3. Items of Business

3.A. Consider a recommendation to the City Council on new ambulance specifications with a cost estimate of \$240,000 and setting a bid date.

Assistant Fire Chief James Yost informed the council about the 3 current ambulance conditions and that it's about time to replace one that's over 100,000 miles. The purchase can take up to a year, so they're starting the process now and need to set bidding dates.

3.C. Consider a recommendation to the City Council for a parade on 13th Street from Fuhrer Field House to Doane Drive on September 30, 2021, at 6:00 PM.

Doane staff member Jayma Ausdemore spoke and is requesting for 13th Street to be closed off on the north side of campus for a homecoming parade route that will go just around Doane's football field. The parade will start at 6:00pm and end at 6:45pm. Police Chief Steve Hensel said that rerouting traffic to 15th on Hickory and Code would be likely and that the department will need barricades and a couple of officers to do it.

The Southeast Nebraska Development District (SEND) Board and staff work diligently to serve the 16 counties in this corner of the state. We do this by listening to community leaders, stakeholders, residents, and businesses, to learn about regional issues and find solutions to help. The past few years have been particularly challenging with natural disasters and a global pandemic, yet SEND continues to stay focused and deliver essential programs and services. We could not do this without your support and the SEND Board and staff would like to **thank you** for your continued membership.

SEND staff completed a variety of critical community and regional projects in the past year, as well as launching a **nationally-recognized** broadband mapping initiative for residents of southeast Nebraska. This award-winning effort provides local elected officials, businesses, and the public data, so they know exactly where their communities stand with broadband speeds. Information supports future broadband expansion grants and projects across the state. Additionally, SEND renewed our commitment to support the region by adding staff to support rural housing, public safety, disaster response, small business financing, and incorporating technology into our services.

Last year, SEND staff spent more time on the ground in the region, listening to community leaders and learning how we can better serve you. As a result, the agency successfully captured **\$21.5 million in state and federal funds**, resulting in **improved homes, revitalized downtown business districts, low-interest financing for workforce housing units, assisting businesses and creating new jobs.**

The only way these activities can continue is through your membership, which has remained steady for the **last 15 years**. Last year alone, membership dollars provide match for federal and state funded agency services, resulting in a **110:1 dollar return on investment**. In 2020-2021, your assessment dollars helped return nearly **\$13.1 million** of your federal tax dollars back into the region.

SEND pledges to remain by your side in these difficult times, and we look forward to making an impact across the region by growing our regional economy, identifying new opportunities, and building local wealth. Above all, we will continue to listen. For up-to-date information on grant programs, community and legislative updates, and news alerts, please go to our new website at www.sendd.org, sign up for our e-newsletter, or "Like" our Facebook page.

Once again, thank you for your support, and know that SEND is here to help. As always, I want to extend an open invitation to all members: please, visit the SEND offices or call and schedule a time for us to attend your city council or county supervisor meeting. So we can better serve you now and in the future, I encourage you to contact our staff with your ideas, suggestions, and thoughts.

We are here to serve you and look forward to your next visit.

Best regards,

Tom Bliss
Executive Director

ORDINANCE NO. 2141

AN ORDINANCE OF THE CITY OF CRETE, NEBRASKA RELATING TO ACCESSORY BUILDINGS IN THE A-1 AGRICULTURAL DISTRICT; TO AMEND SECTION 11-503 TO EXEMPT ACCESSORY BUILDINGS AND STRUCTURES IN THE A-1 AGRICULTURAL DISTRICT FROM CERTAIN REGULATIONS.

BE IT ORDAINED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF CRETE, NEBRASKA:

Section 1. That Chapter 11, Article 5, Section 11-503 of the Crete Municipal Code shall be amended as follows:

11-503 Accessory buildings and structures.

Accessory buildings, structures, and parts of buildings or structures located within the corporate limits and extraterritorial jurisdiction of the City of Crete must comply with the following provisions:

- (1) An accessory building or structure shall not be located on a premises unless a principal building or structure is also located on that same premises.
- (2) No construction permit shall be issued for the construction of an accessory building or structure prior to the issuance of a construction permit for the construction of the principal building or structure upon the same premises. If construction of the principal building or structure does not precede or coincide with the construction of the accessory building or structure, the City shall revoke the construction permit for the accessory building or structure until construction of the principal building or structure has been substantially completed.
- (3) Any accessory building or structure attached to a principal building shall be considered part of the principal building for the purpose of height, distance, and yard requirements, and the total building or structure shall adhere to the yard requirements for the zoning district in which it is located.
- (4) The design of accessory buildings and structures shall be consistent with the character of the neighborhood and the exterior materials shall match those of the principal building or structure as much as possible.
- (5) The minimum distance between an accessory building or structure and any other buildings or structures on the same premises shall be five feet.
- (6) The cumulative total square footage for all accessory buildings or structures shall not exceed the total square footage of the first floor of the principal building.
- (7) The maximum height of any detached accessory building or structure is fifteen feet.
- (8) Detached accessory buildings or structures, except for signs, may only be erected in the rear yard and shall be set back from side and rear lot lines by a minimum of five feet, except that, if erected on a corner lot, any detached accessory building or structure shall be set back from the side street to comply with the setback line applying to the principal building for that side street.
 - (a) Notwithstanding the above, if the access to a detached accessory building or structure used as a garage, carport, or similar structure is from an alley, then it shall be set back from the property

line adjacent to the alley a minimum of fifteen feet.

- (b) The cumulative total square footage of all detached accessory buildings or structures shall not exceed forty percent (40%) of the required rear yard.
- (9) Accessory buildings or structures on corner lots shall not be located closer to the side property line than the front yard required on the adjacent premises.

**APPENDIX
INTERRUPTIBLE TRANSPORTATION AGREEMENT**

Contract Terms and Conditions

A. Noncompliance with Company Curtailment Orders.

(1) Company, being bound by its pipeline suppliers' tariffs to discontinue taking gas in compliance with the pipelines' curtailment orders or pay a penalty for any takes in excess of such curtailment levels, and Company being also compelled to control its own deliveries to protect service to its high priority residential, small commercial and small industrial customers, must impose adequate damage and deterrent requirements against intentional or careless or extended excessive takes by Customer there-under (as well as by other customers similarly situated). Accordingly, Customer hereby specifically agrees that it will pay to Company, as liquidated damages for all volumes of gas taken while curtailment is in effect, pursuant to notice to Customer by Company, an amount equal to \$20.00 per Dth above the highest daily natural gas market price as determined by Company (i.e., in addition to any and all pipeline and/or Company charges, fees, penalties, and the market or company derived rate for natural gas) for all such unauthorized gas taken by Customer, plus any additional charge, including unauthorized overrun charges, imbalance, scheduling charges, storage, allocation, or other costs assigned to Customer by Company. Customer acknowledges the need for such charges and, therefore, waives any objections thereto based on a contention that they amount to an improper penalty rather than a proper level of deterrent charges and damage payments.

(2) The payment for unauthorized overrun volumes set forth above shall not, under any circumstances, be considered as giving Customer the right to take unauthorized overrun volumes, nor shall such payment be considered to exclude or limit any other remedies (including cancellation for breach of contract) available to Company against Customer for failure to comply with this Section.

B. Character of Service.

(1) Delivery Pressure. Delivery of gas by Company shall be at such varying pressures as may exist under operating conditions in the pipeline of Company at the point of delivery. Customer shall install, operate and maintain, at its own expense, such pressure regulating devices as may be necessary to regulate the pressure of gas after delivery to the Customer.

(2) Quality. Natural gas delivered to Customer will conform to the quality specifications of Company.

C. Computation of Volumes of Gas Transported or Sold.

(1) Gas delivered hereunder shall be measured in accordance with the standard operating practices of Company from time to time.

D. Billing and Payment.

(1) "Billing Day" as used herein, means the period determined by Company for Interruptible Sales Service, as may be changed by Company from time to time.

(2) A statement shall be submitted by Company to Customer for natural gas delivered during the preceding billing month, and payment therefore shall be made by Customer to Company within ten (10) days of the current billing date (Bill Issue Date). If the unpaid balance is in excess of \$10.00, a late payment charge of 1.5% per month of the unpaid balance or \$1.00, whichever is greater (but not to exceed the maximum rate allowed by law), shall be added to the unpaid balance. In addition to its other rights and remedies set forth herein, Company shall have the right to discontinue service hereunder upon twelve (12) days prior written notice to Customer in the event any statement or portion thereof is not paid within thirty (30) days of the due date.

(3) Payments shall be made in U.S. dollars or, at Company's discretion, by the electronic transfer of funds to a specified bank account.

E. Termination of Service.

(1) Statements for service become delinquent if not paid within ten (10) days of the Bill Issue Date. If the statement for service is delinquent, Company may discontinue service or take whatever actions are available to Company to recover the amount owed.

F. Liability of Parties. Company and Customer each assume full responsibility and liability for the maintenance and operation of their respective properties and shall indemnify and save harmless the other from all liability and expense on account of any and all damages, claims or actions, including injury to and death of persons, arising from any act or accident in connection with the installation, presence, maintenance and operation of the property and equipment of the indemnifying party. Company shall not be liable to Customer for its failure to deliver gas, and Customer shall not be liable to Company for its failure to receive gas, when such failure on the part of either shall be due to accident to or breakage of pipelines, machinery or equipment, fires, floods, storms or storm warnings, strikes, war or riots, legal interferences, acts of God or public enemy, shutdowns for emergency repairs and maintenance, failure or curtailment of gas supply or, without limitation by enumeration, any other cause beyond the reasonable control of the party failing to deliver or receive gas, as the case may be, provided such party shall promptly and diligently take such action as may be necessary and practicable under the then-existing circumstances to remove the cause of failure and resume the delivery or receipt of gas, as the case may be. However, if Customer fails to receive gas, Customer shall nonetheless be charged the minimum bill as provided for and defined in the approved rate schedule under which Customer is served. Neither Company or Customer shall be relieved of liability to the other for any damage or expense caused or contributed to by its own negligence when such negligence on its part shall be the proximate cause of its failure to deliver or receive gas, as the case may be. In the event of strike or labor trouble, the obligation to take such action as may be necessary and practicable shall not be interpreted to require the making of any concession or conceding any demands. Company shall not be liable for defects in Customer's piping or appliances.

G. Regulation. The provisions of this Agreement and the sale by Company to Customer are subject to all valid legislation with respect to the subject matter hereof, and to all valid present and future orders, rules and regulations of duly constituted authorities having jurisdiction. Company shall have the right to make and file with any and all regulatory bodies exercising jurisdiction in the subject matter hereof, now or in the future, changes in rates and new rates, and any agreed upon amendments to this Agreement.

H. Delivery. Gas delivered by Company shall be delivered to Customer at the point of connection between the distribution pipeline of Company and that of Customer on the outlet side of the measuring station of Company. All risk of loss, damage or injury shall pass to Customer upon delivery.

I. Information. Customer, upon written request, shall furnish Company such reasonable data as, in Company's judgment, is necessary for the proper analysis of the gas load requirements of Customer.

J. Taxes. When any town, city, county or state imposes a franchise, occupation, business, sales, license, excise, privilege or similar tax of any kind on Company, the amount thereof shall be surcharged on a proportionate basis to Customer and all other customers receiving gas service within such city, town, county or state. Such charges shall, in all cases, be in addition to the regular charges for service specified in Company's approved rate schedules.

K. Imbalance/Variance Resolution Procedure. The parties acknowledge and agree that nominated volumes and actual consumption must balance on a daily and/or monthly basis, as required by the interstate pipeline as those requirements may be changed from time to time. If there are any daily and/or monthly variances between the amount of gas Customer delivered to Company at the Receipt Point and the amount taken by Customer at the Delivery Point, the variances will be resolved in accordance with the applicable pipeline tariff as it may be amended from time to time. In the event the applicable interstate pipeline variance/imbalance resolution methodology and/or charges to its shippers are revised, modified, or superseded so that the methodology and/or charges to said interstate pipeline shippers or any tolerance level is changed, then the methodology and/or cash-out will be revised by Company accordingly.

L. Penalties. If Customer fails to perform any of its obligations or duties under this Agreement, Company will impose and Customer will pay Company the applicable pipeline tariffed penalties as they may change from time to time.

RE: Notice of Natural Gas Usage Level and Rate Evaluation Decision

Dear City Administrator Ourada:

As a representative of Black Hills Nebraska Gas, LLC d/b/a Black Hills Energy (“Black Hills Energy”), I recently wrote to inform you of our evaluation of service provided to all customers in the state. Black Hills Energy’s natural gas service rate and customer consumption audit included High Volume Customers who transport more than five hundred (500) Therms per day as determined by average daily consumption. That process is now complete.

Natural gas service to Crete Power Plant qualifies for the Small Volume Interruptible customer rate, which is based on your usage under the requirements of the State Natural Gas Regulation Act, and the tariffs of Black Hills Energy. The SVI rate is currently \$1.35/MMBtu with a monthly charge of \$110.00.

Analysis of your natural gas usage over the last five years showed annual average usage of 976 MMBtu. Accordingly, your usage for natural gas under the SVI rate, we estimate your average annual bill at \$3,442.20. Crete Power Plant’s current rate has remained unchanged since 2013.

Black Hills Energy wanted to ensure you were notified prior to changes going into effect on September 1, 2021.

Please let me know if you have questions about this rate class review or would like to learn about ways to manage your energy usage. Black Hills Energy is honored to serve Crete. On behalf of our team, thank you for allowing us to be part of your ongoing success story.

Sincerely,

Mary Martin
