

# Columbus Campus and Artificial Intelligence

# Using AI in the Workplace and Classroom

---

AI is already in our  
everyday life; we all use  
AI

Generative AI has  
created new  
opportunities for  
creating an endless  
variety of options

Generating is not the  
same as searching

AI is great with tactics  
and horrible with  
strategy

We can use these tools  
to build efficiencies and  
buy time in our day

# Using AI in the Workplace and Classroom
