  - President
  - Artist
  - Best-selling author

- **I really enjoyed the webcast speakers. I especially enjoyed the advice given by Matthew McConaughey. I'm grateful for NSLS because it helps me surround myself with like-minded, ambitious individuals that help motivate me and keep me accountable. - Teresa Contreras**
- **The SNT meetings have given a new perspective on how other students tend to do their assignments in college. I mainly enjoy hearing about other people's routines and how they have to adjust for college in their daily lives. It has helped me understand that a lot of college students are also balancing between a job, personal life, and college life. These SNT meetings have mainly helped me find different ways that I can achieve my goals. The meetings also allow me to see different perspectives of those around me. - Jake Inthavongsa**
- **I think that the SNT meetings have helped me gain confidence not only in my abilities, but also in talking to unfamiliar people. It is very rewarding to achieve my goals and see my other SNT group members achieve their goals. Since I am an online student, getting to know other students taking CCC classes feels like a genuine classroom setting, and that is a nice experience. - Georgene Sommer**
