop and a pedestrian bridge over the Highway 6 and Burlington Northern Santa Fe Railroad Corridors. There were 166 Community Opinion Survey participants, or 65 percent of all participants who either agreed or strongly agreed that the sustainability of the City of Waverly could be improved by new and improved park, recreation and trail amenities. The development of "all-inclusive" park spaces and equipment should be considered within the 10-year planning period. Connections to newly platted and developing neighborhoods will be critical to the safe movement of pedestrians and the appeal and visitability of the neighborhood, overall.

The City should consider the development of a full service Community Recreation Center during the 10-year planning period, complete with all modern amenities.

Community & Economic Preservation & Growth/Development Initiatives.

Future Health & Wellness Amenities.

Members of the Economic Development Advisory Committee expressed interest in researching expanding the City's capacity regarding medical provisions, potentially developing into a locally-based, full care medical center. Partnerships with local health providers, health and large-scale medical/hospital organizations could make this project a reality. Proper site location, accessibility, service population and staffing will need to be determined.

Multiple organizations and local leadership in Waverly have expressed interest in the development of an assisted living facility, providing specialized services to senior citizens in Waverly. An assisted living facility, developed as either a group home or apartment-style units, would greatly enhance the continuum of care provisions Waverly current has to offer. Partnership with a local health organization and guidance from Aging Partners, Inc. could assist in the development of an assisted living facility in Waverly.

Residential Housing Development & Critical Housing Needs.

Recent housing development in the City of Waverly has largely consisted of single family residential units for moderate to upper income. While development and construction of these types of units and price points should continue, it is important to be cognizant of the significant need for other housing types, such as multifamily housing, senior supportive and independent living housing and workforce housing.

The Future Land Use Maps developed for this Comprehensive Plan identify areas within the Community of Waverly for new housing construction. The **2023 Waverly Community Housing Study** highlights the following housing information, including current tenure and projected housing unit target demand requirements for the next 10 years:

Community & Economic Preservation & Growth/Development Initiatives.

Currently, an estimated 1,574 households reside in Waverly, consisting of an estimated 1,282 owner and 292 renter households. By 2033, owner households will account for an estimated 79.6 percent of all households in the Community.

Based on the 2033 "Medium" population projection, the total estimated housing unit "target" demand for Waverly, from 2023 to 2033, includes a total of 420 housing units, including 300 owner and 120 rental units, at an estimated development cost of \$122.3 Million should be constructed in Waverly. By 2033, the "high" population will require the development of 592 housing units (402 owner, 190 rental), while the "CGI" population projection of 6,761 will require the development of 902 housing units (594 owner, 308 rental).

Additional information regarding target population sectors, price points (products) and land use projections by housing type are presented in the 2023 Waverly Community Housing Study.

The Future Land Use Maps also identify residential growth areas adjacent and beyond the Waverly Corporate Limits for development and eventual annexation into the Community. All residential land needs (acres) would support the housing unit target demand statistics presented in the Community Housing Study.

A **Future land Use Capacity Matrix**, prepared for this Comprehensive Plan, identifies a slight excess in the number of acres developed for single family housing in Waverly, when compared to National Planning Standards (number of acres developed per 100 population). This includes an estimated 347.3 acres of land currently supporting single family housing. By 2033, a range between 76.7 and 173.3 additional acres of land (424 to 520.6 total developed acres) should be developed with single family housing and additional 346.6 to 519.9 acres planned for new single family residential development; a total of 867.2 acres both developed and planned. This will ensure the Community is consistent in both maintaining its current planning standard and planning for future growth.

For multifamily housing, the Community of Waverly is experiencing a critical shortfall, supporting an estimated nine acres for multifamily housing. National Planning Standards recommends an estimated 90.4 acres of land for a Community similar in size to Waverly. By 2033, a range between two and 4.5 additional acres of land (11 to 13.5 total developed acres) should be developed with single family housing and additional 6.4 to 10.9 acres planned for new multifamily residential development; a total of 19.9 acres both developed and planned. Additionally, 65 percent of Community Opinion Survey participants identified multifamily housing as being either "somewhat" or "greatly" needed in the City of Waverly.

Community & Economic Preservation & Growth/Development Initiatives.

Commercial & Industrial Development.

The Waverly Economic Development Strategy & Action Plan recommends the formation of a nonprofit 501(c)(3) corporation, including the creation of an Economic Development Director position and associated "Board of Directors". The locally-based Economic Development Corporation will work to create relationships with existing and prospective businesses and industries and create relationships with other community and economic development funding entities in Waverly. As the City grows in population, employment needs will also increase the desire for new and expanded existing employers.

It was also recommended in the Strategy/Plan to replace the existing Waverly Community Development Agency (currently the City Council) with a **Community Redevelopment Authority**, comprised of five economic development leaders in the Community, appointed by the Mayor.

Top responses to new businesses desired in Waverly, as identified by participants of the Community Opinion Survey included restaurants/convenience store, discount/department stores and a new grocery store. Similar responses were also provided by the Planning Steering Committee and the Economic Development Advisory Committee. All facets of local leadership and community and economic development should strive to target these operations for locations in the Community to serve the local population. The most desired location for Commercial growth areas within the Corporate Limits are located along the Highway 6 Corridor in southwestern Waverly.

A more than sufficient amount of land has been developed in Waverly for industrial land uses, though a majority are developed to support a single industrial entity. The City will want to consider establishing, via local Zoning Regulations, additional industrial land for new both clean and light manufacturing industries. Access to the Burlington Northern Santa Fe Railroad Corridor will provide an extra benefit to new industries in the transport of goods.

Community & Economic Preservation & Growth/Development Initiatives.

Public Facilities, Utilities & Infrastructure.

The City of Waverly is in the planning stages of developing a new facility to house City offices and serve as a central location for all functions of the City. This facility would also house a new Waverly Volunteer Fire Department. Conceptual plans have placed the new facility at the northwest corner of Canongate and Amberly Road. This new facility will be critical to the future growth and development of the Community as growth and expansion in multiple facets of Waverly is projected. A new "City Shop" will, also, likely be needed within the duration of the 10-year planning period.

The expansion of public water, sewer and electrical capacity will promote growth and development in Waverly, especially in newly platted subdivisions in close proximity to the Waverly Corporate Limits. Specific projects have been documented in the City's recently completed Water Distribution Study that will not only serve the current population, but also serve new developments throughout the Community in the wake of annexation and expansion.

Future Transportation System Needs.

A project to improve the Highway 6 Corridor east of Waverly would expand capacity of the Highway in the form of an extended three-lane corridor. The benefits would include greater access for developments east of Waverly and a safer section for vehicles turning left out of the through lane. This project would include improvements to a state highway and preliminary plan improvements would include reconstruction of a three-lane concrete section.

The City of Waverly has considered a possible interchange located near 162nd Street on Interstate 80. These improvements are in the conceptual stage at this time and an interchange justification study would be necessary to continue developing plans for this interchange. Access to the interstate on the east side of Waverly would provide a second access point to the City and a more direct route for trucks looking to access the manufacturing tracts on the east side of Waverly.

The Nebraska Department of Transportation and the City of Lincoln have developed a conceptual plan for an East Beltway around the City of Lincoln connecting Nebraska Highway 2 and Interstate 80. The north terminus for this project would connect the City of Waverly with these improvements. This project would provide a more direct link for vehicles and trucks to a highway system and a bypass route for the City of Lincoln. Preliminary planning and a corridor analysis has been completed. Plan development and environmental documentation are the next steps for this project.

Community & Economic Preservation & Growth/Development Initiatives.

Alternative Energy Practices.

In 2009, the State of Nebraska Legislature approved and signed into law, LB 439 (Nebraska State Statute \$70-2001 to 2005), which is also referred to as "Net Metering." This Law allows individual residences and businesses to supplement their standard electric service with one, or combinations of multiple alternate energy systems, including Solar, Methane, Wind, Biomass, Hydropower and Geothermal. By implementing these types of alternative energy systems, individuals will reduce their reliance on public utility systems, potentially generating more electricity than they use and profit by the public utility districts purchasing their excess energy. The Waverly Planning Commission can choose to allow usage control of Net Metering by allowing residential and businesses property owners to seek a Conditional Use Permit, if the applicant can document they are in conformance with the provisions of the Small Wind Energy Conversion System provisions in the Zoning Regulations. Additional initiatives relating to alternative energy policies are discussed in the "Energy Element" section of this Comprehensive Plan.

3. PROJECT FUNDING/IMPLEMENTATION & PLAN MAINTENANCE/REVIEW.

Project Funding/Implementation.

The preservation and growth/development initiatives highlighted in this section all have one common goal; to create a Community that operates in the best interests of health, safety and overall quality of life of both new and existing residents. All facets of community and economic development and governmental leadership will need to seriously consider these and other necessary development and betterment projects as a high priority through 2033 and acquire eligible funding from local, State and Federal funding sources to implement such projects. Funding opportunities are highlighted throughout this Comprehensive Plan.

Plan Maintenance & Review

The City of Waverly leadership, including City Council, Planning Commission and staff, in conjunction with the Economic Development Advisory Committee and local development and funding entities, community development stakeholders and other public entities should regularly review this **Comprehensive Plan**, in an effort to continue efficient, sustainable community development and track progress of meeting specific goals. This can be done by establishing an **annual review process of the Comprehensive Plan**. The **Comprehensive Plan** should be made available to allow for public and private sector review and input. Encourage public participation and involvement in the review process.

SECTION 4 EXISTING & FUTURE LAND USE PLANNING.

INTRODUCTION.

The identification of land use development patterns, which have occurred in Waverly since the adoption of the last Comprehensive Plan in 2013, consists of examining both **existing and future utilization of land** in and around the Community, with the intent of **identifying growth and development areas** in close proximity to the City of Waverly. A discussion of the **environmental** and **physical characteristics** of Waverly precedes a description and analyses of **existing** and **future land use** conditions in the City.

Proper land use practices can protect the natural resources of a community and be a complement to the built environment. The natural environment of the Community provides both opportunities and constraints for existing and future developments. As humans strive to create a sustainable living environment, they must work and live in harmony with their natural surroundings. This can occur by designing with nature, conserving unique features, protecting watersheds and using sensitive development practices. In Waverly, the major development constraints are associated with the soil conditions and associated floodplains of Salt Creek and the steep slopes of the upper elevations of the river valley.

THE NATURAL ENVIRONMENT.

SOIL ASSOCIATIONS

The soils in and around Waverly are classified into three soil groups, or associations, each with a broad range of characteristics. **Illustration 4.1** graphically displays the **General Soil Associations** for the City of Waverly and the One-Mile Planning Jurisdiction. The U.S. Department of Agriculture, Natural Resources Conservation Service conducted the soil survey and developed the boundaries of the soil types found on the **Illustration**.

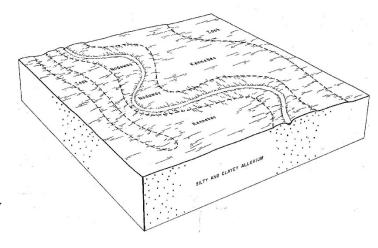

The three soil associations depicted in **Illustration 4.1** are the Kennebec-Nodaway-Zook; Crete-Sharpsburg and the Sharpsburg-Judson **Associations**.

The majority of the lands throughout the Waverly Planning Jurisdiction are associated with Salt Creek. The City is situated along the southern bank and upper terraces of the Salt Creek, which afforded the Community access to drinking water and suitable land that was fairly level for development purposes.

***** KENNEBC-NODAWAY-ZOOK ASSOCIATION.

This Association is concentrated in the northern third of the One-Mile Planning Jurisdiction of the City of Waverly. Land included in the Association are comprised of the bottom land and upper stream terraces of the Salt Creek. Soils of this Association are described as, "Deep, nearly level and very gently sloping, moderately well drained to poorly drained, silty soils that formed in alluvium; on flood plains." Flooding is the primary hazard. Nearly all lands within the Association are included in 100 or 500-year floodplains.

Soils in this Association are severely limited for roads and streets, sanitary facilities and building sites due to flooding hazards and frost action.

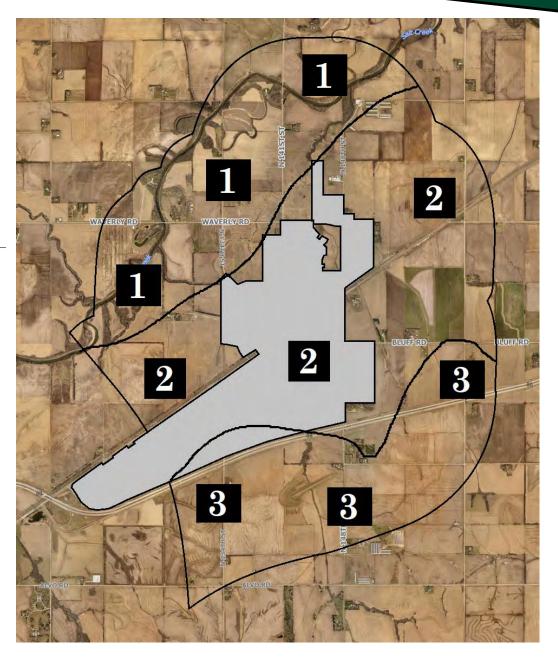

SOIL ASSOCIATIONS WAVERLY, NEBRASKA 2023

ILLUSTRATION 4.1

LEGEND

- 1 KENNEBEC-NODAWAY-ZOOK ASSOCIATION
- 2 CRETE-SHARPSBURG ASSOCIATION
- 3 SHARPSBURG-JUDSON ASSOCIATION

HANNA:KEELAN ASSOCIATES COMMUNITY PLANNING & RESEARCH

Waverly, Nebraska Comprehensive Plan-2033.

* CRETE-SHARPSBURG ASSOCIATION.

The Crete-Sharpsburg Association is located in the central portion of the Waverly One-Mile Planning Jurisdiction and includes nearly all of the incorporated areas of the City. Soils throughout the region area described as, "Deep, nearly level to gently sloping, moderately well drained, silty soils that formed in loess; on stream terraces." Crops in this Association have sufficient access to ground water for irrigation.

Soils in this Association are severely limited for septic tank absorption fields due to slow permeability. Sewage lagoons are suited to these soils when not limited by slope. Severe limitations for buildings, roads and streets exist because of high shrink-swell potential. These limitations can be overcome by structurally securing building foundations and sufficient compaction and preparation of the road beds of streets.

* SHARPSBURG-JUDSON ASSOCIATION.

The southern third of the Waverly One-Mile Planning Jurisdiction, the area generally south of Interstate 80, is located in the Sharpsburg-Judson Association. Moderate to steep hills comprise this region. The Associations is characterized as, "Deep, nearly level to moderately steep, moderately well drained, silty soils that formed in loess and colluvium; on uplands and foot slopes."

Water erosion of soils on hill crests and side slopes are the main hazard. In some years, inadequate rainfall limits the production of dryland crops and ground water supplies are generally insufficient for irrigation. Soils are moderately limited for septic tank absorption field and sewage lagoons due to slow permeability and slope. Building sites, roads and streets are limited by high shrink-swell and high frost action.

WATERSHEDS.

The topography and terrain of Waverly and the Planning Jurisdiction are varied. The natural landscape has been formed by wind and water erosion and deposits, creating areas of nearly level lands on stream terraces. The natural topography of Waverly is nearly level to gently sloping. Rolling hills south of Interstate 80 slope to the north/northeast down to the nearly level developed areas of Waverly and continue to the north and northeast of the City along drainage ways and tributaries to Salt Creek.

Groundwater and groundwater-fed surface streams account for a large percentage of the water resources in the Waverly Planning Jurisdiction. The City of Waverly relies upon the groundwater reserves and surface water run-off to recharge the underground water supply of the municipal wells.

The underground water supply is vital to the region and is the source of water for numerous rural private drinking and irrigation wells. Any endangerment to the supply threatens public health, as well as the local farm economy. This natural resource must be protected. Securing the quality of drinking water from private wells in the rural areas within the Waverly One-Mile Planning Jurisdiction is very important. A minimum lot size of 20 acres is utilized in the "AG Agriculture" District and two acres in the "RR Rural Residential" District for residences in the Planning Jurisdiction. This standard generally ensures that adjacent households do not contaminate one another's drinking water.

WELLHEAD PROTECTION PROGRAM.

The Nebraska Department of Environment and Energy (NDEE) regulates ground water quality and quantity. To assist local municipalities with protecting their municipal drinking water supply, the NDEE has developed the **Nebraska Wellhead Protection (WHP) Program.** The voluntary program intends to prevent the contamination of ground water.

The WHP Program provides the following in accordance with the federal laws: 1) duties of the governmental entities and utility districts, 2) determines protection area, 3) identify contamination sources, 4) develop a contaminant source management program, 5) develop an alternate drinking water plan, 6) review contaminated sources in future wellhead areas, and 7) involve the public. The approaches of Nebraska's Wellhead Protection Program are to prevent the location of new contaminant sources in wellhead protection areas through planning, minimize the hazard of existing sources through management, and provide early warning of existing contamination through ground water monitoring.

The Wellhead Protection Area (WHPA) in the Waverly One-Mile Planning Jurisdiction is highlighted, below.

CLIMATE.

The climate of the Waverly area is continental and characterized by widely ranging seasonal temperatures and rapidly changing weather patterns. The temperature ranges from an average daily minimum of 17°F in January and maximum of 86°F in July. The total annual precipitation is 29.9 inches, including an annual average snowfall of 28.3 inches. These climatic characteristics and fertile soils create an environment for a productive agricultural industry.

THE BUILT ENVIRONMENT.

The built environment of Waverly is characterized by its districts, roadways and landmarks. The combination of these physical features creates a sense of place for the citizens of Waverly. The natural terrain enhances the built environment by providing an aesthetic base for urban development. The districts and neighborhoods are defined by their edges or boundaries. The major transportation corridors and the physical barriers of the terrain generally create the edge of each district, giving the neighborhoods distinct boundaries.

Table 4.1, Page 4.8, highlights an Existing Land Use Capacity Matrix for the City of Waverly. Existing land use for both the Community of Waverly and the One-Mile Planning Jurisdiction are highlighted in **Illustrations 4.2 (Page 4.9)** and **4.3 (Page 4.10),** respectively. Total land acreage in Waverly is an estimated 1,545.4 acres and consists of a variety of land uses. The acreage for each land use is divided by 1/100 of the total estimated 2023 population for Waverly (4,532) to determine the amount of acres per 100 persons in the Community, known as the "Waverly Planning Standard." This is then compared to the "National Planning Standard" to determine excess or shortfall of required land use designation in the Community.

Currently, the Community of Waverly has a shortage of land developed to support Park & Recreation, Multifamily Residential and Commercial land uses.

Section 4
Existing & Future Land Use Planning.

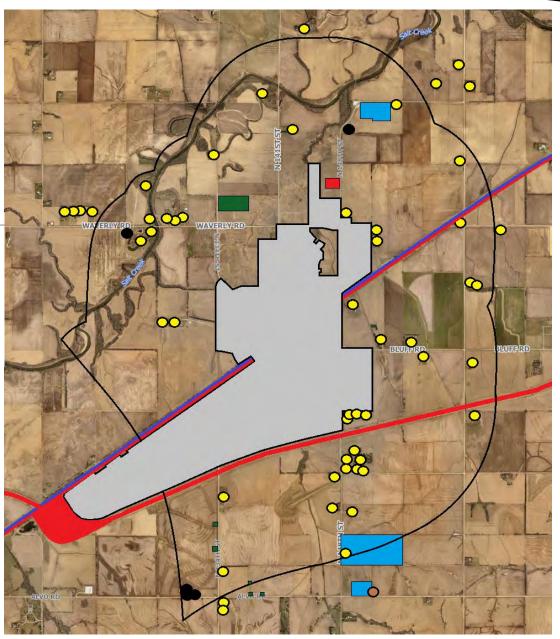

EXISTING LAND USE MAP WAVERLY, NEBRASKA PLANNING JURISDICTION ILLUSTRATION 4.3

HANNA:KEELAN ASSOCIATES COMMUNITY PLANNING & RESEARCH

EXISTING LAND USE OBSERVATIONS.

Parks & Recreation.

The major park and recreation land uses in Waverly include Lawson Park, Wayne Park, Jaycee Park and Sharp Park. An estimated 75.3 acres of land within the Waverly Corporate Limits are designated as park and recreation land uses. Additional information regarding park amenities and future needs are highlighted in **Section 5** of this **Comprehensive Plan**.

Public/Quasi-Public.

The City of Waverly maintains public and quasipublic land uses that are scattered throughout the
Community. Services include but are not limited to
City government and public safety offices,
education facilities churches, Waverly Post Office
and Waverly Library. Currently, an estimated
163.5 acres of land are designated for public/quasipublic land uses. Additional information regarding
public/quasi-public amenities and future needs are
highlighted in **Section 5** of this **Comprehensive Plan.**

Residential.

Residential development is the most prevalent land use in the City of Waverly, comprising an estimated 357.6 acres, nearly one-quarter of total land area inside the Waverly Corporate Limits. Single family housing units have been the dominant development type in Waverly, comprising an estimated 97 percent of all residential land uses with a large portion of new homes being constructed in newly-platted subdivisions in northern Waverly. Additional new single and two-family residential housing units have also been built in southern Waverly, generally south of Amberly Road.

The remaining residential land uses in Waverly are designated for multifamily residential developments. A total of three multifamily apartment complexes exist in Waverly, utilizing an estimated 0.2 acres of land, well short of the recommended 2 acers with the National Planning Standard.

Downtown Waverly is home to most of the City's locally-based commercial businesses and professional offices, while the Highway 6 Corridor, in south central and southwestern Waverly, comprises many of the Community's highway commercial businesses including convenience stores, restaurants and department/grocery stores. These highway commercial uses are scattered along the Highway 6 Corridor consisting of the Wayfair Second Addition along Guildford Street, as well as the Day Commercial Park Third and Fourth Addition. Combined, all commercial uses in Waverly utilize an estimated 65.2 acres of land within the Waverly Corporate Limits.

Industrial.

Industrial land uses comprise an estimated 231.4 acres of land within the Waverly Corporate Limits. Industrial operations include but are not limited to light manufacturing production, food processing, gravel extraction, agricultural-based operations and lumber/building material production. Waverly's industrial operations are generally located in the southwestern portion of the Community along the Highway 6 Corridor, or in close proximity to the Burlington Northern Santa Fe Railroad Corridor in central and northeastern Waverly.

While land designated for Industrial land uses in Waverly is significantly higher than the National Planning Standard recommendation, much of this is due to a few major operations with very high land requirements for operation. In terms of land use requirement, Waverly's three largest operations (Tractor Supply Company-Waverly Distribution Center, Millard Lumber and Pavers LLC) comprise an estimated 144.5 acres, or 62.4 percent of all industrial land uses in the Community.

Vacant/Undeveloped.

Vacant/undeveloped land in the City of Waverly totals an estimated 314.7 acres. Much of this vacant land is zoned for either commercial or industrial land uses in the southwestern portion of Waverly, along the Highway 6 Corridor. Additional vacant/undeveloped land areas for residential development are located in newly-platted subdivisions in the northern portion of the Community.

FUTURE LAND USE & ANNEXATION.

The City of Waverly, has proposed a goal of implementing appropriate community and economic development initiatives to sustain a "medium" population growth of **988 people through 2033** and potentially **2,257 persons by 2033**, via a local "Community Growth Initiative". If met, this growth will require the creation of jobs, housing and the availability of vacant land for development.

Table 4.2, Page 4.15, highlights the "Future Land Use Capacity Matrix" for the City of Waverly, determining necessary land acreage to both maintain the existing "Waverly Planning Standard" and achieve the "National Planning Standard". Based on the 2033 medium population projection (5,520), a range between 332.2 acres and 381.6 acres is required to be annexed and developed to support new development consisting of a variety of land uses. The 2033 "Community Growth Initiative" population projection (6,778) will require a range from 760.1 to 821 acres.

Proper comprehensive planning practice encourages any community to both develop existing vacant/undeveloped tracts of land while planning and designating for future land uses within its respective corporate limits. By 2033, the City of Waverly is required to have an estimated 3,055.6 acres supporting both new and existing development, as well as land planned and designated for future development projects within its Corporate Limits to meet the anticipated CGI population projection. Based on the existing total land acreage in Waverly, an estimated 1,545.4 acres (including 314.7 total vacant land acres) the City will need an additional 1,510.2 acres of land to meet this requirement. Thus, the City of Waverly is experiencing a shortage of vacant, developable land areas to meet 2033 population projections.

The infill of vacant land within the Corporate Limits of Waverly is already designated, as highlighted in the Future Land Use Map for the City of Waverly, **Illustration 4.4**, **Page 4.16**. Land adjacent but outside the Corporate Limits of Waverly, specifically east and south of the Community, are designated as "growth areas," depending on the achieved 2033 population. These growth areas/scenarios are highlighted in **Illustrations 4.5A**, **B and C**, **Pages 4.17**, **4.18** and **4.19**.

Parks & Recreation.

The City of Waverly should have an estimated 93.6 to 114.9 acres of land developed to support future park and recreation land uses while maintaining the Waverly Planning Standard. A range between 110.1 and 135.2 acres will be needed to achieve the National Planning Standard requirement. A total of 194.1 acres should be both developed and planned for future development. Newly-platted residential subdivisions and planned multifamily rental housing programs in Waverly should include dedicated park spaces/amenities for use by the Community.

A significant number of participants of the Waverly Community Opinion Survey expressed the desire for a City-wide trails system. This would consist of trails both circling and connecting points of interest within the Community and potentially connecting to existing trails in Lancaster County and eastern Nebraska. The future trails system is highlighted in **Section 5** of this **Comprehensive Plan.**

Section 4 Existing & Future Land Use Planning.

Public/Quasi-Public.

An estimated 198.2 to 243.4 acres of land developed to support future public and quasi-public land uses to maintain the Waverly Planning Standard and 154.2 to 189.3 acres will be needed to achieve the National Planning Standard requirement. A total of 403.2 acres should be both developed and planned for future development.

The City of Waverly should consistently monitor the capacity of its public facilities and services provided to Waverly residents. A growing population will require new and modern technologies and facilities to better serve the Community. The most significant change to public/quasi-public land uses/amenities through 2033 will be the anticipated construction of the new Waverly Fire Station facility at the intersection of Amberly Road and Canongate Road, as the current facility has become obsolete to effectively serve the existing population. Other public facilities/buildings are planned to remain in their current locations through the 10-year planning period. A new City Office and Shop facility should also be considered during this 10-year planning period.

Residential.

Residential land uses have rapidly increased their capacity in the City of Waverly, specifically single family residential developments. The Waverly Community Housing Study identifies an estimated 1,583 housing units currently exist in Waverly, an increase from the 2012 American Community Survey estimate of 1,162 housing units. The Anderson North Park and Riley Subdivisions, in northern and southern Waverly respectively, are the newest and fastest developing residential subdivisions in the Community, mainly supporting single family housing unit development.

Multifamily housing is considered a critical need in Waverly, as the current acreage of such development is significantly lower than what is required by the National Planning Standard. An estimated 11 to 13.5 acres of land developed to support future multifamily residential uses to maintain the Waverly Planning Standard, but 110.1 to 135.2 acres will be needed to achieve the National Planning Standard requirement. A total of 19.9 acres should be both developed and planned in Waverly by 2033. Multifamily residential developments would be best suited in close proximity to existing residential neighborhoods and services. A multifamily housing program is currently in the planning stages for development in the eastern portion of the Community.

Additionally, the Housing Unit Target Demand for Waverly includes 300 owner and 120 rental housing units, by 2033, to meet the medium population projection.

Commercial.

Most of Waverly's new commercial development will occur along the Highway 6 Corridor in the southwestern portion of the Community. The Day Commercial Park will be the prime location for expanded highway commercial services. A very limited amount of developable lots and vacant buildings exist in Downtown Waverly, thus, the Community should continue to support the existing businesses and professional offices that are located in the Downtown.

The City should, at a maximum, maintain 94.7 acres of developed commercial land uses to maintain the Waverly Planning Standard and 162.3 to achieve the National Planning Standard requirement. A total of 153.7 acres should be both developed and planned in Waverly by 2033.

Industrial.

The City of Waverly maintains more than double the National Planning Standard for industrial land uses, with most of the acreage dedicated to large-scale operations. While industrial development should continue to occur in the Community, a focus on small to medium scale operations would be beneficial to diversify local industry types and provide broad employment opportunities in a variety of professions. The Day Commercial Park, as well as land along the Burlington Northern Santa Fe Railroad Corridor northeast of Waverly and north of Waverly by near the existing wastewater treatment plant would be prime locations for new industrial operations.

At a maximum, an estimated 280.8 acres of land should be maintained, or be developed to support industrial land uses to maintain the Waverly Planning Standard (medium population projection). Regarding the CGI population projection, an estimated 344.8 acres should be maintained/developed. A total of 571.6 acres should be both developed and planned in Waverly by 2033.

INTENSIVE AGRICULTURAL USES.

The Waverly Planning Commission recognizes the importance of agricultural practices, including livestock facilities, to the economy of the Community. The expansion of existing livestock confinement operations within the Planning Jurisdiction of the City of Waverly should only be permitted in unique circumstances. The development of new livestock confinement operations should be prohibited from the Planning Jurisdiction of the City. Floodplains associated with Salt Creek prohibit the development of the City beyond its current Corporate Limits to the north/northwest. Therefore, the remaining portions of the One-Mile Planning Jurisdiction to the northeast and east of the City are vital to the continued growth and development of Waverly. Livestock confinement operations are best suited for locations within rural Lancaster County.

LAND USE PLAN IMPLEMENTATION.

Various funding sources exist for the preparation and implementation of a capital improvement budget designed to meet the funding needs of proposed development activities. These include local, State and Federal funds commonly utilized to finance street improvement funds, i.e. Community Development Block Grants, Special Assessments, General Obligation Bonds and Tax Increment Financing (TIF). The use of TIF for redevelopment projects in the areas such as the Downtown and adjacent older residential neighborhoods is deemed to be an essential and integral element of Development and Redevelopment Planning and use of TIF as an incentive for future projects.

A total of 1,697.1 acres of land are within a designated "**Redevelopment Area**" within the Waverly One-Mile Planning Jurisdiction. Of this, 674.5 acres are located within the Corporate Limits of Waverly. This encompasses 43.6 percent of the total land area inside Waverly. The **Waverly Redevelopment Area** is highlighted in **Illustration 4.6.**

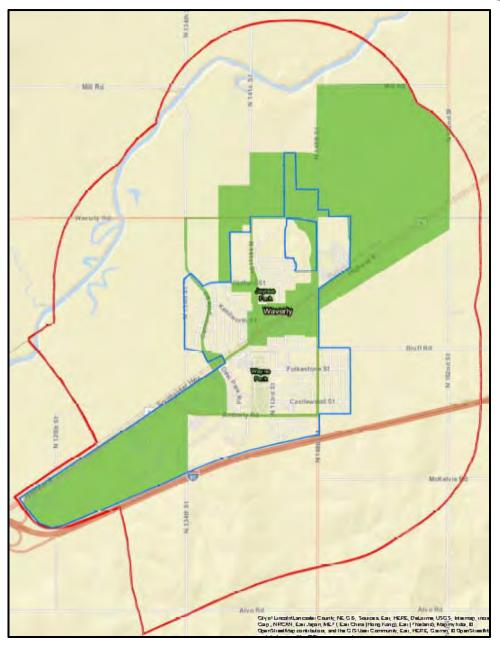

Section 4 Existing & Future Land Use Planning.

HANNA:KEELAN ASSOCIATES COMMUNITY PLANNING & RESEARCH

Waverly, Nebraska Comprehensive Plan-2033.

ANNEXATION.

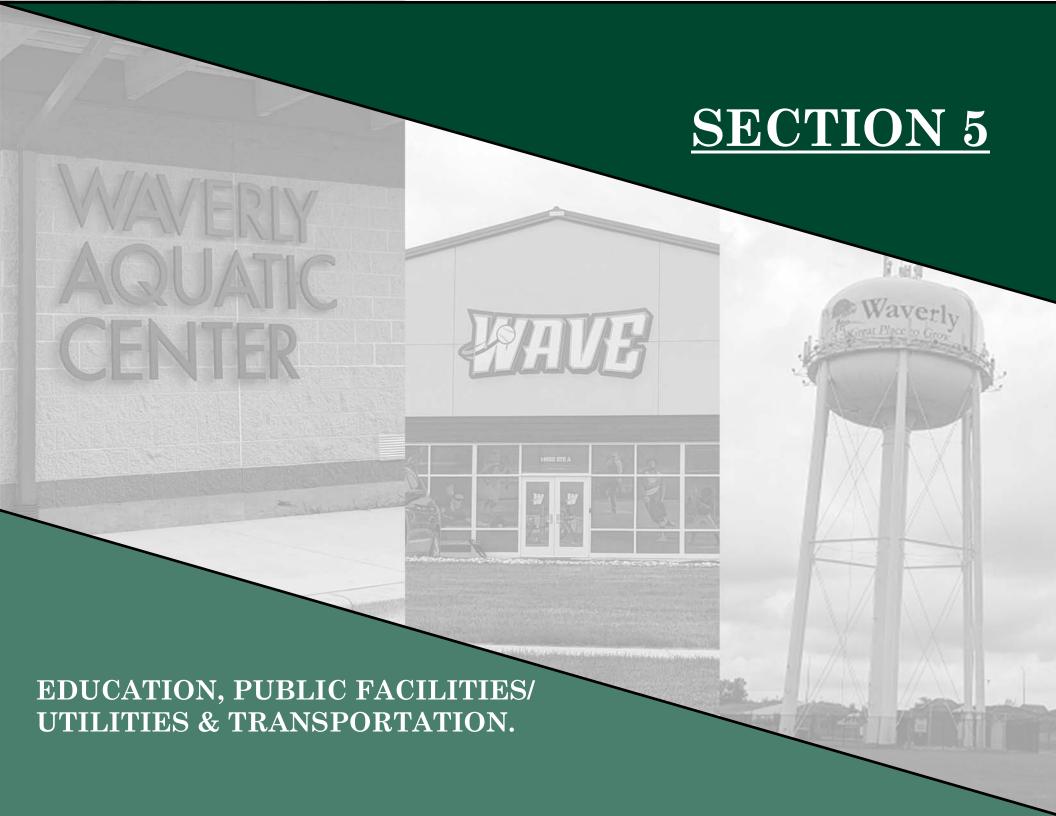

Future annexation activities in the City of Waverly, both **voluntary and involuntary**, should occur in the non-agricultural land use areas identified in **Illustrations 4.5A, B and C.** Land could be annexed at a point in time when in conformance with and meeting the criteria of Nebraska State Statutes, (Neb.Rev. Stat.§16-117). Specifically, if such land, lots, tracts, streets, or highways are <u>contiguous or adjacent and are urban or suburban in character</u>. Agricultural lands that are <u>"rural in character"</u> are not included under such authority. The terms "adjacent" or "contiguous" under §16-118, states that "contiguous may be present even though a stream, embankment, strip, or parcel of land not more than 200 feet wide lies between the targeted land and the corporate limits of the city."

The City of Waverly should conduct any annexation procedures set forth in Nebraska Revised Statutes 17-405.01 to 17-405.05.

Documenting that the character of the land proposed for annexation is "urban or suburban in character" and not "agricultural in nature" has no clear definitions or thresholds established by State Statues. Although court cases have found that the use of land for agricultural purposes is not "dispositive of the character of the land, nor does it mean it is rural in character. It is the nature of its location as well as its use which determines whether it is rural or urban in character."

Standard planning methodology also advocates:

- 1. Lands that are planned for the growth of the City are best identified in the Comprehensive Plan of the City, specifically the "Future Land Use Maps." Lands are identified to support future growth needs for residential, commercial, industrial, parks/recreation and open space.
- 2. Also, planning practice dictates that if the land is bound on two sides by the Corporate Limits of a City it should be considered for annexation. If it also has municipal water, but not sewer access; or municipal sewer, but not water access, a stronger case for the land being "urban or suburban in nature" is made.
- 3. If the land is bound on three sides by the Corporate Limits of the City and has access to municipal water and sewer service, general planning practice dictates that the land should be annexed.

SECTION 5 EDUCATION, PUBLIC FACILITIES/UTILITIES & TRANSPORTATION.

INTRODUCTION.

Section 5 of the **Waverly, Nebraska Comprehensive Plan** discusses the existing conditions and planned improvements to the public facility and utility systems in the Community. All improvements to these Community components are aimed at maintaining or improving the quality of life in the City of Waverly.

Public Facilities identify existing public facilities in Waverly and determine future needs of and desires for pertinent public facilities during the planning period, 2023 to 2033. Public Facilities provide citizens with social, cultural and educational opportunities in Waverly. Facilities in Waverly include, but are not limited to health care, law enforcement, fire protection and recreational facilities such as parks and athletic fields. The locations of these public facilities are identified in the **Waverly Public Facilities Map, Illustration 5.1.**

EDUCATION - DISTRICT 145 (WAVERLY) PUBLIC SCHOOLS.

Public school education is a major factor in the quality of life for families that reside in the communities that fall within the boundaries of this education district. District 145, in partnership with the Waverly community, prepares students for a successful future by continually creating relevant learning experiences and focusing on all students' needs. The quality of the education provided by these schools has been attractive to many families relocating to the City of Waverly. It will be important that public schools that fall within District 145 continue to adapt to the potential growth anticipated within the borders of this community.

District 145 Public Schools is a Class B school district, as identified by the Nebraska School Activities Association. This district serves the communities of Alvo, Eagle, Prairie Home, Walton, and Waverly. Currently the district educates more than 1,920 students in grades K-12 and employs over 270 staff members. The district vision statement, "Inspire Our Students to Seek Excellence in Their Lives," can be seen in action every day school is in session. The physical boundaries of District 145 (Waverly) Public Schools encompass approximately 300 square miles with district property in four counties: Lancaster, Cass, Otoe, and Saunders. The district is governed by a six-member board of education, elected by wards. District #145 (Waverly) Public Schools is a Class III school district accredited by the Nebraska Department of Education.

In the 2021-2022 school year, District 145 employed over 300 staff member including 179 certified staff. The instructional staff in District 145 averages 15.79 year of teaching experience with 63% having a master's degree. Persons employed with District 145 (Waverly) Public Schools include the following:

- 144 certificated teachers and specialists.
- 15 certificated administrators.
- 7 Certified Counselors.
- 4 Specialists.
- 10 School Secretaries.
- 5 Librarians.
- 40 Paraprofessionals.
- 7 District system Admin support.
- 21 food service staff.

Section 5 Education, Public Facilities/Utilities & Transportation.

The District 145 Foundation For Education provides funding for educational opportunities that allow prospective students to continue their education through the District's extended education programs and community outreach. It is the mission of the FFE to enrich the educational experience in our schools by providing financial resources to support creative endeavors that will promote the achievement and success of our students. The Foundation was organized exclusively for educational and charitable purposes within the meaning of Section 501(c)3 of the Internal Revenue Code. The entire initial Board of Directors was selected by the Board of Education of District 145 (Waverly) Public Schools. The members consist of a program director and 25 officers and representatives. A total of seven committees represent the Foundation, including Finance, Resources, Awards and Grants, Nominating, Public Information, Executive and Before & After School programs. Our goals are to:

- Identify and provide funding for educational opportunities beyond the scope of existing programs and District 145 (Waverly) Public Schools's funding sources.
- Recognize excellence and outstanding contributions to the educational programs throughout District 145 (Waverly) Public Schools.
- Increase participation and involvement from every sector of our community in the educational programs of District 145 (Waverly) Public Schools.

***** DISTRICT FACILITIES.

District 145 Public Schools maintains an elementary school and one intermediate school in Waverly with a second elementary school in the Community of Eagle. Middle and High School facilities, along with all athletic fields and facilities are located in Waverly. Information associated with the District 145 Public Schools facilities was cited from the District Administration and Superintendent's offices, as well as the District's 2022 Waverly School District Master Plan prepared by DLR.

Hamlow Elementary School – Located in Waverly, at 14541 Castlewood Street in southeast Waverly, Hamlow Elementary serves grades Kindergarten through second, as well as a Community preschool. The School was constructed in 1974 as a 65,000 square foot facility. A 6,800 square foot addition was completed in 2000 for Kindergarten classroom use. Classroom doors and walls, and a sprinkler system were added to the facility in 2003. In 2013, Hamlow Elementary School installed a geothermal heating and cooling system for the school. A year later, Hamlow Elementary School, replaced the Kal-Wall Panel skylight in the media center.

Section 5 Education, Public Facilities/Utilities & Transportation.

The 2022 facilities master plan identified five takeaways related to necessary improvements or recommendations for the facility. They are listed below:

- Playground Equipment needs replacing, currently hazardous and aging.
- The kindergarten would like to be co-located within the building for collaboration & synergy.
- A desire and need to make the building more accessible and better universal design.
- Staff need a dedicated breakroom and more staff restrooms.
- Would like to have more break-out space and an outdoor classroom.

Eagle Elementary School – A second elementary school is located in the nearby Community of Eagle, at 600 South First Street. The School building was originally constructed in 1918 and served as the main facility for the Eagle-Union School District. This building was later replaced in 2001 with a 43,800 square foot elementary school facility. In 2012, improvements to the building included HVAC improvements, interior fire doors and replacement of exterior entry doors. The 2022 facilities master plan identified five takeaways related to necessary improvements or recommendations for the facility. They are listed below:

- Staff would like to see more break-out space for group work and collaboration
- There is a desire for a better display system for student work to create a sense of pride and make the building more inviting
- Special Education does not have a dedicated space
- Concern over focus of curriculum only and less focus on child development as a whole
- Eagle ES has a strong sense of community and would like to remain a PK-5 facility as the district grows

Waverly Intermediate School – The Waverly Intermediate School is located at 14621 Heywood and is currently home to classes from third through fifth grade. The building was constructed in 1958 and originally served as Waverly High School, until the construction of the new facility in 1998. In 2007, several upgrades and renovations were made to classrooms, offices and the commons area to support intermediate grade levels. There have been no further improvements to the facility since 2007. The 2022 facilities master plan identified five takeaways related to necessary improvements or recommendations for the facility. They are listed below:

- The facility does not reflect an elementary school, lacks color and age-appropriate furniture.
- Staff would like dedicated plan spaces to collaborate and spaces that allow for team teaching.
- Environmental comfort is poor in various areas of the building.
- Educational spaces are inconsistent and lacking equity within the building.
- A considerable amount of space is underutilized.

Waverly Middle School – The Waverly Middle School serves grades sixth through eighth in a facility located at 13801 Amberly Road. Built in 2006, the current building replaced the former junior high building which was constructed in 1910. The Middle School is a 108,000 square foot facility consisting of modern classrooms, library, cafeteria and administrative office amenities. There have been no further improvements to the building since it was built in 2006. The 2022 facilities master plan identified five takeaways related to necessary improvements or recommendations for the facility. They are listed below:

- There is need for another gym space.
- Classroom size is an issue with increased enrollment, furniture could be part of the problem.
- Pods are used often but could be better set-up for more functional educational space.
- Grade level team configurations enhances their ability to deliver curriculum.
- Have a desire to do more project-based learning but require the proper space.

Section 5 Education, Public Facilities/Utilities & Transportation.

Waverly High School – The High School facility for grades ninth through twelfth is located at 13401 Amberly Road. The High School was constructed in 1998 and originally consisted of 124,000 square feet. A 24,000 square foot expansion was constructed in 2006 and consisted of additional classrooms, an auxiliary gym and health training room. The High School gymnasium is also used for City basketball and volleyball leagues throughout the year. In 2010, Waverly High School installed a drain tile system around the exterior of the building and under the gym floor. In 2014, Waverly High School removed the commons area skylight and replaced it with a rubber membrane roof. The 2022 facilities master plan identified five takeaways related to necessary improvements or recommendations for the facility. They are listed below:

- Building is running out of space for both academic and extra-curricular activities.
- The "L" shaped classroom is not very functional.
- The theater has safety and water drainage issues.
- Pod areas are used often but could be set up better for more functional education space.
- Would like to advance the course offerings to students but the building is holding them back.

Administration Building (Central Office) – Located at 14511 Heywood, the Administrative building contains the central offices of District 145 Public Schools, including the Superintendent, Accounts and Payroll offices, Special Education and a meeting room for Board of Education members. The facility was constructed in 1992, adjacent to the Waverly Intermediate School.

Bus Barn/Athletic Fields – The District Bus Barn is located along Deer Park Road, south of Highway 6 in Waverly. The facility was constructed in 1982 and consists of bus parking spaces, along with mechanical and wash bays. The Waverly athletic fields for District 145 (Waverly) Public Schools are all located in the City of Waverly.

DISTRICT ENROLLMENT.

District enrollment, from 2013 to the 2021-2022 school year, is highlighted in **Table 5.1.** Current 2021-2022 school year enrollment at District 145 (Waverly) Public Schools is an estimated 2,138. District officials estimate a consistent growth in enrollment of approximately 25 to 30 students per year. The following table highlights District 145's enrollment growth during the past 10 years. Since 2013, enrollment has increased by an estimated 15 percent. District officials project this trend to continue during the 10 year planning period.

TABLE 5.1

❖ FUTURE DISTRICT PROJECT & PROGRAM RECOMMENDATIONS.

Leadership with District 145 (Waverly) Public Schools identified general maintenance of existing facilities as their priority during the 20-year planning period, but have identified current, unused building space and vacant land adjacent the Middle and High Schools as their primary objectives for any building or facility expansions. All current facilities are in "good" to "excellent condition and have the ability to support current enrollment. Expansion of these facilities will need to be considered when student enrollment increases and nears the target enrollment for each school building.

Education is becoming increasingly important as the need for a broader-based education with emphasis on technical and human relation skills increases in today's society. Standards developed by educators and planners can provide guidance in the creation of, and additions to the School District's educational facilities. According to this Study, growth of student populations begins to exceed capacity at Waverly Middle School and Waverly High School in the 2026-2027 school year. Total capacity for the entire district is exceeded in 2032-2033 based on these growth projections.

Education, Public Facilities/Utilities & Transportation.

❖ DISTRICT STRATEGIC PLANNING

The following six goals were developed by district 145 staff and summarize the objectives that staff deemed critical to maximize the success and progress of the students attending District 145 schools.

Goal 1: By May 2024, 80% of students will demonstrate proficiency on local and state academic assessments.

Included in this goal would be vertically aligning curriculum, developing an assessment system that includes common assessments, proposing a staff development model that includes time, focus and structure for developing teacher practice and implementing a collaboration model to support professional learning communities, including a defined process and time to support collaboration.

Goal 2: By 2022 District 145 (Waverly) Public Schools will enact a comprehensive, multi-year Master Facilities Plan.

Included in this goal is creating a process for maintaining existing facilities, projecting how future student growth impacts our facilities, preparing facility plans based on enrollment and delivery of instruction, creating budgets and option timelines and communication of plans to the board of education and community.

Goal 3: By 2023, District 145 (Waverly) Public Schools will implement systems and services that supports staff and students socially, emotionally and behaviorally.

Included in this goal would be to establish a multidisciplinary K-12 team to implement systems that support staff and students social, emotionally and behaviorally, integrating social emotional learning/social emotional wellness PK-12 instructional practices into classrooms, establish systems of support and partnerships for staff and students and develop a long term plan to ensure ongoing professional development in SEL and SEW/Mental health for all faculty and staff.

Goal 4: By 2023, District 145 (Waverly) Public Schools will implement a comprehensive technology plan.

Included in this goal would be to define the use of technology for classroom instruction, evaluate student data utilizing a comprehensive information system to support student learning, provide the necessary infrastructure, hardware and staff to continuously support technology in the district and utilizing technology for the safety and security of staff and students.

Education, Public Facilities/Utilities & Transportation.

Goal 5: By May 2022, Implement a District 145 Instructional Model.

Included in this goal would be that District 145 would adopt an instructional model to define and describe expectations for classroom practice across the district, build the knowledge and understanding of the instructional model through ongoing professional development and leadership development and to integrate the instructional model into the evaluation and appraisal process

Goal 6: By 2022, District 145 will implement an inclusive communications plan.

Included in this goal would be to establish an effective communication plan with internal audiences to improve communication and engagement, establishing an effective communication plan with external audiences to develop and maintain positive, collaborative relationships and to utilize a variety of media to maximize awareness and support of the district's goals, objectives and programs.

The following section highlights recommended projects and programs to be implemented throughout District 145 Public Schools. These recommendations are a summary of different studies completed recently and input from district 145 staff.

- 1) Review potential growth trends for students and identify schools which will need improvements to classrooms to address classroom size and utility of the space. Each of the schools that reside in the City of Waverly identified classroom size or utility constraints as issues which would need to be addressed in order for the school to function more efficiently.
- 2) Additional space for extracurricular activities including a new gym for the Waverly Middle School was a recommendation from the DLR study on Waverly School District Master Plan. Hamlow Elementary would like an addition to the school to accommodate the request to locate the kindergarten classroom within the building.
- 3) General facility maintenance to Public School grounds and buildings should continue to provide a safe and clean environment for all persons employed with or attending District 145 Public Schools. One area recommended to improve safety is the replacement of playground equipment at Hamlow Elementary School.
- 4) With the anticipated growth in student enrollment, a sufficient number of teachers, faculty staff, additional education support and facility maintenance must be secured.

Section 5 Education, Public Facilities/Utilities & Transportation.

- As was mentioned in the previous planning document, support any and all efforts to provide safe routes to and from each school facility in Waverly. A "crosstown" busing system is currently implemented in the Community, but the need for a pedestrian overpass, as well as crossing signals at major intersections in Waverly, has been significantly stressed as a priority. A pedestrian overpass over Highway 6 and the BNSF Rail corridor, along with Rapid Rectangular Flashing Beacons (RRFB's) at the intersections of 148th & Folkestone Streets and 148th & Castlewood Streets to go along with the recently constructed RRFB at 140th Street and Amberly Road, would provide safe routes to school for children of all ages. These intersections should be monitored for child safety precautions, with crossing guards installed when needed.
- With increased student traffic at the Waverly High School and Middle School, an intersection improvement project at the intersection of Amberly Road and Canongate Road needs to be considered to improve efficiency and safety for the vehicles using this intersection in the morning and afternoon peak times. Recent traffic studies have shown this intersection does not currently meet any traffic signal warrants for intersection control. The recommendation here is the same as the previous planning document and the pedestrian study completed by Iteris which is to construct a roundabout.

OTHER AREA EDUCATIONAL FACILITIES.

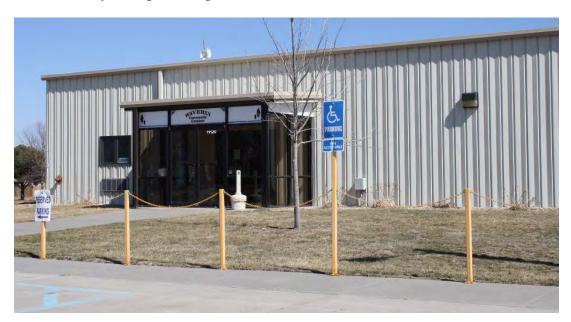

Several Colleges and Universities are located within a short distance of Waverly, many of which accept high school credits from District 145 Public Schools. These Colleges and Universities include the following:

- Midland University Fremont, NE
- Bellevue University Bellevue, NE
- University of Nebraska Omaha- Omaha, NE
- Nebraska Methodist College Omaha, NE
- College of Saint Mary Omaha, NE
- Clarkson College Omaha, NE
- University of Nebraska Lincoln Lincoln, NE
- Union College Lincoln, NE
- Southeast Community College Lincoln, NE
- Metropolitan Community College Elkhorn, NE
- Nebraska Wesleyan University Lincoln, NE

& LIBRARY.

The Waverly Library is located at the Waverly Community Center, north of Downtown Waverly. The Library first opened in 2012 with the remodeling of several rooms within the Community Center. All books and materials are donated by the general public. The Library consists of one part-time librarian and a group of volunteers. A summer reading program is provided at the Library by the Lincoln City Library System. Waverly volunteers assist with writer's workshops, homework help and story time. The Library has an estimated 5,000 volumes and has a catalog of the average annual circulation.

The City of Waverly has identified the need to complete a concept study to consider the location and construction of a recreation center within the city limits. This center would provide another option for health and wellness activities as well as a larger space for the library. This multi-purpose facility is likely to be constructed within the 10 year planning time period covered by this planning document.

PUBLIC FACILITIES

❖ PARKS AND RECREATION

The City of Waverly has excellent parks and recreation offerings for the size of the community. There are currently 82.5 acres of designated park and recreation sites within the community plus a number of playground locations at various school properties. Many of these parks are located near accessible hiker/ biker trails and have recently seen many improvements and recently constructed amenities as part of the recreation experience of the community.

CITY PARKS

Wayne Park – This 30-acre park is located at the south terminus of South 140th Street and south of Highway 6. The park contains two playground areas, picnic shelters, 3 baseball and softball fields, soccer fields, basketball and tennis courts, lighted trails and restrooms. The park also features a nine-hole Frisbee golf course.

Wayne Park is also home to the new Waverly Aquatic Center located at 11160 Holly Drive. The pool has two water slides, a splash pad and a current channel. There are trail connections between Wayne Park and the recently constructed trail system along Amberly Road.

Lawson Park – This 36.5 acre park has grown tremendously since the previous planning document was published. This park is located north of Oldfield Street and west of 141st Street. The park contains the official use baseball field by District 145 public schools and has added three additional baseball/softball fields to the facility. It contains shelters, concession stands, additional multi-use fields for soccer and flag football, restrooms and additional parking off of Oldfield Street. There is also a trail connection from the north parking area across to 141st Street and additional plans for trail connections to future Oldfield Street construction.

Jaycee (Community Foundation) Park – Jaycee Park is the location of the Waverly Community Center which is home to the Waverly Community Foundation. The park consists of 10 acres of land and provides a milled surface walking trail that connects to a paved trail system along Mansfield Street. The complex has two baseball/softball fields, three sand volleyball courts, a playground, a gazebo, and horseshoe pits. The reconstruction of Mansfield Street has provided parking for the playground and sand volleyball courts.

Sharp Park – Sharp Park is located at the intersection of North 139th street and Woodstock Boulevard. The Park consists of approximately 0.7 acres and features a basketball court, picnic shelter, and playground area. Future plans for a pedestrian crossing of the BNSF Railroad corridor and Highway 6 have looked at this location as a starting point for this structure.

***** FUTURE PARK AND RECREATION RECOMMENDATIONS

- Expand park and recreation facilities to supplement the projected increase in population during the next 10 years. This would include the construction of a park on the east side of the community to serve residents on this side of the city.
- Continue to support the development of sports fields for youth activities. The City of Waverly should consider opportunities to acquire land for additional soccer, baseball, and softball fields.
- Provide more pedestrian friendly connections from the residential developments to parks throughout the community.
- Continue to provide general maintenance for park equipment to continue to provide a variety of recreational opportunities for the population of the community.
- A Recreation/wellness Center should be planned and developed to provide an enclosed space for fitness and sproting activities.

❖ GOVERNMENT BUILDINGS

City Hall – The current City Hall of Waverly is located at 14130 Lancashire Street in the northern part of Downtown Waverly. All city offices are located at the City Hall. The City of Waverly Planning Commission and the City Council hold their bi-weekly meetings at this facility.

The City of Waverly has begun the process of designing a new facility which will house the new City Hall as well as all office staff and expandable meeting rooms. The location of this proposed facility is the northeast corner of Amberly Road and 135th Street. This building will also be the new home for Waverly Fire and Rescue. The plan would triple that amount of square footage of the current fire hall from 6,500 sq ft. to 20,000 sq ft. Construction for this building is planned to occur within the planning period of the next comprehensive planning document.

New Recreation Facility (Future) – This potential recreation facility would be the new location of the Library as well as accommodate additional office and meeting space. This facility will provide opportunities for health and wellness activities and feature a kitchen and athletic facilities. There are no current plans or locations determined for this site but planning is anticipated to begin within the early years of the next planning period.

Post Office – The U.S. Post Office is located at 10850 North 142nd Street in downtown Waverly. The Post office employs seven employees and manages three rural routes. They offer the following services at this branch location: Bulk Mail Acceptance, Duck Stamps, General Delivery, Money Orders (Domestic and International), Online PO Box, Pickup Hold Mail, Street Parking

Rose Hill Cemetery – The Rose Hill Cemetery is located at the northwest corner of North 148th Street and Heywood Street across from the Waverly Intermediate School. The City has managed the 6.9-acre cemetery since 1992 and has consistently maintained the property. General maintenance including lawn and headstone care are the only planned improvements during the next planning period.

❖ PUBLIC SAFETY, GOVERNMENT & COMMERCE

Public administration facilities are building centers which provide critical services for the efficient functioning of the community and conduct the business of the government. The critical nature of these services makes the centrally located nature of these buildings an important factor in the health and well-being of the community members who rely on these services.

Public Safety.

Police – The City of Waverly is policed by the Lancaster County Sheriff's Office, located in Lincoln, Nebraska. The patrol division of the Sheriff's Office consists of 115 employees and 84 commissioned deputies sergeants and captains that respond to service calls, traffic regulation and enforcement, issued warrants and general citizen assistance throughout Lancaster County.

Fire Department / Ambulance – The City of Waverly Volunteer Fire Department consists of 27 active members as of May 2023. In 2022 the volunteers responded to 409 fire and rescue calls. The department serves both the City of Waverly and 100 square miles within the Waverly Fire District. The Waverly Fire/Rescue Department provides fire protection and emergency response services to the Waverly community. The Fire Department's mission is to prevent the loss of life and property. In addition to responding to fires, the Waverly Fire And Rescue also responds to medical emergencies, motor vehicle accidents, rescue calls, and incidents involving hazardous materials.

Fire and rescue equipment is stored in the Waverly Fire Department located at 10530 North 141st Street south of downtown Waverly. In 1988, the building was solely dedicated to the fire department. Current equipment being used by the volunteer fire department consists of nine vehicles, including an ambulance, two pumping trucks, two grass rigs, three tankers and one suburban for personnel transportation.

The City of Waverly provides ambulance service within the Community's designated fire district. Waverly Rescue consists of 16 EMT-trained staff members and uses two modular ambulance rescue trucks for emergency situations.

The City of Waverly is working to plan and design a new public use facility that would serve as a city hall as well as fire station at the northwest corner of Canongate Road and Amberly Road. This building would triple the amount of square footage available for equipment storage as well as increase the amount of meeting space available. There is no timetable for this construction but it is anticipated that it will be constructed within the next planning period.

❖ PUBLIC HEALTH

Medical and elderly services are available to residents of Waverly within a reasonable distance of the Community. The City of Lincoln also provides modern health and hospital services, including full service hospitals, nursing care facilities, clinics and private medical offices.

Section 5

Education, Public Facilities/Utilities & Transportation.

Waverly Health Care Urgent Care – The Waverly Health Care Urgent Care facility is located at 13220 Callum Drive, Suite 4. The providers care for the entire family from newborn infants to adults, including acute and chronic conditions as well as routine checkups. The urgent care has an on-call service on evenings and weekends for emergencies and are always able to see established patients on the same day they call in with an acute problem.

Family Practice of Waverly – This facility is located at 13851 Guildford Street and is affiliated with the Bryan Physician Network. General family care is also practiced at this location.

The following services at these locations include, but are not limited to:

- · Walk-in Care.
- · Preventive Care & screening.
- · Men's Health & Wellness, Testosterone Therapy.
- · Well Woman Examinations & Wellness.
- · Geriatric Care.
- · Dermatological and orthopedic care.
- · Mental Health diagnosis & referral.
- · Immunizations.
- · Pediatrics.
- · Well child visits.
- · School/Sport Physicals.
- · Acute Visits (cough, sore throat, UTI, etc.).
- · Flu and Pneumonia Vaccines.

- · STD Screening
- · EKG and Spirometry/Pulmonary Function Test.
- · Acute injury evaluation and treatment.
- · Management of Diabetes Mellitus.
- · Management of Hypertension.
- · Management of High Cholesterol.
- · Pre-operative Clearance.
- · Post-Hospital Care.
- · In-Office Procedures.
- · Mole Removal.
- ·Wart Freezing/Removal.
- · Joint Injections.

Section 5

Education, Public Facilities/Utilities & Transportation.

Amberly Dental - Since its opening in 2009 at 13220 Callum Drive, Amberly Dental has provided a wide range of dental services to Waverly and surrounding communities.

Waverly Dental - Waverly Dental is located at 13810 Guildford Street and has practiced in Waverly since 2003.

Combined, the following services are provided to Waverly residents:

· Preventive dentistry.

· Restorative dentistry.

· Dental Implants.

· Cosmetic dentistry.

· Emergency dentistry.

·TMJ Therapy.

· Sedation dentistry.

· Dental technology.

· Periodontal therapy.

· Sleep Apnea therapy.

Azria Health Waverly - The Azria Health in Waverly is located at 11401 N. 137th Street and provides adult and long-term care and rehabilitation to elderly persons and families. Azria Health Waverly is a 54 unit complex that provides excellence at every level, delivering exceptional service to each individual – from the inviting welcome program to the individualized care plans – they are with you every step of the way.

The staff considers every detail in making patients feel at home, providing a high level of personal attention. The entire Azria Health experience is designed to encourage social activity and maintain regimens that foster health and well-being. Azria Health provides the following specialized care services:

· Neurological and Stroke Care.

· Wound Care.

· Post Cardiac Care.

· Prosthetic Training.

· Orthopedic Care.

· Back Injuries.

· Pulmonary Care.

Waverly Community Center – The Waverly Community Center, located at 11120 North 141st Street, provides an enclosed facility that is available for rent to the general public for meetings and gatherings. The Center plays host to several public services and educational and social activities. The facility has a maximum capacity of 300 with tables and chairs to seat up to 225 people. The Community Center is also home to the Waverly Library and Community Foundation offices.

PUBLIC UTILITIES.

It is the responsibility of any community to provide a sound public infrastructure for its citizens as well as to provide for anticipated growth. Therefore, it is important to coordinate the improvements to public utility systems with the anticipated expansion of this community. This section describes the existing condition of the public utilities found in the City of Waverly and the potential improvements needed during the planning period for this document.

The city employs a full-time utilities systems and maintenance supervisor to review operations and maintenance of the water distribution system and waste-water distribution system. The city has purchased and maintained equipment for the activities performed by the city to maintain the public owned systems necessary for the well-being of the residents of the community.

***** WATER DISTRIBUTION SYSTEM.

The municipal water system, as highlighted in **Illustration 5.2**, **Page 5.23**, is maintained by the City of Waverly. The existing system has eight active producing wells providing water for the community and residents that fall within its jurisdiction. Two municipal water wells are located in town and the other six are located in the rural portion of the One-Mile Planning Jurisdiction at approximately 134th Street and Alvo Road. The oldest well was completed in 1982.

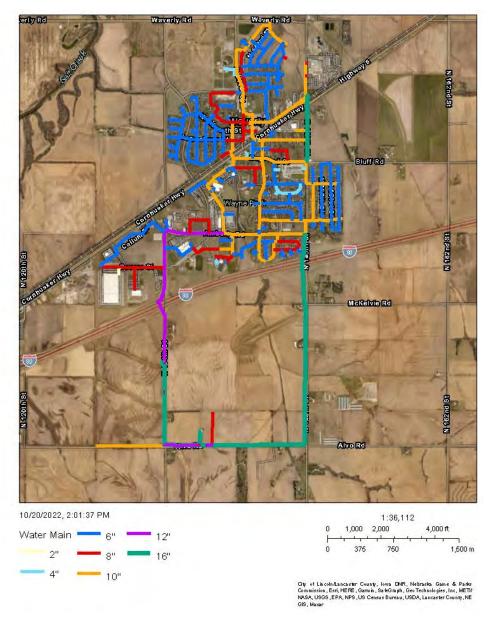

Water in Nebraska tends to have higher hardness levels due to the increased presence of calcium and lime in the area groundwater. This water also has a lower pH which means it is slightly acidic. These two factors result in small amounts of copper being removed from the pipes and added to the water. In order to keep the pipes from corroding and adding copper to the water, a chemical called orthophosphate is added. It significantly lowers the amount of copper in the water, but as a result, the water hast to be chlorinated slightly due to the potential for bacteria in the phosphate. By using this treatment technique, the copper levels have been reduced to meet levels required under the Copper Action Level instituted by the E.P.A. in 1999.

The City of Waverly constructed a 500,000-gallon elevated water tank in 1975. This structure is located at the northwest corner of Amberly Road and 148th Street. More recently, the City of Waverly constructed an additional 500,000-gallon storage tank to hold more water in reserve for peak day demands. The eight municipal wells produce 165 gallons per capita. The average daily demand for water is 400,000 gallons per day. During the summer, with increased use by lawn sprinklers, usage goes up to around 1.5 million gallons per day.

Section 5 Education, Public Facilities/Utilities & Transportation.

WATER DISTRIBUTION SYSTEM

WAVERLY, NEBRASKA ILLUSTRAION 5.2

Section 5 Education, Public Facilities/Utilities & Transportation.

The City of Waverly has completed a number of improvements to the distribution system in the most recent planning period to provide a more efficient municipal system. These projects include:

- · Two new wells were constructed in the rural One-Mile Planning Jurisdiction.
- · A new chemical injection building for water treatment was constructed.
- · An additional 500,000-gallon tank for storage was built near Alvo Road.
- · New 16" watermain trunk was installed along Alvo Road and 148th Street from Alvo Road to Amberly Road.
- · New watermain installed along North 142nd Street from Highway 6 to Heywood Street.
- · Watermain extensions along North 141st Street from Saint Ronan Street to Paris Street.
- ·Replacement of old water mains at North 142nd Street from Kenilworth to Lancashire Street, Kenilworth from North 141st Street to North 143rd Street.

There are a number of improvements to the water distribution system that were discussed throughout this planning process. These improvements are intended to address future growth in the coming years and replace deficient facilities within the community.

- · Due to potential growth of residential developments on the east side of the community, additional wells and storage facilities may need to be constructed.
- · An extension of 16" water main along 148th Street from Amberly Road to Bluff Road.
- · New 16" water main along Bluff Road from North 148th Street to North 162nd Street.
- · New 16" water main along Mckelvie Road from North 148th Street to North 162nd Street.
- · New 16" water main along North 162nd Street from Mckelvie Road to Bluff Road.
- · New 16" water main along North 162nd Street from Bluff Road to Mill Road.
- · New 16" water main along Mill Road from North 148th Street to North 162nd Street.
- · New 16" water main along North 148th Street from Mill Road to Highway 6.
- ·Replacement of old water mains at Eastbourne and North 147th Street, Oak Lane, North 142nd Street and Highway 6 and Lancashire Street from North 141st Street to North 137th Street.

Education, Public Facilities/Utilities & Transportation.

* WASTEWATER SYSTEM.

Illustration 5.3, Page 5.26 highlights the wastewater distribution system in Waverly. The initial sewer system in the City of Waverly was constructed in 1955. The wastewater treatment facility consisted of one lagoon and was located at the northwest corner of the city near the Intersection of Canongate and Oldfield Streets. A second wastewater treatment plant was constructed in 1975 and the original lagoon was abandoned.

The newest wastewater treatment plant was constructed in 2008 adjacent to the 1975 plant. The new treatment plant has a peak capacity of One Million gallons per day and can sustain service for a Waverly population of up to 10,000 people. The current facility will have the ability to expand processing to support a peak future demand of up to Two Million gallons per day.

The current facility consists of several buildings and tanks that serve specific purposes. Several of the tanks are open air tanks to prevent odors from accumulating in the system. The treated end product of the wastewater treatment facility is clean water that meets Federal guidelines to be released into the Salt Creek. The solid waste from the plant becomes a black, dry material which is well suited for fertilizer on agricultural fields in the area.

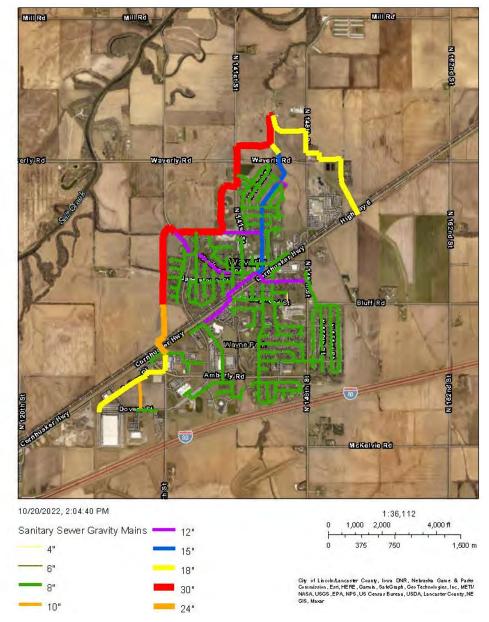

Future improvements to the wastewater collection system include the construction of wastewater storm sewer system replacement of old or deficient mains. The oldest sewer mains are approximately 70 years old. Typical maintenance activities are critical to the efficient operation of the wastewater system. There are also private developments planned for the east and south portions of the community that will need access to the sanitary sewer system as part of the construction of these residences.

The City of Waverly has identified additional improvement projects in addition to the typical maintenance activities for the system.

- · Extend sanitary sewer service to the west of North 128th Street.
- · Extend sanitary sewer east trunk main from the Highway 6 Corridor to McKelvie Road.
- · Complete expansion project on the new treatment facility once daily flows exceed one million gallons or around 10,000 population.
- · Complete lining projects for all remaining clay tile sewer mains.

WASTEWATER DISTRIBUTION SYSTEM

WAVERLY, NEBRASKA ILLUSTRAION 5.3

Education, Public Facilities/Utilities & Transportation.

STORMWATER DRAINAGE SYSTEM.

The City of Waverly in cooperation with the Lower Platte South Natural Resources District hired Alfred Benesch & Company to complete "The City of Waverly Watershed Master Plan" in October of 2010 that was later revised in February of 2011. This plan identified four tributaries that drain through the city limits and the one-mile extraterritorial jurisdiction:

- · 148th Street Tributary.
- · West Tributary.
- · East Tributary.
- · Ash Hollow Tributary.

In 2008, the FEMA preliminary FIS and FIRM panels were released incorporating updated hydrologic and hydraulic modeling for the Ash Hollow basin as well as new modeling for a portion of the 148th Street Tributary basin. The new modeling showed a significant increase in the Ash Hollow flows which placed the city within the FEMA 100 year floodplain. These revisions to the floodplain for the City of Waverly were the driving force behind developing a watershed master plan for the community.

One of the major goals of this master plan was the desire to analyze the existing drainage conditions of each basin. The analysis of these existing drainage basins provided information on identifying local flooding issues as well as providing improvement strategies to reduce or eliminate local flooding during small storm events. Through this plan a number of priority projects were developed to address potential flooding concerns throughout the community.

In 2017 the City of Waverly completed construction of the Ash Hollow earthen dam. This 32' high dam was designed to hold back runoff from a 500-year storm. This structure will reduce peak flows along Ash Hollow to be more in line with original flows along this tributary. With the construction of this dam, the City was able to complete a Certificated Letter of Map Revision (CLOMR) and reduce the limits of the FEMA 100 year floodplain.

Section 5

Education, Public Facilities/Utilities & Transportation.

The watershed master plan identified four additional priority projects to be completed to address local flooding issues within the community. Those projects are:

- · Oldfield road local drainage improvements.
- · Highway 6 and 144th Street local drainage improvements.
- · Oldfield Road Culvert Improvements.
- · Channel work and easements on Waverly Tributaries.

In addition to these priority projects, the City identified the following improvements to the storm water drainage system.

- · Implement storm water drainage improvements along Highway 6 between 144th Street and 148th Street as well as along 144th Street south of Highway 6.
- · Implement storm water drainage improvements on the west side of 148th Street from the north side of Rose Hill Cemetery to Highway 6.

The Master Plan has provided the City of Waverly with storm water design standards to be used for all projects built within the city. These standards will supplement the municipal floodplain regulations.

The Waverly Watershed Master Plan provides the necessary planning tools and capital improvement projects necessary to reduce flooding impacts to the city. This plan has also prevented development from occurring in areas that would be detrimental to collecting and passing storm water to the drainage system throughout the City of Waverly.

ELECTRIC DISTRIBUTION SYSTEM.

Lincoln Electric Systems owns and operates the electrical distribution system throughout the city of Waverly. Many of the distribution lines are overhead distribution but the city would like to transition to an underground transmission system. Electric generation and consumption are covered in greater detail in **Section 6** of this **Comprehensive Plan.**

Section 5

Education, Public Facilities/Utilities & Transportation.

***** INTERNET.

The internet service providers for the City of Waverly are Kinetic high speed internet by Windstream, Allo and Spectrum Communications.

* NATURAL GAS.

The City of Waverly currently uses Black Hills Energy provider as the source for natural gas for the residents of the community.

CABLE TV.

Spectrum Communications is the designated provider of cable TV service to the City. Internet and phone services can potentially be bundled with cable service. Both Dish network as well as Direct TV are available for residents who would like to get Satellite Television for their household. Kinetic by Windstream and Allo are also local Cable TV Providers.

***** TELEPHONE.

Telephone service is officially provided by Windstream, although Spectrum Communications and a variety of internet providers may offer Voice-Over Internet Protocol (VOIP) services.

* SOLID WASTE PICKUP.

Solid waste collection is available from three different companies to residents and businesses in the City, including Uribe Refuse Services, Industrial Services and Quik Dump Refuse Inc.

Education, Public Facilities/Utilities & Transportation.

TRANSPORTATION.

***** EXISTING CONDITIONS.

The City of Waverly Planning Commission, in coordination with Hanna: Keelan Associates and Schemmer Associates, has conducted plan workshops to define the elements of the planning process and gather input through a citizen participation process. Through these workshops, Schemmer Associates received comments from City of Waverly staff and citizen planning committee members to help define what the community would like to emphasize with a capital improvement program that covers the timeline for this Comprehensive Planning Document. This section covers the Transportation Element of this Comprehensive Plan.

During the previous comprehensive plan timeline, a number of capital improvement projects identified in the most recent document were designed and constructed throughout the City of Waverly. The following is a list of projects completed within that timeframe:

- Ash Hollow Dry Dam Construction of a 32-foot-high dam to hold back runoff from a 500-year storm along the Ash Hollow Tributary.
- Amberly Road Improvements from 141st Street to 148th Street Amberly Road was widened to a three-lane section with truck radius returns developed at 148th Street. This project included the design of an urban storm sewer drainage system and a trail along the north side of Amberly Road.
- Traffic Signal Construction at Highway 6 and Amberly Road After performing a traffic signal analysis, this intersection met the conditions necessary to warrant the construction of a traffic signal. This signal was built with state aid dollars and constructed in 2020.
- Folkestone Street Improvements This project includes the reconstruction of a residential street from 145th Street to 148th Street. Improvements include pavement reconstruction, ADA ramp construction and driveway apron reconstruction.

- Mill and Overlay of 141st Street from Mansfield Street north This project completed base pavement repairs for sections of road that had suffered severe damage and then completed construction improvements with an overlay of the corridor.
- 143rd Street Residential Rehabilitation Project This project included a 2" mill and overlay of 143rd Street from Amberly Road to Jamestown Street. This project also included base repair and the construction of ADA ramps along the corridor.
- Mansfield Street from 141st Street to 143rd Street Street improvements included pavement reconstruction, parking stall construction for access to Jaycee Park, trail construction, and ADA ramp construction.
- Lawson Park Trail This trail was constructed to link Lawson Park to the Anderson North Park neighborhood.
- Downtown ADA Ramp Construction The City of Waverly identified a number of intersections where curb ramps did not meet ADA standards in and around the downtown area of Waverly. This project reconstructed curb ramps along 139th Street, 140th Street, 141st Street, 142nd Street, Jamestown Street, Kenilworth Street and Lancashire Street.
- Annual ADA ramp compliance/improvement checks throughout Waverly in order to become compliant with standards.

Many of these projects were listed in the previous Comprehensive Plan and were prioritized as critical improvements for the city during the previous planning period.

❖ STREET NETWORK

The City of Waverly is divided into a north and south sections by Highway 6, a major arterial. The location of the City of Waverly lies along Interstate 80 just north and east of the City of Lincoln. Access from I-80 to the City of Waverly is at an interchange at the intersection of I-80 and Highway 6. There are other arterials that provide north-south and east-west routes through the City of Waverly. The following roads are considered other arterials;

- 141st Street from Heywood Street north to the north limits of the study area.
- 148th Street from Heywood Street/Bluff Road south to the south limits of the study area.
- Heywood Street/Bluff Road from 141st Street to the east limits of the study area.
- Waverly Road from 148th Street to the west limits of the study area.

All other roads located within the study area are considered local roads.

One major aspect influencing travel throughout the City of Waverly is the BNSF rail line that runs parallel to Highway 6. Roadways from the north side of Waverly to the south side of Waverly cross the railroad at either at-grade intersections or via an overpass. Overpasses of the BNSF railroad are located at Canongate Road and I-80. At-grade crossings of the BNSF railroad are located at 141st Street and 148th Street. There is currently not one pedestrian overpass of the BNSF railroad within the study limits.

***** EXISTING PEDESTRIAN ANALYSIS

In 2018 The City of Waverly commissioned a traffic study completed by Iteris called "Traffic Analysis for the City of Waverly. Pedestrian Study on Amberly Road and N. 148th Street" to analyze existing traffic volumes and pedestrian activity within the City of Waverly. A total of 12 intersections in the vicinity of the project study area were analyzed. The study area is identified in the traffic study and shows the location of the four schools found within the study area and the location of the following 12 intersections.

- o Highway 6 & Amberly Road.
- o N. 134th Street & Amberly Road.
- o Canongate Road & Amberly Road.
- o N. 140th Street & Amberly Road.

Section 5

Education, Public Facilities/Utilities & Transportation.

- o N. 143rd Street & Amberly Road.
- o N. 145th Street & Amberly Road.
- o N. 148th Street & Amberly Road.
- o N. 148th Street & Folkestone Street.
- o N. 148th Street & Heywood Street.
- o N. 148th Street & Highway 6.
- o N. 145th Street & Heywood Street.

* TRAFFIC OPERATIONAL ANALYSIS.

Existing traffic volume data was collected for both 24-hour average daily traffic as well as peak hour turning movements at intersections. Average daily traffic data was used as part of a signal warrant analysis for the intersections studied. Peak hour count data was used for both level of service analysis and signal warrant analysis. **Table 5.2, Page 5.34,** shows the existing 2018 peak hour traffic volumes.

Level of service (LOS) analysis was evaluated for the existing intersection operations during the A.M. and P.M. peak hours at the 12 study intersections. **Table 5.2** summarizes the existing LOS at the study intersections.

As shown in the Table, all intersections analyzed are operating at satisfactory levels of service (LOS D or bettor) during the A.M. and P.M. peak hours.

TABLE 5.2 EXISTING INTERSECTION PEAK HOUR LEVEL OF SERVICE 2018

		A.M. Peak Hour		P.M. Peak Hour	
<u>Intersection</u>	Control Type	<u>V/C</u>	$\underline{\mathbf{LOS}}$	<u>V/C</u>	$\underline{\mathbf{LOS}}$
Highway 6 & Amberly Road	Signal Controlled *	0.39	\mathbf{A}	0.28	A

^{*}Traffic signal at Highway 6 and Amberly Road was built in 2020.

Source: Schemmer Associates, 2023.

Education, Public Facilities/Utilities & Transportation.

❖ SIGNAL WARRANT ANALYSIS.

At the time of the study completion, the only studied intersection that met traffic signal warrants for construction was Highway 6 and Amberly Road. A traffic signal was constructed there in 2020. No other analyzed intersection met any of the 9 traffic signal warrants as outlined in the 2009 MUTCD Chapter 4C traffic control signal needs studies (pages 436 - 448).

❖ TRAFFIC ANALYSIS STUDY RECOMMENDATIONS.

Several recommendations were developed through this traffic study. While the traffic study is useful in analyzing data, it is also recommended that the primary focus of the City moving forward related to engineering, education, and enforcement of pedestrian related safety issues.

- Engineering: Recommendations related to the design and safety of pedestrian facilities.
 - o Analysis shows that the current traffic volumes do not satisfy signal warrants at the majority of study area intersections. The one exception is the intersection of Highway 6 and Amberly Road which had a traffic signal constructed at that intersection in 2020.
 - o The gap analysis included several findings:
 - There are not enough gaps along the 148th Street and Amberly Road corridors to serve the 30-minute peak period for pedestrians in the A.M.
 - There are select crossings that exceed 20 pedestrians during the 30-minute peak period to consider additional traffic control.
 - o Due to the location of existing crosswalks near unsignalized intersections and without intersections meeting traffic signal warrants, design of Rectangular Rapid Flashing Beacon (RRFB) deployment is recommended. Two locations along Amberly Road and two locations along 148th Street. One location at 140th Street and Amberly Road has already constructed an RRFB.
 - o No pavement marking or signing changes are necessary along Heywood Street.
 - o Data collection included inspection of signing and striping for pedestrian facilities, which resulted in following recommendations:
 - Traffic signing along the corridor is inconsistent with good signing practices and should be changed to better accommodate future crossing enhancements.

- Some signs need replaced as they are no longer compliant with the latest MUTCD.
- Some signs need to be relocated as the location, the mounting height and the overlap of signs is inconsistent with MUTCD.
- o A plan should be prepared for the construction of the remaining recommended RRFB's which includes signing and pavement marking updates for Amberly Road and 148th Street.

• Education:

- o Develop a specific School Campaign to begin before the school year starts, including information spread among social media tools and the local press.
- o Implement a program similar to other states or cities that have an annual campaign on safety. It is likely that this program could be City-wide and potentially linked with initiatives from the city of Lincoln or Lancaster County.
- Place Dynamic Message Boards with PSA messages before start of school and first weeks.

• Enforcement:

- o Establish a trained crossing patrol program during the peak student crossing times.
- o New concepts for enforcement, including a crosswalk or pedestrian decoy program.
- o Increase enforcement prior to school starting and recurrent events.

• Future Planning:

- o Construct Round-about at Canongate and Amberly Road.
- o Redefine truck routes and move trucks off Amberly Road.
- o Reclassify Amberly Road from Canongate Road to N. 148th Street as a Minor Collector.
- o Set school zone speed limit to 20 mph.
- o Reclassify Amberly Road from Canongate Road to Highway 6 as a Major Collector.
- o Reclassify Heywood Street west of 148th Street as a Minor Collector.

Education, Public Facilities/Utilities & Transportation.

***** FUTURE NEEDS ANALYSIS

City of Waverly staff met with Schemmer and Hanna:Keelan on January 12, 2023, to discuss Capital Improvement projects identified for the near term and other projects anticipated on a much longer time frame. From this meeting, a number of projects were discussed and prioritized based on internal staff direction and public input. The following projects were identified as near-term projects with time frames for construction in the next six years:

- Oldfield Street from Canongate to North 141st Street.
- Guildford Street from North 140th Street to Highway 6
- Woodstock Boulevard from North 139th Street to North 140th Street.
- Energy Way from Canongate Road to the west.
- Danvers Street from North 143rd Street to Castlewood.
- North 141st Street from Mansfield to City Limits.
- Deerpark Road mill and overlay.
- Heywood Street from North 140th Street to North 141st Street.
- Folkestone Street from North 143rd Street to Park Entrance.
- Jamestown Street from North 137th Street to North 141st Street.
- Lancashire Street from North 141st Street to North 142nd Street, North 142nd from Lancashire Street to Kenilworth Street, Kenilworth Street from N. 140th Street to N. 142nd Street.
- Eastbourne Street North 143rd Street to North 147th Street Eastbourne Circle, North 147th Street Eastbourne Circle to Castlewood, North 146th Street Oak Lane to Eastbourne Street.

Staff also discussed projects that are outside of the most recent 1 and 6 year Capital Improvement Plan due to high impacts to the community or prohibitive cost estimates for construction. These projects are as follows:

- North 148th Street Overpass at Highway 6.
- North 162nd Street Overpass at Highway 6.
- North 148th Street from Alvo Road to Mill Road.
- North 148th Street from Mill Road to Waverly Road.
- McKelvie Road from North 148th Street to North 162nd Street.
- North 162nd Street from McKelvie Road to Bluff Road.
- North 162nd Street from Bluff Road to Mill Road.

Section 5 Education, Public Facilities/Utilities & Transportation.

- Mill Road from North 162nd Street to North 148th Street.
- North 148th Street from Highway 6 to Waverly Road.
- North 148th Street from Mill Road to Waverly Road.
- Waverly Road from North 141st Street to North 148th Street.
- Waverly Road from North 148th Street to North 162nd Street.
- I-80 Interchange at 162nd Street.

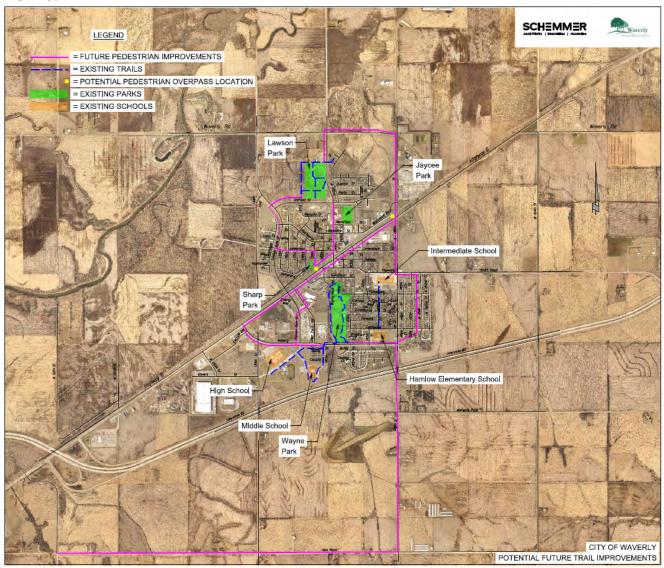

The planning commission meeting with Hanna Keelan and Schemmer occurred on January 23, 2023. Schemmer prepared a display outlining typical improvements to the future transportation network anticipated to be completed in the upcoming planning document window. Schemmer presented to the group projects that were identified in previous meetings and through research of desired improvements for the community. Through these conversations, the following prioritized projects were discussed:

- Pedestrian Bridge over the BNSF Rail corridor.
- Walkable community Trail projects around the City.
- Trail connections to Northeast Lincoln and the Murdock Trail.
- 148th Street Improvements.
- Intersection improvements @ 143th Street and Highway 6.
- 162nd Street Improvements.
- Intersection improvements @ 148th Street and Highway 6.

SIDEWALK AND TRAILS.

Throughout the planning process, both the City of Waverly and members of the planning commission have emphasized the importance of making the city a more walkable community. The last planning document identified a loop trail system surrounding the city and connecting many of the city's landmarks as part of a larger trail network. Aspects of the trail system have been completed recently as parts of other capital improvement projects. The trail along the north side of Amberly Road, the trail construction along Lawson Park and planned trail projects along Oldfield Street and Canongate Road would be integral parts of a loop system around the town. The **Future Trails System Map** is highlighted in **Illustration 5.4**, **Page 5.39**.

FUTURE TRAILS SYSTEM MAP WAVERLY, NEBRASKA ILLUSTRATION 5.4

There are a number of landmarks that would be linked to each other through this trail system. Waverly High School, Waverly Middle School, Hamlow Elementary School, Wayne Park, Jaycee Park, Lawson Park, and other pedestrian friendly destinations throughout the city. Future trail connections should extend to Northeast Lincoln and the Murdock Trail. The loop areas should extend to the east around potential future residential developments and along Highway 6 to provide access locations to the greatest number of residents possible living within the city limits.

One of the main barriers for providing a loop system around the City of Waverly is the BNSF railroad and Highway 6 corridor. Plans for crossing pedestrians across this barrier were proposed as part of an elevated structure located near Sharp Park and 139th Street. A stand-alone structure must be considered as a part of a strategy to get pedestrians from the north side of Waverly to the south side of Waverly and vice versa. The Canongate Road viaduct was constructed nearly 35 years ago and at the time it was constructed, pedestrian activity was not high enough to warrant provisions for a separated walkway along the Canongate Road viaduct. Extensions to the south should also include some accommodation of pedestrians along 148th Street to cross I-80 and provide a pedestrian path to the south side of the interstate.

* CAPITAL IMPROVEMENT PROJECTS.

The City of Waverly, through meetings held between the Comprehensive Planning Committee and the consultants developing the document, have identified a plan for capital improvements in and around the City of Waverly. These projects fall under two categories: preservation and growth. Preservation projects are intended to maintain and prolong the life of infrastructure facilities in and around the city of Waverly. Growth projects are intended to provide or expand services and facilities to areas where sufficient infrastructure is lacking.

As part of this task, Schemmer has been asked to classify projects identified previously in one of these two groups and what timeframe these projects could be constructed.

Section 5

Education, Public Facilities/Utilities & Transportation.

Group 1 - Short Term Preservation Projects.

Projects identified in this group are projects intended to be constructed within the current planning period and accomplish the objective outlined above for preservation projects.

<u>Intersection Improvements at Amberly Road and Canongate Road</u> This project looks at improving traffic operations at the intersection of Amberly Road and Canongate Road. Traffic volumes have increased with student enrollment increases at Waverly High School and Waverly Middle School. Traffic operations through this intersection are impacted by school traffic during the morning drop-off and afternoon pickup times.

The previous planning document completed in 2013 and the pedestrian study completed in 2018 both recommend a roundabout for this intersection. The signal warrant analysis for this intersection does not justify a traffic signal being placed at this intersection. Roundabouts have been shown to provide a safer and more efficient means of controlling traffic than a traditional traffic signal. The approach travel speeds and severity of crashes are also significantly reduced with roundabouts.

<u>Oldfield Paving Improvements – This project will pave Oldfield from 141st Street to Canongate Road.</u> The current surfacing for Oldfield Street is gravel. This project would pave a three lane concrete section and also include the construction of a sidepath from Lawson Park to Canongate Road and Kenilworth Street. This project will improve access to Lawson Park and reduce dust for residents living in the area.

Plans for this improvement have been developed and are ready to be constructed once funding becomes available. The intersection of Oldfield Street and 141st Street was constructed with earlier improvements.

<u>Intersection Improvements along US-6 at 120th Street, 130th Street, 144th Street and 148th Street – These projects would improve access and traffic operations at intersections along US-6. As existing traffic volumes increase, improvements will be necessary to address potential safety concerns and delay for vehicles turning onto US-6. Improvements could include a traffic signal or geometric improvements at the intersection. Improvements may also include developing an access management plan for side road access points to US-Highway 6 and developing improved intersection geometrics at selected locations and closing access to the highway at other locations.</u>

Section 5

Education, Public Facilities/Utilities & Transportation.

Group 2 - Short Term Growth Projects.

Projects listed in this group are to be constructed within the current planning period and help encourage growth within the community.

<u>Loop Trail around City of Waverly –</u> This group of projects would identify and construct a pedestrian trail around the city. This trail would connect residents to destinations within the city that are high traffic areas for pedestrians. These group of projects would encourage more pedestrians and bicycle usage throughout the community. Projects in this group can be stand-alone projects similar to the trail at the north end of Lawson Park or bundled with other street improvements like the trail along Amberly Road.

<u>Pedestrian Bridge over US-6 and BNSF</u> – This project would build a pedestrian bridge over US-6 connecting the north side of Waverly and the south side of Waverly. One potential location for this structure would be near Sharp Park connecting near the Casey's on Highway 6. This project would provide a pedestrian connection across US-6 and the BNSF Railway that does not exist today.

<u>148th Street Improvements</u> – This project will expand 148th Street to a four-lane section south of Highway 6 and a three-lane section north of US-6. These improvements will provide greater access for residents living and travelling on the east side of Waverly.

148th Street serves as a primary route for industrial traffic generated by businesses located on the east side of Waverly. Traffic north of Highway 6 use 148th Street and Waverly Road as primary routes for semi-truck traffic. The existing pavement condition is deteriorating and may require reconstruction in the next planning time period. Preliminary plans for some of these improvements have been started in recent years. As development grows along this corridor, improvements for 148th Street and the intersection at Highway 6 will need to be considered.

<u>Group 3 – Long Term Preservation Projects.</u>

<u>Miscellaneous Pavement Rehabilitation Projects – These projects are intended to address pavement failure issues related to residential streets within the City of Waverly.</u> There are a number of identified projects that fall within this group. These projects will need to be prioritized and constructed in future years by city staff.

Section 5 Education, Public Facilities/Utilities & Transportation.

<u>Miscellaneous ADA Ramp Projects</u> – These projects will improve handicap ramps that do not meet current standards found at residential intersections. Projects in this group will be added as money and priorities are developed as part of future Capital Improvement Project programs.

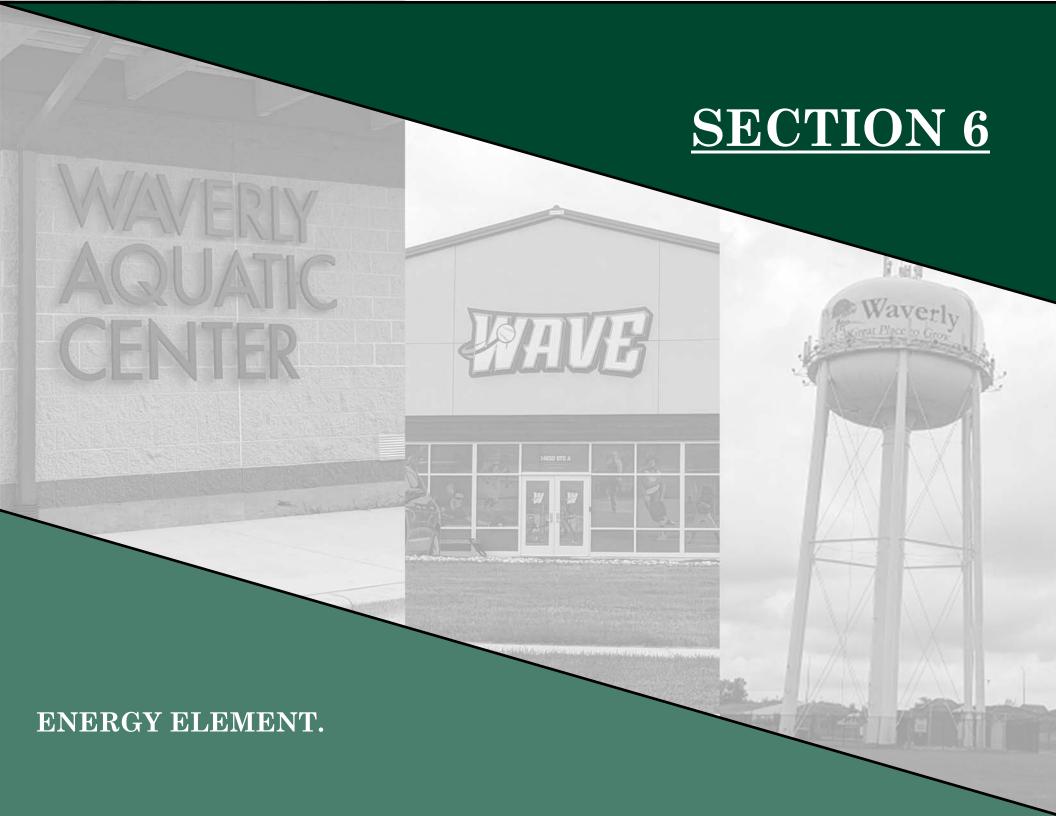

125th Street and Highway 6 – This intersection improvement will likely be a signalized intersection created to have access to the potential development of a large fuel / convenience store with the intent of capturing interstate traffic. This traffic signal would be necessary to safely convey semi-truck traffic into and out of this facility. The timeline for this project will depend on the progress made in constructing the development and the traffic that is generated from that property.

Group 4 - Long Term Growth Projects.

<u>US-6 Improvements East of Waverly</u> – This project would expand capacity for Highway 6 east of the Waverly City limits. The benefits would include greater access for developments east of Waverly and a safer section for vehicles turning left out of the through lane. This project would include improvements to a state highway and preliminary plan improvements would include reconstruction of a three-lane concrete section. This project is not identified in the State's 1- and 6-year plan.

<u>I-80 Interchange at 162nd Street – The City of Waverly has considered a possible interchange located near 162nd Street on I-80. These improvements are in the planning stage at this time and an interchange justification study would be necessary to continue developing plans for this interchange. Access to the interstate on the east side of Waverly would provide a second access point to the City and a more direct route for trucks looking to access the manufacturing tracts on the east side of Waverly.</u>

East Beltway (North Terminus) – The Nebraska Department of Transportation and the City of Lincoln have developed a conceptual plan for an East Beltway around the City of Lincoln connecting Nebraska Highway 2 and Interstate 80. The north terminus for this project would connect the City of Waverly with these improvements. This project would provide a more direct link for vehicles and trucks to a highway system and a bypass route for the City of Lincoln. Preliminary planning and a corridor analysis has been completed. Plan development and environmental documentation are the next steps for this project. Construction, if this project moves forward, will be outside the planning period for this document.

SECTION 6 ENERGY ELEMENT.

INTRODUCTION.

This **Section** of the **Waverly Comprehensive Plan** complies with a July, 2010 amendment to Nebraska State Statues 23-114.02, requiring an "**Energy Element**" with a Community Comprehensive Plan. This component of the **Plan** assesses the energy infrastructure and energy use in Waverly. This **Section** is also intended to evaluate the utilization of renewable energy sources and promote energy conservation measures.

PUBLIC POWER DISTRIBUTION.

Energy usage and consumption throughout the City of Waverly has followed the trends prevalent in the State of Nebraska. Electrical power is distributed throughout the City of Waverly by the **Lincoln Electric System (LES)** and to a portion of the One-Mile Planning Jurisdiction by **Norris Public Power District (NORRIS)**.

LES and NORRIS have a formal Joint Planning and Service Area Adjustment Agreement, which established a "Joint Use Area." The Joint Use Area results in NORRIS providing electrical service in the eastern portion of the One-Mile Planning Jurisdiction, one-half mile east of 148th Street and beyond, while LES covers the remainder of the area. LES provides all the electric power and NORRIS distributes the power.

The LES was established in 1966, as the first sole electricity provider in the City of Lincoln's history. Today, LES has a service area of approximately 200 square miles within Lancaster County, including Waverly, the City of Lincoln and the Villages of Walton, Prairie Home and Emerald.

Information regarding LES energy consumption and sources of energy production are included in the LES Annual Report.

ELECTRIC INFRASTRUCTURE, CONSUMPTION & REVENUE IN WAVERLY

The Waverly electrical infrastructure consists of two 115-12 kilovolt (kV) transformers at a substation located at 134th Street and the Highway 6 Corridor that serve the City of Waverly, as well as other transformers at substations nearby that provide capacity during contingency situations. "Transformer 1" has a capacity of 22.4 mega volt amp (MVA) and Transformer 2 has a capacity of 39 MVA. The electrical system in Waverly also consists of 12kV circuits that are evaluated to maintain adequate normal and N-1 contingency capacity to serve the current and anticipated loads. Both overhead and underground facilities are in place.

No specific issues with the existing electrical system in Waverly are known other than normal ongoing maintenance and asset life evaluation and replacement as needed. A project is planned to move the overhead facilities on 141st Street from Oldfield Street to Mansfield Street to underground in the next few years. A project is planned for Oldfield Street west of 141st Street to move the overhead facilities underground when the paving project is scheduled. Transformer 1 is also approaching the need for replacement based on age. Currently the replacement is scheduled for completion in 2031.

Table 6.1, Page 6.3, identifies **electricity consumption by sector,** for the City of Waverly, Nebraska. Overall, total electricity usage in Waverly has declined, slightly, from 2017 to 2022, or from 103,825,633 kilowatt hours in 2017 to 103,258,901 kilowatt hours in 2022. General service demand for medium-sized businesses has increase an estimated 29 percent between 2017 and 2022, from 7,393,636 kilowatt hours to 9,536,607 kilowatt hours in 2022. Residential electricity consumption has averaged a five percent annual increase in consumption between 2017 and 2022.

TABLE 6.1	
ELECTRICITY	CONSUMPTION BY SECTOR
WAVERLY, NEI	BRASKA
2017-2022	

					PERCENT		
Residential	2017 15,178,988	2018 16,977,016	2019 17,195,128	2020 17,559,423	2021 18,299,423	2022 18,978,277	CHANGE <u>2017-2022</u> +25%

^{**}Large Businesses have either a summer peak of 400KW or six consecutive months of 100,000kWh of usage.

NEBRASKA ENERGY CONSUMPTION.

During the last 40+ years, the State of Nebraska, as a whole, has vastly increased energy consumption. Trends in the Total Energy Consumption for the State of Nebraska, published in the "2021 Annual State Energy Report" of the Nebraska Department of Environment and Energy, is mirrored in each of the individual energy categories, coal, natural gas, gasoline and distillate fuel oil (primarily diesel fuel), nuclear power and hydroelectric production. Each energy type is detailed between 1960 and 2019, as follows:

- ♦ Coal consumption has increased from 20 trillion British Thermal Units (BTUs) in 1960 to 240.4 trillion BTUs in 2019. Peak use of coal was reached in 2013, surpassing the previous high set in 2011. The increase through 2013 was attributable to coal energy used to generate electricity.
- ♦ Natural Gas consumption has risen and fallen during the 58-year period between 1960 and 2019, beginning at 140.4 trillion BTUs, peaking in 1973 at 230.8 trillion BTUs and, by 2019, declining to 198.8 trillion BTUs.
- ♦ **Diesel Fuel** consumption nearly doubled in Nebraska between 1960 and 2019. Gasoline consumption increased by nearly 29 percent, from 78.8 to 102.4 trillion BTUs, as of 2019, and peaked in 1978 at 116 trillion BTUs.
- ♦ **Nuclear** power generation began in Nebraska in 1973 at 6.5 trillion BTUs. Usage has since increased to 72.6 trillion BTUs as of 2019. The peak use of nuclear power was in 2007 at 115.8 trillion BTUs.

Renewable energy consumption has grown, beginning in 1960 at 13.4, and peaking in 2019 at 199.3 trillion BTUs. Hydropower was the primary renewable energy source from 1960 to 1994. Biofuels, or ethanol production, began equaling hydropower in 1995. As of 2019, 58.2 percent of all renewable energy produced came from biofuels, 6 percent from hydroelectric, 32.2 percent from wind and 2.8 percent from wood products. Minor amounts came from geothermal and solar energy.

ENERGY CONSUMPTION BY SECTOR.

Commercial Sector: The commercial sector includes non-manufacturing business establishments, including energy use by local, state and federal governments. Energy use in the commercial sector closely parallels consumer energy use and economic activity in the State of Nebraska. More than 90 percent of all fuel used in the commercial sector was supplied by natural gas and electricity. Although natural gas has historically been the dominant fuel type, recent trends suggest a period of near parity between the two fuel types is likely into the near future. In 2018, a total of 148.3 trillion BTUs were consumed in the commercial sector.

Residential Sector: The residential sector consumed 169.2 trillion BTUs in 2019. Natural gas and electricity accounted for 87.3 percent of the total energy use in the residential sector.

Industrial Sector: The industrial sector includes manufacturing, construction, mining, forestry and agricultural operations. Energy use in the industrial is more diverse, with natural gas, renewable energy, electricity, coal and a variety of petroleum products all being utilized. The industrial sector consumes more energy than any other sector in the State. In 2019, it accounted for 42 percent, or 376.1 trillion BTUs, of the State's total energy consumption.

Transportation Sector: Public and private vehicles, railroads, aircraft and boats are all included in the transportation sector. Motor gasoline and diesel fuel products accounted for 93 percent of the energy use in the transportation sector in 2019. Approximately 206.9 trillion BTUs were used in the transportation sector in 2019.

Agricultural Sector: As per the U.S. Department of Agriculture National Agricultural Statistics Service, there were 47,400 farms and ranches on 45.2 million acres in Nebraska in 2017, encompassing 91 percent of the State's total land area. Energy demand information in this sector is not available on a consistent or annual basis. However, energy needs in the agricultural sector is mainly due to irrigation demand. In Nebraska, 3.1 million acres were irrigated in 1966 and has increased to 9.4 million acres in 2020.

ENERGY CONSERVATION POLICIES.

The most effective means for the City of Waverly to reduce its total energy consumption in each of the Energy Sectors (and by energy type) is by conservation practices and by continuing to promote the conversion to alternative energy systems when appropriate. The following is a list of policies to guide energy practices throughout the City:

- ❖ Promote the use of "Net Metering" or the use of one or more combinations of the five alternative energy sources to reduce residential, commercial and industrial facilities consumption of energy.
 - ♦ Utilize the Waverly Zoning Regulations to control the placement and operation of alternative energy systems.
 - Require compliance with the Conditional Use permit process so that established conditions are met by the applicant.
 - ♦ Utilize the NPPD net metering service it established to assist the City in complying with Nebraska's Net Metering Law.
 - Promote the development of vocational education opportunities in the District 145 (Waverly) Public Schools, trade schools, Community and State colleges and universities to educate the current and future workforce in alternative energy design, fabrication of equipment and maintenance.
- ❖ As other sources of Alternative Energy Systems are developed or become cost-effective for use in Nebraska, amend planning documents of the City to locate and control their operation.
- ❖ Promote the use of conservation methods to reduce the consumption of energy usage in each of the individual sectors including residential, commercial and industrial (which includes agricultural and public uses).
 - Promote the expanded use of solar and geothermal exchange energy systems for applications throughout the City of Waverly One-Mile Planning Jurisdiction.

Section 6 Energy Element.

- Promote the rehabilitation of agricultural, residential, commercial, industrial and public/quasi-public buildings utilizing weatherization methods and energy efficient or "green building" materials in conformance to the "LEED" Certified Building techniques.
- ♦ Implement conservation programs supported by NPPD for its member communities. For example, the ENERGYSMART Commercial Lighting Program provides cash incentives to businesses that replace old lighting fixtures with high-efficient light fixtures such as LED to reduce energy costs.

* Increase Building Efficiency.

- ◆ Lighting transition City street lighting to a Light Emanating Diode (LED) system.
- ♦ Retrofit Residential Buildings provide incentives and construction advice to the public to expand the restoration of homes including windows, doors, attic ventilation, insulation and alternative energy systems such as solar panels.
- Retrofit Old Public and Commercial Buildings provide incentives and construction advice to the public for Restoration Best Management Practices for windows, doors, attic ventilation, insulation, solar panels, lighting.
- ♦ New Construction Codes Implement Best Management Practices (BMPs) to city codes and educate homeowners and realtors.

❖ Increase Transportation Efficiency.

- ♦ Seek out funding sources to establish an "Electric / Natural Gas" City Fleet of Vehicles to replace existing older vehicles.
- Promote Pedestrian Uses sidewalks, crossing guards.
- ♦ Increase and encourage bicycling; carpooling.
- Increase residential development density- with parking requirements.

- Redevelop vacant parcels and/or dilapidated structures.
- Redevelop older existing neighborhoods by establishing architectural design standards as an overlay district within residential districts of the Waverly Zoning Regulations.

❖ Plant Urban Forests.

- ◆ Trees / Urban Forests provide incentives for city rebate programs to replant new trees. Shade from trees reduce peak electric demands during the summer and provide wind breaks during the winter.
- ♦ Compost brush and trimmings utilize the Best Management Practices utilized by other communities to provide a public deposit site to compost brush and trimmings.
- Create a waste wood recycling/composting/energy generation program.
- Establish and maintain a dead-tree wood recovery and re-use program.

❖ Support Low Impact Development (LID) and Green Infrastructure Programs.

- ♦ Specify LID design options in engineering services contracts for subdivision development, storm water and parking lot improvements.
- Provide continuous education to the City Planning/Zoning Staff, City Administrator and Public Works Staff in the new LID designs and BMPs (Best Management Practices) for operation and maintenance of LID projects.
- Calculate and track the public and private construction and life cycle cost savings for LID projects.
- Promote Water Conservation through use of low impact lawn care, rain barrels, alternatives to paved driveways, gray water & potable water systems and xeriscraping.

- Require LID and Green Infrastructure Storm Water Detention and urban forestry practices in Subdivision Agreements.
- Provide incentives to the public and developers to expand energy efficiency, LID and Green Infrastructure, within the annual City Budget.

* Create a Zero Waste Community.

- Reduce waste disposal with a 10-year Zero Waste strategy in support of achieving 90% resource recovery (recycling, reuse, repair, composting, redesign).
- Provide universal access to curbside recycling services for all residential dwellings and businesses.
- Gather annual data on waste disposal and resource recovery by volume.
- Provide access to recycling in public areas and major Community events.
- Establish designated public drop-off sites and promote the benefits of recycling facilities and develop the most efficient collection and transport of recycled materials possible.
- Support creation of publicly owned Zero Waste facilities, including contracting approaches for private operations, or explore public-private partnership opportunities for Zero Waste infrastructure and services.
- Provide Community Gardens & Composting divert organic compost to a local compost operation.
- ♦ Establish education and awareness campaigns promoting the benefits of Zero Waste for the local economy, the environment and public health.

CITY OF WAVERLY, NEBRASKA

ECONOMIC DEVELOPMENT STRATEGY & ACTION PLAN.

CITY OF WAVERLY, NEBRASKA ECONOMIC DEVELOPMENT STRATEGY & ACTION PLAN.

Prepared by: Waverly Economic Development Advisory Committee (WEDAC).

May 24, 2023

Strategy 1: Define and implement a future role for the WEDAC.

Action 1. Name change: Waverly Economic Development ACTION CORPORATION.

- Action 2. Officially organize as a not-for-profit, 501(C3) entity.
- Action 3. Secure a full-time Economic Development Director, to work under the guidance and direction of the WEDAC.
- Action 4. Create working relationships with primary both public and private community and economic development entities.
- Action 5. Establish an annual increase Community Growth Objective of 2 to 2.5 percent. This selected Growth Objective will directly impact economic development efforts in Waverly, including, but not limited to housing, local and highway commercial, industrial and public/quasi-public development. A commitment from both the private sector and the City to assist in financing economic development projects will be needed.
- Strategy 2: WEDAC to secure important community and economic development certifications, to increase Waverly's value with funding entities.
 - Action 1. WEDAC secure Leadership Certified Community status.
 - Action 2. WEDAC secure Economic Development Certified Community status.

- Strategy 3: Continue a progressive mode of funding and conducting Local Community Planning Initiatives/Projects.
 - Action 1. WEDAC to consult and work with City Council, Community Development Agency (CDA) and Planning Commission to define and implement important local planning activities, both of community and economic development importance.

Strategy 4: Maintain an active, participatory CDA in Waverly.

- Action 1. Consider the future role of the CDA as a Community Redevelopment Authority (CRA), with the powers and authority as defined in Neb. Rev. Stat. 18-2101 to 18-2144. Consider the hiring of a director for the CRA, to, also, serve in a similar, dual capacity with the WEDAC.
- Action 2. Continuously evaluate the provision of Tax Increment Financing (TIF) in Waverly, to ensure that TIF is an incentive for development, but also remains a "but-for" subsidy, to protect the Community's tax base.
- Action 3. TIF and other tools of public and private funding should be considered for needed commercial, industrial and housing development activities, as defined in Local Planning Initiatives, on a case-by-case basis.

- Action 4: Continue the process of urging land owners in the Redevelopment Area to produce a Redevelopment Plan, with consideration of removing selected properties from the Area and/or the CDA/CRA purchasing and pursuing developer(s) for said properties.
- Action 5: The WEDAC and CDA/CRA to prepare a Redevelopment Planning/TIF informational piece, by defining and detailing acceptable uses of TIF, as determined by the City Council, with an associated application form, all in an effort to educate both the Community and potential developers on the availability and use and process for obtaining TIF in Waverly.
- Action 6: Expand the Redevelopment Area in Waverly to include selected properties along the HWY 6 Corridor, Wayne Park and the vacant Methodist Church property at 143rd & Folkestone. This could provide TIF assistance in redevelopment efforts of the former Honey Creek Restaurant building, the Park (reclamation associated with the existing pool and other selected amenities) and the potential development of a senior housing program at the Methodist Church site.
- Action 7: Create a Downtown Revitalization Plan with an associated Plan of Implementation.
 - *Purpose 1:* To create a designated social/entertainment zone in Waverly.
 - **Purpose 2:** To provide TIF (and other public/private funding assistance in refurbishing the existing Downtown by rehabilitating/(possibly) repurposing existing buildings, infill developments and (possibly) the improvement/repurposing of the existing City Hall.

Strategy 5: Major Economic Development Specifics.

Action 1. Land Use & Zoning.

 Re-evaluate the existing land use designation for selected undeveloped land parcels in the Redevelopment Area.

Purpose: Reclassify such properties to an alternative land use and appropriate zoning paring to better enhance development opportunities to meet the local needs of the Community.

Action 2. Housing Specific.

• Focus on the development of both Senior and Family Housing, both owner and rental, for selected, appropriate price points. This would include housing for person with special needs.

Purpose: Approach housing development in a "comprehensive manner", ensuring that the City of Waverly has the capacity to meet the housing needs of those desiring to reside in the Community in safe and decent housing.

• Explore the potential for a "Workforce" specific housing program.

Purpose: To begin to match housing needs with the increase of employees/workers in Waverly. "Target" populations would include employees of local industries, businesses and the school.

• Seek out and secure all available, both private funding sources and public tools of intervention.

Purpose: To expedite the development of new housing and the rehabilitation of the existing housing stock in Waverly.

Action 3. Commercial Specific.

- Implement a Commercial Development Initiative in Waverly to meet the needs and wants of the citizenry and local leadership.
 - **Purpose 1:** To provide a diversity of commercial retail types, as recommended by the Community.
 - Purpose 2: To provide the development of the following priority businesses and services in the Community; family restaurant, multi-product grocery store, lodging facility, discount store and medical and vision clinic.
- Implement a program to assist existing businesses and services to expand, while retaining and/or increasing employees.

Purpose: To maintain a commitment to the businesses currently serving the Community.

• Involve the Sandhills Global Event Center (SGEC) in selected economic development projects in the City of Waverly.

Purpose: To create a working relationship/partnership with the SGEC, creating projects that benefit both parties.

Action 4. Industrial Specific.

• Define and seek out those light industries most appropriate for the Community of Waverly.

Purpose: To ensure that any new industry "fits" with the expectations and wants of the Community, including type and operational style of the company. The relocating of existing industries should be investigated, as an overall improvement and attraction to the Community.

• Ensure any new industry accepts the role of a being a "community partner" and commits to making a buy-in with the Community of Waverly.

Purpose: A commitment to be involved in the social/economic affairs of Waverly and provide monetary investment/contribution to proposed community and economic development projects, including, but not limited to being an active partner in a planned workforce housing program.

Action 5. Public/Quasi-Public Specific.

- Meet the challenge of providing the Community of Waverly with modern, appropriate public/quasipublic projects.
 - **Purpose 1:** To enhance the attraction of Waverly, a continuous effort of identifying, planning and implementation of public projects and events should be a priority of the local leadership.
 - Purpose 2: The following public services should be given development priority; completion of the aquatic center and associated amenities, reclamation/rejuvenation of Wayne Park, new City Hall, new maintenance facility, new fire station, senior center and library, expansion of school facilities, park improvements/additions, including a new pavilion/gather place, trail development, dog park and community/civic center with fitness/recreational amenities.

Action 6. Transportation/Public Utilities.

- Maintain a transportation and public utility system that is modern and meets the future land use growth expectations of the City.
 - **Purpose 1:** A transportation/public utilities system that attracts and allows for the potential expansion/growth of new and existing new commercial and industrial businesses.
 - Purpose 2: The following transportation system components should be given priority in the future development of Waverly; safe vehicular roadways, safe pedestrian routes/trail system, the public schools environs, pedestrian overpass for Highway 6/railroad tracks, upgraded improvements along Highway 6 (to enhance the entry into Waverly), the widening of 148th Street, to include turn lanes and sidewalks, a potential, future second Interstate 80 interchange at 162nd Street and the support for the proposed East Beltway.

Waverly Economic Development Advisory Committee:

Abbey Pascoe, Waverly City Council President, WEDAC Chair Bill Gerdes, Mayor, City of Waverly
Stephanie Fisher, City Administrator
Kris Bohac, Chair, Waverly Planning Commission
Mike Palm, City Building Inspector/Zoning Administrator
Cody Mosel, Branch Manager, First State Bank
Dave Watts, Vice President, Watts Electric
Greg Dunlap, President, Horizon Bank
Natasha Hoyer, Owner, Patina Joe Boutique & Coffee

The Waverly, Nebraska Community Housing Study was prepared as a component of the Waverly Comprehensive Planning Program, funded by the Nebraska Investment Finance Authority and the City of Waverly. The Study was completed with the guidance and direction of the Waverly Planning Commission and Planning Steering Committee. The Study addresses the requirements set forth in Nebraska Legislative Bill 866 (Table 7).

RESEARCH APPROACH & PLAN OBJECTIVES.

SECTION 1

RESEARCH APPROACH & PLAN OBJECTIVES.

INTRODUCTION.

This Community Housing Study provides statistical data identifying past, present and projected demographics, local housing needs/demand and specific initiatives for the promotion and development of affordable housing in the City of Waverly, Nebraska, for all population and income sectors. The Waverly, Nebraska Community Housing Study was conducted for the City of Waverly, Nebraska, by Hanna:Keelan Associates, P.C., a Nebraska based community planning and research consulting firm.

The Waverly, Nebraska Community Housing Study adheres to the guidelines presented in *Nebraska Legislative Bill 866*, requiring all Cities less than 50,000 population to prepare an "Affordable Housing Action Plan" on or before January 1, 2024, that promote the development of local affordable housing concepts/projects.

RESEARCH APPROACH.

The Waverly Community Housing Study is comprised of information obtained from both public and private sources. All 2000 and 2010 demographic, economic and housing data for the Community were derived from the U.S. Census and the 2016-2020 American Community Survey. 2020 Census "Redistricting Data" is also documented. The projection of demographic, economic and housing data was completed by the Consultant, with the use of these and secondary data sources. A 10-year projection of affordable housing "target" demand is included in this Plan.

To facilitate effective planning and implementation activities, housing demand projections were developed for five and 10 year periods. The implementation period for this Housing Study will be May, 2023, to May, 2033.

This Housing Study included both quantitative and qualitative research activities. The qualitative activities included a comprehensive citizen participation program consisting of Surveys, meetings with a locally-organized "Planning Steering Committee," all in an effort to understand the issues and needs of Waverly residents. Quantitative research activities included the gathering of multiple sets of statistical and field data for the Community. The collection and analysis of this data allowed for the projection of the Community population and household base, income capacity and housing profile and demand.

PLAN OBJECTIVES.

"The purpose of the Waverly Community Housing Study is to establish a 'housing vision' and provide a 'vehicle to implement' housing development programs with appropriate public and private funding sources for the City of Waverly, Nebraska. This will ensure that proper guidance is observed in the development of various affordable housing types for persons and families of all income sectors."

The Objectives of this Waverly Community Housing Study include:

- (1) **analyze past and present housing trends** in Waverly, with emphasis on determining the 10-year demand for affordable housing for specific population groups, income sectors and price points (products);
- (2) **provide a process** for **educating and energizing the leadership** of Waverly to take an active role in improving and creating modern and safe, both market rate and affordable, housing options;
- (3) identify program-specific affordable housing programs to address the needs of the local workforce, the elderly and retirees, families of all sizes and income levels and persons with special needs by introducing new and innovative housing programs that are a "fit" for Waverly residents, to address both immediate and long-term housing needs, with Place-Based Development Components;
- (4) match housing development efforts with jobs created via commercial and industrial development efforts;
- (5) identify future **land use needs/projections** associated with affordable housing needs, as well as demands for affordable housing in Waverly, in conjunction with the determination of residential land use designation in the **Waverly, Nebraska Comprehensive Plan;**
- (6) determine the effectiveness of local **Zoning Regulations**, including recommended amendments/revisions that support housing development in Waverly; and
- (7) identify **local**, **State and Federal funding sources** with the potential to support affordable housing development in Waverly, Nebraska.

This **Waverly Community Housing Study** is prepared in a manner that thoroughly addresses all of the preceding **Objectives**. Public opinion, population and economic trends and projections and future housing needs are detailed in the following **Sections** of this **Plan**:

- * Citizen Participation Program.
- ***** Waverly Community Profile.
- **❖** Housing Unit Target Demand & Land Use Analysis.
- ***** Housing Development & Preservation Initiatives.
- **❖** 10-Year Affordable Housing Action Plan.

This **Community Housing Study** should be utilized by City staff and elected leadership, Waverly Planning Commission, Greater Waverly Area Foundation Fund, Waverly Chamber of Commerce, District 145-Waverly Public Schools, Community Action partnership of Lancaster and Saunders Counties, housing development corporations and other important for-profit and non-profit groups and organizations in Waverly and Lancaster County. This **Study** will also make the use of housing funds more effective and encourage investors to make better informed decisions that target the Community's needs and desires for new housing types. All of this will result in stability and growth for the **City of Waverly, Nebraska**.

SECTION 2

CITIZEN PARTICIPATION PROGRAM.

INTRODUCTION.

The Waverly Community Housing Study included both qualitative and quantitative research activities. Discussed in this Section is the comprehensive citizen participation program that was implemented to gather the opinions of the Waverly citizenry, as well as local major employers regarding local housing issues, needs and opportunities. Planning for the Community's future, as it relates to affordable housing for all income sectors, is most effective when it includes opinions from as many citizens as possible.

WAVERLY PLANNING COMMISSION & STEERING COMMITTEE.

Preparation of this **Community Housing Study** included the input of the **Waverly Planning Commission** and a locally-based "**Planning Steering Committee**," comprised of City staff, elected officials, representatives of major employers and non-profit organizations and local citizenry representing the Community. The collaboration of the Planning Commission and Steering Committee provided the Consultant with a foundation of knowledge to create **housing development and preservation initiatives** and a plan to implement recommended **Housing Development Programs** that addressed the housing interests of Waverly. The following housing issues were identified by Steering Committee members and will need to be addressed during the next 10 years, in conjunction with the Community goals set forth in the **Waverly, Nebraska Comprehensive Plan.**

The following documents housing issues, strengths, weaknesses and opportunities, as identified by the Waverly Planning Commission and Planning Steering Committee.

- Waverly residents identified a need for a maintenance-free senior retirement community.
- Affordable rental housing options, specifically apartment style housing, are scarce in Waverly. Teachers, both new and existing, at District 145-Waverly Public Schools were identified as having the most difficult time finding housing in the Community.
- Both the Waverly Planning Commission and Planning Steering Committee agree that an assisted living facility supporting 36+ units would easily be supported by residents of the Waverly Community.
- City leadership should be cognizant of the risks and rewards regarding the speed that development, especially housing, is occurring in Waverly. Residential growth needs to involve multiple areas of housing need and not solely focus on single family housing.
- New housing developments in Waverly have generally occurred in the northern and southern portions of the Community. New housing sale prices are generally \$325,000 or higher.
- Waverly's oldest housing stock is generally located south and west of the Downtown. Evidence of moderate- to substantial rehabilitation is present in these neighborhoods.
- Local efforts are underway to address residential growth areas for Waverly, generally located east of the existing Community limits. This land is generally free of environmental barriers, but will need the support of public infrastructure.

COMMUNITY OPINION SURVEY.

A Community-Wide "Opinion Survey" was made available to households in Waverly on pertinent local websites and social media outlets. A total of 201 Surveys were completed and returned, providing valuable public input. Survey participants were asked to provide their opinion about a variety of Community issues, needs and opportunities, including barriers to obtaining affordable owner or rental housing and specific housing types greatly needed throughout the Community. The following summarizes the results of the housing portion of the Survey. The complete results of the Survey, including community growth, land use, zoning and community development opportunities are highlighted in the Waverly, Nebraska Comprehensive Plan and "Appendix I" of this Study.

- Utilizing a scale from 1 ("not needed") to 3 ("greatly needed") the following were identified by participants as the greatest housing needs in Waverly.
 - o Single family housing (2.22).
 - o Housing choices for first time homebuyers (2.22).
 - o Senior independent living housing (2.08).
 - o General rental housing (2.07).
- Participants were largely in support of utilizing local, State and/or Federal grant funds/dollars for the following programs:
 - o Owner Housing Rehabilitation Program (74% support).
 - o Renter Housing Rehabilitation Program (59% support).
 - o Purchase, Demolition & Replacement of existing deteriorated housing (79% support).
 - o Purchase-Rehab-Resale of vacant housing (75% support).
 - o Down Payment Assistance to first-time homebuyers (53% support).
- A total of 72 participants, or 37 percent, identified a willingness to contribute or donate money to support a local community, economic or housing development activity.

WORKFORCE HOUSING NEEDS SURVEY.

The City of Waverly, in cooperation with major employers, conducted a Workforce Housing Needs Survey to determine the specific renter and owner housing needs of the Area's workforce. A total of 208 Surveys were returned.

Survey participants were asked to provide information on such subjects as issues and barriers to obtaining affordable housing, place of employment, annual household income and in where participants would like to become either a homeowner or a renter. The following are highlights that were developed from the **Survey**. The complete **Survey** results are available in "**Appendix I**" of this **Housing Study**.

DEMOGRAPHICS.

- Participating employers included but were not limited to Waverly-District 145 Public Schools, Millard Lumber, and Smart Chicken.
- A total of 60, or 47 percent of all 128 participants lived inside the Corporate Limits of Waverly. An estimated 42 percent reside in the City of Lincoln.
 - o Commute time to work:
 - 10 to 20 minutes (45 participants).
 - Less than 10 minutes (34 participants).

INCOME.

- Household income: (128 total participants).
 - o \$100,000 to \$149,000 42 participants (32%).
 - o \$75,000 to \$99,000 27 participants (21%).
- Monthly rent:
 - \circ \$601 to \$1,250 12 participants (20%).

Section 2: Citizen Participation Program.

- Monthly mortgage:
 - o \$1,001 to \$1,750 55 participants (48%).

BARRIERS TO AFFORDABLE HOUSING.

- For renters, the top issues or barriers experienced with obtaining affordable, suitable housing include the following:
 - o Cost of rent (83%).
 - o Lack of availability of decent rental units in your price range (55%).
 - o Condition of existing rental housing (22%).
- For owners, the top issues or barriers experienced with obtaining affordable, suitable housing include the following:
 - o Housing purchase prices/cost to own (67%).
 - o Lack of sufficient homes for sale (46%).
 - o Cost of utilities (23%).
- When asked what the most was that their family could afford for a home, 32 percent, or 25 participants identified a home purchase price between \$201,000 and \$300,000.
- When asked what the most was that their family could afford for monthly rent, 32 percent or 20 participants identified a range between \$1,101 and \$1,500.
- When asked what amenities would make Waverly a more attractive place to live or relocate, participants selected the following:
 - o Restaurants 81 participants (84%).
 - o Retail/Shopping 57 participants (59%).
 - o Housing Choices 47 participants (48%).

SECTION 3

WAVERLY COMMUNITY PROFILE.

INTRODUCTION.

This **Section** of the **Waverly, Nebraska Community Housing Study** provides a population, income, economic and housing profile of the Community. Presented are both trend and projection analysis. Emphasis is placed on 10-year projections of change from **May, 2023, to May, 2033.** This planning period provides a reasonable time frame for development and allows the Consultant to propose demographic projections with a high level of confidence.

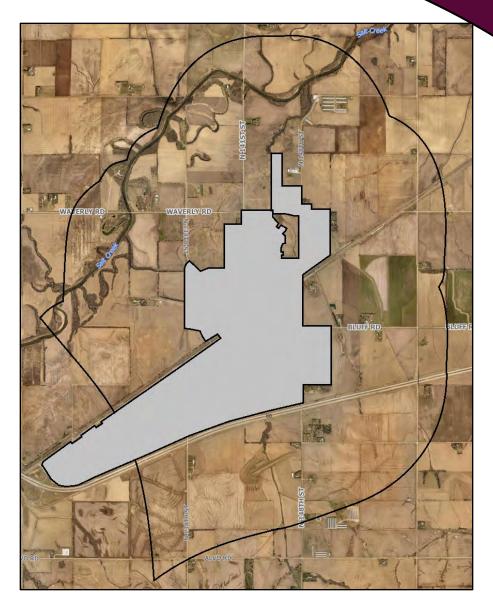

Population, income, economic and housing projections are critical in the determination of both housing demand and need in Waverly and are the foundation of all major planning decisions. A variety of data sources, including 2000 and 2010 U.S. Census data, 2020 Census "Redistricting Data," the 2016-2020 American Community Survey, Nebraska Department of Labor and the Bureaus of Economic Analysis & Labor Statistics were documented. On-site field work and analysis of Community development and preservation activities also provided insight to quality of life and living conditions in **Waverly**. The statistical data, projections and associated assumptions presented in this Profile will serve as the very basic foundation for preparing the Community with a future housing stock capable of meeting the needs of its citizens.

All statistical Tables are included in "Appendix II" of this Housing Study.

HOUSING MARKET AREA.

The Housing Market Area for the City of Waverly is divided into two geographic areas: a Primary and a Secondary Housing Market Area. The Primary Housing Market Area (purple) for Waverly includes the entire Community and its respective "One-Mile Planning Jurisdiction". The Secondary Housing Market Area includes the entirety of the Lincoln Metropolitan Statistical Area (Lancaster and Seward Counties).

This **Secondary Market Area** provides additional support to the **City of Waverly's** housing market area, as well as enhancing local economic development opportunities. In order for **Waverly** to continue to attract residents from the **Secondary Market Area**, the Community will need to provide a variety of housing types, owner and renter, at various price ranges, for all income levels and age groups with an emphasis on housing that is affordable for established income ranges.

POPULATION PROFILE.

The analysis and projection of local demographics are at the center of all planning decisions. This process assists in the understanding of important changes which have and will occur from 2023 to 2033. Estimating population is critical to a community planning process, especially as it relates to the provision of housing. Further, projecting population growth and/or decline of a community is extremely complex. Projections are based upon various assumptions about the future and must be carefully analyzed and continually reevaluated, due to the changing economic and social structure of the community.

Population Trends and Projections.

The City of Waverly is a rapidly growing Community in northeast Lancaster County and is home to some of the County's largest employers. This includes, but is not limited to Tractor Supply Company-Waverly Distribution Center, Smart Chicken, Millard Lumber, District 145-Waverly Public Schools, Kamterter Products and Matheson Tri-Gas. These major employers, combined with aggressive housing development projects and leadership determined to maintain a high quality of life in Waverly, contribute significantly to the desirability to live within, or in close proximity to the Community.

The population from the 2000 and 2010 Decennial Censuses recorded an increase in population for the City of Waverly, increasing from 2,452, in 2000, to 3,277, in 2010, or by 33.6 percent. The rate of population growth in Waverly remained consistent by the 2020 Census, which documented a population of 4,279, or an increase of 30.6 percent from the 2010 Census. Local leadership attributes this increase to the large number of residential subdivisions being platted and developed, in both the northern and southern portions of Waverly, combined with a demand from young professionals and families in Lincoln to reside in a smaller Community, away from the City. A significant amount of housing construction involved single family homes, generally owned by persons of moderate to upper incomes. The current (2023) estimated population for the City of Waverly is 4,532, representing an increase of 5.7 percent since 2020.

Currently, the Waverly One-Mile Planning Jurisdiction maintains an estimated population of 91. Continued population growth in Waverly, as well as surrounding Communities, will contribute to additional population increases in the Jurisdiction through 2033.

The 10-year population projections identify continued population growth in Waverly. Three scenarios that take into account both total jobs created and employment secured via in-migration are presented and defined, below:

- Low: minimal engagement from City leadership, housing stakeholders and major employers; ultimately, letting the "free market" dictate community growth and development.
- **Medium:** continued regular activity from City leadership, housing stakeholders and major employers, including standard annexation procedures. This projection closely represents the current trend of development and growth in **Waverly** and is utilized in the projections documented in this **Housing Study**.
- **High:** increased activity from City leadership and housing stakeholders, including standard annexation procedures, the creation of new jobs and an increase in the amount of in-migration

TABLE 3.1 POPULATION TRENDS AND PROJECTIONS WAVERLY, NEBRASKA 2000-2033

			<u>To</u>	<u>tal</u>	<u>Annual</u>		
	<u>Year</u>	Population	Change	Percent	Change	Percent	
	2000	2,452					
	2010	$3,\!277$	+825	+33.6%	+82.5	+3.4%	
	2020	4,279	+1,002	+30.6%	+100.2	+3.1%	
	2023	$4,\!532$	+251	+5.7%	+83.6	+1.9%	
Low	2033	5,371	+850	+18.5%	+85.0	+1.8%	
Medium	2033	$5,\!520$	+999	+21.8%	+99.9	+2.2%	
High	2033	5,667	+1,146	+25.3%	+114.6	+2.5%

*Includes an estimated population increase associated with a *Community Growth Initiative (CGI)*, via increased Full-Time Employment opportunities and the capture of up to 20% of the current Commuter Employee Population.

securing employment. This also includes collaboration with local, state and federal funding sources and existing major employers in implementing community, economic and housing development activities.

• Community Growth Initiative (CGI): high activity by City of Waverly leadership and housing stakeholders, including aggressive annexation procedures, the creation of new employment opportunities and capturing 20 percent of current commuter employees. This also includes collaboration with both public and private funding sources and major employers of Waverly and Lancaster County.

By 2033, the population of the City of Waverly is projected to increase between 18.5 and 49.8 percent, or ranging from 5,371 to 6,778. A "medium" population projection of 5,520 was utilized for this **Housing Study** for the projection of pertinent housing development objectives. Additionally, the population within the One-Mile Planning Jurisdiction is also projected to increase, ranging from 108 to 140 persons by 2033.

Age.

In 2023, the **City of Waverly** is experiencing an estimated median age of 34.7 years, a slight increase from the 2020 estimated median age of 34.3 years. **Median age is projected to continue to increase to 34.9 years by 2033.**

The "19 and Under" and "35 to 54" age cohorts were the largest population cohorts in **Waverly**, as per the 2000 and 2010 Censuses as well as the 2020 Estimate and remain the largest cohorts in the Community, today. This trend is projected to continue through 2028 and 2033.

The Waverly 55+ population is projected to increase by 2028, with the "55-64" age group projected to experience the largest population increase. It is important that a range of elderly services, amenities and appropriate housing be made available in Waverly to encourage senior/elderly populations to remain in their respective housing situations and, ultimately, remaining a resident of the City of Waverly.

Persons Per Household.

Persons per household remained stable in the **City of Waverly**, from 2000 to 2010, ranging between 2.87 and 2.90. The 2020 Census recorded an estimated 2.88 persons per household in **Waverly**. The average of 2.88 persons per household exist, today, in **Waverly**. This number is projected to continue to remain stable through 2023, at an estimated 2.86 persons per household.

INCOME PROFILE.

Information presented in the **Income Profile** of this **Housing Study** assists in determining the number of households within **Waverly** (and Lancaster County) having the financial capacity to occupy affordable housing. In addition, the analysis of household incomes assist in determining the size, type and style of housing needed in the Community, in the future. Low cost and government subsidized housing are subject to Federal regulations, such as size and type, whereas upper income housing has few limitations.

Per Capita Income.

Per capita income is equal to the gross income of an area (State, County, City, Village) divided equally by the number of residents residing in the subject area. In 2023, per capita income in Lancaster County is an estimated \$58,046, an increase of approximately 49.1 percent from the 2010 per capita income of \$38,928. **By 2033, per capita income in the County will increase an estimated 34 percent, to \$77,782.** By comparison, the State of Nebraska maintains a current estimated per capita income of \$64,517, with a projected 2033 per capita income of \$89,679.

The median income for all households in the City of Waverly, in 2023, is estimated to be \$87,694. By 2033, median income in Waverly will increase an estimated 12.7 percent, to \$89,874. The CGI projection estimates a total household income of \$101,336 by 2033. The majority of Community residents are projected to have incomes at or above \$75,000.

Cost Burdened/Housing Problems.

A portion of households throughout the **City of Waverly** are considered to be "**Cost Burdened**" and/or experiencing various "**Housing Problems**", as defined by the Department of Housing and Urban Development. A cost burdened household is one paying 30 percent or more of their income on housing costs, which may include mortgage, rent, utilities and property taxes. A household is considered to have housing problems if the housing unit is overcrowded (more than one person per room) and/or if the household lacks complete plumbing.

In 2023, an estimated 128 owner households in Waverly, or 10 percent of all owner households, are cost burdened or have housing problems. By 2033, this number is expected to increase, slightly, to 133 households. Currently, an estimated 89 renter households in the Community of Waverly, or 30.6 percent of all renter households, are cost burdened or have housing problems. By 2033, an estimated 120 renter households will be of cost-burden status. Cost burdened households are projected to increase due to the rising costs associated with owning, renting and/or maintaining a place of residency in Waverly.

The increase in cost burdened renter households may be attributed to a lack of affordable rental housing, especially for those of low- to moderate incomes, being constructed in the Community, combined with an absence of existing affordable rental housing, a lack of developer participation in local voucher programs for their prospective tenants and housing that is available for purchase or rent being either severely deteriorating or dilapidated and in extreme cases, experiencing health and safety issues such as mold, inadequate utilities, and deferred maintenance.

ECONOMIC PROFILE.

The following provides a general **Economic Profile** of the City of **Waverly**. Included is a review of relevant labor force data, annual employment trends and the identification of major employers.

The City of Waverly enjoys economic development benefits, in part, due to its location along the Interstate 80 Corridor and close proximity to the City of Lincoln. City Government and the Greater Waverly Area Foundation Fund has been instrumental in providing funding to a number of community and economic development activities that enhance the quality of life in the Community. The largest employers in Waverly include District 145 Public Schools, Tractor Supply Company Distribution Warehouse, Smart Chicken, Matheson Linweld, Valmont, Millard Lumber and the Waverly Care Center. A high percentage of the employees at these industries reside outside of Waverly and commute to work each day. The following provides a general Economic Profile of Waverly.

Employment Trends.

Between 2010 and 2023, the **unemployment rate** in Lancaster County ranged from a high of 4.2 percent to a low of 1.8 percent. During this period, the total number of **employed persons** increased by 23,215. By 2033, an estimated 198,277 persons will be employed in the County, with an unemployment rate maintaining 3.1 percent.

Employment By Type.

In 2023, an estimated 182,585 persons work in Lancaster County in a non-farm place of employment. The largest concentration of workers are employed in the Health Care & Social Assistance and State Government sectors, with an estimated 25.6 percent, or 46,785 total employees maintaining employment in these two sectors.

HOUSING PROFILE.

Households.

Currently, an estimated 1,570 households reside in the City of Waverly, consisting of an estimated 1,279 owner and 291 renter households. By 2033, owner households will account for an estimated 79.6 percent of all households in the Community. Waverly has experienced steady increase in the percentage of owner households in the Community since the 2000 Census.

Group quarters include both "institutionalized housing" such as skilled nursing centers and correctional facilities, as well as "non-institutionalized housing" including military barracks and college dormitories. Currently, the **City of Waverly** maintains a group quarters population of 46, at a local nursing home, a slight increase from the 2020 estimated of 43 persons. The population in group quarters is projected to increase to 97 by 2028, which takes into account the Community's desire to not only continue to build housing, but create more opportunities for senior and elderly populations.

Housing Units/Vacancy & Occupancy.

In 2023, the City of Waverly consists of an estimated 1,579 housing units, consisting of approximately 1,286 owner and 293 rental units. Of these 1,579 units, less than 10 are vacant, resulting in an overall, estimated housing vacancy rate of 0.5 percent. The overall housing vacancy rate accounts for all vacant housing units in the Community, including units for sale, for rent, rented/sold but not currently occupied, seasonal/vacation housing, temporary housing for construction workers, and housing vacant due to other situations (used as storage, vacant and not actively being sold, owner temporarily residing in a group quarter housing program, etc.). The existing vacant housing units consist of an estimated seven owner and two to three rental units, equaling an owner housing vacancy rate of 0.5 percent and a rental housing vacancy rate of 0.7 percent. This concludes that the Community of Waverly has a deficiency of appropriate housing stock.

The City of Waverly should take a position to upgrade the housing stock during the next 10 years. This can be accomplished by, both, building new homes and rehabilitating (economically feasible) existing housing units. Housing units that are severely deteriorated or dilapidated could be targeted for substantial rehabilitation or, in extreme cases, demolition and replacement.

Housing Values & Gross Rent.

The cost of housing in any community is influenced by many factors, primarily the cost of construction, availability of land and infrastructure and, lastly, the organizational capacity of the community to combine these issues into an applicable format and secure the appropriate housing resources, including land and money. The **City of Waverly** is challenged to organize necessary resources to meet the needs of their residents, including both financial and organizational resources. A continued effort to upgrade wages, at both existing and new employment settings, should be a top priority.

The **City of Waverly** maintains a current estimated median owner-occupied housing value of \$230,286, representing an increase of 11 percent from the 2020 estimated median value of \$207,400 and a 133.5 percent increase from the 2000 estimated median value of \$98,600. Median housing values are projected to increase by an estimated 55.1 percent by 2033 to \$357,343.

In 2023, the estimated median gross rent for the City of Waverly is \$881. This represents an increase of 6.1 percent from the 2020 estimated median rent of \$830 and a 71.7 percent increase from the 2000 estimated median rent of \$513. The estimated median gross rent in Waverly is expected to increase by 124.5 percent, by 2033, to \$1,152.

SECTION 4

HOUSING UNIT "TARGET" DEMAND & LAND USE ANALYSIS.

INTRODUCTION.

This Section of the Waverly, Nebraska Community Housing Study provides a Housing Unit "Target" Demand and Land Use Needs Analysis. The analysis includes the identification of housing demand for both new housing development and housing rehabilitation activities.

HOUSING DEMAND POTENTIAL.

Community leadership and local housing stakeholders and providers need to be focused on this housing demand and achieving reasonable goals that will effectively increase the quantity and quality of housing in the City of Waverly. **To effectively determine housing unit demand for Waverly, seven separate components were reviewed. These included;**

- (1) housing demand based upon expected new population/households, during the next five years, including new housing construction and annexation of residential properties,
- (2) need for affordable housing units for persons/families considered to be "cost burdened,"
- (3) replacement of occupied housing in a "deteriorated to dilapidated" condition,
- (4) address the owner and rental housing "vacancy deficiency" in the Community of Waverly,
- (5) development of affordable housing to secure current commuter workforce population,

- (6) determination of the local "pent-up" housing demand for existing residents,
- (7) determination of local housing development capacity in the City of Waverly, during the next 10 years.

A determination of housing unit rehabilitation and demolition demand for Waverly, during the next 10 years, including moderate and substantial housing rehabilitation and demolition and replacement, was also included in the determination of housing unit target demand. Statistical tables regarding Housing Unit "Target" Demand are included in "Appendix II" of this Plan.

New Households.

New households, the replacement of substandard housing and the assistance that can be provided to maintain affordable housing, for both its present and future households, are important considerations in the determination of a housing demand potential for any particular community.

The **Waverly** population is projected to increase during the next 10 years, due to the Community's association with the Lincoln Metropolitan Statistical Area, recent housing development activity, expanding employment opportunities both within and in close proximity to the Community and primary transportation corridors.

Currently (2023), the estimated population for the Community of Waverly is 4,521 and is projected to increase to 5,506 by 2033. The potential exists for the Waverly population to increase to 6,761 by 2033, associated with a Community Growth Initiative via increased Full-Time Employment opportunities and the capture of up to 20 percent of the current Commuter Employee Population.

Overall, total households in Waverly are projected to increase by an estimated 321 households by 2033. Household increases are projected for both owner and renter households.

Cost Burdened Households.

According to HUD standards, a housing unit is considered to have problems if overcrowded (more than one person per room) and/or if the household lacks complete plumbing.

In 2023, an estimated 128 owner households in the City of Waverly, or 10 percent of all owner households, are cost burdened or have housing problems. By 2033, this number is expected to increase, slightly, to 133 households. Currently, an estimated 89 renter households in Waverly, or 30.6 percent of all renter households, are cost burdened or have housing problems. By 2033, an estimated 120 renter households will be of cost-burden status. Cost Burdened households are projected to increase due to the rising costs associated with owning, renting and/or maintaining a place of residency in Waverly.

Substandard Units/Overcrowded Conditions.

A substandard unit, as defined by HUD, is a unit lacking complete plumbing, plus the number of households with more than 1.01 persons per room, including bedrooms, within a housing unit. The 2010 Census and Lancaster County Assessor produced data identifying substandard housing units and housing units having overcrowded conditions.

- Housing structural conditions, provided by the County Assessor, identified **nine housing units in either "Fair" or "Poor" condition** in the **City of Waverly.** An additional 746 housing units were identified to be in "Average-" condition. During the next 10 years, these structures should be targeted for moderate to substantial rehabilitation or demolition and replacement. Units targeted to be demolished should be replaced with appropriate, modern, safe and decent housing units, with a special focus on the local workforce populations.
- As per the 2016-2020 American Community Survey, 27 housing units in **Waverly** had overcrowded conditions and 14 units lacked complete plumbing.

Housing Vacancy Deficiency (Demand).

Housing vacancy deficiency is defined as the number of vacant units lacking in a Community, whereby the total percentage of vacant, year-round and code acceptable housing units is less than 6 to 7 percent. A vacancy rate of 6 percent is the minimum rate recommended for the **City of Waverly**, to have sufficient housing available for new and existing residents.

An **adjusted housing vacancy rate** considers only available, year-round, vacant housing units meeting the standards of local codes and containing modern amenities. Currently, the adjusted vacancy rate for Waverly is 0.5 percent, including a 0.5 percent adjusted vacancy rate for owner housing units and 0.7 percent adjusted vacancy rate for rental housing units. **The City of Waverly is experiencing a housing vacancy deficiency of both owner and rental housing.**

Current Commuter Workforce Population.

A large concentration of employees working in Waverly commute from other nearby communities. A variety of available housing options, both for purchase and for rent, would provide the Community the ability to capture a portion of commuting employees currently working in **Waverly**.

"Pent-Up" Housing Demand.

The "Pent-Up" housing demand is defined as those current residents of the Community needing and/or wanting to secure a different and/or affordable housing type during the next five and 10 years. This would include persons from all household types and income sectors of the Community, including elderly, families, special populations, etc., very-low to upper-income. This includes persons and families needing a different type of housing due to either a decrease or increase in family size, as well as households having the income capacity to build new and better housing. Most often, pent-up housing demand is created by renter households wanting to become a homeowner, or vice-a-versa.

Housing Development Capacity.

After the careful determination of housing need for each of the housing targets identified above, a local housing development capacity is calculated for the **City of Waverly** during the next 10 years. The calculation is based on the Community's ability to organize for housing development, land availability, accessibility to general contractors and other building trades and building supply/materials.

HOUSING UNIT "TARGET" DEMAND.

Table 4.1 on Page 4.6 identifies the estimated Housing Unit "Target" Demand, for Waverly, Nebraska by 2033.

The total estimated **Housing Unit "Target" Demand** for the **City of Waverly**, from 2023 to 2033, includes a total of **420 housing units, including 300 owner and 120 rental units,** at an estimated development cost of **\$122.3 Million,** should be constructed in **Waverly**. An estimated 312 acres of land should be designated for new housing growth and development. Of the 2033 housing unit "target" demand of 420 total housing units, an estimated **296 units (240 owner, 86 rental)** should be targeted as part of a local initiative to promote the development of workforce housing.

An estimated **5 to 8 percent** of the total housing unit target demand, for 2033, should focus on **purchase-rehab-resale and/or re-rent housing activities.** This involves local entities purchasing existing housing that is in a deteriorating or dilapidated condition, utilizing local resources to rehabilitate the housing unit up to local development standards and codes and, finally, placing the rehabilitated unit on the market to be purchased or rented. Housing rehabilitation efforts in the **City of Waverly** could create housing opportunities at a more affordable cost, with minimal risk to both developers and prospective property owners. Target demand for housing rehabilitation and demolition/replacement is identified in this Section.

The "High" and "CGI" growth scenarios for the City of Waverly provide additional housing development opportunity. By 2033, the High population projection of 5,653 will require the development of an estimated 592 housing units (402 owner, 190 rental), while the CGI population projection of 6,761 will require the development of an estimated 902 housing units (594 owner, 308 rental).

TABLE 4.1 HOUSING UNIT "TARGET" DEMAND WAVERLY, NEBRASKA 2033

			$\mathbf{Est.}$	Est. Required
			Total	Housing Unit Target
			Housing Unit	Demand Budget
	$\underline{\mathbf{Owner}}$	<u>Rental</u>	"Target" Demand*	(Millions)
Medium (Pop. Projection):	300	120	$420^{\ 1\ \&\ 4}$	\$122.3
High (Pop. Projection):	402	190	$592{}^{2\&5}$	\$170.4
CGI (Pop. Projection):	594	308	902 3 & 6	\$254.7

*Housing Unit "Target" Demand, based on:

- Expected New Households.
- Cost-Burdened Households.
- Replacement of Occupied "Deteriorated to Dilapidated" Housing Units.
- Owner & Rental Housing Vacancy Deficiency.
- Secure Current Commuter Employment.
- "Pent Up" Housing Demand.
- 10-Year Housing Development Capacity.

Housing Unit "Target" Demand includes both new construction and Purchase-Rehab-Resale or Re-Rent (an estimated 5% to 8% of the Total Housing Demand).

- 1 Estimated Workforce Housing Unit Demand: 296 Total Units (240 Owner, 86 Rental).
- 2 Estimated Workforce Housing Unit Demand: 473 Total Units (325 Owner, 148 Rental).
- 3 Estimated Workforce Housing Unit Demand: 721 Total Units (481 Owner, 240 Rental).
- 4 Estimated Land Designation (New Construction) Requirement (x3): 312 acres.
- ${f 5}$ Estimated Land Designation (New Construction) Requirement (x3): 439 acres.
- 6 Estimated Land Designation (New Construction) Requirement (x3): 670 acres.

Source: Hanna: Keelan Associates, P.C., 2023.

Table 4.2 identifies Housing Unit "Target" Demand, in relation to affordable housing needs (persons and families with an area median income of 80 percent or less) in the City of Waverly, by 2033. During the next 10 years, an estimated 420 housing units should be targeted in the Community of Waverly, of which 93 housing units (35 owner, 58 rental) should be designated as "affordable" housing units. This includes 33 owner and 55 rental units of new construction and two owner and three rental housing units as a component of a purchase-rehab-resale/re-rent program.

A population sector breakdown of the Affordable Housing Unit "Target" Demand highlights a need for 37 total elderly housing units, 40 total family housing units and 16 total units for persons with special needs by 2033.

HOUSING DEMAND BY INCOME SECTOR.

Table 4.3 identifies the current Area Median Income (AMI) for varied levels of AMI percentages, for households in the Lincoln Metropolitan Statistical Area (including the City of Waverly), up to eight person households (PHH), as per HUD. AMI is determined by finding the "100 percent" median income of households in a given geographic area, ranging in household size from one- to eight persons. That "median" amount of income is considered to be "100 percent" for a geographic area for each household size category. For example, in the Table below, a four-person family in the Lincoln MSA, with an annual family income of \$90,600 is considered to be making "100 percent of the local AMI". This information allows for the eventual determination of "affordability" and associated housing price points/products for households of varied sizes.

Table 4.4 identifies the estimated Housing Unit "Target" Demand by income sector for the City of Waverly by 2033. Up to 45 housing units (10 owner, 35 rental) by 2033 should be built for households of very low- and low- income, or between 0 and 60 percent AMI. Typically, rental housing units for these income groups are developed with the assistance of Local, State and Federal subsidies, such as Low-Income Housing Tax Credits (LIHTC), HUD Section 8 and State-wide housing trust funds, and can include purchase-rehab-resale or re-rent program. An additional activity could include rehabilitating existing low- to moderate income housing for increased marketability and safety of local tenants.

A total of **182 housing units (115 owner, 67 rental) by 2033** should be constructed for households of low- to moderate income, or **between 61 and 125 percent AMI.** This income bracket represents much of the housing development product, considered to be in the highest demand among young professionals and workforce populations, but also in the smallest supply due to a lack of supportive funding availability, land and development costs, etc.

For the 126%+ AMI category, a total of **175 owner** and **18 rental housing units** should be built by **2033.** This category represents moderate- to upper income housing; generally, households with the financial capacity to purchase a lot and build a house on their own or rent a unit at local market rate.

HOUSING DEMAND POTENTIAL FOR TARGET POPULATIONS & PRICE POINTS/HOUSING TYPES.

Target populations include elderly, family and special needs populations, per **Area Median Income (AMI).** The housing products in the **City of Waverly** include both owner and rental units of varied types. This will allow housing developers to pinpoint crucial information in the development of an affordable housing stock for the right population sector. The majority of new housing options in Waverly should be directed towards family populations, especially the local workforce.

Table 4.5, Page 4.11, identifies Housing Unit "Target" demand in the City of Waverly, for specific population groups by 2033. An estimated total of 72 owner and 43 rental units should be constructed by 2033 for local elderly (55+) populations. This could include, but is not limited to single family housing, duplexes/triplexes and townhomes for purchase/rent, an assisted living facility, and a senior independent living community with maintenance-free living situations.

By 2033, a total of 219 owner and 66 rental housing units should be developed for family households. Family housing includes a wide range of development concepts and generally includes all types.

A total of **nine owner** and **11 rental units** should be built by 2033 to meet the housing needs of local **special needs populations** or those with a cognitive and/or physical disability(ies). Unit development could potentially include an assisted living facility and group home housing for special needs populations striving to maintain a level of independence.

A majority portion of the housing demand totals for each of the above-mentioned population sectors should focus on housing that meets the needs of the local workforce in the City of Waverly. This includes an estimated 326 of the total 420 housing unit demand by 2033. A majority of workforce housing units should be designated towards family households.

Table 4.6, Page 4.13 highlights proposed housing types by price product for the given AMI for the City of Waverly, by 2033. By 2033, the owner housing type in highest demand in the Community of Waverly is projected to be units with three+bedrooms, for persons or households at or above 126 percent AMI with an average affordable purchase price at or above \$441,200, with a total target demand for 155 owner housing units. Two- and three+bedroom rental units (38 total) with an average affordable monthly rent between \$1,035 and \$1,559, present the greatest demand in the City. Three+-bedroom units at an average purchase price at or above \$252,800 and an estimated average monthly rent cost at or above \$765 are the most needed housing types for the workforce population in Waverly.

HOUSING REHABILITATION/DEMOLITION DEMAND.

Table 4.7 identifies target rehabilitation and demolition needs in the City of Waverly by 2033. Up to 30 units by 2033 could be targeted for moderate rehabilitation in Waverly at an estimated cost of \$840,000. Moderate rehabilitation generally includes cosmetic improvements to a housing unit, including but not limited to paint, doors, windows, landscaping, etc.

Up to 14 units by 2033 could be targeted for substantial rehabilitation in Waverly at an estimated cost of \$ 476,000. Substantial rehabilitation focuses on the same elements of moderate rehabilitation, but also includes structural elements to a home that are in need of replacement, including bowing and/or sagging walls and roof lines and foundation issues.

Up to 10 housing units should be demolished by 2033 and replaced due to dilapidated conditions and the structure not being cost effective to rehabilitate. The estimated cost of this housing development process will range between \$210,000 and \$3.85 Million by 2033, depending on property acquisition and unit replacement potential.

HOUSING LAND USE NEEDS.

It is imperative for any community to designate the appropriate amount of land to support new housing development projects, both within and adjacent, but outside a community's corporate limits. Residential development projects generally encompass three types: (1) infill development in older, existing residential neighborhoods, (2) acquisition and development of large tracts of vacant land inside a community's corporate limits for "large scale" development, and (3) acquisition and development of land as part of a designated future residential "growth area"

Infill housing development projects have the advantage of utilizing existing infrastructure and utilities, but may be challenged by the lot dimensions and setback requirements of local development code. Concepts including "narrow housing" and "stacked housing" may be the most appropriate housing type for infill development projects.

"Large scale" development projects involve the acquisition of tracts of undeveloped land and can be utilized for multiple residential related projects, including single family residential subdivisions, apartment complexes and senior housing "continuum of care" campuses. The appropriate zoning classification and future land use designation must be in place for these projects to occur. Additionally, these types of projects could have a more significant impact on a community's tax base and have a greater ability to encourage the development of both traditional and unique housing concepts and prototypes, potentially satisfying multiple community housing needs at once.

Residential "Growth Areas" identifies land outside, but adjacent a community's corporate limits, and being specifically designated for residential development. Land areas in this location may be the most affordable to purchase, but may not have appropriate utilities and infrastructure in place. Residential developments in growth areas typically include large lot subdivisions and acreages. "Build-through" subdivisions are encouraged, so as to be in conformance with local development code in the event of annexation.

The following provides a list of environmental criteria that should be avoided in selecting a site for housing development.

- Floodplain/wetland locations, which require lengthy public review process and consideration of alternative sites in the area.
- Sites in or adjacent to historic districts, buildings or archeological sites, which may result in expensive building
 modifications to conform to historic preservation requirements and a longer review process.
- Sites near airports, railroads or high volume traffic arteries, which may subject residents to high noise levels, air pollution and risks from possible accidents.
- Sites near tanks that store chemicals or petrochemicals of an explosive or flammable nature.
- Sites near toxic dumps or storage areas.
- Sites with steep slopes or other undesirable access conditions which may make them undesirable for use.

In addition to the previously mentioned criteria, the U.S. Department of Housing and Urban Development (HUD) provides guidelines for analyzing proposed housing sites. In Chapter 1 and Chapter 4 of the HUD 4571.1 Rev.-2, HUD addresses the importance and requirements of proposed site locations:

"Site location is of the utmost importance in the success of any housing development. Remote or isolated locations are to be avoided. Projects which, by their location or architectural design, discourage continuing relationships with others in the community will not be approved (are not acceptable). A primary concern is that the project not be dominated by an institutional environment."

Table 4.8, Page 4.18, identifies the estimated land use projections and housing types per age sector for the City of Waverly, Nebraska, by 2033. Popular housing types in Waverly will include single family units, town homes, duplexes/triplexes and apartment units. By 2028, for persons age 18 to 54 years, a total of 228 owner and 77 rental housing units should be targeted to accommodate young professionals and workforce families, special needs populations, existing/new employees and persons of low-, moderate- and upper-income. An estimated 78 acres will be needed for new and/or improved housing developments. An estimated 72 owner and 43 rental housing units should be designated for retirees, seniors and elderly populations by 2033.

To meet the "new" construction housing unit demand, by 2033, the City will need to designate up to 312 acres of land and meet the expectation of developing 104 of the 312 acres. A total of 297 acres should be designated for new housing construction with a goal to develop 99 of these acres with new housing. An estimated 195 acres should be designated for the new construction of workforce housing, with 65 acres being developed by 2033. Affordable housing designation should comprise 63 acres, with a development goal of 21 acres. These housing land use designation and development requirements can be interchangeable.

SECTION 5

HOUSING DEVELOPMENT & PRESERVATION INTITIATIVES.

INTRODUCTION.

The following **Housing Development & Preservation Initiatives**, for the **City of Waverly**, **Nebraska**, address the housing issues, opportunities and needs of the Community and define the necessary housing activities for the successful implementation of selected both market rate and affordable housing programs or projects. These **Initiatives** are needed for the implementation of specific, both new housing development and existing housing preservation programs and are the product of both **qualitative and quantitative research activities** performed on the local level.

A <u>qualitative research</u> process provided important information for the formation of these **Housing Development & Preservation Initiatives.** A citizen participation and public input process included meetings with the **Waverly Planning Commission** and a local **Planning Steering Committee**, comprised of elected leadership, major employers and pertinent, local housing stakeholders, both public and private, and the implementation of a **Community "Opinion Survey"** for the general population and a "**Workforce Housing Needs Survey"** for employees of major employers.

Quantitative research included the analysis and projection of pertinent population, income, economic and housing data from local, State and National sources, all in an effort to understand past and present statistical trends and the projected **Housing Unit "Target" Demand** for the individuals and families of Waverly.

The combined qualitative and quantitative research efforts allowed the Consultant, Planning Commission and the Planning Steering Committee to prepare an "Affordable Housing Action Plan" that both identifies housing development projects that are a "fit" for the local market and adheres to the requirements set forth in Nebraska Legislative Bill 866.

Local leadership, housing stakeholders and Governmental entities have implemented a variety of housing initiatives that have been a significant benefit to the housing development in **Waverly**. Much of this new housing was driven by new and expanded economic development activities, annexation of undeveloped land areas for residential development and the implementation of existing housing development programs. It is recommended that all local, State and Federal housing development, rehabilitation, preservation and funding entities continue to provide housing choice and opportunity for both existing and prospective citizens of the Community.

Housing Development & Preservation Initiatives address the important components of housing program implementation. The following identifies three primary categories in addressing housing issues in Waverly.

- 1. Housing Development Partnerships & Education.
 - o Housing Development Partnerships.
 - o Housing Education.
- 2. Housing Development, Rehabilitation & Preservation.
 - o Housing Unit Target Demand & Budget.
 - o Demand for Housing Types, Households & Income Sectors.
 - o Residential Land Requirements.
 - o Zoning Regulations for the Development of Innovative/Alternative/Reform Considerations.
 - o Workforce Housing Demand.
 - o Housing Rehabilitation & Preservation.
 - o Elderly/Senior Affordable Housing.
 - o Special Needs Housing.
 - o Emergency Housing & Natural Disaster Preparedness.
 - o Housing & Alternative Energy.
 - o Impediments to Fair Housing Choice.
- 3. Housing Study Implementation & Review.
 - o Financing Activities for Housing Development in Waverly.
 - o Housing Study Maintenance.

AFFORDABLE HOUSING DEVELOPMENT & PRESERVATION INITIATIVES.

1. HOUSING DEVELOPMENT PARTNERSHIPS & HOUSING EDUCATION.

Housing Development Partnerships.

The creation and organization of both public and private Housing Development & Preservation Partnerships (HDPPs) in the City of Waverly is key to the successful production and improvement of the local housing stock and maximizing the opportunity to develop affordable housing for all price points for families and households at all income levels. Partnerships with Southeast Nebraska Development District (SENDD), Southeast Nebraska Affordable Housing Council (SENAHC), local housing developers, general contractors, major employers and other local housing-related organizations and stakeholders will expand the capacity and ability to create housing in Waverly. This process should be continued and refined to produce additional partners, such as major employers and foundations, to maximize the potential for both building new housing and preserving the existing housing stock throughout the Community.

The following are important Steps in producing an effective HDPPs program and process in the Community.

- Create a "mission statement" that meets the overall housing cause or purpose, as it relates to the identified housing of needs and demands of the Community. Recruit local persons and organizations (both public and private) that match the "mission statement".
- Based upon selected **HDPPs** and associated "mission statements", each **HDPPs** will select and prioritize housing programs for both new construction and housing preservation (rehabilitation), with an accompanying timeline for implementation and identify "most appropriate" funding tools for the completion of each selected housing.

Attention should be given to increasing in-home health services and home maintenance, repair and modification of homes for elderly households, as well as providing additional affordable housing units, both owner and rental, both with or without supportive services. Housing for special populations should also be targeted to support populations with mental or physical disabilities.

- Train selected **HDPPs** to serve as local "housing advocates" in meeting the local housing needs and, specially, serve as caseworkers for individuals and families unable to have the either the income and/or knowledge to help themselves in securing safe, affordable housing.
- Consider the development of a locally-based **municipal land bank program** to create an inventory of vacant, developable land for future residential development, including infill lot developments.

Housing Education.

Elevating the "housing intelligence" of local HDPPs will be beneficial to the success of any housing program in the City of Waverly. Housing intelligence will be supplemented by providing the appropriate learning systems for educating HDPPs and their members on the processes of housing financing and development, including appropriate methods for prioritizing both new construction and housing rehabilitation programs in Waverly. The following Steps for providing "housing intelligence" are recommended.

- Utilize existing "Housing Development Education Programs" for HDPPs, with SENDD and SENAHC, complete with certification of pertinent housing development topics, including, but limited to housing need recognition, housing advocacy, housing financial planning and housing development.
- Train **HDPPs** to monitor and understand Local, State and Federal housing legislative proposals and policies that could impact both existing and future housing programs in the Community.
- **HDPPs** will need to fully understand the working connection between this **Housing Study** and other, current, local planning initiatives that will, in some capacity, have an impact on the future development, rehabilitation and preservation of both the current and future housing stock in the Community. These other planning initiatives typically include the Comprehensive Plan and Zoning Regulations, Capital Improvement Plans, Public Facility/Utility Plans, Downtown Revitalization Studies, Hazard Mitigation Plans, etc.

2. HOUSING DEVELOPMENT, REHABILITATION & PRESERVATION.

Future affordable housing development in the **Community of Waverly** will need to be directed at meeting the housing needs and wants of all household and income sectors, including families, the elderly or retiree, the local workforce, minority groups and populations with special needs, from the very-low to the upper income family. Such an effort will require housing programs to be planned and implemented for new construction, housing rehabilitation and the preservation and/or replacement of housing for families residing in substandard/dilapidated housing.

Future affordable housing development efforts should serve to address health, safety and social issues, as well as provide economic development opportunities. It should be the right of all persons and families in **Waverly** to live in safe, decent and affordable housing. The results of new housing developments and the moderate- to substantial rehabilitation of existing housing will elevate the quality of life in the Community.

Housing Unit Target Demand & Budget.

- Section 4 of this Housing Study identifies an estimated Housing Unit "Target" Demand of 420 housing units, based on the 2033 medium population projection, including 300 owner and 120 rental housing units, requiring an estimated budget of \$122.3 Million.
 - o Housing Unit "Target" Demand, based on the "High" and Community Growth Initiative" population projections, will require the development of 592 housing units (402 owner, 190 rental) and 902 housing units (594 owner, 308 rental), respectively.

Demand for Housing Types, Households & Income Sectors.

- Housing construction in the City of Waverly will need to include the development of up to 45 affordable housing units in Waverly (10 owner, 35 rental) for persons of low income, or between 0 and 60 percent AMI. The recommended price product for this AMI range would be a purchase price less than \$124,100 and an affordable monthly rent less than \$914.
- For low to moderate income households, a total of 182 housing units (115 owner, 67 rental) for persons/families, or between 61 and 125 percent AMI should be targeted for construction throughout the Community by 2033. An affordable price product for this AMI range would be an approximate purchase price range between \$214,500 and \$434,000. An affordable monthly rent, by 2033, should range from \$945 to \$1,559.
- A total of 193 housing units (175 owner, 18 rental) for persons/families of moderate to upper income, or at or above 126 percent AMI should be targeted for construction throughout the Community by 2033. Price products will be at or above \$441,200 for owner housing units and at or above \$1,568 for rental housing units.
- In an effort to satisfy an **immediate housing need** in **Waverly**, consider allowing **non-traditional housing developments** on existing residential locations. As an example, this could include allowing for the conversion of owner occupied housing to allow for single room occupancy rental units (for the purpose of housing availability for new major employers or temporary housing in the event of a natural disaster), accessory dwellings and developing homes specifically designed for lots typically not sized to local and/or national building and development codes. This could include the development of housing concepts and prototypes that include mixed use residential/commercial developments and single structure housing projects to increase housing density. Consider infill housing and accessory housing development programs including in-law suites, granny flats, conversion housing, single room occupancy housing and tiny homes as a means of creating more density in developed and older neighborhoods.

Section 5: Housing Development & Preservation Initiatives.

Residential Land Requirements.

• The City of Waverly will need to identify up to 312 acres by 2033 for the future development of "new" housing units. Of the 312 acres, an estimated 104 acres should be developed with new owner and rental housing units. This also includes up to 63 acres for affordable housing units and 195 acres for workforce-related housing. This land use demand is consistent with the residential land development recommendations set forth in the Waverly, Nebraska Comprehensive Plan. The Community should utilize existing Zoning Regulations to identify future residential land use needs.

Consideration of Zoning Reform-Housing.

The **City of Waverly** should review and consider, if deemed appropriate, the adoption of **Zoning Reforms**, currently being studied and adopted by American cities, in an effort to enhance and maximize the economics of housing developments, while producing additional housing units. The following summarizes the various Zoning Reforms being considered, all of which would require the official adoption of City policy to implement such.

- Eliminating Single Family Housing, only, Zoning Districts, to allow for properly planned duplex and triplex housing developments, within traditional Single Family Zoning Districts, to maximize the use of vacant residential sites or development of a larger parcel of land.
- Reducing parking requirements for multi-family housing developments, to maximize the use of the site, to, possibly, provide additional units or common areas for the tenants.
- Addressing the "missing middle" housing issue, by allowing Communities to reduce minimum lot sizes in selected areas, primarily, with vacant lots, to maximize, or increase the number of units per acre when developing infill housing.
- **Allowing ADUs,** whereby a Community allows homeowners to add an accessory dwelling unit in their backyard or in their unused garage, attic or basement.
- **Zoning for Adoptive Use.** Allowing existing commercial building rehabilitation activities to include adaptive use concepts, such as housing on above ground floor commercial and/or office space use. Includes encouraging "live/work" situations for local business owners and/or incubator businesses.

- Tiny Houses, a residential development concept currently being considered in many communities, today, is an inexpensive affordable housing option. Tiny Houses, constructed as small as 200 sq. ft., are being built in both open, vacant lots and planned subdivisions, equipped with all amenities necessary to meet local Building/Housing Code requirements.
- **Single Room Occupancy (SRO) Housing,** typically developed as expanded dormitory-style housing, consisting of six, eight or more units per building. SRO housing is a suitable housing type for young professionals entering the workforce, as well as families in transitional housing.
- "Work/Live" Residential Campus," consisting of workforce housing, of varied types and price points developed in close proximity to one or several major employers in a "walkable" campus setting.

Workforce Housing Demand.

- The City of Waverly should develop an estimated 240 owner and 86 rental housing units for the local workforce, by 2033. The successful implementation of workforce housing will depend on the creation of specific HDPPs to address specific work sectors. The involvement of major employees as a participant in HDPPs will be crucial in the successful implementation of various workforce housing programs. The development of new workforce housing should target an owner workforce housing price product of \$252,800+ and a monthly rent of \$765+ by 2028.
- The City of Waverly should consider the development of a "Work/Live Residential Campus," consisting of workforce housing located in close proximity to one or several major employers.

Housing Rehabilitation & Preservation.

- Continue to implement comprehensive, community-wide program(s) of housing rehabilitation and preservation in the **City of Waverly**, including the demolition and replacement of dilapidated housing units. By 2033, an estimated **44 housing units**, both owner and rental, in **Waverly**, are in need of **moderate- to substantial rehabilitation**. An additional **10 housing units** are in a condition that may require **removal and replacement**.
- Identify housing units in need of **moderate rehabilitation**. This includes homes needing "cosmetic" and minor "structural" improvements such as new siding, windows, paint, roof surface, doors, etc.
- Identify housing units in need of **substantial rehabilitation** in **Waverly**. This includes homes needing the improvements identified above, but also includes repairs to structural and infrastructure elements of the house, such as foundation, baring walls and roof lines/ structural repairs and plumbing/electrical upgrades.

• Identify **occupied housing units** that should be **demolished and replaced** in **Waverly**. Housing not cost effective for rehabilitation should be demolished and, eventually, replaced with sound, safe and affordable housing to take advantage of existing infrastructure.

Elderly/Senior Affordable Housing.

• A Continuum of (Housing) Residential Care Program, directed at persons and families 55+ years of age will need to be implemented in the Community of Waverly to address several facets of elderly housing and supportive services needs to coincide with a projected growth in elderly population. Partnerships should be created with the local senior/retirement Community including assisted living and senior independent living facilities.

Attention should be given to increasing in-home health services and home maintenance, repair and modification of homes for elderly households, as well as providing additional affordable housing units, both owner and rental, both with or without supportive services.

- The Community of Waverly should target up to 115 elderly housing units by 2028. This would include up to 72 owner and 43 rental units affordable to persons and families of 30+ percent AMI. Local elderly housing providers should collaborate to address all facets of elderly housing and supportive service needs in Waverly, including the increasing need for in-home services, memory care, maintenance and repair of homes occupied by elderly households in the Community and additional affordable housing, both owner and rental, for elderly persons with and without supportive service needs.
- Continue to support programs and services regarding the benefits of safe and affordable senior housing. Develop a
 messaging platform and communications plan to highlight benefits and resident experiences. Promote programs and
 services designed to enhance emotional, physical and cognitive well-being, along with the benefits of recreation and
 leisure opportunities.

Special Needs Housing.

• Address the housing needs of persons with a disability(ies) in the City of Waverly, by planning and implementing fully accessible housing, both for rent and for sale. An estimated nine owner and 11 rental housing units should be planned and developed for persons of special needs in Waverly, by 2033. Successful programs should include transitional housing and group homes that encourage resident safety and/or handicap accessibility. Include supportive services where necessary. It is recommended that, at a minimum, 10 percent of new housing added to the housing stock should be fully accessible for persons with a physical and/or sensory disability.

Emergency Housing & Natural Disaster Preparedness.

- Prepare an **emergency housing "plan of action"** in an effort to assist the **City of Waverly** in providing temporary, short-term shelter to those affected by natural disaster, including post-disaster housing repair, reconstruction and/or household relocation plans.
- Local, State, Federal "disaster housing partners" will play a critical role in ensuring the provision of housing for persons and families affected by catastrophic natural disaster. Partners should include local governments, the office of the Lancaster County Emergency Manager, Nebraska Investment Finance Authority, Nebraska Department of Economic Development, Nebraska Emergency Management Agency, Federal Emergency Management Agency and U.S. Department of Housing and Urban Development.

Section 5: Housing Development & Preservation Initiatives.

- Create and monitor a list of residential properties in Waverly requiring housing repair/rehabilitation or replacement, due to the 2019 flooding incident and assist in securing needed funding, above and beyond insurance assistance to aid families.
- Develop a City of Waverly "Emergency Operations Plan" that includes initiatives for providing temporary housing for persons and families affected by natural disaster.
- Encourage local landlords to allow persons and families displaced by natural disaster to temporarily reside in vacant, non-occupied housing units.
- Review and revise comprehensive planning, land use, zoning and subdivision regulation documents as a means of limiting or eliminating housing development in areas where a natural disaster, such as flooding, could frequently occur.

Housing & Alternative Energy.

- Encourage housing developers in the **City of Waverly** to take advantage of "tools of alternative energy implementation," such as personal wind energy conversion systems, solar panels and geothermal technology to make housing more energy efficient and reduce utility costs for the unit occupant.
- **Utilize local Zoning Regulations and building codes** to control the placement and operation of alternative energy systems. Local Zoning Regulations should be able to control the placement of individual energy systems to limit their impact on adjacent property and the visual character of residential, commercial and industrial areas.
- Promote the development of vocational **education opportunities** at **District 145-Waverly Public Schools** to educate the future workforce in alternative energy design, fabrication of equipment and maintenance.
- Promote the **expanded use of solar and geothermal exchange energy systems** for applications throughout the Community's **One-Mile Planning Jurisdiction**.
- Consider implementing a "**pilot**" alternative energy program at a developing residential subdivision in the Community. An alternative energy source(s) could generate 100 percent of the energy needs for heating and cooling, as an example, promoting affordable development.

- Promote the **rehabilitation of residential buildings throughout the Community** utilizing weatherization methods and energy efficient or "**green building**" **materials** in conformance to the "**LEED**" **Certified Building techniques**.
- Expand awareness of available incentives that could assist in replacing old lighting fixtures, or heating and cooling systems in housing units with new energy efficient systems that reduce consumption and energy costs.

Impediments to Fair Housing Choice.

- The Community of Waverly should strive to eliminate all barriers and impediments to fair housing choice. Both public and private sectors of the Community should play a role in this process, including local government, schools, churches and the private sector.
- Address the primary impediments to fair housing choice throughout the Community. Respondents to both the Housing Survey and Workforce Housing Needs Survey identified impediments to fair housing for homeowners as housing prices and a lack of sufficient homes for sale. For renter households, impediments included the high cost of monthly rent and a lack of decent rental units at an affordable price range.
- The Community of Waverly should utilize existing Fair Housing Policies and Property Maintenance Codes to ensure all current and future residents of the Community do not experience any discrimination in housing choice and that properties are not overtaken by debris, potentially leading to unsafe and unhealthy conditions.

3: HOUSING STUDY IMPLEMENTATION & REVIEW.

This **Housing Study** contains a variety of qualitative and quantitative information from local, State and Federal data sources and Survey implementation. Documented statistics and citizen input provide a clear and concise understanding of local housing needs that will assist local governments and organizations (public, private and non-profit) in creating and maintaining a resilient, sustainable Community.

Financing Activities for Housing Development.

- Housing developers doing business in the **City of Waverly** should consider both public and private funding sources when constructing new or improving the local housing stock and, thus, be encouraged to pursue securing any and all available tools of financing assistance to do so. This assistance is available from the Nebraska Investment Finance Authority, Nebraska Department of Economic Development, Midwest Housing Development Fund, Federal Home Loan Bank and the Department of Housing and Urban Development in the form of grants, tax credits and mortgage insurance programs.
- First and foremost, **HDPPs** in **Waverly** are encouraged to **establish or expand existing local, housing-related Foundations** for the purpose of financing housing development activities. Program concepts could include the following:
 - ✓ Investment funding for individual owner and rental housing rehabilitation programs.
 - ✓ Development of a community purchase-rehab-resale and re-rent program. Vacated housing on the real estate market in need of rehabilitation could be purchased by **HDPPs** or a local economic development entity, for the purpose of being rehabilitated into a viable, livable housing unit for persons and families generally of moderate income. The house is then put back on the market for sale by a local realtor or other housing-related agency.
 - ✓ Gap financing and/or developer incentives for the construction of new, affordable housing units.
 - ✓ Down payment and closing cost assistance via low- or no-interest loans for persons and families purchasing a home in **Waverly**. Housing purchase price maximums and household income thresholds can be determined by **HDPPs**.
 - ✓ First or second mortgage assistance for prospective or current homeowners, including reduced rate or deferred payment loans.

- Continue utilizing **Tax Increment Financing (TIF)** to assist developers in financing new housing developments, specifically for land purchase, preparation and public facility/utility requirements.
- Establish an **affordable housing fund** with TIF surplus provided by new commercial and industrial projects, to serve as gap financing for selected housing projects.

Housing Study Maintenance.

- This **Community Housing Study** should be reviewed annually by local housing providers and partnerships, including the **City of Waverly**, Waverly Chamber of Commerce, Greater Waverly Area Foundation Fund, local business leadership and school systems, local Foundations and other important for-profit and non-profit groups and organizations and local housing stakeholders.
- Engaging local organizations and housing stakeholders in the planning and implementation of new housing programs will make the use of housing funds more effective and encourage investors to make better informed decisions that target the Community's needs and desires for new and improved housing types. All of this will result in stability and growth for the Community.
- Establish an **annual review process of local Comprehensive Planning** and associated **Zoning and Subdivision Regulation documents.** The Waverly Planning Commission, City Council and local governmental volunteers and community and economic development groups should all be involved in this review. This will ensure a consistent vision for community and economic growth and development.

10-YEAR AFFORDABLE HOUSING ACTION PLAN.

SECTION 6

10-YEAR AFFORDABLE HOUSING ACTION PLAN.

INTRODUCTION.

The greatest challenge for the City of Waverly, during the next 10 years, or by 2033, will be to develop housing units for persons and families of all income sectors, including housing, both owner and rental for the elderly, young families and special needs households, with attention given to workforce households. The housing programs listed in this Study have a specific focus on persons/families with incomes, both at or below 80 percent and 81 percent or more of Area Median Income. The successful implementation of the Action Plan will involve a five-step implementation process including the following:

- 1) Coordination of local Housing Stakeholders, to create appropriate **Housing Development & Preservation Partnerships**, per specific affordable housing activities;
- 2) Plan and implement a variety of **community and economic development initiatives** to compliment a variety of new housing projects in **Waverly**, including highlighting housing development of a component of the **City's Economic Development Strategy & Action Plan**;
- 3) Secure housing developers and contractors to work as a team with local Housing Development & Preservation Partnerships in selecting, prioritizing and producing appropriate housing projects;
- 4) Secure both **public and private funding** to ensure both permanent housing and any required "gap", or subsidy dollars needed for **housing projects**; and
- 5) Coordinate new housing activities with infrastructure installation.

PLACE-BASED DEVELOPMENT COMPONENTS.

Each Housing Program identified in this Action Plan should incorporate "Place-Based" Development Components, as identified by the Nebraska Investment Finance Authority, whereby development supports each community's quality of life and availability of resources including, but not limited to: public safety, community health, education and cultural elements.

ACCESS AND LINKAGES:

- Does the housing program have adequate accessibility and walkability to other neighborhoods and centers in the Community?
- What is the program's proximity to local services and amenities?
- Can people utilize a variety of transportation modes, such as sidewalks, streets, automobiles, bicycles and public transit, to travel to and from the housing program?
- Is the housing program visible from other neighborhoods or parts of the City?
- Is public parking available for visitors to the housing program?

COMFORT AND IMAGE:

- Is the proposed housing program located in a safe neighborhood?
- Are there historic attributes to consider for the proposed housing program?
- Is the neighborhood of the proposed housing program clean and safe for all residents?
- Are there any environmental impacts that could hinder the development of a housing program?

USES AND ACTIVITIES:

- How will the proposed housing program be used? By young families and local workforce? By elderly or special needs populations?
- Are there amenities proposed, or existing and nearby to the housing program that will keep local residents active, including parks and recreation opportunities?
- Does the housing program include a central gathering space for program residents, as well as Community residents?

SOCIABILITY:

- Will the housing program be developed in a way that will allow residents to socialize and interact with one another?
- Will people take pride in living at the proposed housing program?
- Are diverse populations encouraged to reside at the housing program?
- Does the housing program present a welcoming environment for both current and prospective residents?

ORGANIZATIONAL/OPERATIONAL PROGRAMS.

1. Create Local Housing Investment Funding Programs.

Purpose:

The City of Waverly, with assistance from local housing and economic development stakeholders in the Community, create a "pool" or "bank" of funds to invest in needed "gap" financing for local housing development and rehabilitation activities. This is coupled with encouraging the involvement of major employers and local/regional housing developers with assisting employees in obtaining affordable housing through first-time homebuyer and down payment assistance programs, as well as financial support to local developers constructing workforce housing.

Estimated Cost (annual fund drive): \$1,300,000.

2. Establish an Area-Wide Housing Disaster/Pandemic Recovery Program.

Purpose:

The City of Waverly, with the assistance of Lancaster County Emergency Management and Local Housing Stakeholders, create a locally-funded program designed to assist persons and families living in housing affected by natural disaster and/or COVID-19. In combination with State and Federal disaster grant programs, funding for this **Program** should include funding via local foundations, financial lending institutions and private donations.

Estimated Cost (annual): \$450,000.

AFFORDABLE HOUSING REHABILITATION/PRESERVATION PROGRAMS.

3. Owner/Rental Housing Rehabilitation/Preservation Program.

Purpose:

The City of Waverly, with the assistance of Local Housing Contractors and Housing Stakeholders, as well as personal investment among housing property owners/developers, should set a 2033 goal of **35 to 50 housing units** to receive moderate-to substantial rehabilitation. Identify Community block areas with excessive deterioration and dilapidation of housing units, especially areas where Tax Increment Financing can supplement a project.

Estimated Moderate Rehabilitation Cost: \$32,000 to \$42,000 per unit.

Estimated Substantial Rehabilitation Cost: \$43,000 to \$60,000 per unit.

Estimated Cost Subsidy: 40% to 80% per unit.

4. Owner/Rental Housing Demolition/Replacement Program.

Purpose:

The City of Waverly and Local Housing Stakeholders, with the assistance of Local Housing Contractors and personal investment among housing property owners/developers, should set a 2033 goal of 10 to 15 housing units, to be purchased/donated, demolished and replaced with new, innovative affordable housing types, for families/elderly.

Estimated Purchase/Demolition/Construction Cost: \$265,000-\$332,000 per unit. Estimated Cost Subsidy: 45% to 60% per unit.

AFFORDABLE & MARKET RATE HOUSING FOR ELDERLY/SENIOR POPULATIONS.

5. Elderly (55+ Years) Affordable Rental Housing Program.

Purpose:

Develop one- or two-bedroom independent living, duplex/triplex, or apartment units, standard amenities and the potential for maintenance-free living options, to meet the affordable rental housing needs of low- to moderate income elderly households (0% to 80% AMI). This **Program** would include a minimum of **30 units in Waverly, by 2033,** and should feature a variety of living options and on-site amenities.

Total Estimated Cost: \$5,350,000. Estimated Cost Subsidy: 60% or \$3,210,000.

6. Elderly (55+ Years) Market Rate Rental Housing Program.

Purpose:

Develop one- or two-bedroom independent living duplex/triplex, townhome or apartment units, standard amenities, to meet the affordable rental housing needs of moderate- to upper income elderly households (81%+ AMI). This **Program** would include a minimum of **30 units in Waverly, by 2033**, and should feature a variety of living options and onsite amenities.

Total Estimated Cost: \$5,790,000. Estimated Cost Subsidy: 30% or \$1,737,000.

7. Assisted Living Rental Housing Program.

Purpose:

Develop one- and two-bedroom assisted living apartment units, standard amenities, to meet the rental housing needs of moderate- to upper income elderly households (31%+ AMI). This **Program** would include a minimum of **30 units in Waverly**, by 2033.

Total Estimated Cost: \$6,960,000. Estimated Cost Subsidy: 40% or \$2,784,000.

8. Elderly (55+ Years) Affordable Owner Housing Program.

Purpose:

Develop a minimum of **20 two+-bedroom owner units, duplexes/townhomes,** scattered site or in a designated residential subdivision/retirement community, with standard amenities, to meet the housing needs of low- to moderate income elderly households (31% to 80% AMI).

Total Estimated Cost: \$6,400,000. Estimated Cost Subsidy: 40% or \$2,600,000.

9. Elderly (55+ Years) Market Rate Owner Housing Program.

Purpose:

Develop a minimum of **70 two+-bedroom owner units**, **single family units/townhomes**, scattered site or in a designated residential subdivision, with standard amenities, to meet the housing needs of moderate- to upper income elderly households (81%+ AMI).

Total Estimated Cost: \$21,350,000. Estimated Cost Subsidy: 15% or \$3,200,000.

AFFORDABLE & MARKET RATE HOUSING FOR FAMILIES & SPECIAL NEEDS POPULATIONS.

10. Affordable/Market Rate Rental Housing Program.

Purpose:

Develop a minimum of **70 one-, two- or three-bedroom rental housing units, including single-room-occupancy units, duplex/triplex, townhome or general rental apartment units,** Community-wide, with standard amenities, to meet the rental housing needs of families, individuals and persons with special needs. **Program** should be combined with a **Workforce Employer Housing Assistance Program.**

Estimated Cost: \$12,300,000. **Estimated Cost Subsidy:** 40% or \$12,760,000.

11. Affordable/Market Rate Homeownership Program.

Purpose:

Develop a minimum of **250 two+-bedroom owner housing units, single family/townhomes,** Community-wide, scattered sites or in a residential subdivision, with standard amenities, to meet the housing needs of families, individuals and persons with special needs. **Program** should be combined with a **Workforce Employer Housing Assistance Program.**

Estimated Cost: \$99,750,000. **Estimated Cost Subsidy:** 20% or \$19,950,000.

Answer Choice	Response Count	Response Percentage
Yes	241	92%
No	20	7%
Total Responses	261	

If No, why not?

With Lincoln so close we have no need for low income housing.

Upgrades would be nice

Not enough rental properties and those that are rentals are in very poor shape.

Waverly Citizen Survey (267 total respondents)

Comments edited for clarity.

Are there sufficient and safe routes to School for children? If No, what could be done to improve the safety of children commuting to and from school?

- A better way to cross Highway 6 on foot/ bike.
- A crossing guard from Hamlow to Evendale.
- A crosswalk across Amberly by the MS & HS, a walkway across the overpass on Canongate, a walkway across Hwy 6.
- A light near the intersection at the High School on Amberly Rd/Cannongate.
- a path somewhere that goes over hwy 6.
- A pedestrian bridge or tunnel under Amberly road by the park would help kids avoid traffic.
- A pedestrian bridge over Hwy 6 would make it much safer for kids to cross. We don't allow our child to walk to school due to this but we do use the district 145 bus option.
- A pedestrian bridge over the tracks is needed.
- A pedestrian walk/bike path over 6 Highway. A walk/bike path to WIS and Hamlow.
- A pedestrian walking path on the bridge.
- A pedestrians bridge on canongate is necessary for me and my family to want to continue living where we do prior to our children starting school.
- A stop light OR 4 way stop at entrance to middle/High School (east driveway to the High School parking lot).
- A stop light or something similar on Highway 6 and 148th would help along with sidewalks on the west side of 148th.
- A walkable overpass over Hwy 6. More/better school bus options.
- A walking bridge over the train tracks. Reroute semi trucks off of Amberly.
- A walking path over the train tracks. Kids walking on the current overpass is extremely dangerous.
- A walking/biking overpass over the tracks on Cannongate.
- A way for middle/High School students to safely cross Hwy 6.
- Add a walking path over the viaduct, place a stoplight at Cannongate.
- Amberly is dangerous for kids to walk along and drive on.
- Amberly Rd is a high traffic road. Not safe to cross 148th coming out of Evandale. Traffic needs patrolled better all throughout this community, kids and
 adults speed down Amberly, and in residential areas. Semis fly down 148th.
- Amberly road is an accident waiting to happen. Especially if coming over the overpass. I understand plans are in the works to improve this though.
- Amberly traffic during peak hours makes crossing to the schools dangerous. Rerouting truck traffic out of Waverly needs to be a priority.
- Better bike/walking paths from north side of town.
- Better crossing for Highway 6.
- Biggest issue is a safer crossing across the railroad tracks and Highway 6 a pedestrian bridge would be ideal.
- Busses are too crowded.
- Canongate Road needs a safe walkway or alternate path for kids going to school.
- Crossing Amberly.
- Crossing amberly from the south is scary. Too many vehicles traveling too fast. Even w a light and crossing guard. Path over amberly would be safest and encouraging non local traffic to go to hwy 6 also best.
- Crossing guard at HWY 6 or dedicated pedestrian route from the north side of town.
- Crossing guards. High School intersection improvement.

- Crossing the Highway, Amberly and 148th needs to be safer.
- Crosswalk lights at every crossing. Walking bridge over the tracks. Solution for amberly and cannongate.
- Crosswalks need attention. Get trucks off Amberly. Slow down traffic on 148th. Enforce safe drop off and pick up from schools.
- Don't allow trucks on the road in front of school during the times of kids going to school and leaving school.
- Either put stop lights at amberly rd and cannon gate, plus amberly rd and 146th. Or putting a safe walkway for kids to get across amberly rd.
- From the Northside to the MS/HS, the path to walk or ride bikes over the bridge is unsafe. The intersection at Amberly & Cannongate is very unsafe at high traffic times. I've had to find alternate routes for my kids which are indirect.
- Have a walking overpass bridge that goes over the railroad tracks and Highway.
- Help with crossing 148th street from the East in Evandale.
- Hwy 6/railroad tracks come to mind for children crossing.
- I would like to see a sidewalk on the bridge over hwy 6.
- Improve shared entrance to the High School and middle school. Consider a roundabout.
- Increase pedestrian safety on Canongate and intersection of 141st/6. Also, a light at 148th/6 as I a lot of people taking unnecessary chances at that
 intersection.
- Intersection in front of middle/high.
- It would be great to incorporate shoulders and sidewalks on the busier streets, allowing safer, more direct routes for kids to walk.
- It would be nice to have a walking/bike ramp that extends over the tracks and Highway to allow kids from Anderson North to safely walk/bike to school
 instead of the bus when they want to.
- Keeping semi trucks off of Amberly road during school hours, putting a stop sign at 143rd and Bailey.
- Kids from north side of Highway don't have safe way to walk or ride bikes.
- Kids from the north side have to cross HWY 6 and the train tracks.
- Light at 148th and Highway 6. Walkway on Cannongate.
- Many kids walk over the Canongate viaduct which has no walkway.
- More lights.
- · More marking of school crossings on roads.
- More safety around railroad tracks, whistles, cross walkers available.
- More safety for all children walking to school. What's been done is still not enough.
- More sidewalks, more crosswalks with crossing signals. Highway 6 at 141St Street needs a lower speed limit and more traffic enforcement. At least once a day, I see a semi or other large work vehicle run a red light.
- More stop lights.
- Move the truck route from passing by three of our four schools.
- My children don't have to walk across the overpass, but I have driven over it and there is no decent path (a shoulder even) for children to walk in.
- My son will have to go from Evandale to the middle school next year and I worry about him having to cross Amberly. So many people don't stop at the
 crosswalks, even with the flashing lights.
- Need a safer alternative for children to cross hwy 6. A pedestrian overpass would be a great addition to Waverly.
- Need a walking bridge that connects to the overpass and goes over Amberly road.
- Need pedestrian overpasses.
- Need safer north-south pedestrian crossing over Highway 6 and the railroad.

- Need something to make cannongate safer. And the intersection at cannongate and Amberly is horribly unsafe.
- No direct pedestrian access to junior High School and High School from residential areas west of 140th Street and north of railroad tracks/Highway 6.
- No sidewalks on canongate or convenient way around to the schools.
- North side of the tracks has no real way for students to ride bikes or walk.
- Paying for bus services when there is no safe way for my children to get to school without it is ridiculous, they either have to cross a train track/hwy or
 walk on an overpass with no walkway. A ped bridge & a school zone on the Highway.
- Pedestrian bridge across hwy 6.
- Pedestrian bridge crossing Highway 6 and railroad tracks. Adding walkway on viaduct on Cannongate. Generally dangerous for students going to middle school and High School by walking or in a car.
- Pedestrian bridge over Highway 6 to allow safe crossing for children on the north side of Waverly.
- Pedestrian bridge over railroad tracks. Traffic circle at Amblerly and Canongate.
- Pedestrian bridge over the railroad on Cannongate. Traffic light at Cannongate and Amberly. More monitoring of school zone speed limits.
- Pedestrian bridge to connect North and South side of Waverly.
- Pedestrian overpass walkways to cross Hwy 6 and train tracks.
- Pedestrian walkway over the railroad and Highway.
- Pedestrian crosswalk over Highway six or address pedestrian crosswalk to the overpass.
- Possibly more lights or better painted crosswalks on the roads. Crossing guards on the busier roads. There are so many kids that walk to school all over, anything would help make kids safer.
- Pretty much every thoroughfare is now pedestrian friendly (and more difficult for drivers) and the City shouldn't have to do more. Children need to be taught by parents to WATCH, not to just trust lights and stop signs.
- Protected crossings for bicycles and pedestrians across the railroad racks and Highway 6. Crossing guards on 148th and Amberly have been beneficial. Traffic still ignores the flashing lights when crossing guards aren't present.
- Push-button crosswalk beacon at 143rd & Amberly. Pedestrian sidewalk on Cannongate overpass. Pedestrian overpass at 141st & Hwy 6. Crossing guards at more intersections between neighborhoods and Hamlow & WIS. Increase age of school permit drivers.
- Rail and Highway crossing.
- Real lights (red, yellow, green) at crosswalks. Ped Crossing over passes. Lower speed limits. Move the truck route!
- Redirect semi traffic on Amberly road. That road is way to busy. Having larger trucks makes it more dangerous.
- Round about at the entrance to the school off Amberley.
- Round about or signal operating between hours of 7:30am 9am and 3:00-4:30pm...the rest of the time would be a stop sign and could be turned on for after football/basketball games.
- Roundabout at Amberly and Cannongate. Safer routes of travel across hwy 6 for children....mark paths clearly, walking bridges across in several location. Request railroad traffic to slow or not travel between 755-830am and 325-4pm.
- Safe walking alternative over the Highway.
- Safer passages over Highway 6. There aren't any sidewalks on the overpass. It's very unsafe.
- Safer walk/bike paths are needed.
- Sidewalk on Amberly that reaches all the way to the High School.
- Sidewalk on Canongate bridge.
- Signal in front of High School (amberly/cannon gate).
- stop light after overpass to Waverly High School/middle school.

•

- Stop light at 148th and hwy 6. More clearly marked cross walks on major streets so advise cars to slow and pay attention.
- Stop light at Cannongate & Amberly road. Walkway over Hwy 6.
- Stop light or better yet a round about on Cannongate and Amberley rd. Less car parked on 143rd st as it is a main drive to both hamlow and wis for the
 majority of parents.
- Stop light used during school drop off and pick up times at the intersection of cannongate and Amberly.
- The bussing helps from North to South but that is the only safe option if living on north side.
- The crossing at hwy 6 and 141 is terrible. They need a walking bridge.
- The crossings on Heywood are busy and is even hard for an adult to cross with children let alone children by themselves. There needs to be a crosswalk guard there.
- The intersection at 143rd and Amberly is dangerous and needs a light to STOP traffic! Cars currently run the flashing light at 145th and Amberly, it's extremely dangerous!! The intersection coming out of the middle school is a nightmare!
- The kids either have to ride over the overpass or through wayne park which they have to cross Highway 6.
- The overpass on cannon gate needs a sidewalk or something.
- There is no safe way for the kids to use the overpass to get to school. There is no sidewalk. Going to 141st also isn't safe or time effective with trains and traffic running the red light. And crossing Amberly at Cannongate isn't safe.
- There isn't an efficient and safe route from the middle/High Schools to the north side of town, i.e. Jaycee Park. You have to either walk the overpass, which is EXTREMELY unsafe, or walk all the way through town, which is not efficient.
- There needs to be a cross walk person on heywood, in front of wis.
- There needs to be a dedicated overpass that includes sidewalk / bike access separate from the driving lanes. The current cannon gate is unsafe. There needs to be a dedicated pedestrian bridge at 141st that spans both the railroad and HW6.
- There needs to be a pedestrian bridge that crosses Hwy 6 at the stop light.
- There needs to be a safe pedestrian walkway bridge across the Highway!
- There needs to be a stoplight at the corner by the High School. Especially in the morning.
- There needs to be pedestrian bridge over Highway 6. Kids & families walking/riding bikes have to cross 4 lanes of traffic plus multiple railroad tracks. Extremely dangerous.
- There's got to be some sort of supervision on HEYWOOD street. There are so many students walking home and with young drivers out driving around recklessly, something is going to end up happening and it will be too late.
- These is no walkway over the tracks on 141 and it is unsafe to walk on overpass. Build a pedestrian bridge or have crosswalk guards at 141st and hwy 6 for before and after school.
- Use the greenspace (utility easements) that have recently been decommissioned to build a major bikepath/sidewalk through the Evandale neigborhood, and future development, connecting it to the existing sidewalk to the SW of the elementary school.
- Walk over bridge on Amberly and a light at Amberly and 143rd st.
- Walk overpass over hwy 6 for children.
- Walk way over bridge. Better signs on Highway for crossing at 141st. Traffic is too fast. Need the warning lights for truckers that light is changing. See way too many trucks blow through this red light. Even cars blow through it. Slow it down to 35mph.
- Walking bridge for safe options to traverse HWY 6 and railroad tracks. Additional mechanisms to control traffic for students that must cross Amberly Road. Current warning lights are ok, but some traffic does not respond to them.

- · Walking bridge over Canongate.
- walking bridge over Highway 6. have the police office watch the stoplight in the morning to help prevent people from running red-lights heading east and west, that happens a lot.
- Walking bridge over the overpass. And something done about the intersection of Amberly and Cannongate.
- Walking pass over railroad tracks from the north side towards the middle schools.
- Walkway over RR tracks and Hwy 6.
- Walkway over the tracks.
- Walkway over viaduct.
- We live in Aspen Park and it's not safe for kids to travel on canongate or crossing the railroad tracks/hwy 6. A walking path on Canongate would be amazing.
- We live in the Riley addition by Hamlow Elementary. The current crosswalk system across Ambely is still concerning as countless drivers do not pay
 attention to the crossing guard or the crosswalk lights and signs. It continues to be dangerous.
- We live just north of the overpass. I would love to see a safe walking path from there to the middle and High School.
- We live on the North side of 141st and there is no safe option for my kids to walk/bike to or from school. Crossing the Hwy is so dangerous as I see semi's run the red light daily. We need a walking overpass!
- We need a better way for kids to get across Highway 6 and the railroad tracks.
- We need a pedestrian bridge over the tracks and Hwy 6.
- We need a safe way for children to cross the tracks and Cornhusker.
- We need to lower the speed on Amberly. State law requires motorists to yield to pedestrians in or about to enter a crosswalk. With or without the flashers
 that were installed. I'd also suggest 4 way stops at 145th, 143th and Amberly.
- While there are safe routes, there are routes also not safe. The Hwy is so dangerous to cross during school and not. Cars are always running the red light and turning when they have crosswalk time.
- Would LOVE a bike route to the middle school. She wants to ride her bike which would take her 10 mins from our house.but not safe due to overpass.
- Yes and no. We live in Riley and while it's safer for our children to walk to school vs the people that live south of hwy 6. I still think could be safer with actual street lights that would stop traffic for the kids to walk across streets.

What new public recreational opportunities should be considered for Waverly?

- A bike path around town would be nice. We will need more ball fields soon as well.
- A bowling alley would be nice.
- A city pond stocked with fish to give kids something else to do other than play video games and the new pool if it ever gets built.
- A connection to the trails system that is closer than the 148th Street connection.
- A dog park.
- A dog run.
- A larger library.
- A new or bigger community center one with an indoor gym, a bigger and better library, and eventually we will need more schools.
- A skate park, safe updated park equipment.
- A soccer facility.
- A splash pad.

- A YMCA in Wayne Park in partnership with Lincoln Y. Indoor and outdoor pool for year round use instead of 2 months. The Y leagues could use our
 facilities and bring the people here. After school programs would be a benefit. Community center too.
- A YMCA or similar facility would be amazing so we don't have to drive to Lincoln. A youth center for middle school and High School students to go to after school would be nice.
- A YMCA or something similar.
- Actually completing the new pool project. A ton of upkeep to the current pool if it will be optional even for another year. It is falling apart and gross. Clean bathrooms at all the city parks.
- Adult Football.
- An actual library. New swimming pool.
- An aquatic center that will accommodate the public. The current plan does not even double the capacity of the old pool built in the 1970s, when the population of Waverly has more than doubled. More, unobstructed, mile(s) long biking/running paths.
- An indoor facility (pool, basketball, tennis) that can be used all year. Not an outdoor pool that will be open less than 3 months of the year.
- Anything to give people especially kids something to do in Waverly.
- Aquatic center.
- Aquatic center. Basketball courts.
- Aguatic center, improved library.
- Baseball softball complex that is better taken care of. Bike trails.
- Better and more community park shelters and areas to gather.
- Better public sports facility. Baseball is good. Everything else is poor. Honestly something like ymca is greatly needed.
- Bike and walking path 5 + miles long.
- Bike path along Waverly Rd.
- Bike paths, especially along Waverly Rd.
- Bike trail, indoor swimming pool.
- Bike trails.
- Bowling alley
- Public indoor basketball/volleyball facility.
- Bowling alley, movie theater, mini golf, arcade, ANYTHING!
- Build the new pool. Dog run/park.
- Build the pool!!!!
- Catholic church.
- Community center with a court.
- Community center with indoor pool.
- Connected trails allowing for easier access to get across town.
- Day camps in summer.
- Dog park.
- Dog park.
- Dog park.
- Dog park.

- Dog park.
- Dog Park.
- Dog park.
- Dog park and outdoor concert venue.
- Dog park.
- Dog Park.
- Dog park.
- Dog Park. YMCA Branch. Trail w/ integrated fitness stations.
- Dog park, bike trails.
- Dog park, walking/biking trails other than Wayne park, splash pad.
- Dog run.
- Drive in theatre.
- Expanding the community library.
- Extend the pathway to the north side of the tracks.
- Fenced-in dog park/run.
- Fitness center with the access to indoor pool/sauna, Basketball courts, etc.
- Fitness/body weight workout stations around Wayne Park.
- Get the new pool developed!
- Golf.
- Golf course.
- Golf course and Bowling alley.
- Golf course, Bowling alley and Movie theatre.
- Golf course, hike/bike trail.
- · Golf course, overpriced water park.
- Golf course. Public fishing.
- Green space- improved trails.
- Gym that offers class only thing we have is snap and not cross fit, New business Catholic Church.
- Gym!! Library.
- Hiking trail.
- I feel that Waverly has a sufficient number of public recreational opportunities with Lawson Park and the Waverly Community Foundation facilities. Waverly is investing too much public money in a water park that is only used three months of the year.
- I know the there are plans for an improved swimming pool. This is a much-needed upgrade.
- I think the disc golf course should be expanded. My son, who lives here in town designed a course that would give an additional 9 holes.
- I think Waverly is pretty good at having recreational opportunities for our citizens.

- I'm pretty impressed with the parks and rec in Waverly. No suggestions.
- Indoor basketball.
- Indoor facility for kids to play when too cold.
- Indoor play center for kids and teens.
- Indoor pool.
- Indoor pool/workout center.
- Indoor Rec area.
- Indoor recreation that you don't need a membership for where kids can go during summer other than the pool that does activities and engagement.
- It would be nice to see the new pool get off the ground and perhaps more walking trails.
- It would be very cool to have a outdoor archery range. 10-60+ yards as there are not many places that you can go to do this and an opportunity for leagues ect if 3d targets could be incorporated.
- It's doesn't make sense to spend all this money on a pool that can only be open 2-1/2 months a year. An indoor pool would have made so much more sense. We need a dog park. We need a bike path into Lincoln to connect with 84th at path.
- Just keep pushing to get the pool/aquatic center finished.
- Just maintain what we have.
- Large community center with basketball and volleyball courts, indoor walking track (especially needed for aging generation), senior center or combo youth/senior center for activities could be connected to a stand alone library.
- Larger library and community Rec center.
- Let's finish getting our swimming pool built.
- Major bike walkway. Make the new devel north of Bluff Rd build a path, connecting through the easements in Evandale, connecting to the existing sidewalk through Wayne park SW of Hamlow. This would create a major recreation path and safe walkway for kids.
- Making sports complex better so Waverly can host tournaments.
- Mini golf.
- Miniature golf, pickelball, and a community fitness center with a pool, gym, & gather place for community organizations.
- More options for the younger generation to do. Bowling alley, movie theatre, laser tag, YMCA, mini golf etc. Things that young people can do year round.
- More parks and outdoor recreation areas.
- More parks near rylies development.
- More parks with green/open space. Walking, Biking trails. More for adult population.
- More restaurants capable of home delivery. No such options are currently available.
- More running trails.
- More safe walk/run/bike paths throughout city.
- More stuff for kids instead of vandalizing parks.
- More tennis courts and walking paths.
- More theatre, arts, music + better library.
- More walking & bicycle paths.
- More walking trails, splash pad after the new aquatic center is done.
- Move forward with completing the new pool. Bowling? Mini golf? We're so close to Lincoln I'm not sure what we need here.

- Need a running/bike trail that goes around Waverly.
- New park at Wayne park or somewhere else with new equipment.
- new pool, splash pad in Lawson Park, more park shelters.
- New pool. Indoor basketball and volleyball gym.
- New pool. Splash pad and/or playground at Lawson Park to be used during baseball season.
- New updated pool and park area †does not need to be extravagant huge water parks. Just something new and updated (look at Stromsburg, Ne).
- No new public recreational opportunities are needed.
- None.
- None.
- None.
- Our family would love an area designated as a dog park. Also, bike trails would be great/bike park for jumps and tricks etc. A hotel with an indoor pool and conference rooms would do well here. Can we please find someone to open a sandwich shop?
- Outdoor workout equipment. Equipment and ground terrain designed for children with disabilities. Improve basketball courts. Add adjustable volleyball net on grassy terrain for children.
- Pedestrian trail system throughout community. Better indoor gym/recreational facilities for children and adults.
- Pickle ball.
- Pickle ball court.
- Pickle ball courts. Get the pool situation worked out.
- Pickleball courts.
- Pickleball courts updated.
- Pool.
- Pool.
- Pool.
- Public track for working out/running and walking. Dog park. Nice walking trail.
- Rec Center.
- Rec center.
- Rec Center for kids.
- Rec center, redevelopment of downtown, place for people to rent out for events, better tennis courts and pickle ball courts.
- Recreation center for teenagers, walking/running trails.
- Recreational building.
- Recreational center.
- Restaurants.
- · Restaurants, shopping, bar. Weekend entertainment.
- Roller skating, basketball courts, bowling alley, movie theater anything!!
- Save the tax money and give us a rerun. Or just lower the taxes. We can engage in recreation on our own.
- Senior Citizen exercise classes.
- Skate park, water park.

- Skate/BMX park, Golf Course, bike trail that connects to Lincoln.
- Sledding hill for winter, pickle ball courts, skate park, park that has exercise equipment.
- Splash pad. Connected walking paths.
- Splash pad. Pool.
- Splash pad, pedestrian walking/biking area over canongate bridge, more trails.
- Splash park.
- Start new pool.
- Swimming.
- Swimming pool.
- Swimming pool.
- Swimming pool.
- The Pool.
- There are so many activities for kids but nothing for empty nesters. Seriously, between the school and city facilities/parks I think there is enough for kids.
- There is enough activities since we spent 6 million+ on a swimming pool that only is open 2-3 months a year.
- There needs to be better trail systems atriums town to link the parks for biking, walking, jogging. See comments above about needed safe pedestrian crossing to link north and south sides of town.
- Top golf, bowling alley or motorcycle flat track races.
- Trails, bowling alley, library (larger, more kids spaces).
- Walk paths, New pool and Updated parks and cleanliness.
- Walking paths around town. Bike trails round town. Golf course added to the town.
- Walking paths, some type of after school hangout for high-school aged kids.
- Walking trails that incorporate the entire city.
- Walking/biking trails around town.
- Water park, dog park.
- Waverly currently has everything my family would use.
- Waverly is in need of the new pool. My nieces and nephew live in Waverly, so I have frequented the pool throughout the summer.
- We need to concentrate on the water park. Maybe hire someone better to organize kids rec sports.
- We have a shortage of baseball/softball fields for multiple teams to practice on. Waverly needs new tennis courts. Hopefully the new aquatic center will happen sometime soon because the current pool is awful!!
- We should have a roller rink or a bowling alley or a drive in movie theater or putt putt golf.
- Well, take a look at Gretna. The population is not that much bigger than Waverly and yet the community came together to develop Gretna Crossing.
- Wider sidewalks for bike traffic and more bike trails.
- Winter men's basketball. Either league or some sort of pickup game. Would obviously have to work with the schools to get an open gym somewhere 1
 night a week.
- Would be nice to get the new pool started and finished.
- Would love to see something for the kids to do. A YMCA? Karate? Hate driving to Lincoln for things. Only soccer option for middle school I hear is the expensive 400+ plus a year more select team. Would love a rec team.

- YMCA.
- YMCA. Indoor basketball courts.
- youth activities like splash pad, walking/biking trails.
- Youth basketball (elementary age) and better gym/workout facility.

What three new businesses would you like to see in Waverly?

- Dollar General.
- 1) more sit down types of restaurants, family type, no attached bar. 2) a general merchandise type of store such as a Dollar General or a Walmart. 3) a small hardware store such as Wolfe Hardware in Havelock.
- 1. I am excited for the new Mexican restaurant to fill the old Subway, although I do miss having a sandwich place. 2. I have always been surprised that Waverly does not have a Dollar General. It would be nice for quick things that you need to grab.
- 1. Winery or upscale eatery (an adult place to meet for drinks or food), 2. Hotel/event space, 3. Restaurant with healthy food options.
- A bakery/drink shop, a family resturant, a sandwich shop.
- A community center (similar to Hickman's), a sit-down restaurant to replace Honey Creek, a new True Value or other small hardware store like we used to have.
- A couple more sit down dining options. YMCA.
- A Dollar General, or similar store. A restaurant or bar, similar to the new Good Life bar in Gretna. Somewhere fun for kids to hang out/host birthday
 parties (like a bowling alley).
- a dollar store, another fast food place or restaurant, an upgraded/ bigger caseys.
- A full grocery store and more dining options.
- A full grocery store. Dollar tree. A decent restaurant.
- A full grocery store. Laundry mat. Cvs or walgreens. A bigger library for the kids.
- A good pizza place. A coffee shop. A full grocery store.
- A hardware or lumber store.
- A hardware store.
- A Hotel: along the interstate the options are N 27th or closer to Gretna. Another option close to Waverly is 84th and Holdrege. Tried to book for Waverly events and either full or rates increased to \$300/night. More restaurants in town.
- A new restaurant/bar. A new & bigger gym. A hotel out by shakers.
- A nice dine in restaurant, a donut shop, and a movie theater.
- A nicer sit-down restaurant. Brewery/taproom. Florist or really any small retail space.
- A real pizza place (dominos, pizza hut, ect). A diner. An ice cream place that is open evenings and weekends reliably.
- A replacement for Honey Creek.
- A sit-down breakfast place!
- Ace Hardware or similar hardware/lawn& garden center. Dollar General or similar store.
- Amigos, Scooters, Dollar tree.
- An actual restaurant. A better bar. A dollar general type store.
- Another bar and grill. Mexican restaurant. Hardware store.

- Another dining option, a better grocery store and a better gym.
- Another fast food option. Another sports bar. Variety store.
- Another option for sit down dining that's not fast food.
- Another restaurant would be great.
- Another restaurant, dollar store.
- Another sit down Restaurant. Scooters or Starbucks would be great! A lot of commuters would get coffee on their way out of town.
- Another sit down restaurant. Additional fast food. Dollar store equivalent.
- Another sit-down restaurant. A bar. A pizza place.
- Any food joints, dollar store and coffee place.
- Any new business would be welcome. Compared to other towns even those close to Lincoln we are lacking. Specifically restaurants and retail.
- At least one more bar. More food options.
- Authentic Mexican restaurant. A second bar.
- Auto Parts Store, Ace Hardware.
- Bakery, Mexican food, hardware store.
- bar with food, sit down dining, bigger grocery store and a dollar general.
- Bar, Family Restaurant, Commercial Shop Space.
- Bar/grill alternative to Trackside. Mexican restaurant.
- Better bar and restaurant. Good Mexican food. Breakfast place.
- Better hardware store ,Hotels , restaurants.
- Bowling Alley. Restaurants finer dinning. YMCA.
- Bowling, arcade, family activities.
- Cafe for coffee/breakfast/brunch. Sit down restaurant.
- Cafe/diner with breakfast/lunch/dinner, hardware store, general store (sundry/cleaning supplies/personal).
- Coffee shop and bakery. Massage Therapist and Spa. Ace Hardware.
- Coffee shop and bakery. Steakhouse. Jimmy Johns.
- Coffee shop. Bar. Another food option pizza, Mexican, etc.
- Coffee Shop. Steak house. Discount Store.
- Coffee shop, dollar general or equivalent, hardware store.
- Coffee shop, Mexican restaurant, convenience store.
- Coffee. Sports bar. Gas station/fast food open late (past 10pm).
- Culver's, Target, Scooters.
- Dine in restaurants. Better fast food options. Small town bar and grill.
- Dog day care, Goodcents, pizza place.
- Dollar General or something similar. More Restaurants.
- Dollar General type store.
- Dollar General. Ace Hardware. Restaurant options.
- Dollar General. Scooters. More Fast Food.

- Dollar general. Walmart. Hyvee.
- Dollar general, ace hardware, bbq restaurant.
- Dollar general, dining options.
- Dollar general, hardware store, pizza restaurant.
- Dollar general. More restaurants.
- Dollar Store. Restaurants.
- Dollar Tree or Dollar General. Restaurants. Hotel.
- Dollar tree, pizza place, family restaurant.
- Drive through coffee, internet cafes/study places, bowling alley, miniature golf, horse boarding/riding.
- Drive thru coffee shop, Mexican restaurant, sandwich shop(Picklemans).
- Dunkin donuts, hardware and a nice sit down restaurant.
- Family dining. Super Saver. Super Target.
- Family Dollar. Jimmy Johns or Mr Goodcents. Taco Inn.
- Family restaurant, Bakery, Coffee shop.
- Family restaurant. Hardware store.
- Family restaurant. Dollar general.
- Family restaurants.
- Fareway Meats, dine in restaurant, dollar general.
- Fast Food. Large Indoor Kids Playground. Bigger grocery store.
- Food.
- Food Restaurants. Escape Room.
- Food options.
- Full sized grocery store. Dry cleaner. Restaurant.
- Giant hardware store. Bigger grocery store with a lot more options. More fast food choices.
- Godfathers pizza, want Subway back, more retirement housing options.
- Grocery store. Pizza restaurant. Hardware store.
- hardware store.
- Hardware store. More sit down restaurant choices. Drug store open when people need it.
- Hardware store. More upscale family restaurant.
- Hardware store, Gift shop and home goods, Subway, Taco Bell, party store, card shop.
- Hardware store, more restaurants, dollar general.
- · Hardware store, more sit-down family restaurants.
- HoneyCreek like restaurants or Mexican style and family dollar, pizza/ wings other than trackside.
- Hotel. Dollar General. Family Restaurants.
- Hotel, family restaurants.
- Hotel, restaurant, home improvement store.
- Hotel, restaurants, and dollar general.

- Hotels, more restaurants, shopping.
- Hyvee/Walmart Some type of sit down restaurant besides bar food. Chick-fil-a.
- I think everything that is currently here is being supported well. Anything more might have a hard time financially by a town the size of Waverly. Waverly does a great job for what it already has for population size.
- I would like to see restaurants a donut shop and a pizza place.
- Larger grocery store.
- Larger grocery store and a hardware store.
- Laundry, hardware store, restaurants.
- Lowes as there is not one on this side of town and they would have what tsc and others in town do not carry. A bicycle repair and sales shop to encourage bike use. Smoothie shop. Fitness area i.e.YMCA.
- Mexican food. Another sports bar. Hardware store.
- Mexican food. Sandwich shop. dollar store.
- Mexican food, Mr. Goodcents, a brewery.
- Mexican Restaurant.
- Mexican restaurant. Hardware store. Another sit down restaurant.
- Mexican restaurant. Hardware store. Somewhere to eat breakfast.
- Mexican Restaurant. Hotel.
- Mexican restaurant. More shopping clothing and gift type.
- Mexican Restaurant. Coffee shop. Quick oil change shop.
- Mexican Restaurant. Theater. Golf course.
- Mexican restaurant, hardware store, scooters coffee!
- Mexican restaurant, thrift/consignment store/Dollar Tree, plants/flowers store.
- Mexican restaurant. Breakfast /coffee cafe (dine in). Flower shop.
- Mexican restaurant. Convenience store on North side of tracks. Another sit down restaurant.
- Mexican restaurant. Domestic violence resource center. Dollar store.
- More bars & restaurants.
- More eating establishments, especially a sit down restaurant similar to Honey Creek. More fast food options. Perhaps a laundry facility for those who
 don't have laundry in their homes.
- More food choices. A good example would be the Main Street in Ashland they got shops several good food choices a winery. A hardware store when I want to buy something I do not need bulk.
- More food options- restaurant, it would be neat to open a cafe where people could go for coffee/breakfast/lunch foods. Another grocery store or to be able to get a bigger store?
- More food options, better hardware store (other than Tractor supply).
- More food options, especially sit down restaurant. Daycare and family activities (bowling alley).
- More food options, jet splash or similar car wash.
- More food places to eat and fast food.
- More restaurant choices. Bowling alley/fun center.

- More restaurant options (sit down & fast food), dollar general and coffee/donut shop.
- More restaurant options- it's a bummer that several have closed in the past couple of years. Expanded hours at the pharmacy. HyVee! A better gym
 option. Allo.
- More restaurant options, a nicer bar, hardware store, coffee shop/bakery. It's so exciting to hear the new aquatic center will be built. It is so needed and
 will really benefit our families here in Waverly.
- More restaurant options. Larger grocery store. More Retail (Hardware specifically).
- More restaurants.
- More restaurants.
- More restaurants. Hardware store.
- More restaurants. Hardware store. Arcade.
- More restaurants. Hotel.
- More restaurants and another bar.
- More restaurants and coffee shops.
- More restaurants variety. Dollar tree or dollar general. Hotel by the interstate.
- More restaurants! Dollar general. More fast food establishments and more restaurants to eat.
- More restaurants, and a gym with a pool and or Hotel with a pool.
- More restaurants, and an alternate grocery store.
- More restaurants, kum n go, target.
- More restaurants, urgent care open on weekends, hardware store like ace hardware.
- More restaurants. Don't care what. Just need more options that are open in the evenings.
- More restaurants. Cannot wait for the new mexican place to open.
- More Restaurants.
- More Sit-Down Restaurants such as a steakhouse. Fitness Center. Thrift Store.
- Motel. Plumbing. Heating, air. Appliance repair.
- Motel, restaurants, rec center.
- New business needs to be limited. There is already too much growth in this town. Too many new people, too much crime. Limit the growth. Keep Waverly a small town.
- New sit down restaurants.
- Nicer food options. Drive-thru coffee shop. Not a new business, but a better Casey's.
- None.
- None.
- None.
- Pizza place, crafting shop.
- Pizza restaurant. Sit down restaurant.
- Pizza restaurant, a salon/spa and Trader Joes.
- Pizza, pizza, pizza.
- Places to eat.

- Places to eat. Restaurants.
- Plumbing. Well drilling. Steel fabricator.
- Putt putt golf, more diverse set of restaurants/fast food, shopping center (non grocery).
- · Quality food. Hardware.
- Restaurant.
- Restaurant. Another bar. Hardware store.
- Restaurant, Dollar store, Fast food.
- Restaurant, Dollar Store, Bar/Restaurant.
- Restaurant. Hardware.
- Restaurant. Modern gas station.
- Restaurant. Retail stores. Auto parts store.
- Restaurant. Shopping other than boutiques. New bar.
- Restaurant options, clothing, dollar general or family dollar.
- Restaurant. Dollar General. Starbucks.
- Restaurant, dollar general, hardware store.
- Restaurant, dollar tree/dollar general, scooters.
- Restaurant, fast food, hardware.
- Restaurant, large box store (Walmart or target).
- Restaurants.
- Restaurants.
- · Restaurants.
- Restaurants.
- Restaurants. Dollar Store. Drive thru coffee.
- Restaurants. Hardware store. Discount store. Bowling alley.
- restaurants (any, non fast food), bigger grocery store.
- Restaurants (not fast food). Bakery/coffee shop.
- Restaurants and additional fast food options.
- Restaurants coffee shops.
- Restaurants. Larger grocery store. Larger convenience store.
- Restaurants. Spa. Car wash (Jetsplash).
- Restaurants!
- restaurants! (Sit down dinner option, breakfast/brunch, another fast food option such as Good Scents or amigos), fun center like bowling and/or mini golf.
- Restaurants!!!! Food places, hotel, a Dollar General would be nice.
- Restaurants!!!!! Drive through coffee shop.
- Restaurants (sit down and fast food), small hardware store.
- Restaurants, dollar tree, thrift store.
- Restaurants, bigger grocery store, hardware store.

- Restaurants, coffee shop, nice bar.
- Restaurants, coffee, donuts.
- Restaurants, Dollar General, ?
- Restaurants, hardware store and a ice cream shop which is open on a regular basis with evening hours.
- Restaurants, hardware store, another grocery/drug store.
- Restaurants, hardware store, auto parts store.
- Restaurants, hardware store, car parts.
- Restaurants, hardware store, discount store like a dollar general.
- restaurants, hotel.
- Restaurants, Quicklube/tire repair.
- Restaurants, shopping.
- Restaurants, shopping center, hardware store.
- Restaurants, would prefer additional sit down options as well as potentially fast food.
- Restaurants, bowling alley.
- Restaurants.
- Restaurants...
- Scooters.
- Scooters, Dairy Queen, Amigos.
- Scooters, Trader Joes, Target.
- Sit down (non-bar) dining options.
- Sit down family restaurant NOT A BAR. Coffee shop. GYMS.
- Sit down family restaurants. Dollar General. Bigger Caseys.
- Sit down non-fast food eating establishment, somewhere else to shop (ex dollar store etc), dog grooming/boarding.
- Sit down Restaurant. Dollar store.
- Sit down restaurant. Grocery. Convenience store.
- Sit down restaurant. Store. Dollar General? Maybe not Walmart but something better than our grocery store and U-Save so I wouldn't have to go to Lincoln. I don't see how I wouldn't have to go to Lincoln for meat though. Bar/Tavern/Wine-tasting.
- Sit down restaurant.
- Sit down restaurant, fast casual food, hotel.
- Sit down restaurants that are not fast food or bar food are non existent in this town. I can only assume that affordable space is limited as I have seen vacant space in the strip near Amberly and 6 for quite some time.
- Sit Down restaurants. Dollar general or family dollar. full service doctors office.
- Sit-down restaurant. Coffee shop. Tanning.
- Starbucks, indoor play center, 24 hr diner.
- Starbucks, or scooters. Somehwere to get coffee in the morning. Any cafe for breakfast, we loved honey creek.
- Steak house. Coffee shop. Discount/Variety store.
- steak house, orschlen, automotive store.

- Taco inn.
- Taco place. Italian place. Another bar.
- Target, Mexican food, Sushi.
- Valentinos, Amigos, Scooters.
- Walmart Neighborhood Market. Bank of the West.
- Walmart or Dollar General, Texas Roadhouse or Family Restaurants, Panera or healthier fast food. ANYTHING!
- We need a hotel with restaurant and flexible event space for weddings, gatherings, lodging, etc. New restaurants with brewery, and a real hardware store. We also need a real gym.
- We need a variety of business including dining. We go into Lincoln for most things due to lack of support in Waverly. We can go to plattsmouth and see such a big business area compared to Waverly with a short drive to Bellevue and Omaha.
- We need another choice for bar/restaurant. Better fast food options. A breakfast place like Honey Creek would be great.
- We need more options for food.
- Whichever ones would be attracted by lower taxes.
- would like to see more restauraunts, a new bar, and a place for teenagers to hang out bowling alley, arcade something along those lines.

What three services would you like to see offered in the City of Waverly that are currently not available?

- Drive in movie theater (which could bring in people from outside of town). Possibly other entertainment options.
- 1) small engine repair / mower blade sharpening.
 2) television / electronics repair.
 3) automobile dealer such as Sid Dillon.
- 1) We need a partially paid fire and EMS dept. 2) Trails, walking paths.
- 1. Better water. The water in the drinking fountains at the schools has a metallic taste. If the bottle fillers are used, they have filters, so the water has a better taste. 2. A round about at the intersection of Amberly and Cannon Gate.
- 1. Co-working space: I think there are a lot of people who work-from-home in Waverly a space for them to connect might be appreciated. 2. Volunteer or Social Club: A way to connect with others in the community and give back. 3. Stronger downtown.
- 1.Recycling. 2.Sit down restaurant such as Mexican restaurant not a bar.
- A dedicated police department.
- A police department.
- A Police force.
- A police station!
- A post office.
- A senior center. A library that loans out tools, household items, etc. (things that you don't necessarily want to purchase for a one or two time use). A youth center (my kids grew up on military bases, this is something that all USAF bases have).
- Active city police.
- Activities for seniors.
- Actual bathrooms at the city parks....and the parks that do have bathrooms (wayne) the bathrooms need to be clean and updated. Bigger library!!!!
- Allo.
- Allo I know it is coming but the internet is unreliable. Also continuing up top we have no Healthy food options we have two fast food places anything after 5 pm your choices are the bar or fast food.

- Allo but that's coming!!
- Allo fiber internet. Security at parks.
- Allo fiber internet which sounds like is coming. Not sure right now what else.
- Allo, bigger grocery store, golf course.
- Allo, more cable options.
- Amazon drop for returns. Car maintenance/oil change. Recycling site.
- An actual library facility.
- Another church option than Lutheran or Methodist, town police force or more police presence.
- Another grocery store.
- Auto service.
- Better internet, expanded library.
- Better internet/fiber optics.
- Better library.
- Better medical and dental facilities.
- Better recycling plan.
- Bigger tree dump site. Better upkeep on public bathrooms.
- Bike trail.
- Bus transportation, community volunteer days, fireworks displays on the 4th.
- Butcher shop. Mexican food. Police department.
- Can't think of any. I don't want my taxes to keep increasing.
- Can't think of any.
- Can't think of any.
- Carpet cleaning. Merry Maids or some type of professional cleaning service. Massage therapy and spa.
- Catholic Church.
- Catholic Church. Indoor pool.
- CHEAPER SEWER RATES. Fiber Internet.
- Cheaper water and sewer rates.
- Cheaper water bill. Indoor swimming pool.
- City law enforcement, indoor gym/workout center.
- City Police force.
- City provided trash. Public library / online access to books.
- City take care of all the trees they planted between the sidewalk and curb. I've read through the ordinance and the way I read it that's what's supposed to happen but now the city wants the owner to pay for half of the removal and get bids to do it.
- Commuter train to Lincoln/ Omaha. Bus service to Lincoln/ Omaha. Safe bike trail to Lincoln.
- Custom bakery, apparel print shop, eye doctor, barber.
- Different water. Laundry mat. Bus route.
- Dog boarding/grooming, police department.

- Dollar store, theatre, mexican food.
- Dry Cleaner Drop-Off Site. Amazon/Fed-X/UPS Drop-Off Site. Printing/Copying Services.
- Dry cleaning, laundry mat.
- Eye doctor.
- Eye doctor, Elderly living village, transport service.
- Eye dr.
- Faster internet.
- Fiber internet.
- Fiber internet through the whole city, city golf course.
- fiber internet, 24 hour urgent care.
- Fiber internet, more businesses to provide competition for all services.
- Fiber internet, recycling.
- Fiber optic, cheaper water bill.
- Fitness Center with workout classes and space.
- Fitness such as Genesis with classes for adults. Yoga/Wellness studio.
- Free public recycling, similar to how it used to be behind honey creek.
- Full service fitness center with pool and group classes.
- Full time fire department, full time sheriff, cheaper water utilities.
- Full time police.
- Full time police. Full time fire.
- Get that pool done. Our own police department.
- GYMS. Tanning. Grocery stores.
- hardware store.
- Help for the homeless, retirement apartments.
- High speed internet.
- Hotel. A bowling alley. An arcade.
- Hotel, police, bigger grocery store.
- House Cleaning service. Carpet cleaning.
- I'm concerned about our level of capacity for the fire department. I'm noticing more and more medical calls that are require mutual aid and I've been told staffing is the issue. As Waverly continues to grow a full time police presence would be beneficial.
- I'm just glad ol mayor finally let Allo in.
- I'm not sure.
- Internet (our neighborhood does not have reliable services available (Spectrum, Kinetic, NextLink, etc are not consistent). No other services come to mind.
- Jazzercise or Zumba classes. ELCA Lutheran church.
- Law.
- Library. Revitalize our downtown!!!!!!!

- Local Public Safety Officer.
- Localized law enforcement, mental health.
- Lower taxes.
- Lower Water bills. We pay almost double what other towns pay.
- Make the library an actual city library.
- Maybe local police for better safety and know eye to keep the bad out.
- Medical clinic.
- More activities for adults and kids ie disc golf leagues, tennis leagues, parkway tree trimming and better City Maintenance ie. ditch mowing, tree removal and trimming in the creek areas.
- More Child Care Service. More elderly/retired community services. retail services.
- More dining. Bigger grocery store. Better shelter for park.
- More fast food options. A fancier bar. Rec center.
- More interconnection of bike paths in town and out to the High School/ runza area and north/south. Recycling, I know we lost this, but it would be nice to have it back. Composting, possibly in the tree dump.
- More Senior Activities.
- More senior activities.
- More senior items.
- more walking trails and dog run Indoor track.
- n/a
- N/A.
- Na.
- Nicer food options. Drive-thru coffee shop. Pet waste stations in parks.
- No.
- No new services are needed.
- None.
- None since Allo is coming finally.
- None. I like the size and feel of Waverly as it is.
- On site police and hired support for fire and ent.
- Opportunities for homeschool families without religious affiliation.
- Optical, bigger fitness center.
- Own police.
- Paid FD/Police department. Dump open more outside of business hours. I feel sometimes the schools and businesses forget some work 8-5!
- paid fire and rescue.
- paid full time police force. Paid paramedics or EMT's.
- Pizza place and Mexican food. Hotel. Catholic church.
- Police.
- Police.

- Police department. More food options.
- Police department. Recreation center. Senior center.
- Police Department.
- Police force and emergency workers that are stationed in Waverly.
- Police force, public transportation.
- Police officer.
- Police presence.
- Police. More trails for safe running and riding.
- Police, recreation center, restaurants.
- Police. Shooting range. Dog park.
- Post office.
- Public wifi at all city parks/lower income families.
- Public yard waste disposal site (I know that Waverly has a tree dump site already but the process to get keys and access to the site is more hassle than it's worth in most cases to use the site). Fiber internet.
- Recycling.
- · Recycling.
- Recycling.
- Recycling.
- Recycling.
- Recycling center even if its just for cardboard, dog park.
- Recycling center. Dog park.
- Recycling, better parking for events.
- Recycling, community crops, dedicated police.
- Recycling, faster internet (Allo), more police presence.
- RECYCLING, RECYCLING. Especially for glass; I pay to have my recycling picked up but still have to take glass in to Lincoln.
- Recycling, snow removal assistance for elderly, better support to Fire Dept.
- Motel. Plumbing. Heating, air.
- Scooters coffee shop.
- Senior center. Library supported by city. Retirement living facility.
- Shuttle to Lincoln. Neighborhood Watch programs.
- Sit down restaurant. Police.
- Something for young kids activities/gym/somewhere to go on a rainy day. Better internet. Bar/keno/etc. More daycare.
- Swimming in High School.
- Take over HOAs.
- Uber.
- UPS/Fed EX. Longer Postal hours. Dry Cleaning.
- water that is drinkable & not so expensive, a police department that is invested in our city & enforces ordinances other than speeding.
- Waverly police officers.

Please provide additional comments regarding the future of Waverly, Nebraska:

- As Waverly grows, we need to look at developing our own police department and a permanent fire/emergency set up instead of volunteer.
- At the rate we are growing, we will definitely need more food, retail and entertainment options.
- Everybody wants to see Waverly grow grow. We moved out here 26 years ago because we wanted a small town and smaller school to send our children too. Do we need some improvements, yes. A couple more places to eat, a couple more shops but we don't need to become Lincoln.
- Fix the parking on the street situation. It is very bad in the town. Turns away younger generation home buyers.
- Growth needs be managed better...do not grow just to grow. Be smart and grow with purpose. Coordination with the school district should happen more regularly. Needs to be better at options other than building a pool that can be used for three months a year.
- I appreciate the businesses and individuals coming together for entertainment, i.e., Fire House, Camp Creek, Halloween with the businesses and tree
 lighting, etc.
- I believe most people reside in Waverly to escape the hustle and busy-ness of Lincoln and Omaha. I feel we need to keep the small town feel of Waverly and not focus overly on growth/expansion. Any costs associated with expansion shouldn't be the burden of current residents (ie the sewer line to nowhere). The majority of that burden should be covered by the developers and/or the new tenants.
- I don't feel the need to push growth. We are already growing!! We can't sustain too much growth in our utility systems, fire and police protection as is and our schools. All of those are already behind the growth that has happened. People choose Waverly because it isn't too big. Too Much growth without being able to support the infrastructure would result in diminished services and satisfaction.
- I don't think we need much housing growth as we are start g to lose the small town feel and connectivity of the community.
- I don't think it's the job of government to tell people what their house or property needs to look like, what they can have in their property if it is clean and orderly. Metal roofs should be an option for houses and garages due to the amount of storm damage we can get.
- I feel that as compared to other similarly sized local small towns such as Ashland and Gretna, Waverly falls behind.
- I love living in Waverly and truly think it's a great place to live. I've visited places like Hickman and Seward and love that they have more options in terms of stores and restaurants and they also have some nice walking trails. I would also love to see more options for community involvement or community activities. Advertise/post more for school and community events to get some town pride going! Update the downtown.
- I pay more than enough in taxes to the school. We pay so much we can't afford to also donate to the city. Something has to happen to lower these taxes so we can make our community better.
- I support adding a few businesses for those that live here but don't feel we need to continue to add more and more housing. The schools will not be able to keep up and we'll lose the quality education that everyone loves so much. We will lose the small town vibe which is why people are here.
- I wish we had a noise ordinance, I also think the 4th of July fireworks, days should be decreased.
- I would honestly like to see Waverly slow down on its growth as we moved her to be in a small town with a good educational experience. Due to how
 quickly the town is growing I feel it has caused the school to decline as its unable to keep up with the population demands.
- I would like to see the city doing more with the resources we have currently. While I understand the need for new equipment, infrastructure, etc., I would like to see a conscious effort to utilize the buildings, lots, equipment, vehicles, infrastructure, and people we already have. To me sustainability is about controlled growth and using the resources around you. Looking at modifying existing things or adding small changes instead of building and buying new. Creativity goes a long way.
- Improve amberly street and get rid of the junk yard at the gas station.
- I've lived in Waverly or just outside of Waverly for 48 years. I see no need to build the volume of housing that we are. Everyone that wants to live here doesn't need to live here.
- Keep us a smaller friendly town. As we've grown we're losing our neighborliness. Felt more personal 20 years ago. We really need affordable housing for the population that have aged in our community, so they have the option to stay and be here for grandkids, as they downsize in retirement. More buildings like the brick ones on north side in the cul-de-sac with the gazebo.

- More businesses!! GYMS, small business!
- More commercial businesses, more businesses equal more in town employment. Safer roads. Loosen up on regulations for improvements. Enforce school drop off and pick up locations. Fix the water/sewer costs. Full time EMT 24/7. More police presence. Make school crosswalks more prominent and lawful. It's always saddened me that Waverly has no courthouse, no downtown and no visible history.
- More funding for arts and music in school. Keep it even with athletics.
- More is not always better. Many folks chose Waverly because it is not Lincoln. Improvements should be made with that in mind.
- Need more restaurant options.
- Need to focus most on new single family housing, and recreational activities for Waverly residents. I feel like the new aquatic center will be enjoyed
 mostly by Lincoln residents. I would rather improve the quality of the parks we already have.
- Need to have better ways for the kids to get to and from that have to cross 6 Highway or the train tracks. Places to shop to bring people into the town. Have festivals! Be proud of the town and show the support. Get the park and Rex to communicate better about what is happening. Have more items to do in town.
- no more building. please please keep this the small town I grew up in. All of this growth is ruining the small town feel and we have absolutely nothing in this town to offer except housing. Invest in something the kids here can do and stop building more houses.
- No more half million dollar homes please.
- Our city government needs to be smart about growth. Growth just to grow, isn't always the smartest idea. If all we're going to do is keep adding houses without growing our businesses or public services (police), then we're failing. It's no wonder citizens tax dollars are going to Lincoln, we don't have any options to spend our money here in town. Our sales tax needs to stay here!
- Please build a pedestrian bridge on canongate.
- Please do something about the cost and quality of the water.
- Something needs to be done about kids driving golf carts and 4wheelers around town. Sheriff taking care of complaints from neighbors of not real nice people in rental homes.
- Stop with the taxes. We just had the Waverly School District raise taxes on us again and we can't afford it. We pay over \$7000/year in property tax and are stuck sending our daughter to the public school system with no ability to pay to send her elsewhere. We can't breathe under the stifling taxation. The local government needs to downsize and leave development to the private sector.
- Thanks for all you do! We pray that you will have the wisdom to make the best decisions for the improvement our community.
- The city can not accommodate large housing increases. Build up businesses and parks before adding large capacity neighborhoods please.
- The city is growing that's a fact. We need more businesses, but the prices per square foot are higher here than in south Lincoln, which stops growth.
- The city of Waverly needs to do something to attract business owners to want to bring their businesses here to our community, especially restaurants!!
- The future growth of Waverly needs to facilitate government transparency with any tax levy that is specific to and identifies need. The government should be providing this information annually to the property owners in order to ensure what has historically been approved, to ensure that the citizens receive accountability for tax collected. Sales tax was approved for community improvements, continues to be collected, yet fire department facilities remain yet to be built.
- The golf carts and four wheelers are everywhere in this town. Some people let kids drive them and some don't have lights on them at night. We had a four wheeler drive on our sidewalk in front of our house. Looks to me that people can't be responsible and laws about golf carts/four wheelers need to change. Waverly also has many sidewalks but people choose to walk in the middle of the street.
- The interstate noise is a issue for homeowners living around the interstate. Please consider building a sound barrier along the interstate.
 - The last thing we need in Waverly is more development. Waverly used to be a quaint agriculture based small town. Now it's full of city folk who are far experience concerned with policing other people than they are themselves. Let people live their lives on their property as they see fit.

- The Water Bills are outrageous, water bills do not need to be raised now. We pay more here than most towns of the same size. It is getting pretty ridiculous here. They also need to get better police patrols. We have crime in the city, but they spend 90% of their time writing traffic tickets and ignore the 12 year olds, or the people driving golf carts while holding a baby and 3 kids in back not restrained.
- There already seems to be tremendous growth, but since we are part of that, having built and moved here last year, I support things that make it possible for others as well.
- Very much need a traffic light at 148th and Hwy 6.
- Water rates are way too high.
- Waverly has grown and the use of golf carts has increased a lot. Too many kids driving them, adults drinking and driving the golf carts around town, golf carts in use at night without lights and the rules are not enforced. Either enforce the rules or get rid of the golf carts.
- Waverly is an OK place to live if you have kids because of the quality and quantity of nearby schools. It's also good for church if you are Lutheran or Methodist. But if you are older, are of a different religious faith, would like to dine out or be entertained, it really has nothing to offer other than a reasonable proximity to both Lincoln and Omaha. We have lived here for a long time because of our granddaughters being in Omaha but now that they are adults we will move to Omaha or Lincoln.
- Waverly needs LESS industry and more retail. Waverly is a perfect bedroom community for people driving to Lincoln and Omaha for work. We do not
 need industry to run down housing values and attract people who want to live in trashy homes. Quit zoning for industry. We have far more than we need.
- Waverly needs to maintain a higher standard to keep the riff raff from Lincoln and Omaha out. As we grow I hope we don't sacrifice public safety to save a
 few bucks.
- We don't need a new pool in the Wayne Park. This should be built north of Waverly near the Lawson Ball fields. Way too congested for this size of pool in a park. And, this takes away open green park space.
- We have enough housing, we need to focus on growing our public services, schools, and business to accommodate the growth that has already occurred. We should not be adding more housing until other things are addressed to be able to gable growth.
- We love it here! Hoping to see more businesses and easy access to needed shopping and housing for our future senior years so that we do not need to go to Lincoln.
- We love Waverly. But knowing how fast it's growing we have to catch up business wise ASAP.
- We need a Waverly police department since Waverly has and will continue to expand. Need more restaurants/food options. And the sidewalks need attention, especially on the north side of town.
- We need better fire and police force. We are moving away from being a small town and are moving toward a bigger town and need to keep residents safe. We need a paid fire department and a larger police presence.
- We need more community organization to bring in new volunteers from New residents. We need sound and safety barrier and better access to law enforcement, fire, and emts. It takes far too long for people to get help. Our volunteers do the best they can but they need help if we keep growing. School district has had a major culture shift with the new people moving in. Not necessarily positive. Keep our small town caring community intact.
- With Waverly growing so fast we need better city administrator and city council, A full time paid police force and a paid paramedics or EMT's. A new fire
 station since this building is too small and not to have city offices with fire department. Being truthful with the community as to where the tax money and
 such goes to not just one project(swimming pool)!Donation money and equipment fund be used for fire department only! These funds being used for fire
 department equipment.
- Would like to see more community support and try to keep more people from having to leave town for basic things. More healthcare options.
 Pediatrician office.

• Years ago, a sales tax was passed by the citizens of Waverly. Many times it was stated that these funds would be used for a new fire station as the city grows. No sales tax dollars have yet gone for a new fire station. Instead, sales tax dollars are going for recreation (aquatic center) instead of public safety. It is time to invest in public safety. Waverly is large enough and growing fast enough to invest in its own police force and paid paramedics for emergency medical services.

Waverly Workforce Survey (128 total respondents)

Comments edited for clarity.

Are you satisfied with your current housing situation? If No, please explain.

- House is too small.
- It's very affordable, but I would like to reside within the Waverly community.
- Living cost due to school and community projects.
- Looking for an acreage.
- looking to relocate closer to Waverly, possibly more rural.
- Not because I wanted my own house and one that was bigger and had a yard.
- Right now I am very lucky to have an affordable house to rent, but I know that is near impossible for most people. Rent is REALLY high in this town, and there are not many homes available for rent often.
- Speed limits need to be reduced on North 140th and electrical poles cause blindspots when backing out of my driveway.
- Taxes are too high.
- too far from my job, rent is way too high.
- Too small.
- We have 7 people in an apartment. We cannot afford the houses here in Waverly.
- We wanted to live in Waverly, but it is so expensive to move we will just make the best of it.
- Wish we could have found a home with a 3-car garage and one more bathroom, but we scooped up what we could get to get into Waverly... but other than that it's awesome and what we wanted.
- Would like something a little bigger but needs to be affordable.
- Would like to move outside of city limits.
- Would like to move to Waverly, but can't afford due to interest rates and pricing.
- Would like to move to Waverly.

APPENDIX III

AFFORDABLE HOUSING FUNDING SOURCES/PARTNERSHIPS.

INTRODUCTION.

Appendix III of this Waverly, Nebraska Community Housing Study provides a discussion of affordable housing funding sources and partnerships for the City of Waverly. Included is a discussion of various affordable housing development options, funding opportunities and important partnerships for the successful implementation of housing initiatives in Nebraska Communities, today. The City can consider these and other successful affordable housing models in the development of housing.

FUNDING SOURCE & PARTNERSHIPS.

To produce new and upgrade existing renter and owner-occupied housing in Waverly, a public/private partnership must occur to access affordable housing programs, which will reduce the cost of development and/or long-term operations. The following information identifies various funding sources, programs and strategies available to assist in financing future housing activities in a County and the Communities. The (strategic) combination of two or more sources can assist in reducing development and/or operational costs of proposed affordable housing projects.

LOCAL FUNDING OPTIONS.

Local funding for use in housing development and improvement programs are limited to two primary sources (1) local tax base and (2) dollars secured via state and federal grant and loan programs, which are typically only available to local units of government (Village, City or County).

Local Tax Base.

Tax Increment Financing (TIF) can use added property tax revenues, created by growth and development in a specific area, to Finance improvements within the boundaries of a designated Redevelopment Area. Utilizing the Nebraska Community Development Law, each community in Nebraska has the authority to create a Community Redevelopment Authority (CRA) or Community Development Agency (CDA).

A City or Village with a CRA or CDA has the authority to use TIF for commercial, industrial and residential redevelopment activities. The CRA/CDA can utilize TIF for public improvements and gain the revenue associated with these improvements. The tax increment is the difference between the taxes generated on an existing piece of property and the taxes generated after the redevelopment occurs. One hundred percent (100%) of the increment can be captured for up to 15 years, by the CRA and used for public improvements in a designated Redevelopment Area. Every Community in Nebraska is eligible to utilize TIF, after a CRA or CDA has been established and a Blight and Substandard Determination Study has been completed by the Community. TIF may be used for infrastructure improvements, public façade improvements in the Downtown and to purchase land for commercial or industrial development and for the development of workforce housing. Additionally, "Nebraska Legislative Bill 496" allows for TIF funds to assist in funding the development of workforce housing.

The City of Waverly has an established CDA and associated Redevelopment Areas. The CDA has experience in utilizing TIF for a variety of community and economic development projects, including affordable housing.

Other Local Options.

Local Major Employers and/or Community Foundation Assistance – This is a common occurrence today within many cities and counties nationwide, in an effort to provide housing opportunities to low- and moderate-income persons and families. Major local employers and community foundations are becoming directly involved in housing developments and improvements. These Foundations and/or major Employers could provide the following:

- a) Direct grants;
- b) Low interest loans;
- c) Letter of Credit, for all or a percentage of loans;
- d) GAP Financing provides financing to cover the unfunded portion of development costs, as a deferred or less than market rate loan to the development;
- e) Mortgage Interest Rate Subsidy provides buy down of a conventional loan;
- f) Purchase Bonds/Tax Credits make a commitment to purchase either/both taxable/tax exempt bonds and/or low-income tax credits utilized to Finance housing development.

The previously described local funding options could be used separately or "pooled" together and utilized in equal proportions for the implementation of County-wide housing programs.

STATE PROGRAMS.

State programs available to assist in funding a community housing initiative include resources available from the **Department** of Economic Development (NDED), Nebraska Investment Finance Authority (NIFA), Nebraska Department of Environment & Energy (NDEE) and Nebraska Department of Health and Human Services (NDHHS). The following describes the primary housing funding programs provided by these State agencies.

Nebraska Department of Economic Development (NDED).

The **2022 Annual Action Plan**, prepared and administered by the NDED, has the following, approximate allocations of State and Federal funds available for housing activities.

\$25.9 Million – Community Development Block Grant \$7.7 Million – HOME Investment Partnership Fund \$683,130 – Housing Opportunities for Persons with AIDS \$1.0 Million – Emergency Solutions Grant Program \$5.9 Million – Federal Housing Trust Fund \$12.7 Million – Nebraska Affordable Housing Trust Fund \$1.2 Million – Nebraska Homeless Shelter Assistance Trust Funds

NDED administers the non-entitlement Community Development Block Grant (CDBG) program, available to local Community and County municipalities for financing housing, planning and public works projects. All Nebraska Counties and Communities are an eligible applicant for CDBG funds. The City of Waverly receives an annual allocation of CDBG funds, from the Department of Housing and Urban Development, as an "entitlement community". The remaining Nebraska Communities are classified as non-entitlement Communities and compete annually for CDBG funds for various community and economic development programs, including housing. Nebraska Communities, with a population of 5,000+ are eligible for multi-year CDBG funding from the Comprehensive Revitalization Category of funding.

NDED also administrates **HOME** Program funds. HOME funds are available to authorized, local or regional based **Community Housing Development Organizations (CHDOs)** for affordable housing repair and/or new construction, both rental and owner. An annual allocation of HOME funds is established for CHDOs based on individual housing programs. HOME funds are also available to private developers, via a local non-profit as gap financing on affordable housing projects.

NDED is allocating **CDBG Disaster Recovery (CDBG-DR)** funds to support Nebraska's disaster relief, long-term recovery and restoration efforts as a result of the 2019 flooding disaster. HUD has allocated \$108.9 million to the fund, which Nebraska local government will be able to apply for. NDED's CDBG-DR webpage will be continually updated to serve as an informational resource for potential grantees.

The primary goals of the **Housing Opportunities for Persons with AIDS (HOPWA) Program** is to help provide activities that serve persons with HIV/AIDS throughout the State of Nebraska. Activities of **HOPWA** include short-term rent/mortgage assistance, permanent housing replacement and supportive services.

The **Emergency Solutions Grant Program (ESG)** resources are allocated to non-profit agencies throughout Nebraska to provide ESG-eligible homeless and at-risk of homelessness services for the Nebraska Balance of State Continuum of Care (CoC) system.

Federal Housing Trust Fund (HTF) resources are primarily used for rental development and acquisition, rental rehabilitation and operating assistance and operating reserves for extremely low income persons at or below 30% AMI. As identified within the *AP-30: Methods of Distribution and the HTF Allocation Plan*, funds are distributed to projects through the following set-asides: LIHTC 9%, Targeted Needs and Permanent Housing.

Rural Workforce Housing Land Development Program provides funds for activities such as acquiring vacant properties, demolishing dilapidated structures, or installing water lines. The intent of the program is to help municipalisties prepare land for affordable housing construction.

DED awarded \$10,000,000 in American Resucue Plan Act funds through the **Qualified Census Tract (QCT) Recovery Program** – Greater Nebraska.

Nebraska Affordable Housing Trust Fund (NAHTF) – The NAHTF is available to assist in funding affordable housing programs. The Trust Fund is administered by the NDED and is used to match with Low-Income Housing Tax Credit allocations, for new affordable rental housing, funding of non-profit operating assistance, financing distressed rental properties and the acquisition/rehabilitation of existing rental programs.

The City of Waverly is a member of the Southeast Nebraska Development District (SENDD) and the Southeast Nebraska Affordable Housing Council, which provides local affordable housing development planning coordination and development activities to southeast Nebraska, including the City of Waverly and Lancaster County. SENDD provides assistance to members on a variety of issues of regional significance, including transportation planning, strategic planning and needs assessments, grant assistance for economic development and planning efforts for environmental issues.

Middle Income Workforce Housing Investment Fund.

In 2020, the "Middle Income Workforce Housing Investment Act" (*Legislative Bill 866*) was adopted to supply matching grants to non-profit development entities with a background in housing development. This funding opportunity is only available to communities in Douglas, Lancaster and Sarpy Counties and must take place in a qualified Census Tract. Construction of new owner-occupied housing after-construction appraised value, or a housing rehabilitation project that exceeds 50 percent of a unit's before-construction assessed value, must range from \$125,000 to \$275,000. The housing project must not benefit from low-income housing tax credit or state or federal subsidy programs.

Nebraska Historic Tax Credit (NHTC).

On April 16, 2014, Legislative Bill 191 was signed into law, which created the Nebraska Historic Tax Credit. This new historic tax credit will serve as a valuable incentive to allow Nebraska real property owners to offset Nebraska income, deposit or premium tax amounts equal to twenty percent of "eligible expenditures" on "improvements" made to "historically significant real property." Nebraska is now the 36th state to provide a historic tax credit at the state level, which is a tax credit that is separate and distinct from the federal historic tax credit.

The NHTC establishes a \$15,000,000 tax credit pool and the Nebraska State Historical Society (SHPO) handled the annual allocation of the credits for the 2015 through 2022 tax years. The NHTC ended in December 2022, but there are efforts to reinstate it.

The program encourages the preservation of the State's historic buildings for the following important outcomes:

- Incentives for redevelopment of historic properties and districts across the State.
- Private investment in historic buildings, downtowns and neighborhoods.
- New uses for underutilized and substandard buildings.
- Jobs and economic development in Nebraska communities, both rural and urban.
- Creation of housing units.
- Revitalized communities through preservation of historically significant buildings and districts.
- More heritage tourism in communities.

Basic provisions of the NHTC:

- Twenty percent (20%) Nebraska tax credit for eligible expenditures made to rehabilitate, restore or preserve historic buildings.
- Maximum of \$1 million in credits for a project, a dollar-for-dollar reduction in state tax liability.
- Tax credits can be transferred with limitations.
- Rehabilitation work must meet generally accepted preservation standards.
- Detached, single-family residences do not qualify.

To qualify, a historic property must be:

- Listed individually in the National Register of Historic Places or
- Located within a district listed in the National Register of Historic Places or
- Listed individually under a certified local preservation ordinance or
- Located within a historic district designated under a certified local preservation ordinance.

The minimum project investment must equal or exceed:

• The greater of \$25,000 or 25% of the property's assessed value (for properties in Omaha and Lincoln). \$25,000 (for properties located elsewhere).

Nebraska Investment Finance Authority (NIFA).

NIFA is a major provider of funding for affordable housing development in Nebraska. The primary program is the Section 42 Low Income Housing Tax Credits (LIHTC) utilized to help finance both new construction and rehabilitation of existing rental projects. LB 884-State Low-Income Housing Tax Credit is another source of funding for affordable housing administered by NIFA in a process similar to that of the LIHTC process.

A popular LIHTC Program is the CROWN (Credit-to-Own). CROWN is a lease-to-own housing program developed to bring home ownership within reach of very low-income households while assisting local governments in revitalizing their neighborhoods. The objectives of the program are to:

- 1. Construct housing that is decent, safe and permanently affordable for low income residents:
- 2. Develop strong public/private partnerships to solve housing problems;
- 3. Offer renters a real plan to own a home; and
- 4. Restore unused, vacant, in-fill lots to become a neighborhood asset.

CROWN utilizes the LIHTC program as one financing tool. Other sources of financing may be HOME funds, NAHTF, Federal Home Loan Bank funding, local government grants and loans and traditional development financing sources. **CRANE** (Collaborative Resources Alliance for Nebraska) is a LIHTC set-a-side program for targeted resources, for community development and housing programs. NIFA also provides the Single Family Mortgage Program – This program provides a less than current market interest rate for First-time Homebuyers in Nebraska. Local lender participation is encouraged in this Program.

Community Housing Development Corporation (CHDO)/Community Action Partnership/Economic Development District.

The Community Action Partnership serving a particular Community or County can provide housing and weatherization programs in a specified service area. A Community Action Partnership (CAP) also provides community social services, emergency services, family development and nutrition programs. Nebraska Communities and Counties should work with their CAP to provide safe, accessible, affordable housing to its residents.

The CHDO/Community Action Agency serving the Community of Waverly is the Community Action Partnership of Lancaster and Saunders Counties (CAPLSC). The Nebraska Housing Developers Association is a State-wide organization providing important housing capacity building and support for local housing development corporations. Community, Economic and Housing Development Grant administration is provided by both CAPLSC and SENDD.

Blueprint Nebraska.

A collaboration of State-wide business, industry and civic leaders, released a 2019 **'Blueprint Nebraska'** report to propel sustained economic prosperity for all Nebraskans. The Blueprint includes the creation of a Nebraska.

Housing Partnership, with five "Concurrent Tracks to Build Nebraska." These five tracks include:

- 1. Developing Model Codes/Practices for building/zoning administration, taxation, infrastructure development, etc.;
- 2. Reviewing and Revising State-Administered Program;
- 3. Establishing a Housing Health Index, to measure the housing stock in each community, for example;
- 4. Reviewing/Revising Regional and Local Programs; and
- 5. Formalizing curriculum for community leaders to elevate the Housing Intelligence of a community.

Nebraska Strategic Housing Framework.

In partnership with the Nebraska Department of Economic Development, the Nebraska Investment Finance Authority is completing a **Nebraska Strategic Housing Framework** report, addressing the State-wide affordable housing needs. The report is due for completion in December, 2022. The report identifies the need for 35,000 affordable housing units. The report is also driven by four "Pillars" to address affordable housing development goals and strategies:

- Pillar 1) Financial Support & Incentives for Development.
- Pillar 2) Education & Policy.
- Pillar 3) Special Populations & Safety Net.
- Pillar 4) Workforce & Community Capacity.

Nebraska Department of Environment and Energy.

Low-Income Weatherization Assistance Program – This Federally funded program assists people with low-incomes by making energy improvements to their homes. The program is a State-wide effort carried out primarily by Nebraska Community Action Partnerships.

The weatherization program concentrates on energy improvements which have the greatest impact on making recipient's homes more energy efficient, thereby lowering their energy consumption. Eligible weatherization measures include caulking, weather stripping, ceiling, wall and floor insulation and furnace repair.

Nebraska Department of Health and Human Services (NDHHS).

NDHHS administers the Nebraska Homeless Shelter Assistance Trust Fund and Emergency Shelter Grant to assist local or regional based groups in the provision of housing improvements for homeless and "at risk of homeless" persons and families.

Nebraska Realtors Association's Homebuyer's Assistance Foundation.

The **Home Buyer's Assistance Foundation** is a nonprofit organization dedicated to supporting first-time homebuyers in Nebraska, with an emphasis on low and moderate income individuals and communities. The Foundation also works to offer housing relief in times of natural disaster. Following the 2019 flooding disaster, the Foundation, in partnership with the National Association of Realtors, assisted families and individuals with mortgage payments and rental costs due to home displacement in Nebraska up to \$1,000.

Nebraska Disaster Behavioral Health Project.

The goal of the Disaster Behavioral Health Project is to develop human infrastructure in Nebraska to effectively mitigate or respond to the psycho-social consequences of terrorism and disaster. The project aims to enhance state level capacity for a coordinated response to mental health and substance abuse service needs in the event of an emergency or disaster. Behavioral health training and educational opportunities are available to local emergency managers, volunteers and community leaders via conferences, webinars and online training materials.

Nebraska Department of Veterans' Affairs - Nebraska Veterans Aid (NVA).

Nebraska Veterans Aid (NVA) was established in 1921 to assist veterans and their dependents who experience a financial hardship, including those related to natural disasters. Following the 2019 flooding disaster, qualifying individuals were eligible to receive assistance with food, clothing, emergency housing and other eligible flood-related expenses.

Housing.ne.gov - Housing Listing and Locator Service Partnership.

Housing.NE.gov is a service created via collaboration and partnership between Assistive Technology Partnership (ATP), NDED, NIFA, NDHHS, Nebraska Rentwise, Region V Systems, HUD, USDA-RD, the Nebraska Chapter of the National Association of Housing and Redevelopment Officials (NAHRO), Omaha and Lincoln Housing Authorities and the Hotline for Disability Services, which allows Nebraskans to locate available housing that best fits their needs either through the website or via a toll-free number. Individuals can easily search for housing utilizing different criteria and access helpful websites. Tools for renters include an affordability calculator, a rental checklist and renter rights and responsibilities information.

Property owners and managers, including Housing Authorities, can use this service to manage their property listing free of charge. The organizing agencies involved in this partnership are encouraging all owners and onsite managers of rental housing to register and begin listing their properties on www.Housing.NE.Gov.

REGIONAL FUNDING.

Federal Home Loan Bank.

Affordable Housing Program – This program makes low-interest loans to Finance home ownership for families with incomes at or below 80 percent of the median income for the area. The program can also Finance the purchase, construction or rehabilitation of rental housing in which 20 percent of the units are occupied by and affordable to very low-income households. These funds are available through the Federal Home Loan Bank member institutions in Nebraska and are loaned on a competitive basis, with semi-annual application dates. This program can be combined with other programs (i.e., State CDBG, Low-Income Housing Tax Credit, etc.) to absorb the development subsidy requirements for both rental and owner occupied housing projects.

Midwest Housing Equity Group (MHEG).

MHEG was created in 1993 to secure equity capital to invest into affordable rental housing throughout Nebraska, Kansas, Iowa and Oklahoma. MHEG is a privately-owned non-profit corporation with a nine-member board of Directors and receives no federal or state dollars. MHEG's income is derived from its ability to obtain equity capital and investing into affordable housing properties.

MHEG also provides equity financing for the federal low income housing tax credit program, as defined in Section 42 of the Internal Revenue Code. In addition to tax credit syndication, MHEG staff provides technical assistance to developers, owners and management companies on the development and management of tax credit properties.

Midwest Housing Development Fund (MHDF).

Founded in 2000, MHDF is a non-profit community development financial institution whose main goal is to provide "nontraditional financing needs" for affordable rental housing development, redevelopment and rehabilitation. As per the MHDF website, "The primary financing product of MHDF is predevelopment loans that are provided to borrowers prior to them having access to traditional construction and permanent financing." Types of loans available through MHDF include predevelopment, construction, gap financing, land/infrastructure and permanent (post construction) loans.

FEDERAL FUNDING.

A primary provider of Federal funding to Nebraska Communities and Counties for housing development, both new construction and rehabilitation, is the **Department of Housing and Urban Development (HUD).** Housing programs provided by HUD are available for both profit and non-profit developers. Funds from these programs are commonly mixed or pooled with other public funding sources, as well as conventional financing.

U.S. Department of Housing & Urban Development.

- Section 8 Moderate Rehabilitation SRO's Available to Public Housing Authorities to provide rental assistance for homeless individuals in rehabilitated single-room occupancy housing.
- Shelter Plus Care Provides rental assistance and supportive services on a long-term basis for homeless individuals with disabilities.

- Mortgage Insurance The HUD 221(d)(4) provides up to 100 percent mortgage insurance for non-profit developers and 90 percent mortgage insurance coverage for profit and non-profit developers 221(d)(4). Permanent financing can be provided via the public funds (i.e., CDBG, HOME) and/or conventional financing.
- **HUD 203(b)** provides mortgage insurance for a person to purchase or refinance a principal residence. The mortgage loan is funded by a lending institution, such as a mortgage company, bank or savings and loan association and the mortgage is insured by HUD.
- Section 203(k) Rehab Mortgage Insurance enables homebuyers and homeowners to finance both the purchase or refinancing of a house and the cost of its rehabilitation through a single mortgage or to finance the rehabilitation of their existing home.
- Section 811 Supportive Housing for Persons with Disabilities Program Through the Section 811 program, HUD provides funding to develop and subsidize rental housing with the availability of supportive services for very low- and extremely low-income adults with disabilities.
- **Section 202 Multifamily Health Care Program** Helps expand the supply of affordable housing with supportive services for the elderly. It provides very low-income elderly with options that allow them to live independently but in an environment that provides support activities such as cleaning, cooking, transportation, etc.
- Single Family Homeownership/Housing Counseling Agencies HUD provides free assistance through local housing counseling agencies where consumers can access information and counseling in regards to buying a home, refinancing a mortgage, saving a home from foreclosure and more.

U.S.D.A. Rural Development (RD).

- a) Section 515 Program Provides a direct interest subsidized loan for the development of family and elderly housing, including congregate and rental housing for persons with a disability. A Section 538 mortgage insurance program is also available
- **Section 502 Program** Provides either a mortgage guarantee or direct loan for single family homeownerships for low-and moderate-income persons/families, including persons with a disability. **Section 504 Program** Provides for the rehabilitation of homes.
- c) Community Facilities Program Provides a direct, interest subsidized loan for a variety of projects specific, community facility improvement programs including new construction or housing rehabilitation for "special populations."
- d) Preservation Program Administered by qualified local and regional organizations/agencies to assist in housing rehabilitation programs in Nebraska Communities. This could include a local based, planned program of home modification income eligible to low/moderate-income persons and families.
- e) Business & Industry Program The RD Business and Industry Program allows for loan mortgage guarantee for commercial projects, including retirement/assisted care housing.

Federal Emergency Management Agency (FEMA).

The State of Nebraska is part of FEMA's "Region VII" coverage area, which also includes the States of Iowa, Kansas and Missouri. FEMA Region VII works with local, State and Tribal emergency management officials and private sector entities to respond to natural disasters and project human life and property from any and all natural disasters and hazards. After a federal disaster declaration is made, information is delivered via website to those in the affected area. Region VII consists of five divisions:

- a) **Response** Established at a regional "watch center," awareness and analysis and the coordination and implementation of federal responses to major disaster areas is key. Preparation of an Incident Management Assistance Team to plan necessary operations and logistics to a disaster area ensures prompt response to help those in need.
- b) **Recovery** Provides federal assistance to individuals, households and public facilities located within a declared disaster area.

- c) **Mitigation** Reduces property loss due to flooding via outreach provision, including affordable flood insurance and other programs that encourage safe community development and reduction of loss of life and property due to natural disaster.
- d) **National Preparedness** Coordinates and develops tools necessary to prepare for hazards and natural disasters among all levels of government, as well as private non-governmental agencies and Communities.
- e) **Mission Support** Ensures functional efficiency among critical business operations, including functions with key partners and customer service to persons and families affected by natural disaster.
- f) **Grants** Oversees that disaster and non-disaster grants are in compliance with public law.

Federal Covid-19 Supplemental Appropriations-CARES Act.

The State of Nebraska received approximately \$10.8 Billion of assistance for combatting economic distressed caused by the Coronavirus Pandemic. In June, 2020, a plan for the expenditure of these funds was announced, including the following:

- Community CARES program administered through the Department of Health and Human Services to provide food security, housing and behavioral health care: \$85 million.
- Reimbursements to state and local government for coronavirus-related expenses: \$180 million.
- Agriculture & businesses: \$392 million.
- Small business stabilization: \$230 million.
- Livestock producers stabilization: \$100 million.
- Rural broadband remote access grant program: \$40 million.
- Workforce retraining initiative: \$16 million.
- Admin support to all business programs: \$5 million.
- Gallup business stabilization and growth training: \$1 million.
- Unemployment Trust Fund and potential General Fund Budget Flexibility: \$427 million.

In February, 2021, the State of Nebraska approved \$200 Million to support the State's "Emergency Rental Assistance Program." Eligible renter households of specified incomes will be those that are unable to pay past due or future rent and utilities as a result of the COVID-19 Pandemic. Funds will be paid to landlords on behalf of the tenants. Currently, \$158 Million is available to assist Nebraska low-income households. Current funding was available through September, 2022, with another round currently being determined.

As of October, 2022, a total of \$9.2 Million in award funding was dispersed throughout Sarpy County, benefitting a total of 4,130 recipients.

American Rescue Plan Act (ARPA).

The State of Nebraska has appropriated \$111.2 Million for use by non-entitlement units of government to be used in a variety of methods as a means of combatting fiscal losses relating to the COVID-19 Pandemic. Local governments can utilize ARPA funds to replace lost public sector revenue in water, sewer and broadband infrastructure, which could ultimately support new housing development. Applications for grant funding are available on the State of Nebraska website.

Other Federal Funding.

Other funding products that may serve to be useful in the development of affordable housing include the HUD Rural Housing and Economic Development Fund, the Native American Housing and Self-Determination Act and CDBG funds and the (Historic) Rehabilitation Tax Credit, available via the Historic Preservation Act.

Waverly, Nebraska West Redevelopment Area REDEVELOPMENT PLAN.

INTRODUCTION.

The Waverly, Nebraska Redevelopment Plan is a guide for redevelopment activities within the West Redevelopment Area. Illustration 1, Page 2, identifies the location of the Area within the context of the City of Waverly.

This Redevelopment Plan serves as an amendment to an original plan prepared in 2004 for the furthest western portion of the Redevelopment Area (or referred to as redevelopment area #1), less two parcels (2429100006000 and 2420401004000) totaling 71 acres. These parcels are located along the south boundary of the Area, adjacent one another. The reason for the parcel removal is the addition of the East Beltway Corridor Protection Area that will disallow any development within these parcels, set aside for the planned construction of the I-80 East Beltway around the eastern edge of Lincoln, Nebraska. The second change to the original Redevelopment Area is the addition of the South Central Redevelopment Area, that was determined to be Blighted and Substandard in December, 2024.

The West Redevelopment Area begins along I-80 Exit 409, continuing northeast along Highway 6 until the Canongate Road overpass, then northwest to encompass the approach to the Canongate Road overpass (2421100999000), continuing along Highway 6 to N 140th Street, then south along N 140th Street, east along Guildford Street, then south to encompass parcel (2421106001000).

Once intersecting the northern border of Wayne Park (2421200012000) the boundary of the **Redevelopment Area** follows the border of the parcel southeast until intersecting with Eastbourne Street. The boundary of the Area continues west through Wayne Park along Eastbourne Street slightly north of the new Waverly Aquatic Center until intersecting Holley Drive, following the roadway south until it ends. The **Area** boundary continues south along the concrete trail adjacent Holley Drive, then west along Amberly Road, until diverting north along the western boundary of the Wayne Park parcel, then west intersecting the southern boundary of parcel 2421104002000 until intersecting Deer Park Road, then following the right-of-way south, until intersecting with Amberly Road, then north on the west side of Deer Park Road. The boundary of the West Redevelopment Area, then diverts southwest along the southern border of parcel (2421103001000) until intersecting Canongate Road, following the right-of-way south, until diverting west on the south side of Amberly Road until intersecting N 134th Street, then south along the right-of-way until it diverts southwest to encompass the N 134th Street overpass approach, following the border of I-80.

The **Area** boundary continues west, following the northern boundary of parcels **2420401004000** and **2429100006000**, continuing south along the western boundary of parcel **2429100006000** until intersecting I-80 and following Exit 409, concluding at Highway 6.

A complete list of all Parcels included within the West Redevelopment Area is as follows:

2430200003000	2420300007000	2420203006000	2421115002000	2421101004000
2430200008000	2420300008000	2420203004000	2421115001000	2421111001000
2430200007000	2420403004000	2420203003000	2421117003000	2421103001000
2429100004000	2420403001000	2420203002000	2421117005000	2421104002000
2420302001000	2420401002000	2420200007000	2421117004000	2421200012000
2420302002000	2420401003000	2421110004000	2421117006000	2421102003000
2420302003000	2420203007000	2421110003000	2421117002000	2421107010000
2420302004000	2420203008000	2421110002000	2421117001000	2421116002000
2420302005000	2420400005000	2421112002000	2421118003000	2421106001000
2420300004000	2420200002000	2421114002000	2421118002000	2421108001000
2420301003000	2420203001000	2421100007000	2421118001000	2416321001000
2420301001000	2420203005000	2421114004000	2421118004000	

EXISTING CONDITIONS.

The Redevelopment Area presents signs of ongoing decline during the last few decades. Many existing structures and public facilities and utilities are old and in need of updating/possible replacement. A Blight and Substandard Determination Study confirmed the number and degree of blighting and substandard factors in the Area, as per State Statutes. The Studies were completed in October 2004 for the western portion from Exit 409 to Canongate Road. The South Central Blight and Substandard Determination Study was completed in December 2024. The continuation of blight and deterioration is a threat to the stability and vitality of the West Redevelopment Area. Revitalization efforts are not likely to occur without public action. This Redevelopment Plan provides a guide for public and private partners as redevelopment efforts move forward in the Area.

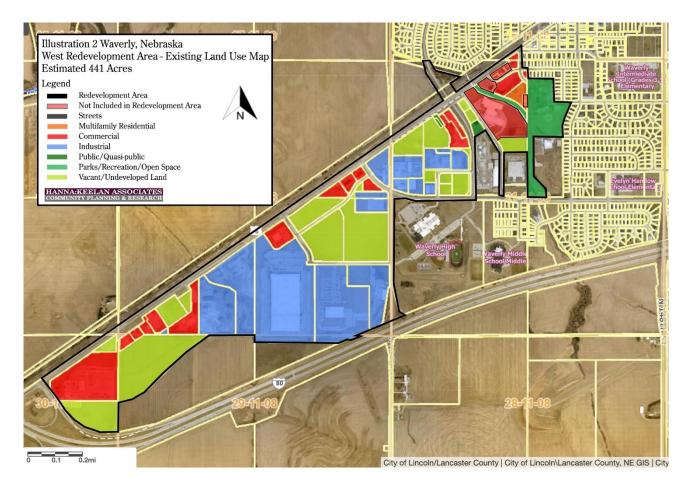

Land Use.

The West Redevelopment Area consists of approximately 441 acres. Table 1 presents the estimated existing land use within the Redevelopment Area. Illustration 2, Page 4, identifies the Existing Land Use Map of the Redevelopment Area. The Redevelopment Area includes a variety of land uses, including industrial, which comprise an estimated 160 acres, or 36.26 percent of the Area Excluding streets and alleys, which comprise an estimated 82 acres or 18.75 percent of the Redevelopment Area, vacant/undeveloped land and commercial land uses occupy the second and third largest sections of the Area, with estimated acreages of 113 and 57 respectively. Public/quasi-public uses in the Redevelopment Area are used for storm water management and other miscellaneous public uses. Parks and recreational facilities are mainly comprised of Wayne Park.

TABLE 1
EXISTING LAND USE
WEST REDEVELOPMENT AREA
WAVERLY, NEBRASKA

Land Use	$\underline{\mathbf{Acres}}$	$\underline{\mathbf{Percent}}$
Industrial	159.9	36.26%
Public Streets and Alleys	82.68	18.75%
Commercial	57.25	12.98%
Parks/Recreation/Open Space	23.26	05.27%
Multifamily Residential	2.67	00.61%
Public/Quasi-public	1.77	00.40%
Vacant/Undeveloped Land	113.47	25.73%
Totals	441.00	100.0%

Source: Hanna: Keelan Associates, 2024.

Zoning.

Five **Zoning Districts** are present throughout the **Redevelopment Area:** "General Commercial (GC)", "Community Commercial (CC)", "Limited Light Industrial (LI)", Single Family Residential (R-1) and "Multifamily Residential (R-4)". The Majority of the **Area** is zoned light industrial (LI) with two isolated general commercial (GC) areas along Highway 6. All instances of multifamily residential (R-4) as well as community commercial (CC) are confined to the area east of Canongate Road. Wanye Park is the only land use within the Single Family Residential (R-1) **District**. **Illustration 3, Page 5,** identifies the **Existing Zoning Districts** in the **Redevelopment Area**. These **Districts** are described as:

General Commercial (GC): This District has a variety of commercial uses, some of which have significant traffic or visual effects. These districts may include commercial uses which are oriented to services, including automotive services, rather than retail activities.

Community Commercial (CC): This District is intended for commercial facilities which serve the needs of markets ranging from several neighborhoods to the overall region.

Limited Light Industrial (LI): This District is intended to reserve sites appropriate for the location of industrial uses with relatively limited environmental effects. The District is designed to provide appropriate space and regulations to encourage good quality industrial development, while assuring that facilities are served with adequate parking and loading facilities.

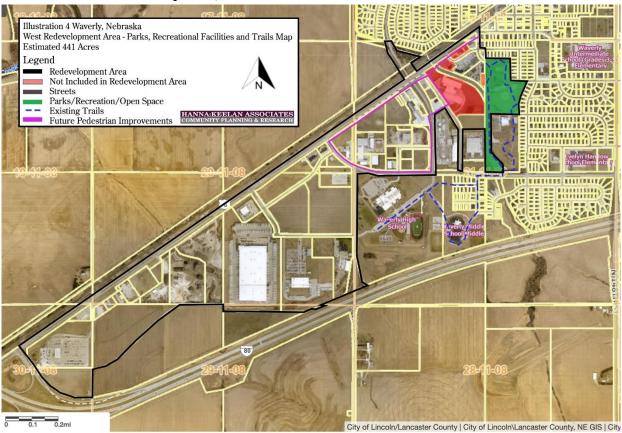

Single Family Residential (R-1): This **District** is intended to provide for residential neighborhoods, characterized by single-family dwellings on large lots with supporting community facilities and urban services. **(Wayne Park is the existing land use in this R-1 District.)**

Multifamily Residential (R-4): This District is intended to provide for residential neighborhoods, characterized by single-family and duplex dwellings on relatively large lots with supporting community facilities and urban services.

Parks and Recreational Facilities and Trails.

- Parks and Recreational Facilities: Wayne Park is the only instance of parks
 and recreational facilities within the West Redevelopment Area. The Portion of
 Wayne Park within the Area includes playground equipment, ball fields and
 multipurpose courts for basketball, tennis and pickle ball, a recreation trail and
 other public accommodations.
- Trails: The only existing trail system within the West Redevelopment Area is a portion of the Wayne Park Trail System that connects to the intermediate, middle and high school within the surrounding area and offers protected connections to Several neighborhoods.

The general land use within the **West Redevelopment Area** discourages regular bike travel as it lacks residential populations and has a presence of heavy through traffic. Community growth and general wants of residents have necessitated a better network of walkable/bikeable infrastructure within the surrounding around and throughout the City of Waverly. There is currently a plan to extend existing trail systems and add additional trails to better connect the Community to essential services in the City. **Illustration 4** identifies the locations of parks, recreational facilities and trails in the **Area**.

Transportation.

- Traffic: There are two major roadways bordering the West Redevelopment Area, Interstate 80 (I-80) and Highway 6. These major roadways are high in traffic volume and offer the Area connectivity within Waverly and to surrounding cities like Lincoln and Omaha.
- **Public Transportation:** There is no widely available public transportation within the City of Waverly.
- Street Layout: The linear development pattern of properties that are located along the south side of **Highway 6** are currently accessed by frontage roads. However, these parcels were developed on lots abutting one another to the extent that few rights-of-way were established to provide access to land located to the south of these smaller developed tracks of land. Land locked parcels with no road access for future development exist. Due to the location of **I-80** along the southern boundary of the **Redevelopment Area**, there is no option for a right-of-way in the southern portion.
- Access and Parking Issues: Excluding the major roadways that border the Redevelopment Area, there are 10 roadways providing varying levels of access into the Area. Access points are located the north off Highway 6:
 - o **N 120**th **Street**, which only provide access to Lincoln Auto Auction and the adjacent commercial park
 - o **Two frontage roads** connecting to one another, which only provides access to the back industrial lots of Pavers.
 - o $\ N\ 130^{\mathrm{th}}\ Street$ fully connects to the City's roadway infrastructure.
 - o Amberly Road fully connects to the City's roadway infrastructure.
 - o **Canongate Road** fully connects to the City's roadway infrastructure via an overpass from the residential neighborhood north of the **Area**.
 - o **Deer Park Road**, **Guildford Street and N 140**th **Street** fully connects to the City's roadway infrastructure.
 - o N 134th Street provides access via an overpass from the south of the Area, but does not connect to Highway 6.

Public Utilities.

- Water Sanitary Sewer Systems: The portion of the West Redevelopment Area southwest of 130th Street and Dover Street do not currently have access to the water distribution and sanitary system of the City. Parcels northeast of 130th and Dover Street are relatively well connected, but undeveloped parcels may not have access that is conforming to the desired land use.
- Watershed Management: Salt Creek is approximately one mile north of the Redevelopment Area. The Creek's flood plain does not impact the Area directly, but there are two storm water drainage channels in and near the Redevelopment Area, one on the west side of Canongate Road and another generally between Deer Park Road and Guildford Street that follows into Wayne Park. This results in approximately 13 percent of Area in a floodway or "100-year flood plain".

Future redevelopment in the **Area** will need to consider the floodplain. The area between **Amberly Road** and **Canongate Road** has a particularly high flood risk. Stormwater quality standards are in effect and any redevelopment that disturbs an acre or more ground must include facilities for stormwater quality standards.

• **Electrical/Street Lighting**: Lincoln Electric System supplies power to the City of Waverly. The electrical system capacity consists of two 115-12 kilovolt transformers at a substation location near **N 134th Street** and **Highway 6**. Other transformers are located at nearby substations that provide capacity during contingency situations. Transformer 1 has a capacity of 22.4 megavolt amperes (MVA) and Transformer 2 has a capacity of 39 MVA.

This capacity is deemed appropriate for the City of Waverly. An underground project is planned to move the overhead facilities on **N 141st Street** from **Oldfield** to **Mansfield** in the next few years. Another project is planned for Oldfield west of **N 141st Street**, to move the overhead facilities underground when a planned paving project is underway.

Historical Significance.

There are no historic properties or areas of historic significance in the West Redevelopment Area.

PLAN REQUIREMENTS.

Redevelopment activities are guided by the Nebraska Community Development <u>Law</u>, <u>Neb. Rev. Stat.</u> Section 18-2101, et. seq., as amended (the "Act"). The statutes indicate the governing body must first declare the project area as substandard and blighted to prepare a redevelopment plan for the designated redevelopment area. The City of Waverly has authorized the Waverly Community Development Authority (WCRA) to act as the Authority under the Act. The City has contracted with Hanna:Keelan Associates to develop a Plan for guiding appropriate private and public resources to:

- Eliminate or prevent the spread of urban blight;
- Encourage urban rehabilitation;
- Provide for the redevelopment of substandard and blighted areas, including provision for the prevention of the spread of blight into areas of the municipality, which are free from blight through diligent enforcement of housing, zoning, and occupancy controls and standards;
- Rehabilitation or conservation of substandard and blighted areas or portions thereof by re-planning, removing congestion, providing parks, playgrounds, and other public improvements by encouraging voluntary rehabilitation and by compelling the repair and rehabilitation of deteriorated or deteriorating structures; and
- Clear and redevelop substandard and blighted areas or portions thereof.

Section 18-2111 of the Act defines the minimum requirements of a Redevelopment Plan as follows: "A Redevelopment Plan shall be sufficiently complete to indicate its relationship to definite local objectives as to appropriate land uses, improved traffic public transportation, public utilities, recreational and community facilities and other public improvements, and the proposed land uses and building requirements in the redevelopment project area..."

Section 18-2111 also outlines **six elements** that must be included in all Redevelopment Plans:

- 1. The boundaries of the redevelopment project area with a map showing the existing uses and condition of the real property in the **Redevelopment Area**;
- 2. A land use plan showing proposed uses of the Area;
- 3. Information showing the standards of population densities, land coverage, and building intensities in the **Area** after redevelopment;
- 4. A statement of the proposed changes, if any, in zoning ordinances or maps, street layouts, street levels or grades, or building codes and ordinances in the **Area**;
- 5. A site plan of the **Area**;
- 6. A statement as to the kind and number of additional public facilities or utilities, which will be required to support the new land uses in the **Area** after redevelopment.

In making the recommendation to approve this **Redevelopment Plan**, the Consultant has considered the land uses and building requirements of the **West Redevelopment Area** and determined conformance of such with the **Comprehensive Plan** for the **City of Waverly**, to represent a coordinated, adjusted, and harmonious development of the City and its environs.

These determinations are in accordance with:

- present and future needs to promote health, safety, morals, order, convenience, prosperity;
- the general welfare; and
- efficiency and economy in the process of development.

Factors considered in the determination included among other things:

- adequate provision for traffic and vehicular parking;
- promotion of fire safety and prevention of other dangers;
- adequate provision for light and air;
- promotion of the healthful and convenient distribution of population;
- provision of adequate transportation, water, sewerage, and other public utilities;
- schools, parks, recreational and community facilities, and other public requirements;
- promotion of sound design and arrangement;
- · efficient expenditure of public funds; and
- prevention of insanitary of unsafe dwelling accommodations or conditions blight.

REDEVELOPMENT PLAN.

Waverly Comprehensive Plan 2033 (WPlan 2033): Guiding Principles.

The **WPlan** embodies the Community of Waverly's shared vision for the future, to the year 2033. It outlines where, how and when the Community intends to grow, how to preserve and enhance the things that make Waverly special and strategies for implementing the vision for how people will live, work, play and get around in the future.

The relevant principles listed below are taken directly from **WPlan 2033** and will be used as a guide for redevelopment activities in combination with the concerns identified in this **Redevelopment Plan.**

Community and Economic "Preservation" Initiatives.

- Existing Park/Recreation and Other Public Amenities Should be maintained by the City to ensure continued safe use by all sectors of the population, which could include replacement of existing playground features and shelters (as needed), enhanced park accessibility and parking areas and improved connectivity with existing local trails and sidewalks.
- Road Network and Other Transportation Systems Additional enhancements may be needed during the next 10 years, including but not limited to improved street and traffic lighting, pedestrian crossings, turn lanes and reduced speed limits.

The condition of local streets should continue to be monitored and, when and where necessary, rehabilitated or resurfaced with new pavement. Currently, street segments in need of rehabilitation or resurfacing exist in the older and established neighborhoods of the Community. The desire to create safe routes to school for kids is greatly needed in Waverly.

• <u>Commercial and Industrial Development</u> - Recommendation for the City to foster a partnership of support with both local business owners/franchisees and small, locally based business owners to support business industry retention and development in Waverly. Current vacant land parcels along the Highway 6 Corridor should be targeted for continued development of goods-based businesses, including restaurants, convenience stores and other automotive-oriented businesses.

The existing shopping mall area should be targeted for improvements to enhance redevelopment activities to include additional local based businesses and services. The City, with the assistance of economic development leaders in the Community, should work to maintain a strong industrial sector, including assisting those existing industries with both maintaining a stable employment base and production goals, as well as expansion opportunities, and securing new light industrial/commercial enterprises for land areas currently available in the Waverly for development.

• <u>Public Facilities/Services</u>, <u>Utilities and Infrastructure</u> - The City of Waverly maintains modern public facilities and services traditional to many First- and Second-Class Cities in Nebraska.

These include a City hall/government, fire protection, (County) law enforcement, a library, parks, ballfields and new Aquatic Center, public schools, churches and modern water and sewer systems.

These operations and their respective facilities will need to be cognizant of the rate of growth in the Community and expand services and capacity as needed. This would include any necessary technology, as well as vehicular and pedestrian street and sidewalk upgrades. As the Community continues to grow, maintenance of existing public utilities and infrastructure components will be critical to the sustainability of the existing neighborhoods.

Community and Economic "Growth/Development" Initiatives.

• <u>Land Use Planning and Zoning</u> - This includes utilizing and understanding both the existing and future land use capacity matrices in designating specific land uses to undeveloped tracts of land to maintain current City and National Planning Standards and having land "set aside" for future developments.

Maintain and amend, when needed, the local zoning and subdivision regulations and maintain appropriate building codes, which support the efficient implementation of the Land Use Plan. Establish new provisions within these Regulations that support mixed use, sustainable development principles, smart growth and green building practices. Subdivision requirements should include modern infrastructure standards.

- <u>Future Parks/Recreation and Other Public Amenities</u> As new residential neighborhoods continue to be platted, developed and established in the Community, land should be set aside for the provision of trails, playground equipment, athletic fields and natural greenspace purposes.
- <u>Commercial and Industrial Development</u> The locally based Economic Development Corporation will work to create relationships with existing and prospective businesses and industries and create relationships with other community and economic development funding entities in Waverly. As the City grows in population, employment needs will also increase the desire for new and expanded existing employers.

A local public opinion survey revealed responses to new businesses desired in Waverly included restaurants/convenience store, discount/department stores and a new grocery store. Similar responses were also provided by the Planning Steering Committee and the Economic Development Advisory Committee.

All facets of local leadership and community and economic development should strive to target these operations for locations in the Community to serve the local population. The most desired location for commercial growth areas within the Corporate Limits is located along the Highway 6 Corridor in southwestern Waverly. The City will want to consider establishing, via local Zoning Regulations, additional industrial land for new both clean and light manufacturing industries.

• <u>Public Facilities</u>, <u>Utilities and Infrastructure</u> - The City of Waverly is in the planning stages of developing a new facility to house City offices and serve as a central location for all functions of the City. This facility could also, possibly house a new Waverly Volunteer Fire Department and/or City recreational facilities. This new facility will be critical to the future growth and development of the Community as growth and expansion in multiple facets of Waverly is projected.

A new "City Shop" will, also, likely be needed within the duration of the 10-year **WPlan**. The expansion of public water, sewer and electrical capacity will promote growth and development in Waverly, especially in newly platted subdivisions near the Waverly Corporate Limits. Specific projects have been documented in the City's recently completed Water Distribution Study that will not only serve the current population, but also serve new developments throughout the Community in the wake of annexation and expansion.

• <u>Future Transportation System Needs</u> - A project to improve the Highway 6 Corridor east of Waverly would expand the capacity of the Highway in the form of an extended three-lane corridor. The benefits would include greater access for developments east of Waverly and a safer section for vehicles turning left out of the through lane. This project would include improvements to a state highway and preliminary plan improvements would include reconstruction of a three-lane concrete section.

The City of Waverly has considered a possible interchange located near 162nd Street on Interstate 80. These improvements are in the conceptual stage at this time and an interchange justification study would be necessary to continue developing plans for this interchange.

Access to the interstate on the east side of Waverly would provide a second access point to the City and a more direct route for trucks looking to access the manufacturing tracts on the east side of Waverly.

The Nebraska Department of Transportation and the City of Lincoln have developed a conceptual plan for an East Beltway around the City of Lincoln connecting Nebraska Highway 2 and Interstate 80. The north terminus for this project would connect the City of Waverly with these improvements. This project would provide a more direct link for vehicles and trucks to a highway system and a bypass route for the City of Lincoln. Preliminary planning and corridor analysis has been completed. Plan development and environmental documentation are the next steps for this project.

Project Funding/Implementation and Plan Maintenance/Review.

• <u>Project Funding/Implementation</u> - The preservation and growth/development initiatives highlighted in this section all have one common goal; to create a Community that operates in the best interests of health, safety and overall quality of life of both new and existing residents.

All facets of community and economic development and governmental leadership will need to seriously consider these and other necessary development and betterment projects as a high priority through 2033 and acquire eligible funding from local, State and Federal funding sources to implement such projects. Funding opportunities are highlighted throughout this Comprehensive Plan.

• <u>Plan Maintenance/Review</u> - The preservation and growth/development initiatives highlighted in this section all have one common goal; to create a Community that operates in the best interests of health, safety and overall quality of life of both new and existing residents.

All facets of community and economic development and governmental leadership will need to seriously consider these and other necessary development and betterment projects as a high priority through 2033 and acquire eligible funding from local, State and Federal funding sources to implement such projects. Funding opportunities are highlighted throughout this Comprehensive Plan.

Future Land Use and Zoning Districts.

Illustration 5 is a proposed Future Land Use Map, Illustration 6, page 16 is a proposed Future Zoning Districts Map.

The proposed future land use and zoning designations differ from that presented in the WPlan. This being the case, once this Redevelopment Plan is adopted by the City of Waverly, the Waverly Planning Commission will need to make these recommended changes to the City Council for officially amending the WPlan land use and zoning districts maps accordingly.

West Redevelopment Area Redevelopment Activities.

Table 2, page 17 identifies proposed projects within the West Redevelopment Area, with estimated costs for each. Illustration 7, page 18 is a Proposed Projects Map, numbered in accordance with Table 2, identifies potential redevelopment project sites. Illustrations 8 and 9, pages 18 and 19 identify proposed improvements to the water and sewer main systems in accordance with Table 2. All proposed projects identify future land-uses and improvements which can advance planning goals while considering the existing context of the Area.

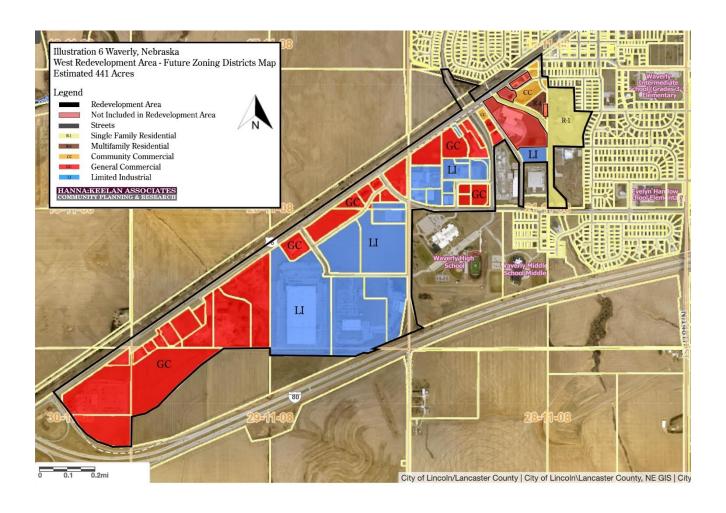

TABLE 2 PROPOSED PROJECTS WEST REDEVELOPMENT AREA WAVERLY, NEBRASKA

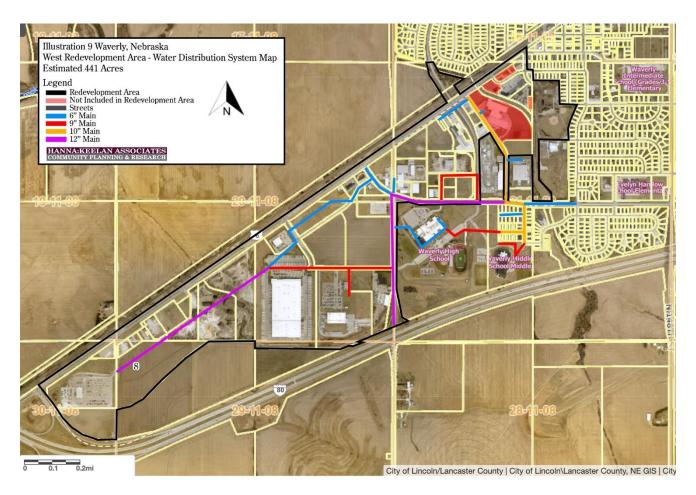

Project	Cost
Amberly Road and Canongate Road intersection: Construct roundabout	\$1,000,000
Canongate Overpass: Resurface asphalt	\$450,000
N 135th Street: Highway 6 Construct turn lane	\$400,000
N 135th Street: Castlewood Street to Highway 6 construct new street	\$450,000
N 134th Street: Amberly Road to frontage road construct new street with storm	\$620,000
sewer	
Callum Drive, Canongate Road, Amberly Road, N 134th Street, N 135th Street	\$410,000
turn lane: Add streetlights	
N 130th Street and Highway 6: Traffic signal	\$275,000
From Tractor Supply Company to N 120th Street: Extend Water main	\$1,300,000
From Tractor Supply Company to N 120th Street: Extend Sewer main	\$2,000,000
For New City Office and Recreation Center (1 parcel): Land Purchase	\$1,200,000
For Development (3 parcels): Land Purchase	\$5,800,000
New City Office/Recreation Center Construction	\$12,000,000
Trail System: Add Concrete Trail around West Redevelopment Area	\$350,000
Energy Way: Resurface/New Concrete, New Storm Sewer for entire length	\$250,000
Deer Park Road: Resurface Asphalt and Add Streetlights	\$240,000
Guildford Street: Rebuild Concrete from N 140th to Highway 6	\$30,000
N 140th Street: Resurface Asphalt from Highway 6 to Wayne Park	\$50,000
Wayne Park: Resurface courts and New Equipment for Tennis / Basketball / Pickleball Courts	\$150,000
Wayne Park: Construct Inclusive Playground Structures with equipment	\$400,000
Wayne Park: Construct Outdoor Pavillion	\$150,000

City of Waverly, Nebraska Redevelopment Plan West Redevelopment Area

• Private Improvement Goals

Successful redevelopment projects should remove or lessen blighted and substandard conditions and make positive contributions to the **Redevelopment Area**. Preferred projects should increase the security and safety of the **Area** through the removal and redevelopment of blighted and substandard conditions.

Proposed redevelopment/development projects should align with the **Guiding Principles** of **WPlan 2033**, especially the principles identified in this **Plan**.

All redevelopment/development projects in the West Redevelopment Area should be consistent with the goals of this Waverly, Nebraska Comprehensive Plan. Potential project locations and concepts are included in this Redevelopment Plan.

- **Statutory Elements**: Proposed projects in the **West Redevelopment Area** will need to account for the following statutory elements:
 - o **Property Acquisition, Demolition, and Disposal:** This element considers the ownership of land in the area to be redeveloped, the extent of demolitions required and associated environmental remediation, including any necessary capping, removal or replacement of utilities and site preparation. Any disposition of public land should be noted.
 - Population Density: This element considers the impact of a redevelopment project on the population density in the Redevelopment Area. The number of residential units and associated total square footage of commercial or industrial uses should be reviewed.
 - Land Coverage: This element considers the impact of a redevelopment project on the developed land coverage and building density in the Redevelopment Area.
 - o **Traffic Flow, Street Layouts and Street Grades:** This element considers the likelihood of any redevelopment project resulting in a significant increase in traffic. Any impacts on existing streets or public rights-of-way should be considered.
 - o **Parking:** This element evaluates the impact of a redevelopment project on parking in the **Redevelopment Area.** The number of parking spots and whether that number meets parking requirements should be considered.
 - Ozoning, Building Codes and Ordinances: This element evaluates the conformance of a redevelopment project to the existing zoning, building codes and associated ordinances which apply to the redevelopment project area. Any required rezoning will be considered. Any project must conform to building codes and ordinances.

- Cost Benefit Analysis: As required by the Nebraska Community Development Law (Neb. Rev. Stat. 18-2113), the City of Waverly will analyze the costs and benefits of proposed projects, including the impacts on:
 - o Public Tax Revenues: Proposed projects will be reviewed for the impact on public tax revenues, via a Tax Increment Financing (TIF) analysis. This analysis considers the base assessed value of the site and compares this value to the estimated new assessed value. The increment value is determined through subtracting the base assessed from the estimated new assessed value. The annual TIF generated is determined by taking the increment value and multiplying it by the current tax rate. The use of TIF rests on the principle that public improvements and enhancements for proposed redevelopment projects would not occur "but for" the TIF generated by private redevelopment within the project area. Project improvements would not be achievable to the same extent without TIF.
 - O Public Infrastructure and Community Public Service Needs Impacts: Any anticipated adverse impacts from redevelopment projects on existing public infrastructure will be evaluated. Projects will capture the incremental tax revenues for eligible public purposes including, but not limited to, site acquisition, façade enhancements, streetscape, public area enhancements and other eligible improvements.

Redevelopment projects should also encourage private investment in the **West Redevelopment Area** and once completed, should increase security and safety in the **Area**, by the removal of certain blighted and substandard conditions. Any anticipated adverse impacts on City services will be evaluated, as well as additional revenues which will provide support for those services.

- Employment within the Redevelopment Project Area: Adverse impacts, as well as positive effects on employment within a redevelopment project area will be evaluated.
- Employment in the City outside the Redevelopment Project Area:
 Adverse impacts, as well as positive effects on employment for the City of Waverly will be evaluated.

Other Impacts: Redevelopment projects should improve the Redevelopment Area, eliminating blighted and substandard conditions. Any other impacts, both negative and beneficial, should be evaluated. While the use of TIF will defer receipt of the incremental ad valorem real property taxes generated for up to 15 years, additional revenue will be generated, including the sales tax paid by businesses and/or residents of the project. Upon the completion of the 15-year collection period, projects should benefit the Community through higher property tax payments.

All proposed redevelopment/development projects should be consistent with the goals of this **Waverly**, **Nebraska Comprehensive Plan**. Potential project concepts and locations are discussed in this **Redevelopment Plan**.

Redevelopment Process.

Public improvements and redevelopment activities may require construction easements, vacating of street and alley rights-of-way, temporary and permanent relocation of businesses, demolition and grading, disposal/sale of property and site preparation including driveway easements, paving driveways, approaches and sidewalks outside property lines, relocation of overhead utility lines and rerouting/upgrading of underground utilities, as needed. The process for these activities include the following:

- **Property Acquisition:** The City may acquire the necessary fees, easements, property and covenants through voluntary negotiations (See *Land Acquisition Policy Statement*, on file at the Urban Development Department and available on request).
- **Relocation:** Relocation may involve the temporary or permanent relocation of businesses to complete redevelopment activities. Relocation will be completed according to Local, State, and Federal relocation regulations.
- **Demolition:** Demolition will include clearing sites on property proposed for public improvements; necessary capping, removal or replacing utilities, site preparation securing insurance and bonds, and taking other necessary measures to protect citizens and surrounding properties. Measures to mitigate environmental findings may also be necessary if determined by site testing.

- **Disposal/Disposition:** Future redevelopment projects may include the sale of land to private developers for redevelopment purposes. Developers will be selected in an equitable, open and competitive proposal process according to City requirements.
- Requests for Proposals: Architects and engineers will follow the City's standard selection process for the design of public facilities and improvements. Primary contractors for public facilities and improvements will also be competitively selected according to City requirements.

Conformance with Comprehensive Plan.

WPlan 2033, the Waverly Comprehensive Plan, adopted December 2023, as amended, represents the local goals, objectives, and policies of the City of Waverly. The majority of the Waverly, West Redevelopment Plan was developed to be consistent with WPlan 2033. The proposed future land use and zoning designations presented in this Redevelopment Plan differ from those presented in the WPlan. This being the case, once this Redevelopment Plan is adopted by the City of Waverly, the Waverly Planning Commission will need to make these recommended changes to the City Council for officially amending the WPlan land use and zoning districts maps accordingly.

Financing.

The primary burden for revitalization of the **West Redevelopment Area** must be on the private sector. The City must provide public services and public improvements and participate where necessary in the redevelopment process, but the redevelopment needs of the **Area** are beyond the City's capacity to do alone. Financing of proposed improvements will require participation by both the private and public sectors. Where appropriate, the City may participate by providing financial assistance for the rehabilitation of structures.

Sources of funding may include:

- Special Assessments Business Improvement Districts
- Private Contributions
- Sale of Land (Proceeds from the sale of land acquired for redevelopment, as identified in the Redevelopment Plan, may be reinvested in the Redevelopment Area)
- Municipal Infrastructure Redevelopment Fund (MURF)
- Community Development Block Grant Funds (CDBG)
- Community Improvement (Tax Increment) Financing (Ad Valorem Tax)
- Capital Improvements Program Budget
- Federal and State Grants
- Interest Income
- Advance Land Acquisition Fund property rights/easements, public facility site acquisition
- Impact Fees

Redevelopment project activities will be undertaken subject to the limit and source of funding authorized and approved by the Mayor and City Council. According to the Community Development Law, any ad valorem tax levied upon real property in the redevelopment project for the benefit of any public body shall be divided, for a period not to exceed 15 years after the effective date of such provision, by the governing body as follows:

That portion of the ad valorem tax which is produced by the levy at the rate fixed each year by or for each such public body upon the redevelopment project valuation shall be paid into the funds of each such public body in the same proportion as are all other taxes collected by or for the body; and

That portion of the ad valorem tax on real property in the redevelopment project in such amount, if any, shall be allocated to and, when collected, paid into a special fund of the authority to be used solely to pay the principal of, the interest on, and any premiums due in connection with the bonds of loan, of money to, or indebtedness incurred by, whether funded, refunded, assumed, or otherwise, priority for financing or refinancing, in whole or in part, the redevelopment project.

When such bonds, loans, notes, advances of money, or indebtedness, including interest and premiums due, have been paid, the authority shall so notify the county assessor and country treasurer and all ad valorem taxes upon taxable real property in such a redevelopment project shall be paid into the funds of the respective public bodies.

The effective date for the Community Improvement Financing for each Redevelopment Project shall be identified in the project redevelopment contract or in the resolution of the authority authorizing the issuance of bonds pursuant to Neb. Rev. Stat. 18-212.
