## Proposal for dark fiber to Crete Public Schools

Proposed fiber build:

Segra Dark Fiber Proposal:

- NRC of \$61,113
- No monthly cost.

Notes:

We can provide this dark fiber span to the new press box and softball building on a non-recurring charge. However, since there is no ongoing monthly charge, this span will only be on the school's property, and no other Segra customers will be provided service off this span, if there is ever any damage to this fiber, Crete Public Schools will be held financially responsible for the repair. I just want to make that clear from the start.

Tentative timeline would be around 90 days with the chance to pull that in some since we are only going to be working on one property.

Thank you for your consideration. Let me know if you have any questions or if there is anything else I can assist with.

Best,

Bobby Mercier
