Garden Team Proposal (To add four additional positions)

This spring will mark the 10th year of operation for our garden at Hastings Middle School, an important milestone given the fact that most school and community gardens fail within a two-year period. Our garden is different. Our philosophy on gardening and community is unique and it works. One would have a difficult time finding a program in the country that provides what we currently offer.

The garden meets many of the needs in our district mission and vision outline. It represents a multigenerational educational opportunity that extends to healthy diets, healthy cooking, healthy relationships, and food security/independence. Perhaps the most profound impact we have is our connection to the community. On a weekly basis, parents, students, teachers, and community members meet, work, and share ideas together. We are providing opportunities for students and the community that they would likely never have. We have community members that are creating innovative programs with their skilled expertise, resulting in educational opportunities not possible in the public school system and continue to add new and innovative programs every year.

To date the garden has been funded with well over \$100,000 in donations and grants. The garden program has paid a stipend to one person over the last five or so years. The stipend was added to cover the time that was needed to start and tend to plants that were needed in the garden and the homes of our students. As the space has evolved and the responsibilities have grown and with the addition of the dome the garden has become a 365 days/year commitment. Currently, the one individual being paid a stipend is committing a minimum of 20 hours per week in the summer and more than 10 hours per week during the school year. The current structure is not sustainable if we want to continue to grow and move toward a progressive and sustainable future. This project will not be realized in its entirety with only one person on the team. Help is needed.

Our goal is to continue down the path we are on. The foundation is laid, and now is the time to build something special. Community and staff involvement is growing daily and our reach is immense. Those involved with this project view it as an original and the model that others should follow (we have given a lot of advice and assistance to other community and school gardens) when setting out with the goal of producing food as a community. Please feel free to contact me if you have any questions regarding the garden, our philosophy, and our goals. My hope is that as the program grows we can, as a team, revisit the stipends and make appropriate changes to facilitate the needs of the program.

Sincerely,

Jayson Stoddard
