FIBER

Design – Building Relationships

- **Local** - Collaborate with City GIS & Utility departments
 - Design preferences and rules, data sources
 - Community preferences and future utility projects
- **Innovation** – 10 GIG speeds capability to every home and business utilizing XGS-PON compliant standards.
- **Future-Proof** – Fiber-rich network with 40–50 year service life.
- **No Hassle** – Minimal impact from boring and aerial cable, staying in character of current utilities.
- **Simple** – PON Grids based on 800-1,000 customer locations. Centralized 64:1 splitters simplify construction.
- **Fast** – Auto designs completed in weeks, not months.
- **Safe** – NEC and NESC compliant.

Construction Steps

Before you even hear about ALLO in your neighborhood, we are working to design the fiber cable paths throughout your community.

Engineers decide the most efficient way to bring fiber optics to the greatest amount of people in your area.

Contractors, city officials, and ALLO collaborate on the fiber path design and submit to the city for approval.

Once approved, ALLO partners with local contractors to begin the construction process.

Why ALLO

Local Presence

- Storefront
- Service
- Employee base

Economic Partner

- Investment in physical assets
- Eliminates digital divide
- Empower and assist in economic development
- Ensure Crete is Fiber Ready for the Future
