MEMORANDUM

DATE: July 29, 2026
TO: Tara Vasicek, City Administrator
FROM: Richard J. Bogus, City Engineer
RE: Pavement Management Program and Priority List 2027

RECOMMENDATION:

I recommend approval of the 2027 Pavement Management Program and Priority List for use by the Engineering Department for design and scheduling of roadway rehabilitation services.

DISCUSSION:

The Engineering Department and Public Works Department have worked together for several years on the locations and priorities of street concrete or asphalt rehabilitation. The City has almost 500 lane miles of streets.

The departments conduct pavement condition surveys which includes a visual analysis and testing if needed, to determine paving defects, extent of roughness or rutting, and if storm water is entering the subgrade. Damage to public and private property and safety are taken into account. The locations are then field data collected with global position satellite coordinates. The projects are then determined if the work can be done by the Street Department or should be included in the Engineering design, bid, and contractor build project. Annual projects are then determined based on priority and amount of funding available in the fiscal year budget.

The attached list contains those locations in the current fiscal year for inclusion in the Paving Improvement Plans and Specifications for construction in 2027 along with a remaining list of future projects. The roadway conditions are constantly being evaluated, thus the need to revise the priorities and add to the list.

FISCAL IMPACT:

City Council sets the annual street rehabilitation budget amount each fiscal year.

ALTERNATIVE:

Revise the priority order and/or include additional locations.
