

# MEMORANDUM

TO: Blair Mayor and City Council

From: CJ Heaton, Director of Public Works

Date: 5/13/25

Re: Flow Monitors from Trekk

Staff have been working with Olsson and Associates on a sanitary sewer model of the city of Blair. One requirement of that project is to provide flow data from several points around town. Staff typically contracts this out on a rental basis with Trekk, and the data is shared with the engineer. After reviewing the cost to rent meters for this project, we felt that purchasing the meters would make more sense long term, as we can use these more than once, for not much more money. Trekk has prepared a proposal for the city to purchase the flow meters and provide some training for city staff to install when needed.

<b>Installation/Training of Meters</b>	\$10,000
<b>Rain Gauge Installation</b>	\$1,500
<b>Maintenance/Training</b>	\$10,000
<b>Flow Meters</b>	\$43,669
<b>Rain Drop App</b>	\$99.00 Year
<b>Flow Link Software (optional)</b>	\$3,218
<b>Total</b>	\$68,486

**Staff Recommendation:** Approval of the resolution to purchase flow meters and additional options in the amount of \$68,486.00

**Financial Impact:** \$68,486.00
