Virtual Health + Well-Being

for Central Community
College

Now's the Time for Your School

The Impact of Virtual Care

CRITICAL BUSINESS ISSUE: Equitable access to care for all students, some of whom do not have health insurance

TimelyCare does not charge copays or bill insurance. Services offered to students at no-cost. Every student has the same level of access.

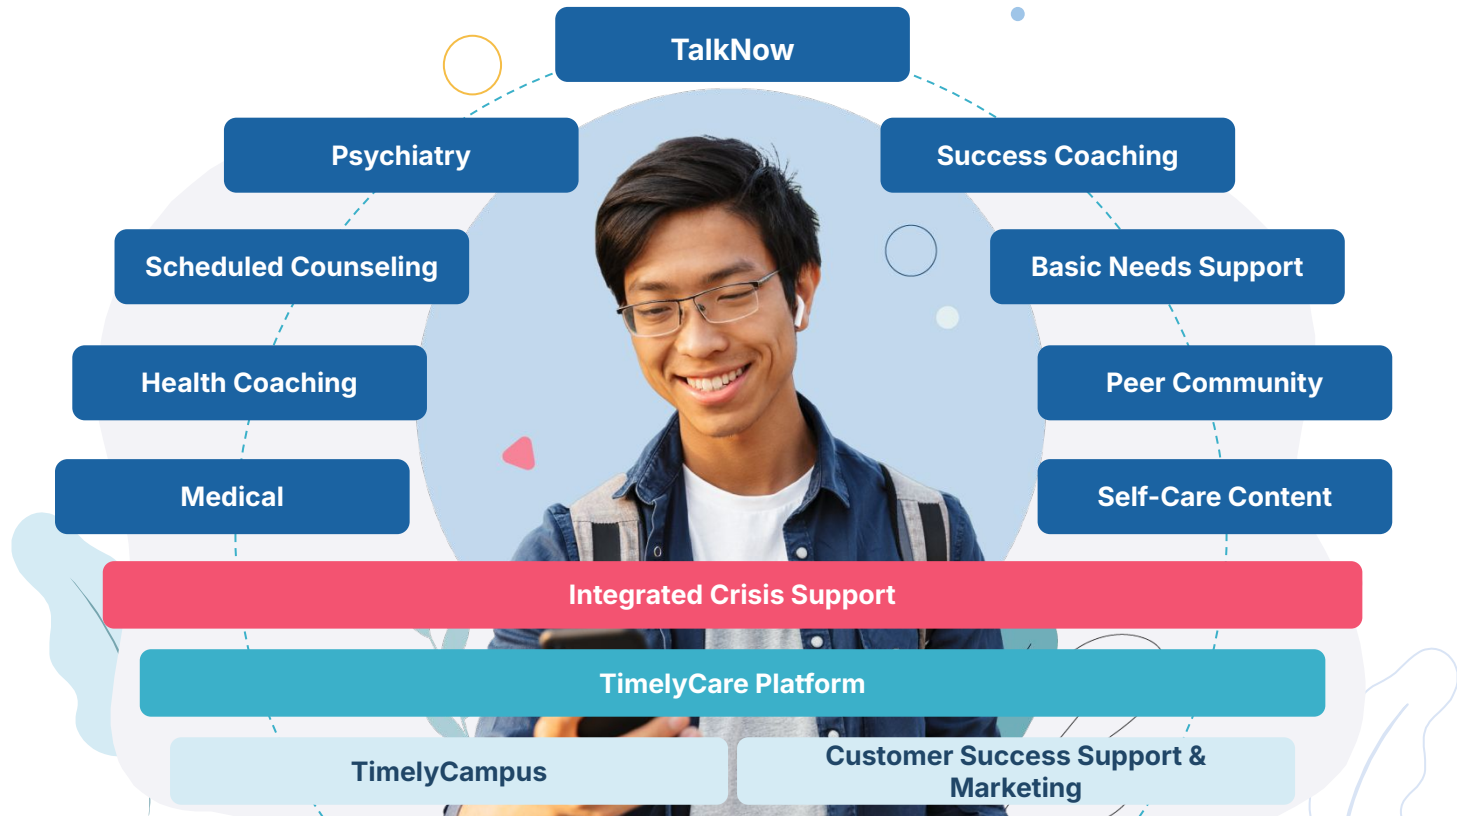

CRITICAL BUSINESS ISSUE: Provide culturally competent care to all (i.e. first gen students, minority students, international students, etc.)

TimelyCare has a diverse provider network (over 50% BIPOC) with many multilingual providers. Translation services also available for additional languages. On-going training to providers for upleveling their cultural competency.

CRITICAL BUSINESS ISSUE: Removing the stigma around seeking care for certain students

TimelyCare offers a plethora of self-care content on the platform which can be an excellent on-ramp to seeking care.
