RE: Deregulation Waiver Application – OAC 210:35-29-2 (Five-Day Instructional Requirement)

Dear Members of the State Board of Education,

On behalf of Bixby Public Schools and the Bixby Alternative Center, I am writing to respectfully request a deregulation waiver of **OAC 210:35-29-2**, which requires **five days per week of instruction for all students** in alternative education programs.

Bixby Alternative Center serves students who benefit from flexible and personalized instructional approaches that address both academic and behavioral challenges. Our request for this waiver is rooted in the need to implement a modified instructional schedule that better supports the unique needs of our student population. Specifically, we seek to operate on a reduced on-site schedule for certain students, while maintaining rigorous instruction, support services, and compliance with graduation requirements through a blend of in-person, virtual, and competency-based learning.

Granting this waiver will allow us to prioritize student mental health, increase engagement, and provide targeted interventions—while ensuring we meet all accountability and instructional standards required by the state.

We greatly appreciate your consideration of this request and your ongoing support of innovative practices that serve Oklahoma's diverse learners.

Sincerely,
Lydia Wilson
Superintendent
Bixby Public Schools

 - When advised by the AED, initiate/resume CPR starting with compressions.
 - Continue to perform CPR until otherwise prompted by the AED or EMS personnel.
6. PRINCIPAL: Actions to take when the EMS arrives.
 - Responders working on the victim should document and communicate important information to the EMS provider, such as:
 - Victim's name
 - Known medical problems, allergies or medical history
 - Time the victim was found, condition and vital signs if obtained
 - Type and time of intervention(s) provided, to include the number of shocks delivered and length of time the defibrillator was used
 - Patient response to intervention(s) and information from the AED screen

Post-incident Procedure

1. An employee involved should notify the building administrator or School Nurse Coordinator as soon as possible.
2. A designated employee should check the AED, restock the supplies immediately after the event and perform the after-patient-use maintenance on the AED.
3. The School Nurse Coordinator or a designated employee should conduct an employee incident debriefing and document as indicated by school policy.

Periodic Maintenance- scheduled and after use

1. Inspect the exterior and connector for dirt or contamination.
2. Check supplies, accessories and spares for expiration dates and damage.
3. Check operation of the AED by removing and reinstalling the battery and running a battery insertion test.

School Crisis Response Plan

A crisis that affects the school and involves students, staff, or others that are an integral part of the school population demands immediate notification of the principal, the Administrative Team Leader, and Crisis Team Leader. These individuals will work closely together to make a very difficult situation as manageable as possible. All media inquiries will go through the Superintendent's office. According to the situation, the Crisis Team Leader will notify the Crisis Team to report to the crisis site or stand by. The Crisis Response Team is divided into two groups to report, dependent upon the situation.

>Level 1: Administrative Team Leader (District Administrator), Response Team Coordinator (Casey Machado), appropriate building principals and building counselors.

>Level 2: The above plus remaining members of the Crisis Response Team.

Crises that qualify as critical and immediate and which require the Crisis Response Plan include (but are not limited to) the following:

1. Death of student or staff
2. Critical injury of student or staff
3. Incidents occurring at school, such as:
 - a. student/staff with gun appears on premises, threatening or enacting bodily harm
 - b. bomb threat requiring evacuation of school
 - c. bomb found on premises by police
 - d. gang activity that disrupts daily operation of school
 - e. intruder threatening bodily harm on premises
 - f. act of nature (tornado, high winds, flood, etc.)
 - g. fire
4. Situations as identified by district administrators.

6. When teachers talk to their classes, they must remain very sensitive to the issue at hand, the confidentiality of the family involved, remember the appropriate grieving/crisis response of this particular age of student, and focus on the feelings of all involved, stressing how we must treat each other and support one another. Answer students’ questions honestly and concisely, giving no more information than they are asking and insuring the appropriateness of what is said.

Bixby Athletics Emergency Action Plan

EAP

One of the first lines of defense for catastrophic injuries is a comprehensive, detailed plan for most scenarios. This is commonly referred to as an Emergency Action Plan (EAP).

The EAP provides information to ensure response to an emergency is rapid, appropriate, controlled and precise. All personnel involved with the organization of athletic activities share a professional and legal responsibility to ensure that guidelines are in place to manage any emergency that could arise.

While being comprehensive, an EAP also needs to be flexible enough to be applicable to any emergency. While health care providers are usually responsible for the writing of this document, all those involved with athletic teams (athletic directors, team physicians, athletic trainers, coaches, strength and conditioning coaches, local EMS services) need to be aware and knowledgeable with its contents.

Purpose

As Bixby employees, we must be prepared to cope with direct and indirect physical effects of any disaster or emergency which occurs within our district. Athletic trainers, coaches and game managers have a unique opportunity to respond to emergencies in a planned and scripted manner that minimizes potential injury or death to students, athletes and spectators.

It is imperative for coaches and game managers to understand they have a responsibility and the authority to act on situations in the absence of a healthcare provider or administrator. The emergency action plans in this guide are site-specific and follow step-by-step procedures.

Coaches and game managers should be familiar with these procedures and keep this document in the facility office, field, gym, or practice facility for easy and quick accessibility in case of an emergency.

Assumptions

All coaches, game managers, spectators and student-athletes are vulnerable to emergencies and disasters. Preparedness is the key to limiting the negative impact of any disasters.

Goals

To outline a predetermined plan of action that can be used to respond to emergencies or disasters. To increase the security and safety of coaches, game managers, spectators and student-athletes. To minimize damage or loss. To return to a normal functioning level as soon as possible by diminishing chaos and confusion.

The emergency action plan (EAP) addresses immediate need for medical assistance in the occurrence of traumatic injury or illness. The EAP assigns specific duties for effective evaluation, transport and follow-up of the situation, and must address situations that may occur at any time throughout the year.

This plan may be used for any sport, for any site where the team practices and/or competes. It must be available at any time. It should also include additional information specific to a unique site.

Should an injury occur which requires medical assistance; the following are critical items that will need to be addressed by an athletic trainer (AT), coach, designated first aid responder and/or administrator.

Notification of parent/guardian.

Coaches must have a copy of a student physical and emergency authorization on hand for quick access. This can be accessed through RankOne.

The student's parent/guardian or a coach must accompany an injured athlete to the hospital. In case of a catastrophic injury, no information should be given to any party other than EMS.

Heat Illness Protocol

The below protocols/policies are set forth by the Oklahoma Secondary Schools Activities Association. Effective July 1, 2013.

XLVIII. EXTREME HEAT

The OSSAA recognizes that heat related illness is the leading cause of preventable death in high school students participating in activities. The OSSAA Board adopted the following policies:

Acclimatization Period: Whenever students are participating in an environment, in which the temperature cannot be controlled there should be an acclimatization period. The acclimatization period is defined as the **first 14 days** of participation beginning with the first date of practice in that sport or activity, or the first date a participant begins practice, whichever is later. Any speed, strength, or conditioning programs shall not be considered a part of the acclimatization period. All students participating in athletics or activities, including those who arrive to preseason practice after the first day of practice, are required to follow the guidelines of the first days of the acclimatization period.

All athletic coaches and marching band directors are required to view *A Guide to Heat Acclimatization and Heat Illness Prevention* at the [NFHS](#) website annually. A certificate of completion shall be kept on file for each coach or marching band director at the member school.

Guidelines for outdoor activities:

Athletic coaches or marching band directors should use a smart-phone app or other mechanism or program to get heat index, such as the Perry weather app. There are also programs available on the internet, such as AccuWeather, or Weather.com. These programs are free and can be used on any smart-phone, tablet, or computer. A chart outlining recommendations for making concessions for extreme heat is available on the OSSAA website. Schools must develop their own form to record the heat index each practice session.

- All practices should be held under the supervision of a coach, director, or sponsor employed by the school.
- Practices should always be conducted with an open water policy.
- Each program should have a heat related emergency plan on hand at all times.
- Preseason practice should be avoided if possible between the hours of 12:00 p.m. and 6:00 p.m.

- Parents and students should be educated on the importance of hydration during extreme heat conditions.
- Cooling stations should be made available when possible
 - buckets of cool water
 - wet towels
 - sponges
- Equipment should be removed or limited for conditioning, as needed.

Exertional Heat Illness Protocol

Activity in hot or humid environments can easily cause a number of heat related illnesses. Heat illness can occur in anyone at any time. The signs and symptoms listed below usually do not occur in a stepwise manner and can change rapidly depending on the person, situation, and activity. All signs and symptoms should be treated as serious and help sought out immediately.

Heat Exhaustion

Heat exhaustion is the most common heat-related condition observed in active populations. It is defined as the inability to continue exercise in the heat due to cardiovascular insufficiency (not enough blood pumped to the heart) and energy depletion that may or may not be associated with physical collapse. Cardiovascular insufficiency refers to when the heart has difficulty providing enough oxygenated blood to all the working organs and muscles and is exacerbated by dehydration via extreme sweating without replacing fluids during exercise.

It is important to note that heat illnesses are not on a continuum and that one condition does not lead to another condition, although having heat exhaustion one day can predispose an individual to heat illness the next day.

How do you prevent heat exhaustion?

Individuals should adapt to exercise in the heat gradually — acclimatize — over 10-14 days by progressively increasing duration and intensity of work in hot conditions. Athletes should recognize heat exhaustion and exertional heat stroke signs and symptoms to indicate the need to slow, modify, or stop activity before a medical emergency arises.

Being adequately hydrated before and during exercise can help prevent heat illnesses including heat exhaustion. Maintaining blood volume is key in the prevention of heat exhaustion.

Appropriate work to rest ratio based on environmental conditions is necessary in the prevention of heat illnesses. Increasing rest break durations as ambient temperature increases is warranted.

What puts an individual at risk for heat exhaustion?

- Exercising in a hot and humid environment (air temp > 91.4°F).
- Inadequate fluid intake before or during exercise resulting in dehydration.
- Inappropriate work to rest ratios with too much work compared to rest breaks.
- Body mass index > 195 lb/ft.

Look for these symptoms in athletes when heat exhaustion is suspected:

- Fatigue
- Nausea
- Fainting
- Weakness
- Vomiting
- Dizziness / Light-headedness
- Pale
- Chills
- Diarrhea
- Heavy Sweating
- Decreased Urine Output / Dehydration
- Irritability
- Headache
- Sodium Loss
- Decreased Blood Pressure
- Decreased Muscle Coordination
- Hyperventilation
- Sign-Core body temperature between 36-40.5°C (96.8- 105°)

How do you treat an individual with heat exhaustion?

Individuals experiencing heat exhaustion should respond quickly to treatment. If not, exertional heat stroke should be suspected.

To treat heat exhaustion:

- Move the individual to a cool/shaded area and remove excess clothing
- Elevate legs to promote venous return
- Cool the individual with fans, rotating ice towels, or ice bags
- Provide oral fluids for rehydration

When can the individual return to activity?

Returning to activity the same day of an episode is *not* prudent or advised. Individuals should wait at least 24-48 hrs. Before returning to activity, athletes should gradually increase

intensity, volume of exercise, clothing, and equipment. Medical clearance is recommended to rule out other conditions.

Heat Cramps

The mechanism of heat cramps is unknown but they can be caused by dehydration or lack of adequate electrolytes in the diet. Although muscle cramping is not a cause of sudden death, it can be confused with a more serious condition, exertional sickling (cramps with no palpable muscle contraction).

Heat cramps are painful involuntary cramping often in the legs, arms, or abdomen with muscle contraction that can easily be felt. Heat cramps usually occur in the preseason-conditioning phase when the body is not properly conditioned and more subject to fatigue. Heat cramps can easily be treated with rest, stretching the muscle, and rehydration of fluid and electrolytes.

How do you prevent heat cramps?

It may be impossible to completely prevent a cramp from occurring; however, certain factors can be modified in order to reduce the incidence of future heat cramps.

The most effective ways to prevent heat cramping in athletes include:

Acclimatizing the athlete to warm/hot environments if their sports require exercise in hot environmental conditions can help prevent heat cramps. Athletes should acclimatize to exercise by gradually progressing intensity and duration before requiring them to perform all out in an event or extensive workout session.

Educate athletes to replace fluids and salt lost in their sweat. Each athlete slightly differs in the amount of sweat and salt lost during exercise. Also, keep in mind that these factors change depending on the temperature and humidity of the ambient environments.

Maintain a balanced electrolyte level by consuming electrolyte rich drinks before and during the athletic event or practice session if physical activity lasts longer than one hour in duration. Certain individuals naturally expel more sodium in their sweat compared to others. These people may need supplemental/extra sodium in their diet. [Learn how to calculate your sweat rate here.](#) Ksi.uconn.edu Korey Stringer Institute for heat illness.

Removing excess clothing/equipment during physical activity may help reduce the chance of getting heat cramps by allowing for greater evaporation thus keeping core body temperature lower during exercise. For example, if a football player is performing conditioning drills during

which protective equipment is unnecessary, the athlete should remove the equipment during this portion of the conditioning session.

What puts an individual at risk for heat cramps?

- Exercising in heat when the individual is not acclimatized to the hot conditions.
- Profuse sweating or body water loss during exercise. These athletes lose a considerable amount of electrolytes through their sweat, which predisposes them to heat cramping.
- Exercising for an extended duration of time or participating in multiple practice sessions per day without replenishing the salts and water lost during sweating.
- Muscular fatigue.
- Wearing additional layers of clothing, protective gear, or equipment.

Look for these signs and symptoms in athletes when heat cramps are suspected:

- Dehydration, thirst, sweating, transient (short-term) muscle cramps, and fatigue.
- Painful, involuntary muscle spasms (usually occurring in the legs) associated with exercise in the heat when athletes have been sweating profusely.
- A precursor to the initial onset of cramps involves muscle twitches or fasciculations. If this occurs, remove the athlete from the heat and encourage rehydration with an electrolyte beverage.

How do you treat the individual?

- Remove the athlete from the exercise session, workout, or practice and have them rest in the shade or an air conditioned room.
- Stretch, massage, and knead the muscle that is cramping in its full-length position (joints should be extended).
- Provide the athlete with cold fluids such as water or an electrolyte sports drink to replace sweat losses.
- Provide food high in salt content to replenish the electrolytes lost from sweat. If this is not available consider providing a solution of 1/2 teaspoon salt dissolved in 16-20 ounces of water prior to or post cramping.

How do you know if these are heat cramps?

Heat cramping is often confused with exertional sickling, but may be differentiated by the following ways.

Symptoms/Factors	Heat Cramps	Exertional Sickling
Pain Factor	More excruciating pain; can be pinpointed to a location	Pain is strong; however, is more generalized over body
State of Muscles	Muscles “lock-up”; Visibly contracted and rock hard	Muscles are weak; athletes slump, push through instances of collapse
Physical Symptoms	Athletes may writhe or yell in pain	Sickling athletes lie fairly still without yelling
Presence of muscle twinges	Yes	None
Occurrence during workout/session	Occurs during or after intense workouts (after 30 minutes)	Generally occurs within first half hour during intense workouts
Body temperatures	Athlete's core temperature is elevated	Athletes core temperature is not greatly elevated

When can the individual return to activity?

Once an athlete has rested and replenished the fluids and electrolytes lost from their sweat, they can usually return to play during that same exercise session or practice

Heat Exhaustion

Stop all activity, move to a cool location, elevate legs above the level of the head. Monitor vital signs, activate EMS (if not conscious), contact parents, begin to rehydrate (if conscious).

Hyponatremia

Assess/differentiate between hyponatremia and heat stroke. Activate EMS immediately if hyponatremia is suspected; do not administer fluids until a physician is consulted.

Heat Stroke

While exertional heat illnesses (EHI) are not always a life-threatening condition, exertional heat stroke (EHS) can lead to fatality if not recognized and treated properly. While not all EHS cases are preventable, schools and institutions should have the equipment and supplies ready and available to properly assess and treat an EHS case. A full EAP on exertional heat stroke is outlined in the next section.

How to reduce the risk of exertional heat stroke.

- Make sure your emergency action plan (EAP) is consistent with the most recent guidelines for preseason heat.

- Acclimatize individuals over a 10-14 day period.
- Educate other medical staff, athletes, coaches, emergency personnel, and parents about exertional heat illnesses and proper hydration.
- Ensure proper body cooling methods are available, including a cold-water immersion tub, ice towels, and access to water and ice.
- Encourage hydrating throughout the day and at practice and ensure hydration through comparing their urine to color charts.
- Establish hydration policies: encourage drinking both water and fluids containing sodium.
- As athletes acclimatize they will sweat more and therefore need to replace a greater amount of fluids during the course of the workout.
- Wear loose-fitting, light colored, and moisture wicking clothing.
- During hot or humid conditions minimize the amount of equipment and clothing worn.
- Sleep at least 8 hours and eat a well-balanced diet.
- Minimize warm-up time and practice in the shade when feasible.
- Practice and perform conditioning drills at appropriate times during the day. Try to avoid the hottest part of the day (10am–5pm).
- Work with coaches and administration to follow acclimatization guidelines.
- Slowly progress the amount of time and intensity of conditioning and practices throughout the season.

What puts an individual at risk for heat stroke?

Exercise extra caution if an athlete has any of these intrinsic factors or you are concerned regarding any of the extrinsic factors.

Intrinsic Factors

- | | |
|-----------------------------------|--------------------|
| ● History of EHI | ● Lack of sleep |
| ● Inadequate heat acclimatization | ● Fever |
| ● Low fitness level | ● Stomach illness |
| ● Overweight or obese | ● Highly motivated |
| ● Inadequate hydration | ● Pre-pubescent |

Extrinsic Factors

- Intense or prolonged exercise with minimal breaks
- High temperature/humidity/sun exposure/high wet bulb globe temperature (WBGT)

- Exposure to similar conditions the previous day
- Inappropriate work/rest ratios based on intensity
- Clothing/equipment/fitness level
- Lack of education and awareness of heat illness among coaches, athletes, and medical staff
- Limited access to fluids or breaks during practice
- Delay in recognition of signs and symptoms associated with EHS

Look for these symptoms in athletes when exertional heat stroke is suspected:

- | | |
|------------------------------------------------------------|----------------------------------------------------|
| ● Rectal temperature greater than 102°F (39°C). | ● Collapse, staggering or sluggish feeling |
| ● Irrational behavior, irritability, emotional instability | ● Profuse sweating |
| ● Altered consciousness, coma | ● Decreasing performance or weakness |
| ● Disorientation or dizziness | ● Dehydration, dry mouth, thirst |
| ● Headache | ● Rapid pulse, low blood pressure, quick breathing |

Other outside factors may include:

- | | |
|---------------------------------------------------------------------|--------------------------------------------------------------------------|
| ● Nausea or vomiting | ● They are out of shape or obese |
| ● Diarrhea | ● It is a hot and humid day |
| ● Muscle cramps, loss of muscle function/balance, inability to walk | ● Practice is near the start of the season, and near the end of practice |
| | ● First day in full pads/equipment |

Exertional Heat Stroke Treatment: Follow these steps to initiate emergency treatment

- Remove all equipment and excess clothing. Cool the athlete as quickly as possible via whole body ice water immersion. Every second matters for the safety of the athletes. It is vital to get an accurate core temperature.
- Place the athlete in an ice bath with water approximately 35–59°F; stir water and add ice throughout the cooling process. Make sure the athlete is supported to keep their head above water, as they may lose consciousness.
 - If immersion is not possible (no tub or no water supply), take athletes to a shaded, cool area and use rotating cold, wet towels to cover as much of the body surface as possible.
 - Remove patient when core body temperature reaches 102°F
- After cooling has been initiated, activate the emergency medical system by calling 911.

- Monitor vital signs such as rectal temperature, heart rate, respiratory rate, blood pressure and CNS status.

HEAT CONDITION CATEGORY CHART

RISK	TEMP	RISK MITIGATION	HEAT INJURY SIGNS AND SYMPTOMS
White Flag MINIMAL	< 82 WBGT	Time to exercise! Drink water/sports before/after exercise	Recognize early symptoms and take appropriate action to prevent serious heat disorders in yourself and others.
Green Flag LOW	82-84.9 WBGT	Drink at least 1 qt of water/ sports drink every 20 min	Recognize early symptoms and take appropriate action to prevent serious heat disorders in yourself and others.
Yellow Flag MEDIUM	85-87.9 WBGT	Take rest breaks during exercise and keep drinking fluids	HEAT CRAMPS LIKELY: Painful contraction of muscles, weakness
Red Flag HIGH	88-89.9 WBGT	Consider reducing workout intensity	HEAT EXHAUSTION LIKELY: Dizziness, nausea, vomiting, headache, fainting, disorientation, weakness
Black Flag EXTREMELY HIGH	> 90 WBGT	Extreme Caution! Exercise indoors in a cooler setting	HEAT STROKE HIGHLY LIKELY: Extremely high body temp, confusion, convulsions, unconsciousness, death

CAUTION: If you experience a heat related injury, call 911 immediately! Move to a shaded area and treat for shock (lie down, cool body with cold compresses, elevate feet)

Exertional Heat Stroke Emergency Action Plan

Initial response: once exertional heat stroke is suspected, prepare to cool the patient immediately and contact emergency medical services (EMS) once cooling has been initiated.

COOL FIRST, THEN TRANSPORT

- Determine vital signs before immersing the exertional heat-stroke patient
- Assess core body temperature with a rectal thermometer, which is a flexible thermometer that stays in place during cooling and allows for continuous monitoring of temperature during immersion.
- Check airway, breathing, pulse, and blood pressure.
- Assess the level of central nervous system dysfunction.
- Begin ice water immersion. Place the athlete in the ice water immersion tub. Medical staff or coaches may be needed to assist with a smooth and safe entry and exit.
 - Use a water temperature between 35-59°F.
 - Cover as much of the body as possible with ice water while cooling. If full coverage is not possible, cover the torso as much as possible.
 - Place an ice/wet towel over the head and neck while the body is being cooled in the tub.
 - To keep the athlete's head and neck above water, an assistant may hold the victim under the armpits with a towel or sheet wrapped across the chest and under the arms.
 - During cooling, water should be continuously circulated to enhance the water-to-skin temperature gradient which optimizes cooling.
- If cold-water immersion is not available, then cool via the best available means. An alternative is a cooler filled with ice, water, and towels. Place ice cold towels all over their body and leave on for 2-3 minutes, then repeat the process. Another alternative is cold water from a locker room shower or from a hose.
- Vital signs should be monitored and documented at regular intervals.
- It may be helpful for an assistant to stand nearby in case the athlete becomes combative. Other assistants may be needed to lift or roll the athlete if vomiting occurs.
- Continue cooling until the patient's rectal temperature lowers to 102°F.
- If rectal temperature cannot be measured and cold-water immersion is indicated, cool for 10-15 minutes and then transport to a medical facility.

Lightning Protocol

The following is the lightning protocol that the Bixby Athletic Department has adopted regarding when to cease and resume outdoor athletic competitions and practices. This protocol is based on the National Athletic Trainers' Association Position Statement: *Lightning Safety for Athletics and Recreation* and The National Federation of State High School Associations: *Guidelines on Handling Practices and Contests During Lightning or Thunder Disturbances*.

- The athletic trainer on site and game manager for competition and/or practice will assume the responsibility and make the final decision if the practice or competition will cease and when it will resume.
- At the beginning of each season the head coach will designate a chain of command as to who monitors threatening weather.
- The athletic trainer & designee will be aware of National Weather Service (NWS) issued thunderstorm watches and warnings as well as the signs of thunderstorms developing nearby. A watch means that conditions are favorable for severe weather to develop in an area; a warning means that severe weather has been reported in an area and for everyone to take the proper precautions.

The athletic trainer & designee will know where the closest safe shelter is to the field or playing area and know how long it takes to get to that safe shelter.

- A safe shelter is defined as (1): any building normally occupied or frequently used by people, i.e. A building with plumbing and or electrical wiring that acts to electrically ground the structure or (2): any vehicle with a hard metal roof (not convertible or golf cart) and rolled up windows. (3): Structures should be fully enclosed.
 - When people are in the safe shelter buildings, it is important that the showers and or plumbing are not used during the thunderstorm.
- When using a vehicle with a hard metal roof it is important that the sides of the vehicle are not touched as they dissipate the lightning around the vehicle.

In the event of severe weather when lightning conditions are probable, at least one of the following two indicators of lightning location will be used as the recognized method of determining dangerous lightning situations.

- **Perry Weather:** Perry Weather is a tracking software which will assist in determining lightning distance and when it is safe to return to the field of play. There is a weather monitoring station located on the roof of Small Whitey Ford Field House. This station will sound a brief siren when lightning is within the 10 mile radius. When it sounds all outdoor venues need to be cleared immediately. There is a weather *dashboard link* that will be sent out to coaches at the beginning of the year, which should be bookmarked. This should be used in conjunction with observation and audible thunder.

By this method all parties involved will be notified when lightning is recognized within 10 miles. Once lightning conditions are detected within 10 miles of the practice or event site, all activity will be suspended. All individuals should be moved to the designated safe areas. Return to practice or competition will not resume until 30 minutes following the last indication of lightning conditions within the 10-mile range. Any subsequent lightning or thunder after the beginning of the 30-minute count will reset the clock and another count should begin.

Other safety guidelines to keep in mind and communicate to others include: It must be remembered that the existence of blue sky and the absence of rain are not protection from lightning. Lightning can, and often does strike as far as 10 miles from the rain shaft. It does not have to be raining for lightning to strike.

CERTIFICATE OF EXCISE BOARD

State of Oklahoma, County of Tulsa

We, do further certify that we have examined the statement of estimated needs for the current fiscal year ending June 30, 2025, as certified by the Board of Education of Bixby Public Schools, District Number I-4 of said County and State, and its financial statement for the preceding year, and in so doing we have diligently performed the duties imposed upon this Excise Board by 68 O. S. 2001 Section 3007, by (1) ascertaining that the financial statements, as to the statistics therein contained, reflect the true fiscal condition at the close of the fiscal year, or caused the same to be corrected so to show; (2) struck from the estimate of needs so submitted any items not authorized by law and reduced to the sum authorized by law any items restricted by statute as to the amount lawfully expendable therefor; (3) supplemented such estimate, after appropriate action, by an estimate of needs prepared by this Excise Board to make provision for mandatory functions based upon statistics authoritatively submitted; (4) computed the total means available to each fund in the manner provided, applying the Governing Board's estimate of revenue to be derived from surplus tax of the immediately preceding year and from sources other than ad valorem tax, or reduced such estimate to not less than the lawfully authorized ratio of the several sums realized from such sources during the preceding fiscal year or to such lesser sum as may reasonably be anticipated under altered law or circumstance and using for such determination the basic collections of the preceding year and the ratios on which distribution or apportionment must be made during the ensuing or current year.

To the several and specific purposes of the estimated needs as certified, we have and do hereby appropriate the surplus balances of cash on hand of the prior year, estimates of income from sources other than ad valorem taxation within the limitation fixed by law, and the proceeds of ad valorem tax levy within the number of mills authorized, either by apportionment by the Legislature, allocation by the excise board or by legal election, all of which appropriations are made in so far as the available surpluses, revenues, and levies will permit, except in that we have also provided that, after deducting items consisting of cash and the revenue from all sources other than the 2025 tax and the proceeds of the 2025 tax levy are in excess of the residue of such appropriations, by a sum included for delinquent tax, computed at 10.0% of such residue. And provided further, if said School District has been ascertained to be a well defined State Aid District, the local budget, as approved and appropriated for, has been applied wholly to its operating accounts.

We further certify that the amount required to be raised from tax, excluding Homesteads, for General Revenue Fund purposes as approved, requires a total ad valorem tax levy of 35.000 Mills. Said levy is within the statutory limit, and if in excess, is within the constitutional limit and has been authorized by a vote of the people of said district, as shown by certificate of the School Board to-wit:

To this District, with valuations shown below, the Excise Board allocated 5.000 Mills, plus 15.000 Mills authorized by the Constitution, plus an emergency levy of 5.000 Mills; plus local support levy of 10.000 Mills; for a total levy for the General Fund of 35.000 Mills.

We further certify that the amount required to be raised for building fund purposes as approved requires a tax levy of 5.000 Mills, and said levy has been certified as authorized by a vote of the people at an election held for that purpose. We further certify that Assessed Values used in computing Mill-vote levies have been applied as certified by the County Assessor.

Re: Adult Breakfast and Lunch Price Increases

The State Department sent out the rates for the amount the district is supposed to charge for breakfast and lunch and Bixby Child Nutrition will have to increase the rate that is charged for both meals. For Breakfast the rate is \$2.46 and the district charges \$2.40, so the increase will have to be \$2.55. For Lunch the rate is \$5.14, and the district charges \$5.00, so the increase will be \$5.50. The Bixby Child Nutrition Department does not set the rates the USDA does. The adult prices have to be more than the student prices and must meet the weighted average that the USDA sets.

LOCAL SUMMER INSTITUTES 2025

[ADVANCINGLITERACY.TC.COLUMBIA.EDU](https://advancingliteracy.tc.columbia.edu)

2025 Local Summer Institutes

Teachers College Advancing Literacy is pleased to design site-based summer institutes with our partner schools and districts. All of our institutes are research-based and will focus on pedagogies as well as content, with the mission of advancing literacy for students through responsive and inclusive teaching.

Local Summer Institutes are presented by Advancing Literacy Staff Developers and may be virtual or in-person, and may range from 2-5 days depending on the topic. Institutes may span any group size and may address more than one topic, depending on the availability of instructors and your needs. You may choose a topic from those listed below, or consult with us about topics most relevant to your community.

To schedule a Local Summer Institute, [please fill out this form](#) or write to [Emily Smith \(EmilyBSmith@tc.columbia.edu\)](mailto:EmilyBSmith@tc.columbia.edu).

Below are some of our most frequently requested topics:

Foundational Reading: An Intensive Study of Phonemic Awareness, Phonics, Fluency, Vocabulary, and Comprehension (Grades K-3)

or

Foundational Reading for Older Students (Grades 3-6)

This institute will help teachers further their understanding of reading research on foundational reading skills and their implications for classroom instruction. Teachers will then harvest this research while studying and practicing together in a collegial community. In addition, teachers will engage with all of the most important reading competencies and plan structures and instruction that draws upon science of learning research, including culturally sustaining pedagogies, to ensure all readers thrive.

Strategic Use of Decodable Texts and Small Groups Help Students Draw on Phonemic Awareness and Phonics to Support Comprehension (Grades K-3)

This institute focuses on methods that support beginning readers who are developing their phonics knowledge, learning to decode, and building more fluency. Participants will delve into the research for learning phonics in and out of context and the best places for young readers to practice and transfer their learning. The institute will explore when and why to use decodable books as well as how to choose decodable texts to maximize benefits for all readers. Participants will plan and practice ways to use decodable books with a variety of purposes: to solidify and practice using phonics knowledge, to build fluency, and then to work on comprehension. Methods of coaching readers to ensure readers are decoding and comprehending will also be addressed.

Knowledge Building to Strengthen and Deepen Comprehension (Grades K-8)

This institute will help teachers further their understanding of research on the connections between knowledge building and reading comprehension. Participants will study the implications these findings have for classroom instruction. Participants will study key research on background knowledge, vocabulary development and explicit instruction and will put this knowledge to use through first-hand experiences using and building text sets. Together we will study the ways that replicable instructional strategies can be utilized for read aloud and close reading. In addition, participants will consider the role of student discourse, writing, and joy - in building knowledge and content, and in how they come together to foster a community of learners.

Teaching Writing: A Deep Dive of Inclusive and Responsive Pedagogies, Structures, and Practices (Grades K-12)

The research on teaching writing and writing process is clear and defined. This institute will enable teachers to recharge their writing communities, focusing on making writing instruction vibrant, accessible, and transformative. Teachers will practice delivering explicit, direct instruction of writing on a wide range of topics – from spelling and vocabulary to literary devices. Furthermore, teachers will develop their skills as mentor writers, explore assessment and responsive feedback, and hone their study of mentor texts as an instrumental teaching resource.

Small Group Work in Reading or Writing (Grades K-8)

The Small Group Work institute is for communities who have engaged in the essentials of whole class instruction in teaching reading or writing, and who now want to focus on responsive small group work and conferring. Staff developers will guide participants through a study of predictable content to support a range of learners. Participants will have the opportunity to explore pedagogy, relevant educational research, and assessment tools that ensure instructional practices are affirming and lead toward student agency. By the end of this institute, participants will have the skills and tools to prepare materials that support foundational skills, and will be able to effectively prepare for a wide range of students' instructional needs.

Phonemic Awareness, Phonics, and Fluency for Upper Grade Readers (Grades 3-6)

Many upper grade readers benefit from ongoing instruction to support phonemic awareness, phonics, and fluency and yet many upper grade teachers may not anticipate or know precisely how to provide this support. This institute is aimed at providing upper grade teachers with the research and content knowledge to support the full range of reading needs students present. Part of the institute will address practical and strategic planning for a range of instructional needs so that teachers' time and students' practice is efficient and effective. This institute will include assessments of students' needs and materials that will be more impactful for upper grade students.

Close Reading, Writing about Reading, and Book Clubs (Grades 3-12)

This institute will focus on multiliteracies, reading for literary techniques, and reading response. By the end of this institute, participants will have a working knowledge of how these practices support learners in regular close reading, so that they see more in the texts they read, and are more alert to language, craft, and structure as a habit of mind. Further, participants will learn new practices of how to engage in book clubs and writing about reading, so they emerge with strategic demonstration texts to support their incoming students with this urgent work.

Supporting Multilingual Learners as Readers and/or Writers (Grades K-9)

This institute will ensure that your community is equipped with a comprehensive toolkit of strategies to support and celebrate multilingual learners. Participants will study research on oral language development and the importance of discourse as part of your literacy curriculum. Teachers will learn to bring this research to their planning of instruction with explicit language goals in mind. Furthermore, teachers will study multiple ways to support student learning, including collaborative structures, while also celebrating student and family identities and knowledge. This institute will also focus on supporting reading and/or writing development with the aim of designing purposeful and meaningful ways of leveraging reading and writing for multilingual learners.

Local Curriculum Writing (Grades K-8/12)

Many districts are eager to support more localized curriculum development to address particular needs and interests of their students and/or to support local or state initiatives and expectations. TC Advancing Literacy Staff Developers can join together with your lead teachers, instructional coaches, and school/district leaders to work in single- or multi-day sessions devoted to curriculum development. Together, the team will design research-based curriculum projects tailored to your unique school community.

LEADERSHIP CONFERENCE SERIES

The Leadership Conference Series provides district and school leaders, literacy coaches, lead teachers, and parent coordinators a time to come together to learn from and alongside the TC Advancing Literacy team – to think about ways we can respond to time-specific and job-specific challenges, and to offer a space for collaborative learning within and across school communities. There are two options for participating in Leadership Conferences: in-person or virtual.

The [in-person Leadership Conferences](#) will include conference days at Teachers College, featuring guest speakers and workshops led by the TC Advancing Literacy team. Each building principal is encouraged to bring a guest to the conferences – their assistant principal, building literacy coach, lead teacher, school librarian, or family coordinator, for instance. The conferences will provide building-wide literacy support, but will also target particular groups on various dates. During the 2024-2025 school year, we found that the opportunity to attend the conferences with colleagues enhanced learning and collaboration. Lunch is provided during the in-person conferences as a way to extend conversations and network with other district and school leaders.

The [virtual Leadership Conferences](#) will include an abbreviated version of the in-person conferences, featuring guest speakers and workshops led by TC Advancing Literacy leaders. This option includes a brief update meeting in September, followed by meetings across the year.

FOUNDATIONAL READING SKILLS ONLINE MODULES OFFERED BY TEACHERS COLLEGE ADVANCING LITERACY

In order to support educators' understanding of the Science of Reading and foundational reading skills, Teachers College Advancing Literacy will offer an online course, available in summer of 2025. This course will equip educators with the knowledge they need of oral language development, phonemic awareness, phonics, fluency, vocabulary, and comprehension (the "Big 6"). When educators understand these literacy needs, they can devise comprehensive, responsive instruction, and curricular adaptations, to move all students to reading proficiency.

The complete course will consist of 6 modules addressing the "Big 6" skills and competencies of effective reading and writing, as well as culturally sustaining and responsive pedagogy. Teachers who complete the course will understand

key and current reading research, the relationship between reading and writing, and the implications for classroom instruction. The course will consist of recorded self-paced modules as well as interactive elements with a cohort of participants and feedback from Advancing Literacy instructors.

Participants who complete all 6 modules will receive a certificate from Teachers College, Columbia University (as well as 35 CTLE credits for NYS educators).

**These modules are offered separate from professional development packages. Please visit [our website](#) for more information.*

Re: Instructional Calendar Days to Hours

Dear Ms. Davis,

Please accept this letter as our notification that our school calendar for the 2025-26 school year will be based on hours, not days. Our instructional calendar was discussed and approved on November 14, 2024, by the Bixby Board of Education. Enclosed is a copy of the board policy (3100) regarding the school calendar utilization of instructional days or 1086 hours of instruction. In addition to our school board-approved calendar, which is calculated using the option of 1086 hours, we have uploaded our worksheets by site disclosing the instructional hours. We are again requesting to use hours for the school year 2025-26.

Please notify me if you need any other information on this matter.

Sincerely,

Ms. Lydia Wilson
